Any designation of a Subsidiary of the Senior Notes Issuer as an Unrestricted Subsidiary will be evidenced to the Trustee by filing with the Trustee a copy of a resolution of the Board of Directors giving effect to such designation and an Officer's Certificate certifying that such designation complied with the preceding conditions and was permitted by the covenant described above under the caption "*—Restricted Payments*". If, at any time, any Unrestricted Subsidiary would fail to meet the preceding requirements as an Unrestricted Subsidiary, it will thereafter cease to be an Unrestricted Subsidiary for purposes of the Senior Notes Indenture and any Indebtedness of such Subsidiary will be deemed to be incurred as of such date and, if such Indebtedness is not permitted to be incurred as of such date under the covenant described above under the caption "*—Incurrence of Indebtedness and Issuance of Preferred Stock*", the Senior Notes Issuer will be in default of such covenant. The Board of Directors of the Senior Notes Issuer may at any time designate any Unrestricted Subsidiary to be a Restricted Subsidiary; *provided* that such designation will be deemed to be an incurrence of Indebtedness by a Restricted Subsidiary of any outstanding Indebtedness of such Unrestricted Subsidiary, and such designation will only be permitted if (1) such Indebtedness is permitted under the covenant described above under the caption "*—Incurrence of Indebtedness and Issuance of Preferred Stock*", calculated on a *pro forma* basis as if such designation had occurred at the beginning of the applicable reference period; and (2) no Default or Event of Default would be in existence following such designation.

Limitation on Issuances of Guarantees of Indebtedness

The Senior Notes Issuer will not cause or permit any of its Restricted Subsidiaries that is not a Guarantor, directly or indirectly, to guarantee any Public Debt of the Senior Notes Issuer or its Restricted Subsidiaries or any Credit Facilities (including the Revolving Credit Facility), unless such Restricted Subsidiary simultaneously executes and delivers a supplemental indenture providing for the guarantee of the payment of the Senior Notes by such Restricted Subsidiary, which guarantee will be senior to (or, if the other Indebtedness being guaranteed by such Restricted Subsidiary is Senior Debt, junior to) or *pari passu* with such Restricted Subsidiary's guarantee of such other Indebtedness and on the same terms as the other Guarantees of the Senior Notes by the Guarantors except that:

(1) if such Indebtedness is by its terms expressly subordinated to the Senior Notes or any Senior Note Guarantee, any such assumption, guarantee or other liability of such Restricted Subsidiary with respect to such Indebtedness shall be subordinated to such Restricted Subsidiary's Guarantee of the Senior Notes at least to the same extent as such Indebtedness is subordinated to the Senior Notes or any such Senior Note Guarantee;

(2) no Restricted Subsidiary of the Senior Notes Issuer shall be required to execute and deliver a supplemental indenture providing for the guarantee of the payment of the Senior Notes until the Senior Notes Escrow Release Date occurs; and

(3) no Senior Note Guarantee shall be required if such Senior Note Guarantee could reasonably be expected to give rise to or result in (A) personal liability for the officers, directors or shareholders of such Restricted Subsidiary, (B) any violation of applicable law that cannot be avoided or otherwise prevented through measures reasonably available to the Senior Notes Issuer or such Restricted Subsidiary, including, for the avoidance of doubt, "whitewash" or similar procedures or (C) any significant cost, expense, liability or obligation (including with respect of any Taxes) other than reasonable out-of-pocket expenses and other than reasonable expenses incurred in connection with any governmental or regulatory filings required as a result of, or any measures

pursuant to clause (B) undertaken in connection with, such Senior Note Guarantee, which cannot be avoided through measures reasonably available to the Senior Notes Issuer or the Restricted Subsidiary.

The first paragraph of this covenant will not be applicable to any guarantees of any Restricted Subsidiary:

(a) that existed at the time such Person became a Restricted Subsidiary if the guarantee was not incurred in connection with, or in contemplation of, such Person becoming a Restricted Subsidiary;

(b) arising solely due to the granting of a Permitted Lien that would not otherwise constitute a guarantee of Indebtedness of the Senior Notes Issuer or any Guarantor; or

(c) given to a bank or trust company incorporated in any member state of the European Union as of the date of the Senior Notes Indenture or any commercial banking institution that is a member of the U.S. Federal Reserve System (or any branch, Subsidiary or Affiliate thereof), in each case having combined capital and surplus and undivided profits of not less than € 500.0 million, whose debt has a rating, at the time such guarantee was given, of at least A or the equivalent thereof by S&P and at least A2 or the equivalent thereof by Moody's, in connection with the operation of cash management programs established for the Senior Notes Issuer's benefit or that of any Restricted Subsidiary.

Each such guarantee will be limited as necessary to recognize certain defenses generally available to guarantors (including those that relate to fraudulent conveyance or transfer, voidable preference, financial assistance, corporate purpose, capital maintenance or similar laws, regulations or defenses affecting the rights of creditors generally) or other considerations under applicable law.

The form of such guarantee shall be the same as the form of a Senior Note Guarantee.

Each guarantee of the Senior Notes shall be released in accordance with the provisions of the Senior Notes Indenture and the Intercreditor Agreement described under "*—Senior Note Guarantees*" and "*Description of Other Indebtedness—Intercreditor Agreement*".

Payments for Consent

The Senior Notes Issuer will not, and will not permit any of its Restricted Subsidiaries to, directly or indirectly, pay or cause to be paid any consideration to or for the benefit of any holder of Senior Notes for or as an inducement to any consent, waiver or amendment of any of the terms of the provisions of the Senior Notes Indenture or the Senior Notes unless such consideration is offered to be paid and is paid to all holders of the Senior Notes that consent, waive or agree to amend in the time frame set forth in the solicitation documents relating to such consent, waiver or agreement. Notwithstanding the foregoing, the Senior Notes Issuer and its Restricted Subsidiaries shall be permitted, in any offer or payment of consideration for, or as an inducement to, any consent, waiver or amendment of any of the terms or provisions of the Senior Notes Indenture, to exclude holders of Senior Notes in any jurisdiction where (i) the solicitation of such consent, waiver or amendment, including in connection with an offer to purchase for cash, or (ii) the payment of the consideration therefor would require the Senior Notes Issuer or any of its Restricted Subsidiaries to file a registration statement, prospectus or similar document under any applicable securities laws (including, but not limited to, the United States federal securities laws and the laws of the European Union or its member states), which the Senior Notes Issuer in its sole discretion determines (acting in good faith) (A) would be materially burdensome (it being understood that it would not be materially burdensome to file the consent document(s) used in other jurisdictions, any substantially similar documents or any summary thereof with the securities or financial services authorities in such jurisdiction); or (B) such solicitation would otherwise not be permitted under applicable law in such jurisdiction.

Impairment of Security Interest

The Senior Notes Issuer will not, and will not cause or permit any of its Restricted Subsidiaries to, take or knowingly or negligently omit to take, any action which action or omission would have the result of materially impairing the security interests with respect to the Senior Notes Collateral (it being understood that the incurrence of Liens on the Senior Notes Collateral permitted by the definition of Permitted Collateral Liens shall under no circumstances be deemed to materially impair the security interests with respect to the Senior Notes Collateral) for the benefit of the Trustee and the holders of the Senior Notes, and the Senior Notes Issuer will not, and will not cause or permit any of its Restricted Subsidiaries to, grant to any Person other than the Security Agent, for the benefit of the Trustee and the holders of the Senior Notes and the other beneficiaries described in the Security Documents and the Intercreditor Agreement any interest whatsoever in any of the Senior Notes Collateral; *provided* that (a) the Senior Notes Collateral may be discharged and released in accordance with the Senior Notes Indenture, the Security Documents, the Intercreditor Agreement or any Additional Intercreditor Agreement; (b) the Senior Notes Issuer and its Restricted Subsidiaries may incur Permitted Collateral Liens; (c) the Senior Notes Issuer and its Restricted Subsidiaries may undertake a Permitted Reorganization; (d) the applicable Security Documents may be amended, extended, renewed, restated, supplemented or otherwise modified, replaced, or released (followed by an immediate retaking of a Lien of at least equivalent ranking over the same assets); and (e) the Senior Notes Issuer and its Restricted Subsidiaries may amend the Security Documents in any manner that does not adversely affect the holders of the Senior Notes in any material respect; *provided, however*, that in the case if clause (a), (c) and (d) above, except with respect to any discharge or release in accordance with the Senior Notes Indenture, any Security Document, the Intercreditor Agreement or any Additional Intercreditor Agreement, or any action not prohibited by the applicable Security Document, the Senior Notes Indenture, the Intercreditor Agreement or any Additional Intercreditor Agreement, the Security Documents may not be amended, extended, renewed, restated, supplemented or otherwise modified, replaced, or released, unless contemporaneously with such amendment, extension, replacement, restatement, supplement, modification, renewal or release (followed by an immediate retaking of a Lien of at least equivalent ranking over the assets), the Senior Notes Issuer delivers to the Trustee either (1) a solvency opinion from an investment bank or accounting firm, in form and substance reasonably satisfactory to the Trustee confirming the solvency of the Senior Notes Issuer and its Subsidiaries, taken as a whole, after giving effect to any transactions related to such amendment, extension, renewal, supplement, modification, replacement or release, (2) a certificate from the board of directors or an Officer of the relevant Person amending, extending, renewing, restating, supplementing, modifying, replacing or releasing and retaking such Security Document which confirms the solvency of such Person after giving effect to any transactions related to such amendment, extension, renewal, restatement, supplement, modification or release and retaking and replacement, or (3) an Opinion of Counsel, in form and substance reasonably satisfactory to the Trustee (subject to customary exceptions and qualifications), confirming that, after giving effect to any transactions related to such amendment, extension, renewal, restatement, supplement, modification, replacement or release, the Lien or Liens securing the Senior Notes created under the Security Documents so amended, extended, renewed, restated, supplemented, modified or replaced are valid and perfected Liens not otherwise subject to any limitation, imperfection or new hardening period, in equity or at law, that such Lien or Liens were not otherwise subject to immediately prior to such amendment, extension, renewal, restatement, supplement, modification, replacement or release and retaking.

At the direction of the Senior Notes Issuer and without the consent of the holders of Senior Notes, the Security Agent may from time to time enter into one or more amendments to the Security Documents to: (i) cure any ambiguity, omission, defect or inconsistency therein, (ii) (but subject to compliance with the immediately preceding paragraph) provide for Permitted Collateral Liens, (iii) add to the Senior Notes Collateral, (iv) comply with the terms of the Intercreditor Agreement or any Additional Intercreditor Agreement, (v) evidence the succession of another Person to the Senior Notes Issuer or a Guarantor and the assumption by such successor of the obligations under the Senior Notes Indenture, the Senior Notes, the applicable Senior Note Guarantee and the Security Documents, in each case, in accordance with "*—Merger, Consolidation or Sale of Assets*," (vi) provide for the release of property and assets constituting Senior Notes Collateral from the Lien of the Security Documents or the release of the Senior Note Guarantee of a Guarantor, in each case, if not prohibited by the terms of the Senior Notes Indenture, (vii) conform the Security Documents to this "Description of the Notes," (viii) evidence and provide for the acceptance of the appointment of a successor Trustee or Security Agent, (ix) (but subject to compliance with the immediately preceding paragraph) to provide for Additional Senior Notes to also benefit from the Senior Notes Collateral or (x) (but subject to compliance with the immediately preceding paragraph) make any other change thereto that does not adversely affect the rights of the holders of the Senior Notes in any material respect.

In the event that the Senior Notes Issuer complies with this covenant, the Trustee and the Security Agent shall (subject to customary protections and indemnifications) consent to such amendment, extension, renewal, restatement, supplement, modification, replacement or release with no need for instructions from holders of the Senior Notes.

Additional Intercreditor Agreements

At the request of the Senior Notes Issuer and without the consent of holders of the Senior Notes, at the time of, or prior to, the incurrence by the Senior Notes Issuer or a Guarantor of Indebtedness permitted to share in the Senior Notes Collateral, the Senior Notes Issuer or the relevant Guarantor, the Trustee and the Security Agent shall enter into with the holders of such Indebtedness (or their duly authorized representatives) an additional intercreditor agreement (an "*Additional Intercreditor Agreement*") on substantially the same terms as the Intercreditor Agreement or an amendment to the Intercreditor Agreement (which amendment does not adversely affect the rights of the holders of the Senior Notes in any material respect, as determined in good faith by the Senior Notes Issuer), it being understood that, for the avoidance of doubt, an increase in the amount of Indebtedness being subject to the terms of the Intercreditor Agreement or Additional Intercreditor Agreement will be deemed to be on substantially similar terms to the Intercreditor Agreement and will be deemed not to adversely affect the rights of the holders of the Senior Notes and will be permitted by this covenant if, in each case, the incurrence of such Indebtedness (and any Lien in its favor) is permitted by the covenants described under the captions "*—Incurrence of Indebtedness and Issuance of Preferred Stock*" and "*—Liens*".

At the request of the Senior Notes Issuer, without the consent of holders of the Senior Notes, and at the time of, or prior to, the incurrence by the Senior Notes Issuer or a Guarantor of Indebtedness permitted to be incurred pursuant to the preceding paragraph, the Senior Notes Issuer or the relevant Guarantor, the Security Agent and the Trustee shall enter into one or more amendments to any Intercreditor Agreement or Additional Intercreditor Agreement to: (1) cure defects, resolve ambiguities or reflect changes, in each case, of a minor, technical or administrative nature, (2) increase the amount or types of Indebtedness covered by any Intercreditor Agreement or Additional Intercreditor Agreement that may be incurred by the Senior Notes Issuer or a Guarantor that is subject to any Intercreditor Agreement or Additional Intercreditor Agreement (*provided* that such amendment is consistent with the preceding paragraph), (3) add new Guarantors to the Intercreditor Agreement or an Additional Intercreditor Agreement, (4) further secure the Senior Notes, (5) make provision for the security securing Additional Senior Notes to rank *pari passu* with the Senior Notes Collateral, (6) implement any Permitted Collateral Liens, (7) amend the Intercreditor Agreement or any Additional Intercreditor Agreement in accordance with the terms thereof or (8) make any other change to any such Intercreditor Agreement or an Additional Intercreditor Agreement that does not adversely affect the rights of holders of the Senior Notes in any material respect.

The Senior Notes Issuer shall not otherwise direct the Trustee or the Security Agent to enter into any amendment to the Intercreditor Agreement or any Additional Intercreditor Agreement without the consent of the holders of the majority in aggregate principal amount of the Senior Notes then outstanding, except as otherwise permitted by "Amendment, Supplement and Waiver" or as described in the preceding paragraph and the Senior Notes Issuer may only direct the Trustee and the Security Agent to enter into any amendment to the extent such amendment does not impose any personal obligations on the Trustee or the Security Agent or adversely affect the rights, duties, liabilities or immunities of the Trustee or the Security Agent under the Senior Notes Indenture, the Intercreditor Agreement or such Additional Intercreditor Agreement.

In relation to the Intercreditor Agreement or, to the extent applicable, an Additional Intercreditor Agreement, the Trustee shall be deemed to have consented on behalf of the holders of the Senior Notes to any payment, repayment, purchase, repurchase, defeasance, acquisition, retirement or redemption of any obligations subordinated to the Senior Notes thereby; *provided* that such transaction would comply with the covenant described under "*—Restricted Payments*."

Each holder of the Senior Notes shall be deemed to have agreed to and accepted the terms and conditions of the Intercreditor Agreement or any Additional Intercreditor Agreement (whether then entered into or entered into in the future pursuant to the provisions described herein) and to have consented to and directed the Trustee and the Security Agent to enter into any Additional Intercreditor Agreement or any amendment of the Intercreditor Agreement or any Additional Intercreditor Agreement which complies with the foregoing provision and the conditions contained therein.

Suspension of Covenants When Senior Notes Rated Investment Grade

If on any date following the Senior Notes Issue Date:

(1) the Senior Notes have achieved Investment Grade Status; and

(2) no Default or Event of Default shall have occurred and be continuing on such date,

then, beginning on that day and continuing until such time, if any, at which the Senior Notes cease to have Investment Grade Status (such period, the "*Suspension Period*"), the covenants specifically listed under the following captions in this offering memorandum will no longer be applicable to the Senior Notes and any related default provisions of the Senior Notes Indenture will cease to be effective and will not be applicable to the Senior Notes Issuer and its Restricted Subsidiaries:

(1) "*—Repurchase at the Option of Holders—Asset Sales*";

(2) "*—Incurrence of Indebtedness and Issuance of Preferred Stock*";

(3) "*—Restricted Payments*";

(4) "*—Dividend and Other Payment Restrictions Affecting Restricted Subsidiaries*";

(5) clause (4) of the first paragraph of the covenant described under "*—Merger, Consolidation or Sale of Assets*";

(6) "*—Transactions with Affiliates*";

(7) "*—Designation of Restricted and Unrestricted Subsidiaries*"; and

(8) "*—Limitations on Issuances of Guarantees of Indebtedness*".

Such covenants will not, however, be of any effect with regard to the actions of Senior Notes Issuer and its Restricted Subsidiaries properly taken during the continuance of the Suspension Period; *provided* that (1) with respect to the Restricted Payments made after any such reinstatement, the amount of Restricted Payments will be calculated as though the covenant described under the caption "*—Restricted Payments*" had been in effect prior to, but not during, the Suspension Period and (2) all Indebtedness incurred, or Disqualified Stock or preferred stock issued, during the Suspension Period will be classified to have been incurred or issued pursuant to clause (2) of the second paragraph of the caption "*—Incurrence of Indebtedness and Issuance of Preferred Stock*", (3) any transactions prohibited by the covenant described under "*—Transactions with Affiliates*" entered into after such reinstatement pursuant to an agreement entered into during any Suspension Period shall be deemed to be permitted pursuant to clause (10) of the second paragraph of the covenant described under "*—Transactions with Affiliates*," and (4) any encumbrance or restriction on the ability of any Restricted Subsidiary to take any action described in clauses (1) through (3) of the first paragraph of the covenant described under "*—Dividend and Other Payment Restrictions Affecting Restricted Subsidiaries*" that becomes effective during any Suspension Period shall be deemed to be permitted pursuant to clause (3) of the second paragraph of the covenant described under "*—Dividend and Other Payment Restrictions Affecting Restricted Subsidiaries*". Upon the occurrence of a Suspension Period, the amount of Excess Proceeds shall be reset at zero. The Senior Notes Issuer shall notify the Trustee upon the occurrence of a Suspension Period; *provided* that such notice shall not be a condition of the suspension of covenants described under this caption having effect and the failure to deliver such notice shall not be a Default or Event of Default under the Senior Notes Indenture. There can be no assurance that the Senior Notes will ever achieve or maintain an Investment Grade Status.

Reports

So long as any Senior Notes are outstanding, the Senior Notes Issuer will furnish to the Trustee:

(1) within 150 days after the end of the Senior Notes Issuer's fiscal year beginning with the fiscal year ending December 31, 2015 and within 120 days after the end of each of the Senior Notes Issuer's fiscal years beginning with the fiscal year ending December 31, 2016, annual reports containing the following information: (a) audited consolidated balance sheet of the Senior Notes Issuer as of the end of the most recent fiscal year (and comparative information for the end of the prior fiscal year) and audited consolidated income statement and statement of cash flow of the Senior Notes Issuer for the most recent fiscal year (and comparative information for the prior fiscal year), including footnotes to such financial statements and the report of the independent auditors on the financial statements; (b) *pro forma* income statement and balance sheet information of the Senior Notes Issuer, together with explanatory footnotes, for any material acquisitions or dispositions (including, without limitation, any acquisitions or disposition that, individually or in the aggregate when considered with all other acquisition or dispositions that have occurred since the beginning of the most recently completed fiscal year as to which such annual report relates, represent greater than 20% of the consolidated revenues, EBITDA, or assets of the Senior Notes

Issuer on a *pro forma* basis) or recapitalizations that have occurred since the beginning of the most recently completed fiscal year as to which such annual report relates, in each case unless *pro forma* information has been provided in a previous report pursuant to clause (2) or (3) below; (c) an operating and financial review of the audited financial statements, including a discussion of the results of operations (including a discussion by business segment, if any), financial condition and liquidity and capital resources, and a discussion of material commitments and contingencies and critical accounting policies; (d) a description of the industry, business, management and shareholders of the Senior Notes Issuer, all material affiliate transactions, Indebtedness and material financing arrangements and a description of all material contractual arrangements, including material debt instruments; and (e) material risk factors and material recent developments; *provided further*, that, if and for so long as the Senior Notes Issuer's shares or the shares of any Parent Entity would be listed on the Euronext Paris Stock Exchange or any stock exchange established in a Member State of the European Union, any item of disclosure that complies in all material respects with the requirements applicable to such item in connection with an annual report (*rapport financier annuel* or *document de référence*) filed with the French *Autorité des Marchés Financiers* (AMF) or the relevant authority of any Member State of the European Union will be deemed to satisfy the Senior Notes Issuer's obligations under this clause (1) with respect to such item;

(2) within 90 days following the end of the fiscal quarter ending June 30, 2015 and within 60 days after the end of each of the Senior Notes Issuer's fiscal quarters beginning with the fiscal quarter September 30, 2015, quarterly reports containing the following information: (a) an unaudited condensed consolidated balance sheet as of the end of such quarter and unaudited condensed statements of income and cash flow for the quarterly and year to date periods ending on the unaudited condensed balance sheet date, and the comparable prior year periods for the Senior Notes Issuer, together with condensed footnote disclosure; (b) *pro forma* income statement and balance sheet information, together with explanatory footnotes, for any material acquisitions or dispositions (including, without limitation, any acquisition or disposition that, individually or in the aggregate when considered with all other acquisitions or dispositions that have occurred since the beginning of the most recent completed fiscal quarter as to which such quarterly report relates, represents greater than 20% of the consolidated revenues, EBITDA or assets of the Senior Notes Issuer on a *pro forma* basis) or recapitalizations that have occurred since the beginning of the most recently completed fiscal quarter as to which such quarterly report relates, in each case unless *pro forma* information has been provided in a previous report pursuant to clause (1) or (2) of this covenant; (c) an operating and financial review of the unaudited financial statements (including a discussion by business segment, if any), including a discussion of the consolidated financial condition and results of operations of the Senior Notes Issuer and any material change between the current quarterly period and the corresponding period of the prior year; (d) material recent developments in the business of the Senior Notes Issuer and its Subsidiaries; and (e) any material changes to the risk factors disclosed in the most recent annual report with respect to the Senior Notes Issuer; *provided further*, that, if and for so long as the Senior Notes Issuer's shares or the shares of any Parent Entity would be listed on the Euronext Paris Stock Exchange or any stock exchange established in a Member State of the European Union, any item of disclosure that complies in all material respects with the requirements applicable to such item in connection with a semi-annual report (*rapport financier semestriel*) filed with the French *Autorité des Marchés Financiers* (AMF) or the relevant authority of any Member State of the European Union will be deemed to satisfy the Senior Notes Issuer's obligations under this clause (2) with respect to such item; and

(3) promptly after the occurrence of (a) a material acquisition, disposition or restructuring (including any acquisition or disposition that would require the delivery of *pro forma* financial information pursuant to clauses (1) or (2) above); (b) any senior management change at the Senior Notes Issuer; (c) any change in the auditors of the Senior Notes Issuer; (d) any resignation of a member of the Board of Directors of the Senior Notes Issuer as a result of a disagreement with the Senior Notes Issuer; (e) the entering into an agreement that will result in a Change of Control; or (f) any material events that the Senior Notes Issuer announces publicly, in each case, a report containing a description of such events; *provided further*, that, if and for so long as the Senior Notes Issuer's shares or the shares of any Parent Entity would be listed on the Euronext Paris Stock Exchange or any stock exchange established in a Member State of the European Union, any item of disclosure that complies in all material respects with the requirements applicable to such item in connection

with ongoing disclosures (*information permanente*) filed with the French *Autorité des Marchés Financiers* (AMF) or the relevant authority of any Member State of the European Union will be deemed to satisfy the Senior Notes Issuer's obligations under this clause (3) with respect to such item.

provided, *however*, that the reports set forth in clauses (1) and (2) above will not be required to (i) contain any reconciliation to U.S. generally accepted accounting principles or (ii) include separate financial statements for any Guarantors and non-guarantor Subsidiaries of the Senior Notes Issuer. For so long as the Holdco Limitation Conditions are satisfied, the reports set forth in clauses (1), (2) and (3) may include financial statements of, and refer to, the Senior Secured Notes Issuer in lieu of the Senior Notes Issuer, in which case the reports set forth in clauses (1), (2) and (3) shall give a reasonably detailed description of any material differences between the management, business, assets, shareholding or results of operations or financial condition of the Senior Notes Issuer and the Senior Secured Notes Issuer and include an unaudited reconciliation of the Senior Secured Notes Issuer's financial statements or other financial information to the Senior Notes Issuer's financial statements or other financial information, as applicable.

The Senior Notes Issuer will, on an ongoing basis, monitor that the Holdco Limitation Conditions are satisfied by the Senior Notes Issuer. Starting with the reporting period in which the Holdco Limitation Conditions are no longer satisfied and at any time thereafter, the reports set forth in clauses (1), (2), and (3) will include consolidated financial statements and financial information of the Senior Notes Issuer.

If the Senior Notes Issuer has designated any of its Subsidiaries as Unrestricted Subsidiaries and such Subsidiaries are Significant Subsidiaries, then the quarterly and annual financial information required by the preceding paragraph will include a reasonably detailed presentation, either on the face of the financial statements or in the footnotes thereto, of the financial condition and results of operations of the Senior Notes Issuer and its Restricted Subsidiaries separate from the financial condition and results of operations of the Unrestricted Subsidiaries of the Senior Notes Issuer. For purposes of this covenant, the Senior Notes Issuer may use financial statements of (x) the Senior Notes Issuer or (y) the Target and the German Target with respect to periods commencing prior to the German Completion Date.

All financial statements shall be prepared in accordance with IFRS. In addition, all financial statement information and other reports required under this covenant will be presented in the English language.

In addition, for so long as any Senior Notes remain outstanding and during any period during which the Senior Notes Issuer is not subject to Section 13 or 15(d) of the U.S. Exchange Act nor exempt therefrom pursuant to Rule 12g3-2(b), the Senior Notes Issuer has agreed that it will furnish to the holders of the Senior Notes and to securities analysts and prospective investors, upon their request, the information required to be delivered pursuant to Rule 144A(d)(4) under the U.S. Securities Act.

The Senior Notes Issuer will also make available copies of all reports required by clauses (1) through (3) of the first paragraph of this covenant (i) on the Senior Notes Issuer's website and (ii) if and so long as the Senior Notes are listed on the Global Exchange Market and the rules of the Irish Stock Exchange so require, at the specified office of the Listing Agent in Dublin.

The Senior Notes Issuer will be deemed to satisfy the "Holdco Limitation Conditions" during any applicable period in which the Senior Notes Issuer does not carry on any business or own any assets other than:

(1) the Senior Notes Issuer's ownership of the Senior Secured Notes Issuer and other assets that are de minimis in nature;

(2) the provision of administrative services (excluding treasury services), legal, accounting and management services to its Subsidiaries of a type customarily provided by a holding company to its Subsidiaries and the ownership of assets necessary to provide such services;

(3) incurring Indebtedness (or other items that are specifically excluded from the definition of Indebtedness) (including activities reasonably incidental thereto, including performance of the terms and conditions of such Indebtedness (or other items that are specifically excluded from the definition of Indebtedness) or granting Liens or distributing, lending or otherwise advancing funds to the extent consistent with the activities of a holding company in the ordinary course of its business as a holding company;

(4) activities undertaken with the purpose of fulfilling its obligations or exercising its rights under Indebtedness (or any item specifically excluded from the definition of Indebtedness), including any activity related to any document entered into in connection with the incurrence of Indebtedness;

(5) the establishment, maintenance and use of bank accounts and the ownership of cash and Cash Equivalents;

(6) making Investments in the Senior Notes or other Indebtedness;

(7) directly related or reasonably incidental to the establishment and/or maintenance of its Subsidiaries' corporate existence or otherwise to comply with applicable law;

(8) issuing directors' qualifying shares and shares to its shareholders, and pay dividends and make other distributions on its shares and onloaning funds to its shareholders or Subsidiaries; and

(9) any activity reasonably related to the foregoing and other activities not specifically enumerated above that are de minimis in nature.

Events of Default and Remedies

Each of the following is an "*Event of Default*":

(1) default for 30 days in the payment when due of interest or Additional Amounts, if any, with respect to the Senior Notes;

(2) default in the payment when due (at maturity, upon redemption or otherwise) of the principal of, or premium, if any, on, the Senior Notes;

(3) failure by the the Senior Notes Issuer or relevant Guarantor to comply with the provisions described under the caption "*—Certain Covenants—Consolidation, Merger or Sale of Assets*";

(4) failure by the Senior Notes Issuer or relevant Guarantor for 60 days after written notice to the Senior Notes Issuer by the Trustee or the holders of at least 25% in aggregate principal amount of the Senior Notes then outstanding voting as a single class to comply with any of the agreements in the Senior Notes Indenture (other than a default in performance, or breach, or a covenant or agreement which is specifically dealt with in clauses (1), (2) or (3));

(5) default under any mortgage, indenture or instrument under which there may be issued or by which there may be secured or evidenced any Indebtedness for money borrowed by the Senior Notes Issuer or any of its Restricted Subsidiaries (or the payment of which is guaranteed by the Senior Notes Issuer or any of its Restricted Subsidiaries), whether such Indebtedness or guarantee now exists, or is created after the Senior Notes Issue Date, if that default:

   (a) is caused by a failure to pay principal of such Indebtedness at the Stated Maturity thereof prior to the expiration of the grace period provided in such Indebtedness on the date of such default (a "*Payment Default*"); or

   (b) results in the acceleration of such Indebtedness prior to its express maturity,

   and, in each case, the principal amount of any such Indebtedness, together with the principal amount of any other such Indebtedness under which there has been a Payment Default or the maturity of which has been so accelerated, aggregates €30.0 million or more;

(6) failure by the Senior Notes Issuer or any Restricted Subsidiary to pay final judgments entered by a court or courts of competent jurisdiction aggregating in excess of €30.0 million (exclusive of any amounts that a solvent insurance company has acknowledged liability for), which judgments shall not have been discharged or waived and there shall have been a period of 60 consecutive days during which a stay of enforcement of such judgment or order, by reason of an appeal, waiver or otherwise, shall not have been in effect;

(7) (i) any security interest created by the Security Documents with respect to Senior Notes Collateral having in the aggregate a Fair Market Value in excess of €5.0 million ceases to be in full force and effect (except as permitted by the terms of the Senior Notes Indenture or the Security Documents), or an assertion by UK Holdco, the Senior Notes Issuer or any of its Restricted Subsidiaries that any Senior Notes Collateral is not subject to a valid, perfected security interest (except as permitted by the terms of the Senior Notes Indenture, the Intercreditor Agreement or the Security Documents); or (ii) the repudiation by UK Holdco, the

Senior Notes Issuer or any of its Restricted Subsidiaries of any of its material obligations under the Security Documents;

(8) except as permitted by the Senior Notes Indenture or the Intercreditor Agreement, if any Senior Note Guarantee is held in any judicial proceeding to be unenforceable or invalid or ceases for any reason to be in full force and effect and such Default continues for 30 days, or any Guarantor, or any Person acting on behalf of any Guarantor, denies or disaffirms its obligations under its Senior Note Guarantee; and

(9) certain events of bankruptcy or insolvency described in the Senior Notes Indenture with respect to UK Holdco, the Senior Notes Issuer or any of its Restricted Subsidiaries that is a Significant Subsidiary or any group of its Restricted Subsidiaries that, taken together (as of the latest audited consolidated financial statements for the Senior Notes Issuer and its Restricted Subsidiaries), would constitute a Significant Subsidiary.

In the case of an Event of Default specified in clause (9), all outstanding Senior Notes will become due and payable immediately without further action or notice. If any other Event of Default occurs and is continuing, the Trustee or the holders of at least 25% in aggregate principal amount of the then outstanding Senior Notes may and, if directed by holders of at least 25% in aggregate principal amount of the then outstanding Senior Notes, the Trustee shall, declare all the Senior Notes to be due and payable immediately.

Subject to certain limitations, holders of a majority in aggregate principal amount of the then outstanding Senior Notes may direct the Trustee in its exercise of any trust or power. The Trustee may withhold from holders of the Senior Notes notice of any continuing Default or Event of Default if it determines that withholding notice is in their interest, except a Default or Event of Default relating to the payment of principal, interest or Additional Amounts or premium, if any.

Subject to the provisions of the Senior Notes Indenture relating to the duties of the Trustee, in case an Event of Default occurs and is continuing, the Trustee will be under no obligation to exercise any of the rights or powers under the Senior Notes Indenture at the request or direction of any holders of Senior Notes unless such holders have offered to the Trustee indemnity and/or security satisfactory to it against any loss, liability or expense. Except (subject to the provisions described under "*—Amendment, Supplement and Waiver*") to enforce the right to receive payment of principal, premium, if any, or interest or Additional Amounts when due, no holder of a Senior Note may pursue any remedy with respect to the Senior Notes Indenture or the Senior Notes unless:

(1) such holder has previously given the Trustee notice that an Event of Default is continuing;

(2) holders of at least 25% in aggregate principal amount of the then outstanding Senior Notes have requested the Trustee to pursue the remedy;

(3) such holders have offered the Trustee security and/or indemnity satisfactory to it against any loss, liability or expense;

(4) the Trustee has not complied with such request within 60 days after the receipt of the request and the offer of security and/or indemnity; and

(5) holders of a majority in aggregate principal amount of the then outstanding Senior Notes have not given the Trustee a direction inconsistent with such request within such 60-day period.

The holders of not less than a majority in aggregate principal amount of the Senior Notes outstanding may, on behalf of the holders of all outstanding Senior Notes, waive any past Default under the Senior Notes Indenture and its consequences, except a continuing Default in the payment of the principal or premium, if any, any Additional Amounts or interest on any Senior Note held by a non-consenting holder (which may only be waived with the consent of holders of the Senior Notes holding 90% of the aggregate principal amount of the Senior Notes outstanding under the Senior Notes Indenture).

Holders of Senior Notes may not enforce the Security Documents, except as provided in the Intercreditor Agreement. The Senior Notes Indenture will provide that in the event an Event of Default has occurred and is continuing, the Trustee will be required in the exercise of its powers to use the degree of care that a prudent person would use in the conduct of its own affairs. The Trustee, however, may refuse to follow any direction that conflicts with law or the Senior Notes Indenture or that the Trustee determines is materially prejudicial to the rights of any other holder of Senior Notes or that would involve the Trustee in personal liability.

The Senior Notes Issuer is required to deliver to the Trustee annually a statement regarding compliance with the Senior Notes Indenture.

No Personal Liability of Directors, Officers, Employees and Stockholders

No director, officer, employee, incorporator or stockholder of the Senior Notes Issuer or any Guarantor, as such, will have any liability for any obligations of the Senior Notes Issuer or the Guarantors under the Senior Notes, the Senior Notes Indenture, the Senior Note Guarantees, the Security Documents, the Intercreditor Agreement or for any claim based on, in respect of, or by reason of, such obligations or their creation. Each holder of Senior Notes by accepting a Senior Note waives and releases all such liability. The waiver and release are part of the consideration for issuance of the Senior Notes. The waiver may not be effective to waive liabilities under applicable securities laws.

Legal Defeasance and Covenant Defeasance

The Senior Notes Issuer may at any time, at the option of its Board of Directors evidenced by a resolution set forth in an Officer's Certificate, elect to have all of its obligations discharged with respect to the outstanding Senior Notes and all obligations of the Guarantors discharged with respect to their Senior Note Guarantees ("*Legal Defeasance*") except for:

(1) the rights of holders of outstanding Senior Notes to receive payments in respect of the principal of, or interest (including Additional Amounts) or premium, if any, on, such Senior Notes when such payments are due from the trust referred to below;

(2) the Senior Notes Issuer's obligations with respect to the Senior Notes concerning issuing temporary Senior Notes, registration of Senior Notes, mutilated, destroyed, lost or stolen Senior Notes and the maintenance of an office or agency for payment and money for security payments held in trust;

(3) the rights, powers, trusts, duties and immunities of the Trustee, and the Senior Notes Issuer's and the Guarantors' obligations in connection therewith; and

(4) the Legal Defeasance and Covenant Defeasance provisions of the Senior Notes Indenture.

In addition, the Senior Notes Issuer may, at its option and at any time, elect to have the obligations of the Senior Notes Issuer and the Guarantors released with respect to certain covenants (including its obligation to make Change of Control Offers and Asset Sale Offers) that are described in the Senior Notes Indenture ("*Covenant Defeasance*") and thereafter any omission to comply with those covenants will not constitute a Default or Event of Default with respect to the Senior Notes. In the event Covenant Defeasance occurs, all Events of Default described under "*—Events of Default and Remedies*" (except those relating to payments on the Senior Notes or, solely with respect to the Senior Notes Issuer, bankruptcy or insolvency events) will no longer constitute an Event of Default with respect to the Senior Notes.

In order to exercise either Legal Defeasance or Covenant Defeasance:

(1) the Senior Notes Issuer must irrevocably deposit with the Trustee, in trust, for the benefit of the holders of the Senior Notes, cash in euros, non-callable European Government Obligations or a combination of cash in euros and non-callable European Government Obligations, in amounts as will be sufficient, in the opinion of an investment bank, appraisal firm or firm of independent public accountants, to pay the principal of, or interest (including Additional Amounts and premium, if any) on the outstanding Senior Notes on the stated date for payment thereof or on the applicable redemption date, as the case may be, and the Senior Notes Issuer must specify whether the Senior Notes are being defeased to such stated date for payment or to a particular redemption date;

(2) in the case of Legal Defeasance, the Senior Notes Issuer must deliver to the Trustee an Opinion of Counsel in the United States reasonably acceptable to the Trustee confirming that (i) the Senior Notes Issuer has received from, or there has been published by, the U.S. Internal Revenue Service a ruling or (ii) since the Original Senior Secured Notes Issue Date, there has been a change in the applicable U.S. Federal income tax law, in either case to the effect that, and based thereon such Opinion of Counsel will confirm that, the holders of the outstanding Senior Notes will not recognize income, gain or loss for U.S. Federal income tax purposes as a result of such

Legal Defeasance and will be subject to tax on the same amounts, in the same manner and at the same times as would have been the case if such Legal Defeasance had not occurred;

(3) in the case of Covenant Defeasance, the Senior Notes Issuer must deliver to the Trustee an Opinion of Counsel in the United States reasonably acceptable to the Trustee confirming that the holders of the outstanding Senior Notes will not recognize income, gain or loss for U.S. Federal income tax purposes as a result of such Covenant Defeasance and will be subject to U.S. Federal income tax on the same amounts, in the same manner and at the same times as would have been the case if such Covenant Defeasance had not occurred;

(4) the Senior Notes Issuer must deliver to the Trustee an Officer's Certificate stating that the deposit was not made by the Senior Notes Issuer with the intent of preferring the holders of Senior Notes over the other creditors of the Senior Notes Issuer with the intent of defeating, hindering, delaying or defrauding any creditors of the Senior Notes Issuer or others; and

(5) the Senior Notes Issuer must deliver to the Trustee an Officer's Certificate and an Opinion of Counsel, subject to customary assumptions and qualifications, each stating that all conditions precedent relating to the Legal Defeasance or the Covenant Defeasance have been complied with.

Amendment, Supplement and Waiver

Except as provided otherwise in the succeeding paragraphs, the Senior Notes Indenture, the Senior Notes, the Senior Note Guarantees, the Security Documents, the Intercreditor Agreement or any Additional Intercreditor Agreement may be amended or supplemented with the consent of the holders of at least a majority in aggregate principal amount of the Senior Notes then outstanding (including, without limitation, consents obtained in connection with a purchase of, or tender offer or exchange offer for, Senior Notes), and any existing Default or Event of Default or compliance with any provision of the Senior Notes Indenture, the Senior Notes, the Senior Note Guarantees, the Security Documents, the Intercreditor Agreement or any Additional Intercreditor Agreement may be waived with the consent of the holders of a majority in aggregate principal amount of the then outstanding Senior Notes (including, without limitation, consents obtained in connection with a purchase of, or tender offer or exchange offer for, Senior Notes).

Unless consented to by the holders of at least 90% (or, in the case of clauses (8) and (9) of this paragraph, 75%) of the aggregate principal amount of the then outstanding Senior Notes (including, without limitation, consents obtained in connection with a purchase of, or tender offer or exchange offer for, Senior Notes), without the consent of each holder of Senior Notes affected, an amendment, supplement or waiver may not (with respect to any Senior Notes held by a non-consenting holder):

(1) reduce the principal amount of Senior Notes whose holders must consent to an amendment, supplement or waiver;

(2) reduce the principal of or change the fixed maturity of any Senior Note or alter the provisions with respect to the redemption of the Senior Notes (other than provisions relating to the covenants described above under the caption "*—Repurchase at the Option of Holders*");

(3) reduce the rate of or change the time for payment of interest, including default interest, on any Senior Note;

(4) impair the right of any holder of Senior Notes to receive payment of principal of and interest on such holder's Senior Notes on or after the due dates therefore or to institute suit for the enforcement of any payment on or with respect to such holder's Senior Notes or any Senior Note Guarantee in respect thereof;

(5) waive a Default or Event of Default in the payment of principal of, or interest, Additional Amounts or premium, if any, on, the Senior Notes (except a rescission of acceleration of the Senior Notes by the holders of at least a majority in aggregate principal amount of the then outstanding Senior Notes and a waiver of the Payment Default that resulted from such acceleration);

(6) make any Senior Note payable in money other than that stated in the Notes;

(7) make any change in the provisions of the Senior Notes Indenture relating to waivers of past Defaults or the rights of holders of Senior Notes to receive payments of principal of, or interest, Additional Amounts or premium, if any, on, the Senior Notes; or

(8) release any Guarantor from any of its obligations under its Senior Note Guarantee or the Senior Notes Indenture, except in accordance with the terms of the Senior Notes Indenture or the Intercreditor Agreement;

(9) release any Senior Notes Collateral granted for the benefit of the holders of the Senior Notes, except in accordance with the terms of the Senior Notes Indenture, the Intercreditor Agreement or the Security Documents; or

(10) make any change in the preceding amendment and waiver provisions.

Notwithstanding the preceding, without the consent of any holder of Senior Notes, the Senior Notes Issuer, the Guarantors, the Restricted Subsidiaries, the Trustee and the Security Agent may amend or supplement the Senior Notes Indenture, the Senior Notes, any Senior Note Guarantee, any of the Security Documents or the Intercreditor Agreement:

(1) to cure any ambiguity, defect or inconsistency;

(2) to provide for uncertificated Senior Notes in addition to or in place of certificated Senior Notes (*provided* that the uncertificated Senior Notes are issued in registered form for purposes of Section 163(f) of the U.S. Internal Revenue Code);

(3) to provide for the assumption of the Senior Notes Issuer's or a Guarantor's obligations to holders of Senior Notes and Senior Note Guarantees in the case of a merger or consolidation or sale of all or substantially all of the Senior Notes Issuer's or such Guarantor's assets, as applicable;

(4) to make any change that would provide any additional rights or benefits to the holders of Senior Notes or that does not adversely affect the legal rights under the Senior Notes Indenture of any such holder in any material respect;

(5) to conform the text of the Senior Notes Indenture, the Senior Note Guarantees, the Security Documents or the Senior Notes to any provision of this Description of the Senior Notes to the extent that such provision in this Description of the Senior Notes was intended to be a verbatim recitation of a provision of the Senior Notes Indenture, the Senior Note Guarantees, the Security Documents or the Senior Notes;

(6) to enter into additional or supplemental Security Documents;

(7) to release any Senior Note Guarantee in accordance with the terms of the Senior Notes Indenture;

(8) to release the Senior Notes Collateral in accordance with the terms of the Senior Notes Indenture and the Security Documents;

(9) to provide for the issuance of Additional Senior Notes in accordance with the limitations set forth in the Senior Notes Indenture as of the Senior Notes Issue Date;

(10) to allow any Guarantor to execute a supplemental indenture or a Senior Note Guarantee with respect to the Senior Notes;

(11) to evidence and provide the acceptance of the appointment of a successor Trustee under the Senior Notes Indenture; or

(12) as provided under "*—Certain Covenants—Impairment of Security Interest*" or "*—Certain Covenants—Additional Intercreditor Agreement*."

The consent of the holders of Senior Notes is not necessary under the Senior Notes Indenture to approve the particular form of any proposed amendment. It is sufficient if such consent approves the substance of the proposed amendment.

In formulating its opinion on such matters, the Trustee shall be entitled to rely absolutely on such evidence as it deems appropriate, including an Opinion of Counsel and an Officer's Certificate.

Satisfaction and Discharge

The Senior Notes Indenture will be discharged and will cease to be of further effect as to all Senior Notes issued thereunder, when:

(1) either:

(a) all Senior Notes that have been authenticated, except lost, stolen or destroyed Senior Notes that have been replaced or paid and Senior Notes for whose payment money has been deposited in trust and thereafter repaid to the Senior Notes Issuer, have been delivered to the Paying Agent for cancellation; or

(b) all Senior Notes that have not been delivered to the Paying Agent for cancellation have become due and payable by reason of the mailing of a notice of redemption or otherwise or will become due and payable within one year and the Senior Notes Issuer or any Guarantor has irrevocably deposited or caused to be deposited with the Paying Agent or the Trustee (or such entity as the Trustee designates for this purpose) as trust funds in trust solely for the benefit of the holders, cash in euros, non-callable European Government Obligations or a combination of cash in euros and non-callable European Government Obligations, in amounts as will be sufficient, without consideration of any reinvestment of interest, to pay and discharge the entire Indebtedness on the Senior Notes not delivered to the Paying Agent for cancellation for principal, premium and Additional Amounts, if any, and accrued interest to the date of maturity or redemption;

(2) the Senior Notes Issuer or any Guarantor has paid or caused to be paid all sums payable by it under the Senior Notes Indenture; and

(3) the Senior Notes Issuer has delivered irrevocable instructions to the Paying Agent or the Trustee under the Senior Notes Indenture, as applicable, to apply the deposited money toward the payment of the Senior Notes at maturity or on the redemption date, as the case may be.

In addition, the Senior Notes Issuer must deliver an Officer's Certificate and an Opinion of Counsel to the Trustee stating that all conditions precedent to satisfaction and discharge have been satisfied; *provided* that any such counsel may rely on any Officer's Certificate as to matters of fact (including as to compliance with the foregoing clauses (1), (2) and (3)).

Judgment Currency

Any payment on account of an amount that is payable in euros which is made to or for the account of any holder or the Trustee in lawful currency of any other jurisdiction (the "*Judgment Currency*"), whether as a result of any judgment or order or the enforcement thereof or the liquidation of the Senior Notes Issuer or any Guarantor, shall constitute a discharge of the Senior Notes Issuer or the Guarantor's obligation under the Senior Notes Indenture and the Senior Notes or Senior Note Guarantee, as the case may be, only to the extent of the amount of euros with such holder or the Trustee, as the case may be, could purchase in the London foreign exchange markets with the amount of the Judgment Currency in accordance with normal banking procedures at the rate of exchange prevailing on the first Business Day following receipt of the payment in the Judgment Currency. If the amount of euros that could be so purchased is less than the amount of euros originally due to such holder or the Trustee, as the case may be, the Senior Notes Issuer and the Guarantors shall indemnify and hold harmless the holder or the Trustee, as the case may be, from and against all loss or damage arising out of, or as a result of, such deficiency. This indemnity shall constitute an obligation separate and independent from the other obligations contained in the Senior Notes Indenture or the Senior Notes, shall give rise to a separate and independent cause of action, shall apply irrespective of any indulgence granted by any holder or the Trustee from time to time and shall continue in full force and effect notwithstanding any judgment or order for a liquidated sum in respect of an amount due hereunder or under any judgment or order.

Concerning the Trustee and the Security Agent

U.S. Bank Trustees Limited will be the Trustee under the Senior Notes Indenture, and will be the Security Agent under the Senior Notes Indenture and the Security Documents.

The Senior Notes Issuer shall deliver written notice to the Trustee within 30 Business Days of becoming aware of the occurrence of a Default or an Event of Default. The Trustee will be permitted to engage in other transactions; however, if it acquires any conflicting interest in its capacity as Trustee (of which it has actual knowledge), it must eliminate such conflict within 90 days or resign as Trustee.

The holders of a majority in aggregate principal amount of the then outstanding Senior Notes will have the right to direct the time, method and place of conducting any proceeding for exercising any remedy available to the Trustee, subject to certain exceptions. The Senior Notes Indenture provides that in case an Event of Default occurs and is continuing, of which the Trustee has written notice, the Trustee will be required, in the exercise of its power, to use the degree of care of a prudent man in the conduct of his own affairs. Subject to such provisions, the Trustee will be under no obligation to exercise any of its rights or powers under the Senior Notes Indenture at the request of any holder of Senior Notes, unless such holder has offered to the Trustee security and/or indemnity satisfactory to it against any loss, liability or expense.

The Senior Notes Issuer and the Guarantors will indemnify the Trustee for certain claims, liabilities and expenses incurred without negligence, willful misconduct or bad faith on its part, arising out of or in connection with its duties. The Senior Notes Indenture will provide for the indemnification of the Security Agent and its relief from responsibility in connection with its actions in relation to the Senior Notes Collateral. The Security Agent will be under no obligation to exercise any of its rights or powers under the Senior Notes Indenture at the request of any Holder of Senior Notes, unless such holder has offered the Security Agent security and/or indemnity satisfactory to it against any loss, liability or expense.

Neither the Trustee nor the Security Agent will be responsible for any unsuitability, inadequacy or unfitness of any of the Senior Notes Collateral as security in relation to the Senior Notes and shall not be obliged to make any investigation into, and shall be entitled to assume, the suitability, adequacy and fitness of the Senior Notes Collateral as security for the Senior Notes. Neither the Trustee nor the Security Agent will be responsible for any loss, expense or liability which may be suffered as a result of the Senior Notes Collateral being uninsured or inadequately insured.

Maintenance of Listing

The Senior Notes Issuer will use its commercially reasonable efforts to obtain and maintain the listing of the Senior Notes on the Global Exchange Market of the Irish Stock Exchange for so long as such Senior Notes are outstanding; provided that if the Senior Notes Issuer is unable to obtain admission to the listing of the Senior Notes on the Global Exchange Market of the Irish Stock Exchange or if at any time the Senior Notes Issuer determines that it will not maintain such listing, it will use its commercially reasonable efforts to obtain and maintain a listing of such Senior Notes on another "recognised stock exchange" as defined in Section 1005 of the Income Tax Act 2007 of the United Kingdom.

Additional Information

Anyone who receives this offering memorandum may, following the Senior Notes Issue Date, obtain a copy of the Senior Notes Indenture, the form of Senior Note, the Security Documents and the Intercreditor Agreement without charge by writing to the Senior Notes Issuer at 5th Floor, 6 St. Andrew Street, London, United Kingdom EC4A 3AE.

So long as the Senior Notes are listed on the Official List of the Irish Stock Exchange and admitted for trading on the Global Exchange Market and the rules of the Irish Stock Exchange shall so require, copies of the financial statements included in this offering memorandum may be obtained, free of charge, during normal business hours at the offices of the Listing Agent in Dublin.

Consent to Jurisdiction and Service of Process

The Senior Notes Indenture will provide that the Senior Notes Issuer and each Guarantor will appoint an agent for service of process in any suit, action or proceeding with respect to the Senior Notes Indenture, the Senior Notes and the Senior Note Guarantees brought in any U.S. federal or New York state court located in the City of New York and will submit to such jurisdiction.

Enforceability of Judgments

Substantially all of the assets of the Senior Notes Issuer and the Guarantors are outside the United States. As a result, any judgment obtained in the United States against the Senior Notes Issuer or any Guarantor may not be collectable within the United States.

Prescription

Claims against the Senior Notes Issuer or any Guarantor for the payment of principal or Additional Amounts, if any, on the Senior Notes will be prescribed ten years after the applicable due date for payment thereof. Claims against the Senior Notes Issuer or any Guarantor for the payment of interest on the Senior Notes will be prescribed five years after the applicable due date for payment of interest.

Certain Definitions

Set forth below are certain defined terms used in the Senior Notes Indenture. Reference is made to the Senior Notes Indenture for a full disclosure of all defined terms used therein, as well as any other capitalized terms used herein for which no definition is provided.

"*Acquisition*" means the acquisition of the Target by BidCo pursuant to the Acquisition Agreement.

"*Acquisition Agreement*" means the sale and purchase agreement dated May 27, 2015 by and among certain sellers identified therein and Ephios France, a *société par actions simplifiée* organized under the laws of France, a wholly-owned subsidiary of the Senior Notes Issuer, with respect to no less than 75% of the share capital of Labco S.A.

"*Acquired Debt*" means, with respect to any specified Person:

(1) Indebtedness of any other Person existing at the time such other Person is merged with or into or became a Subsidiary of such specified Person, whether or not such Indebtedness is incurred in connection with, or in contemplation of, such other Person merging with or into, or becoming a Restricted Subsidiary; and

(2) Indebtedness secured by a Lien encumbering any asset acquired by such specified Person.

"*Additional Senior Secured Notes*" means the €685.0 million aggregate principal amount of Additional Senior Secured Notes that will be issued by the Senior Secured Notes Issuer pursuant to the Existing Senior Secured Notes Indenture upon the exchange of the Temporary Senior Secured Notes as described in "*Description of the Temporary Senior Secured Notes*", consisting of €400.0 million aggregate principal amount of 6.25% Senior Secured Fixed Rate Notes due 2022 and €285.0 million aggregate principal amount of Senior Secured Floating Rate Notes due 2022.

"*Affiliate*" of any specified Person means any other Person directly or indirectly controlling or controlled by or under direct or indirect common control with such specified Person. For purposes of this definition, "control", as used with respect to any Person, means the possession, directly or indirectly, of the power to direct or cause the direction of the management or policies of such Person, whether through the ownership of voting securities, by agreement or otherwise. For purposes of this definition, the terms "controlling", "controlled by" and "under common control with" have correlative meanings.

"*Agreed Security Principles*" means the Agreed Security Principles set out in the annex to the Senior Notes Indenture, as applied reasonably and in good faith by the Senior Notes Issuer.

"*Applicable Premium*" means, with respect to a Senior Note on any redemption date, the greater of:

(1) 1.0% of the principal amount of the Senior Note; or

(2) the excess of:

   (a) the present value at such redemption date of (i) the redemption price of the Senior Note at July 1, 2018, (such redemption price being set forth in the table appearing above under the caption "*—Optional Redemption*") plus (ii) all required interest payments due on the Senior Note through July 1, 2018 (excluding accrued but unpaid interest to the redemption date), computed using a discount rate equal to the Bund Rate as of such redemption date plus 50 basis points; over

   (b) the principal amount of the Senior Note.

For the avoidance of doubt, calculation of the Applicable Premium shall not be an obligation or duty of the Trustee, the Registrar or the Paying Agent.

"*Asset Sale*" means:

(1) the sale, lease, conveyance or other disposition of any assets by the Senior Notes Issuer or any of its Restricted Subsidiaries; *provided* that the sale, lease, conveyance or other disposition of all or

substantially all of the assets of the Senior Notes Issuer and its Restricted Subsidiaries taken as a whole will be governed by the provisions of the Senior Notes Indenture described above under the caption "*—Repurchase at the Option of Holders—Change of Control*" and/or the provisions described above under the caption "*—Certain Covenants—Merger, Consolidation or Sale of Assets*" and not by the provisions described under the caption "*—Repurchase at the Option of Holders—Asset Sales*"; and

(2) the issuance of Equity Interests by any Restricted Subsidiary or the sale by the Senior Notes Issuer or any of its Restricted Subsidiaries of Equity Interests in any of the Senior Notes Issuer's Subsidiaries (in each case, other than directors' qualifying shares).

Notwithstanding the preceding, none of the following items will be deemed to be an Asset Sale:

(1) any single transaction or series of related transactions that involves assets having a Fair Market Value of less than the greater of €10.0 million and 1.0% of Total Assets;

(2) a transfer of assets, claims or Equity Interests between or among the Senior Notes Issuer and any Restricted Subsidiary;

(3) an issuance of Equity Interests by a Restricted Subsidiary to the Senior Notes Issuer or to a Restricted Subsidiary;

(4) the sale, lease or other transfer of accounts receivable, inventory, trading stock, communications capacity and other assets (including any real or personal property) in the ordinary course of business (including the abandonment or other disposition of intellectual property that is, in the reasonable judgment of the Senior Notes Issuer, no longer economically practicable to maintain or useful in the conduct of business of the Senior Notes Issuer and its Restricted Subsidiaries taken as a whole);

(5) licenses and sublicenses by the Senior Notes Issuer or any of its Restricted Subsidiaries of software or intellectual property in the ordinary course of business;

(6) any surrender or waiver of contract rights or the settlement, release, recovery on or surrender of contract, tort or other claims in the ordinary course of business;

(7) the granting of Liens not prohibited by the covenant described above under the caption "*—Certain Covenants—Liens*";

(8) the sale or other disposition of cash or Cash Equivalents;

(9) a Restricted Payment that does not violate the covenant described above under the caption "*—Certain Covenants—Restricted Payments*", a Permitted Investment or any transaction specifically excluded from the definition of Restricted Payment or, solely for purposes of the second paragraph of the covenant described above under the caption "*Repurchase at the Option of Holders—Asset Sales*", dispositions, the proceeds of which are used to make such Restricted Payments or Permitted Investments;

(10) the disposition of receivables in connection with the compromise, settlement or collection thereof in the ordinary course of business or in bankruptcy or similar proceedings and exclusive of factoring or similar arrangements;

(11) the foreclosure, condemnation or any similar action with respect to any property or other assets or a surrender or waiver of contract rights or the settlement, release or surrender of contract, tort or other claims of any kind;

(12) the disposition of assets to a Person who is providing services (the provision of which have been or are to be outsourced by the Senior Notes Issuer or any Restricted Subsidiary to such Person) related to such assets;

(13) any sale or other disposition of Equity Interests in, or Indebtedness or other securities of, an Unrestricted Subsidiary;

(14) any sale, transfer or other disposition of receivables in connection with any CICE Financing, Receivables Financing, CIR Financing and factoring or similar arrangements or otherwise in the ordinary course of business;

(15) any exchange of assets (including a combination of assets and Cash Equivalents) for assets related to a similar business of comparable or greater market value or usefulness to the business of the Senior Notes Issuer and its Restricted Subsidiaries as a whole, as determined in good faith by the Senior Notes Issuer;

(16) any disposition of Capital Stock of a Restricted Subsidiary pursuant to an agreement or other obligation with or to a Person (other than the Senior Notes Issuer or a Restricted Subsidiary) from whom such Restricted Subsidiary was acquired or from whom such Restricted Subsidiary acquired its business and assets (having been newly formed in connection with such acquisition), made as part of such acquisition and in each case comprising all or a portion of the consideration in respect of such sale or acquisition; and

(17) a disposition that is made in connection with the establishment of a joint venture or sales, transfers and other dispositions of Investments in joint ventures to the extent required by or made pursuant to, customary buy/sell arrangements between the joint venture parties set forth in joint venture agreements and similar binding agreements; *provided* that any cash or Cash Equivalents received in such sale, transfer or other disposition is applied in accordance with the covenant described under "*—Repurchase at the Option of Holders—Asset Sales*".

"*Asset Sale Offer*" has the meaning assigned to that term in the Senior Notes Indenture governing the Senior Notes.

"*Associate*" means (i) any Person engaged in a Permitted Business of which the Senior Notes Issuer or its Restricted Subsidiaries are the legal and beneficial owners of between 20% and 50% of all outstanding Voting Stock and (ii) any joint venture entered into by the Senior Notes Issuer or any Restricted Subsidiary of the Senior Notes Issuer.

"*Beneficial Owner*" has the meaning assigned to such term in Rule 13d-3 and Rule 13d-5 under the U.S. Exchange Act; *provided* that any Voting Stock of which any Permitted Holder is the "beneficial owner" (as so defined) (other than deemed beneficial ownership derived from membership in a group) shall not be included in any Voting Stock of which any other person or group is the "beneficial owner" (as so defined), unless that person or group is not an affiliate of a Permitted Holder and has the sole voting power with respect to that Voting Stock. The terms "*Beneficially Owns*" and "*Beneficially Owned*" have a corresponding meaning.

"*Biologist Shareholders*" means holders of Capital Stock of the Senior Notes Issuer or any of its Restricted Subsidiaries that (i) devote their professional activity to the development of the business of the Senior Notes Issuer or any of its Restricted Subsidiaries and (ii) are subject to restrictions on their ability to carry out professional activities other than in respect of the business of the Senior Notes Issuer or any of its Restricted Subsidiaries, as determined by the Board of Directors of the Senior Notes Issuer in good faith.

"*Board of Directors*" means:

(1) with respect to a corporation, the board of directors of the corporation or any committee thereof duly authorized to act on behalf of such board;

(2) with respect to a partnership, the board of directors of the general partner of the partnership;

(3) with respect to a limited liability company, the managing member or members or any controlling committee of managing members thereof; and

(4) with respect to any other Person, the board or committee of such Person serving a similar function.

"*Bund Rate*" means, as of any redemption date, the rate per annum equal to the equivalent yield to maturity as of such redemption date of the Comparable German Bund Issue, assuming a price for the Comparable German Bund Issue (expressed as a percentage of its principal amount) equal to the Comparable German Bund Price for such relevant date, where:

(1) "*Comparable German Bund Issue*" means the German Bundesanleihe security selected by any Reference German Bund Dealer as having a fixed maturity most nearly equal to the period from such redemption date to July 1, 2018 and that would be utilized, at the time of selection and in accordance with customary financial practice, in pricing new issues of euro denominated corporate debt securities in a principal amount approximately equal to the then outstanding

principal amount of the Senior Notes, as applicable, and of a maturity most nearly equal to July 1, 2018; *provided*, *however*, that, if the period from such redemption date to July 1, 2018 is less than one year, a fixed maturity of one year shall be used;

(2) "*Comparable German Bund Price*" means, with respect to any relevant date, the average of all Reference German Bund Dealer Quotations for such date (which, in any event, must include at least two such quotations), after excluding the highest and lowest such Reference German Bund Dealer Quotations, or if the Senior Notes Issuer obtains fewer than four such Reference German Bund Dealer Quotations, the average of all such quotations;

(3) "*Reference German Bund Dealer*" means any dealer of German Bundesanleihe securities appointed by the Senior Notes Issuer in good faith; and

(4) "*Reference German Bund Dealer Quotations*" means, with respect to each Reference German Bund Dealer and any relevant date, the average as determined by the Senior Notes Issuer of the bid and offered prices for the Comparable German Bund Issue (expressed in each case as a percentage of its principal amount) quoted in writing to the Senior Notes Issuer by such Reference German Bund Dealer at 3:30 p.m. Frankfurt, Germany time on the third Business Day preceding the relevant date.

"*Business Day*" means a day (other than a Saturday, Sunday) on which banking institutions are open in London and Paris and which is a day on which the Trans-European Automated Real-Time Gross Settlement Express Transfer (TARGET) System is open.

"*Capital Lease Obligation*" means, at the time any determination is to be made, the amount of the liability in respect of a capital lease that would at that time be required to be capitalized on a balance sheet (excluding the footnotes thereto) prepared in accordance with IFRS, and the Stated Maturity thereof shall be the date of the last payment of rent or any other amount due under such lease prior to the first date upon which such lease may be prepaid by the lessee without payment of a penalty.

"*Capital Stock*" means:

(1) in the case of a corporation, corporate stock;

(2) in the case of an association or business entity, any and all shares, interests, participations, rights or other equivalents (however designated) of corporate stock;

(3) in the case of a partnership or limited liability company, partnership interests (whether general or limited) or membership interests; and

(4) any other interest or participation that confers on a Person the right to receive a share of the profits and losses of, or distributions of assets of, the issuing Person, but excluding from all of the foregoing any debt securities convertible into Capital Stock, whether or not such debt securities include any right of participation with Capital Stock.

"*Cash Equivalents*" means:

(1) direct obligations (or certificates representing an interest in such obligations) issued by, or unconditionally guaranteed by, the government of a member state of the Pre-Expansion European Union, the United States of America, Switzerland or Canada (including, in each case, any agency or instrumentality thereof), as the case may be, the payment of which is backed by the full faith and credit of the relevant member state of the European Union or the United States of America, Switzerland or Canada, as the case may be, and which are not callable or redeemable at the Senior Notes Issuer's option;

(2) overnight bank deposits, time deposit accounts, certificates of deposit, banker's acceptances and money market deposits with maturities (and similar instruments) of 12 months or less from the date of acquisition issued by a bank or trust company which is organized under, or authorized to operate as a bank or trust company under, the laws of a member state of the Pre-Expansion European Union or of the United States of America or any state thereof, Switzerland or Canada; *provided* that such bank or trust company has capital, surplus and undivided profits aggregating in excess of €250 million (or the foreign currency equivalent thereof as of the date of such investment) and whose long-term debt is rated "A-2" or higher by Moody's or A or higher by S&P or the equivalent rating category of another internationally recognized rating agency, as of the date of the investment;

(3) repurchase obligations with a term of not more than 30 days for underlying securities of the types described in clauses (1) and (2) above entered into with any financial institution meeting the qualifications specified in clause (2) above;

(4) commercial paper having one of the two highest ratings obtainable from Moody's or S&P on the date of the investment and, in each case, maturing within one year after the date of investment; and

(5) money market funds at least 95% of the assets of which constitute Cash Equivalents of the kinds described in clauses (1) through (4) of this definition.

"*Change of Control*" means the occurrence of any of the following:

(1) the direct or indirect sale, lease, transfer, conveyance or other disposition (other than by way of merger or consolidation), in one or a series of related transactions, of all or substantially all of the properties or assets of the Senior Notes Issuer and its Subsidiaries taken as a whole to any Person (including any "person" (as that term is used in Section 13(d)(3) of the U.S. Exchange Act) other than one or more Permitted Holders); or

(2) the consummation of any transaction (including, without limitation, any merger or consolidation), the result of which is that any Person (including any "person" as defined above) other than one or more Permitted Holders, becomes the Beneficial Owner, directly or indirectly, of more than 50% of the issued and outstanding Voting Stock of the Senior Notes Issuer measured by voting power rather than number of shares,

provided that, in each case, a Change of Control shall not be deemed to have occurred if such Change of Control is also a Specified Change of Control Event.

"*Change of Control Offer*" has the meaning assigned to that term in the Senior Notes Indenture governing the Senior Notes.

"*CICE*" means the competitiveness and employment tax credit (*crédit d'impôt pour la compétitivité et l'emploi*) provided for in article 244 quater C of the French Tax Code (*Code général des impôts*).

"*CICE Financing*" means Indebtedness under an agreement pursuant to which current or future CICE payments or claims of the Senior Notes Issuer or any Restricted Subsidiary are assigned.

"*CIR*" means the research tax credit (*crédit d'impôt recherche*) provided for in article 244 quater B of the French Tax Code (*Code général des impôts*).

"*CIR Financing*" means Indebtedness under an agreement pursuant to which current or future CIR payments or claims of the Senior Notes Issuer or any Restricted Subsidiary are assigned.

"*Clearstream, Luxembourg*" means Clearstream Banking, *société anonyme*.

"*Completion Date*" means the date of completion of the Acquisition.

"*Consolidated EBITDA*" means, with respect to any specified Person for any period, the Consolidated Net Income of such Person for such period plus the following to the extent deducted in calculating such Consolidated Net Income, without duplication:

(1) provision for taxes based on income, profits and pursuant to the *Cotisation sur la valeur ajoutée des enterprises*, in each case of such Person and its Subsidiaries which are Restricted Subsidiaries for such period; *plus*

(2) the Fixed Charges of such Person and its Subsidiaries which are Restricted Subsidiaries for such period; *plus*

(3) depreciation, amortization (including, without limitation, amortization of intangibles and deferred financing fees) and other non-cash charges and expenses (including without limitation write-downs and impairment of property, plant, equipment and intangibles (including goodwill) and other long-lived assets and the impact of purchase accounting on the Senior Notes Issuer and its Restricted Subsidiaries for such period) of the Senior Notes Issuer and its Restricted Subsidiaries (excluding any such non-cash charge or expense to the extent that it represents an accrual of or reserve for cash charges or expenses in any future period or amortization of a prepaid cash charge or expense that was paid in a prior period) for such period; *plus*

(4) (a) any income or charge attributable to a post-employment benefit scheme (including the current service costs) and any past service costs and curtailments and settlements attributable to the scheme and; *plus*

(5) (a) the amount of management, monitoring, consulting and advisory fees, termination payments and related expenses paid to the Sponsor (or any accruals relating to such fees and related expenses) during such period to the extent permitted by the covenant described under "*—Certain Covenants—Transactions With Affiliates*" and (b) the amount of expenses relating to payments made to option holders (or employees holding other rights tied to the equity value of the Senior Notes Issuer or any Parent Entity) of the Senior Notes Issuer or any Parent Entity in connection with, or as a result of, any distribution being made to shareholders of such Person or its direct or indirect Parent, which payments are being made to compensate such option holders as though they were shareholders at the time of, and entitled to share in, such distribution, in each case to the extent permitted under the Senior Notes Indenture; *plus*

(6) any fees, expenses, charges (including non-cash charges) or other costs related to the Transactions, the issuance of any Capital Stock, any Investment, acquisition, disposition, recapitalization, listing or the incurrence or repayment of Indebtedness or Hedging Obligations permitted to be incurred under the Senior Notes Indenture (including refinancing thereof) whether or not successful, including (i) such fees, expenses, charges or other costs related to any incurrence of Indebtedness and (ii) any amendment or other modification of any incurrence; *plus*

(7) any Receivables Fees and discounts on the sale of accounts receivables in connection with any Receivables Financing, CIR Financing representing, in the Senior Notes Issuer's reasonable determination, the implied interest component of such discount for such period; *plus*

(8) all expenses incurred directly in connection with any early extinguishment of Indebtedness; *plus*

(9) any losses due to outsourcing contracts under which the Senior Notes Issuer or its Restricted Subsidiaries provide services within the 24-month period following the signing of such outsourcing contracts (as calculated in good faith by a responsible financial or chief accounting officer of the Senior Notes Issuer); *provided that* such losses will be limited to 5% of Consolidated EBITDA; *plus*

(10) all adjustments of the nature used in connection with the calculation of "Adjusted EBITDA" and "Estimated *Pro Forma* Adjusted EBITDA" as set forth in footnotes (2) and (3) of "*Summary Historical Consolidated Financial Information and Other Data—Other Financial Data*" contained in the offering memorandum relating to the Existing Senior Secured Notes applied in good faith to the extent such adjustments continue to be applicable during the period in which Consolidated EBITDA is being calculated; *minus*

(11) non-cash items increasing such Consolidated Net Income for such period (other than any non-cash items increasing such Consolidated Net Income pursuant to clauses (1) through (16) of the definition of Consolidated Net Income), other than the reversal of a reserve for cash charges in a future period in the ordinary course of business,

in each case, on a consolidated basis and determined in accordance with IFRS.

For the purpose of clause (1) of the definition of "Permitted Debt", Consolidated EBITDA shall be measured on the basis of the most recent four full fiscal quarters for which internal financial statements are available immediately preceding any incurrence of Indebtedness pursuant to such clause and shall be adjusted as provided under the second paragraph of the definition of "Consolidated Leverage Ratio".

"*Consolidated Leverage*" means, as of any date of determination, the sum of the total amount of Indebtedness of the Senior Notes Issuer and its Restricted Subsidiaries on a consolidated basis (excluding Hedging Obligations entered into for bona fide hedging purposes and not for speculative purposes (as determined in good faith by an Officer or the Board of Directors)).

"*Consolidated Leverage Ratio*" means, as of any date of determination, the ratio of (a)(i) the Consolidated Leverage of the Senior Notes Issuer and its Restricted Subsidiaries on a consolidated basis on such date, less (ii) cash and Cash Equivalents that are stated on the balance sheet of the Senior Notes Issuer and its Restricted Subsidiaries on such date on a consolidated basis, to (b) the Consolidated EBITDA of the Senior Notes Issuer for the most recently ended four full fiscal quarters for which internal financial statements are available immediately preceding the date on which such additional Indebtedness is incurred. In the event that the specified Person or any of its Restricted Subsidiaries incurs, assumes, guarantees, repays, repurchases, redeems, defeases or otherwise discharges any Indebtedness (other than ordinary working capital borrowings) or issues, repurchases or redeems Disqualified Stock or preferred stock subsequent to the commencement of the period for which the Consolidated Senior Secured Leverage Ratio is being calculated and on or prior to the date on which the event for which the calculation of the Consolidated Senior Secured Leverage Ratio is made (for the purpose of this definition, the "*Calculation Date*"), then the Consolidated Senior Secured Leverage Ratio will be calculated giving *pro forma* effect (as determined in good faith by a responsible accounting or financial officer of the Senior Notes Issuer) to such incurrence, assumption, guarantee, repayment, repurchase, redemption, defeasance or other discharge of Indebtedness, or such issuance, repurchase or redemption of Disqualified Stock or preferred stock, and the use of the proceeds therefrom, as if the same had occurred at the beginning of the applicable four-quarter reference period.

In addition, for purposes of calculating the Consolidated EBITDA for such period:

(1) acquisitions that have been made by the specified Person or any of its Subsidiaries which are Restricted Subsidiaries, including through mergers or consolidations, or by any Person or any of its Subsidiaries which are Restricted Subsidiaries acquired by the specified Person or any of its Subsidiaries which are Restricted Subsidiaries, and including all related financing transactions and including increases in ownership of Subsidiaries which are Restricted Subsidiaries, during the four-quarter reference period or subsequent to such reference period and on or prior to the Calculation Date, or that are to be made on or substantially concurrently at the time of the Calculation Date or with all or a portion of the proceeds of any Indebtedness incurred on the Calculation Date, will be given *pro forma* effect (as determined in good faith by a responsible accounting or financial officer of the Issuer) as if they had occurred on the first day of the four-quarter reference period;

(2) the Consolidated EBITDA attributable to discontinued operations, as determined in accordance with IFRS, and operations or businesses (and ownership interests therein) disposed of prior to the Calculation Date, will be excluded;

(3) any Person that is a Restricted Subsidiary on the Calculation Date will be deemed to have been a Restricted Subsidiary at all times during such four-quarter period;

(4) any Person that is not a Restricted Subsidiary on the Calculation Date will be deemed not to have been a Restricted Subsidiary at any time during such four-quarter period; and

(5) the difference between: (i) the total *pro forma* consolidated amount received or receivable pursuant to CICE for the four quarter period as determined on the basis of CICE applicable to all relevant entities of the Group as at the end of the period, and (ii) the total amount received or receivable pursuant to CICE already included in Consolidated EBITDA for that period, shall be added to Consolidated EBITDA.

For the purposes of this definition and the definitions of Consolidated EBITDA, Fixed Charges and Consolidated Net Income, (a) calculations will be as determined in good faith by a responsible financial or accounting officer of the Senior Notes Issuer (including in respect of anticipated expense and cost reductions and expense and cost synergies as though the full effect of such expense and cost reductions and expense and cost synergies were realized on the first day of the relevant period and shall also include the reasonably anticipated full run rate cost savings effect (as calculated in good faith by a responsible financial or chief accounting officer of the Senior Notes Issuer) of cost savings programs, business optimization programs or other restructurings or reorganizations that have been initiated by a member of the Group as though programs, restructurings or reorganizations had been fully implemented on the first day of the relevant period (regardless of whether these cost savings and expense and cost reduction and expense and cost synergies could then be reflected in *pro forma* financial statements to the extent prepared); *provided* that such anticipated expense and cost reductions and expense and cost synergies and cost savings are reasonably anticipated to be realized within 24 months after the consummation of the cost savings program, business optimization program, restructuring, reorganizations or any operational change or the purchase or sale which is expected to result in such anticipated expense and cost reductions and synergies and cost savings), and *further provided* that any synergies directly related to acquisitions completed in the 24-month period prior to the Calculation Date shall be subject to a 20% discount and (b) in determining the amount of Indebtedness outstanding on any date of determination and Fixed Charges for the relevant period, *pro forma* effect shall be given to any Incurrence, repayment, repurchase, defeasance or other acquisition, retirement or discharge of Indebtedness as if such transaction had occurred on the first day of the relevant period.

For the avoidance of doubt, the Consolidated EBITDA and all outstanding Indebtedness of any company or business to be acquired pursuant to a signed purchase agreement (which may be subject to one or more conditions precedent) may be given *pro forma* effect for the purpose of calculating the Fixed Charge Cover Ratio of the Senior Notes Issuer *provided* that (A) if the company or business to be acquired has a Fair Market Value in excess of €25.0 million, the proceeds of any Indebtedness incurred for the purpose of financing such acquisition or refinancing Indebtedness of any such company or business are deposited in an escrow account and are to be later released (x) to pay, in whole or in part, the purchase price of such acquisition, (y) to repay, redeem or refinance existing Indebtedness of such company or business and/or (z) to pay any related costs in connection with any such acquisition or refinancing; (B) the release of such Escrowed Proceeds shall be conditional upon such acquisition or refinancing to occur and (C) if such acquisition or refinancing does not occur, the Senior Notes Issuer or any of its Restricted Subsidiaries shall be required to make a mandatory redemption of the Indebtedness the proceeds of which were deposited in such escrow account.

"*Consolidated Net Income*" means, with respect to any specified Person for any period, the aggregate of the net income (loss) of such Person and its Restricted Subsidiaries for such period, on a consolidated basis (excluding the net income (loss) of any Unrestricted Subsidiaries), determined in accordance with IFRS and without any reduction in respect of preferred stock dividends; *provided* that:

(1) any net after-tax extraordinary, non-recurring or exceptional gains or losses or income, expenses or charges (less all fees and expenses related thereto), including (a) any start-up costs associated with the launch of new operations by the Senior Notes Issuer or any of its Restricted Subsidiaries, (b) any one-off charge in respect of the acquisition of, establishment of, or opening of, new laboratories, distribution centers, or depots, (c) any net loss realized upon the sale, abandonment or other disposition of any laboratory, (d) any losses due to a variation of the earnout or other deferred payment relating to an acquisition or disposition of any business, assets, Person or any Equity Interests of a Subsidiary resulting from a change in the fair value of such earnout or deferred payment, (e) any business optimization expenses and other restructuring or reorganization charges, expenses, accruals or reserves (which shall include retention, severance, systems establishment cost, excess pension charges, contract termination costs, including future lease commitments, integration costs, transition costs, costs related to the start-up, closure, relocation or consolidation of facilities and costs to relocate employees), (f) any costs associated with non-ordinary course tax projects and audits, signing, retention or completion bonuses, and any fees and expenses relating to any of the foregoing, (g) or any charges or reserves in respect of any severance expenses and expenses, charges, fees or other costs related to any Equity Offering and the transactions will be excluded;

(2) the net income or loss of any Person that is not a Restricted Subsidiary or that is accounted for under the equity method of accounting will be included only to the extent of the amount of dividends or similar distributions paid in cash to the specified Person or a Restricted Subsidiary which is a Subsidiary of the Person;

(3) solely for the purpose of determining the amount available for Restricted Payments under clause (c)(i) of the first paragraph under the caption "*—Certain Covenants—Restricted Payments*", any net income or loss of any Restricted Subsidiary (other than any Guarantor) will be excluded if such Subsidiary is subject to restrictions, directly or indirectly, on the payment of dividends or the making of distributions by such Restricted Subsidiary, directly or indirectly, to the Senior Notes Issuer (or any Guarantor that holds the Equity Interests of such Restricted Subsidiary, as applicable), by operation of the terms of such Restricted Subsidiary's charter or any agreement, instrument, judgment, decree, order, statute or governmental rule or regulation applicable to such Restricted Subsidiary or its shareholders (other than (a) restrictions that have been waived or otherwise released, (b) restrictions pursuant to the Senior Notes or the Senior Notes Indenture, (c) restrictions not prohibited by the covenant described under "*—Certain Covenants—Dividend and Other Payment Restrictions Affecting Restricted Subsidiaries*" and (d) contractual restrictions in effect on the Senior Notes Issue Date with respect to such Restricted Subsidiary and other restrictions with respect to such Restricted Subsidiary that, taken as a whole, are not materially less favorable to the holders of the Senior Notes than such restrictions in effect on the Senior Notes Issue Date), except that the Senior Notes Issuer's equity

in the net income of any such Restricted Subsidiary for such period will be included in such Consolidated Net Income up to the aggregate amount of cash or Cash Equivalents actually distributed or that could have been distributed by such Restricted Subsidiary during such period to the Senior Notes Issuer or another Restricted Subsidiary as a dividend or other distribution (subject, in the case of a dividend to another Restricted Subsidiary (other than any Guarantor), to the limitation contained in this clause);

(4) any net after-tax income or loss from discontinued operations and any net after-tax gains or losses on disposal of discontinued operations will be excluded;

(5) any net gain (or loss) realized upon the revaluation, sale or other disposition of any asset or disposed operations of the Senior Notes Issuer or any Restricted Subsidiaries (including pursuant to any sale leaseback transaction) which is not sold or otherwise disposed of in the ordinary course of business (as determined in good faith by the Senior Notes Issuer) will be excluded;

(6) (i) any one time non-cash charges or (ii) any increases in amortization or depreciation resulting from purchase accounting, in each case, in relation to any acquisition, or merger or consolidation with, of another Person or business or resulting from any reorganization or restructuring involving the Senior Notes Issuer or its Subsidiaries will be excluded;

(7) the cumulative effect of a change in accounting principles will be excluded;

(8) any Permitted Biologist Payments will be included;

(9) any unrealized gains or losses in respect of Hedging Obligations or any ineffectiveness recognized in earnings related to qualifying hedge transactions or the fair value or changes therein recognized in earnings for derivatives that do not qualify as hedge transactions, in each case, in respect of Hedging Obligations will be excluded;

(10) any non-cash expense realized or resulting from stock option plans, employee benefit plans or post-employment benefit plans, grants and sales of stock, stock appreciation or similar rights, stock options or other equity interests or rights of officers, directors and employees of such Person or any of its Restricted Subsidiaries will be excluded;

(11) any goodwill or other intangible asset impairment charges and the amortization of intangibles arising from the application of IFRS (excluding any non-cash item to the extent that it represents an accrual of or reserve for cash expenditures in any future period except to the extent such item is subsequently reversed) will be excluded;

(12) any net after-tax gains or losses (less all fees and expenses or charges relating thereto) attributable to the early extinguishment, forgiveness or termination of Indebtedness or Hedging Obligations or other derivative instruments (including deferred financing costs written off and premiums paid) and any net gain or loss from any write-off or forgiveness of Indebtedness will be excluded;

(13) any non-cash interest expense, including non-cash interest expense associated with Subordinated Shareholder Debt, and any non-cash interest income, in each case to the extent there is no associated cash disbursement or receipt, as the case may be, before the earlier of the maturity date of the Senior Notes and the date on which all the Senior Notes cease to be outstanding will be excluded;

(14) any unrealized foreign currency transaction gains or losses in respect of Indebtedness of any Person denominated in a currency other than the functional currency of such Person, any unrealized foreign currency transaction gains or losses in respect of Indebtedness or other obligations of the Senior Notes Issuer or any Restricted Subsidiary owing to the Senior Notes Issuer or any Restricted Subsidiary, any unrealized foreign exchange gains or losses relating to translation of assets and liabilities denominated in foreign currencies and any unrealized foreign currency transaction gains or losses deriving from the purchase of raw materials will be excluded;

(15) to the extent covered by insurance and actually reimbursed, or, so long as the Senior Notes Issuer has made a determination that there exists reasonable evidence that such amount will in fact be reimbursed by the insurer and only to the extent that such amount is (a) not denied by the applicable carrier in writing within 180 days and (b) in fact reimbursed within 365 days of the date of such evidence (with a deduction for any amount so added back to the extent not so reimbursed

within 365 days), losses with respect to business interruption and other liability and/or casualty insurance will be excluded; and

(16) any (a) relocation costs or expenses relating to officers and employees, (b) one-time non-cash compensation charges, (c) the costs and expenses related to employment of terminated officers or employees and (d) costs or expenses realized in connection with or resulting from stock appreciation or similar rights under management equity or stock options plans or any other management or employee benefit plan or agreement or any stock subscription or shareholder agreement, stock options or other equity interests or rights of officers or directors, in each case of such Person or any of its Restricted Subsidiaries will be excluded.

"*Contingent Obligations*" means, with respect to any Person, any obligation of such Person guaranteeing in any manner, whether directly or indirectly, any operating lease, dividend or other obligation that, in each case, does not constitute Indebtedness ("*primary obligations*") of any other Person (the "*primary obligor*"), including any obligation of such Person, whether or not contingent:

(1) to purchase any such primary obligation or any property constituting direct or indirect security therefor;

(2) to advance or supply funds:

(a) for the purchase or payment of any such primary obligation; or

(b) to maintain the working capital or equity capital of the primary obligor or otherwise to maintain the net worth or solvency of the primary obligor; or

(3) to purchase property, securities or services primarily for the purpose of assuring the owner of any such primary obligation of the ability of the primary obligor to make payment of such primary obligation against loss in respect thereof.

"*continuing*" means, with respect to any Default or Event of Default, that such Default or Event of Default has not been cured or waived.

"*Credit Facilities*" means, one or more debt facilities, instruments or arrangements incurred by the Senior Notes Issuer or any Restricted Subsidiary or any Finance Subsidiary (including the Revolving Credit Facility and overdraft facilities) or commercial paper facilities or indentures or trust deeds or note purchase agreements, in each case, with banks, other institutions, funds or investors, providing for revolving credit loans, term loans, receivables financing (including through the sale of receivables to such institutions or to special purpose entities formed to borrow from such institutions against such receivables), letters of credit, bonds, notes debentures or other corporate debt instruments or other Indebtedness, in each case, as amended, restated, modified, renewed, refunded, replaced, restructured, refinanced, repaid, increased or extended in whole or in part from time to time (and whether in whole or in part and whether or not with the original administrative agent and lenders or another administrative agent or agents or trustees or other banks or institutions and whether provided under the Revolving Credit Facility or one or more other credit or other agreements, indentures, financing agreements or otherwise) and in each case including all agreements, instruments and documents executed and delivered pursuant to or in connection with the foregoing (including any notes and letters of credit issued pursuant thereto and any guarantee and collateral agreement, patent and trademark security agreement, mortgages or letter of credit applications and other guarantees, pledges, agreements, security agreements and collateral documents). Without limiting the generality of the foregoing, the term "*Credit Facilities*" shall include any agreement or instrument (1) changing the maturity of any Indebtedness incurred thereunder or contemplated thereby, (2) adding Subsidiaries of the Senior Notes Issuer as additional borrowers, issuers or guarantors thereunder, (3) increasing the amount of Indebtedness incurred thereunder or available to be borrowed thereunder or (4) otherwise altering the terms and conditions thereof.

"*Currency Exchange Protection Agreement*" means, in respect of any Person, any foreign exchange contract, currency swap agreement, currency option, cap, floor, ceiling or collar or agreement or other similar agreement or arrangement designed to protect such Person against fluctuations in currency exchange rates as to which such Person is a party.

"*Default*" means any event that is, or with the passage of time or the giving of notice or both would be, an Event of Default.

"*Designated Non-cash Consideration*" means the Fair Market Value of non-cash consideration received by the Senior Notes Issuer or one of its Restricted Subsidiaries in connection with an Asset Sale that is so designated as "Designated Non-cash Consideration" pursuant to an Officer's Certificate, setting forth the basis of such valuation, less the amount of cash or Cash Equivalents received in connection with a subsequent sale of such Designated Non-cash Consideration.

"*Disqualified Stock*" means any Capital Stock that, by its terms (or by the terms of any security into which it is convertible, or for which it is exchangeable, in each case, at the option of the holder of the Capital Stock), or upon the happening of any event, matures or is mandatorily redeemable, pursuant to a sinking fund obligation or otherwise, or redeemable at the option of the holder of the Capital Stock, in whole or in part, on or prior to the sixth month anniversary of the date that the Senior Notes mature. Notwithstanding the preceding sentence, any Capital Stock that would constitute Disqualified Stock solely because the holders of the Capital Stock have the right to require the issuer thereof to repurchase such Capital Stock upon the occurrence of a Change of Control or an Asset Sale will not constitute Disqualified Stock if the terms of such Capital Stock provide that the issuer thereof may not repurchase or redeem any such Capital Stock pursuant to such provisions unless such repurchase or redemption complies with the covenant described above under the caption "*—Certain Covenants—Restricted Payments*". For purposes hereof, the amount of Disqualified Stock which does not have a fixed repurchase price shall be calculated in accordance with the terms of such Disqualified Stock as if such Disqualified Stock were purchased on any date on which Indebtedness shall be required to be determined pursuant to the Senior Notes Indenture, and if such price is based upon, or measured by, the Fair Market Value of such Disqualified Stock, such Fair Market Value to be determined as set forth herein.

"*Equity Contribution*" means the equity contribution to be made by the Sponsor to the Senior Secured Notes Issuer in connection with the Original Transactions as described in the offering memorandum relating to the Existing Senior Secured Notes.

"*Equity Interests*" means Capital Stock and all warrants, options or other rights to acquire Capital Stock (but excluding any debt security that is convertible into, or exchangeable for, Capital Stock).

"*Equity Investors*" means the Sponsor and any funds, co-investment vehicles or partnerships owned, managed, sponsored or advised, directly or indirectly by the Sponsor or an Affiliate thereof, and solely in their capacity as such, any limited partner of any such partnership, co-investment vehicle or fund.

"*Equity Offering*" means any public or private sale of (i) Capital Stock (x) that is a sale of Capital Stock of the Senior Notes Issuer (other than Disqualified Stock) other than offerings registered on Form S-8 (or any successor form) under the U.S. Securities Act or any similar offering in other jurisdictions, or (y) the proceeds of which are lent as Subordinated Shareholder Debt or contributed to the equity (other than through the issuance of Disqualified Stock or an Excluded Contribution) of the Senior Notes Issuer or any of its Restricted Subsidiaries or (ii) Subordinated Shareholder Debt.

"*Escrowed Proceeds*" means the proceeds from the offering of any debt securities or other Indebtedness paid into an escrow account with an independent escrow agent on the date of the applicable offering or incurrence pursuant to escrow arrangements that permit the release of amounts on deposit in such escrow account upon satisfaction of certain conditions or the occurrence of certain events. The term "*Escrowed Proceeds*" shall include any interest earned on the amounts held in escrow.

"*Excluded Contributions*" means the net cash proceeds or property received by the Senior Notes Issuer after the Original Senior Secured Notes Issue Date from:

(1) contributions to its common equity capital; and

(2) the sale (other than to a Subsidiary of the Senior Notes Issuer) of Capital Stock (other than Disqualified Stock) of the Senior Notes Issuer,

in each case designated as "*Excluded Contributions*" pursuant to an Officer's Certificate of the Senior Notes Issuer (which shall be designated no later than the date on which such Excluded Contribution has been received by the Senior Notes Issuer), the net cash proceeds of which or property are excluded from the calculation set forth in the clause (c)(ii) of the covenant described under "*—Certain Covenants—Restricted Payments*" hereof; *provided that* to the extent any Excluded Contributions so designated are not utilized to make a Restricted Payment, such Excluded Contribution may be reclassified so as to allow the incurrence of Indebtedness incurred under clause (16) of the second paragraph of the covenant described above under "*—Certain Covenants—Incurrence of Indebtedness and Issuance of Preferred Stock*".

"*Existing Senior Secured Notes*" means the €800.0 million aggregate principal amount of Senior Secured Notes issued by the Senior Secured Notes Issuer pursuant to the Existing Senior Secured Notes

Indenture, consisting of €500.0 million aggregate principal amount of 6.25% Senior Secured Fixed Rate Notes due 2022 (the "*Existing Senior Secured Fixed Rate Notes*") and €300.0 million aggregate principal amount of Senior Secured Floating Rate Notes due 2022.

"*Existing Senior Secured Notes Indenture*" means the indenture dated June 17, 2015 between, among others, the Senior Secured Notes Issuer and U.S. Bank Trustees Limited, as the trustee and the security agent, pursuant to which the Senior Secured Notes Issuer issued the Existing Senior Secured Notes.

"*Euroclear*" means Euroclear Bank SA/NV.

"*European Government Obligations*" means direct obligations of, or obligations guaranteed by, a member state of the European Union, and for the payment of which such member state of the European Union pledges its full faith and credit.

"*Fair Market Value*" means the value that would be paid by a willing buyer to an unaffiliated willing seller in a transaction not involving distress of either party, determined in good faith by the Senior Notes Issuer's Chief Executive Officer, Chief Financial Officer or responsible accounting or financial officer of the Senior Notes Issuer.

"*Finance Subsidiary*" means a wholly owned subsidiary that is formed for the purpose of borrowing funds or issuing securities and lending the proceeds to the Senior Notes Issuer or a Guarantor and that conducts no business other than as may be reasonably incidental to, or related to, the foregoing.

"*Fixed Charges*" means, with respect to any specified Person for any period, the sum, without duplication, of:

(1) the consolidated interest expense (net of interest income) of such Person and its Subsidiaries which are Restricted Subsidiaries for such period, whether paid, capitalized or accrued (but excluding such interest on and expense associated with Subordinated Shareholder Debt), including, without limitation, amortization of debt discount (but not debt issuance costs, commissions, fees and expenses), non-cash interest payments (but excluding any non-cash interest expense attributable to the movement in the mark to market valuation of Hedging Obligations or other derivative instruments), the interest component of deferred payment obligations, the interest component of all payments associated with Capital Lease Obligations, commissions, discounts and other fees and charges incurred in respect of letter of credit or bankers' acceptance financings; *plus*

(2) any interest on Indebtedness of another Person that is guaranteed by such Person or one of its Subsidiaries which are Restricted Subsidiaries or secured by a Lien on assets of such Person or one of its Subsidiaries which are Restricted Subsidiaries to the extent actually paid by such Person or one of its Subsidiaries which are Restricted Subsidiaries; *plus*

(3) the product of (a) all dividends, whether paid or accrued and whether or not in cash, on any Disqualified Stock of any Restricted Subsidiary, other than dividends on Equity Interests payable to the Senior Notes Issuer or a Restricted Subsidiary, *times* (b) a fraction, the numerator of which is one and the denominator of which is one minus the then current applicable tax rate of such Person, expressed as a decimal, as estimated in good faith by a responsible accounting or financial officer of the Senior Notes Issuer.

In addition, for the purposes of calculating Fixed Charges, see the definition of Consolidated Leverage Ratio.

"*Fixed Charge Coverage Ratio*" means, with respect to any specified Person for any period, the ratio of the Consolidated EBITDA of such Person for such period to the Fixed Charges of such Person for such period. In the event that the specified Person or any of its Subsidiaries which are Restricted Subsidiaries incurs, assumes, guarantees, repays, repurchases, redeems, defeases or otherwise discharges any Indebtedness (other than ordinary working capital borrowing) or issues, repurchases or redeems preferred stock subsequent to the commencement of the period for which the Fixed Charge Coverage Ratio is being calculated and on or prior to the date on which the event for which the calculation of the Fixed Charge Coverage Ratio is made (the "*Calculation Date*"), then the Fixed Charge Coverage Ratio will be calculated giving *pro forma* effect (as determined in good faith by the Senior Notes Issuer's Chief Financial Officer or a responsible financial or accounting officer of the Senior Notes Issuer) to such incurrence, assumption, guarantee, repayment, repurchase, redemption, defeasance or other discharge of Indebtedness, or such issuance, repurchase or redemption of preferred stock, and the use of the proceeds therefrom, as if the same had occurred at the beginning of the applicable four-quarter reference period; *provided*, however, that the *pro forma* calculation shall not give effect to (i) any Indebtedness incurred on the Calculation Date pursuant to the provisions described in the second paragraph under "*—Certain Covenants—Incurrence of Indebtedness and Issuance of Preferred Stock*," or (ii) the discharge on the Calculation Date of any Indebtedness to the extent that such discharge results from the proceeds incurred pursuant to the provisions described in the second paragraph under "*—Certain Covenants—Incurrence of Indebtedness and Issuance of Preferred Stock*."

In addition, for purposes of calculating the Fixed Charge Coverage Ratio:

(1) acquisitions of business entities or property and assets constituting a division or line of business of any Person, acquisitions that have been made by the specified Person or any of its Subsidiaries which are Restricted Subsidiaries, including through mergers or consolidations, or any Person or any of its Subsidiaries which are Restricted Subsidiaries acquired by the specified Person or any of its Subsidiaries which are Restricted Subsidiaries, and including all related financing transactions and including increases in ownership of Subsidiaries which are Restricted Subsidiaries, during the four-quarter reference period or subsequent to such reference period and on or prior to the Calculation Date, or that are to be made on the Calculation Date, will be given *pro forma* effect (as determined in good faith by the Senior Notes Issuer's Chief Financial Officer or Chief Accounting Officer) as if they had occurred on the first day of the four-quarter reference period;

(2) the Consolidated EBITDA attributable to discontinued operations, as determined in accordance with IFRS, and operations or businesses (and ownership interests therein) disposed of prior to the Calculation Date, will be excluded;

(3) the Fixed Charges attributable to discontinued operations, as determined in accordance with IFRS, and operations or businesses (and ownership interests therein) disposed of prior to the Calculation Date, will be excluded, but only to the extent that the obligations giving rise to such Fixed Charges will not be obligations of the specified Person or any of its Subsidiaries which are Restricted Subsidiaries following the Calculation Date;

(4) any Person that is a Restricted Subsidiary on the Calculation Date will be deemed to have been a Restricted Subsidiary at all times during such four-quarter period;

(5) any Person that is not a Restricted Subsidiary on the Calculation Date will be deemed not to have been a Restricted Subsidiary at any time during such four-quarter period; and

(6) if any Indebtedness bears a floating rate of interest and such Indebtedness is to be given *pro forma* effect, the interest expense on such Indebtedness will be calculated as if the rate in effect on the Calculation Date had been the applicable rate for the entire period (taking into account any Hedging Obligation applicable to such Indebtedness if such Hedging Obligation has a remaining term as at the Calculation Date in excess of 12 months, or, if shorter, at least equal to the remaining term of such Indebtedness).

For the avoidance of doubt, the *pro forma* calculation of the Fixed Charge Coverage Ratio shall not give effect to (i) any Indebtedness Incurred on the dates of determination pursuant to the provisions described in the second paragraph under "*—Certain Covenants—Incurrence of Indebtedness and Issuance of Preferred Stock*" or (ii) the discharge on the date of determination of any Indebtedness to the extent that such discharge results from the proceeds Incurred pursuant to the provisions described in the second paragraph under "*—Certain Covenants—Incurrence of Indebtedness and Issuance of Preferred Stock*".

"*German Acquisition*" means the acquisition of the German Target by German BidCo pursuant to the German Acquisition Agreement.

"*German Acquisition Agreement*" means the sale and purchase agreement dated 27 June, 2015 by and among certain sellers identified therein and Ephios Acquisition GmbH, an indirect wholly-owned subsidiary of the Senior Notes Issuer, with respect to no less than 72.15% of the share capital of synlab Holding GmbH.

"*German Equity Contribution*" means the equity contribution to be made by the Sponsor to the Senior Notes Issuer in connection with the German Acquisition as described in this offering memorandum.

"*guarantee*" means a guarantee other than by endorsement of negotiable instruments for collection or deposit in the ordinary course of business, of all or any part of any Indebtedness (whether arising by agreements to keep-well, to take or pay or to maintain financial statement conditions, pledges of assets or otherwise).

"*Guarantors*" means the German Completion Date Guarantors, the Post-Completion Guarantors, the German Post-Completion Guarantors and any Person that subsequently becomes a Guarantor in accordance with the terms of the Senior Notes Indenture; *provided* that upon the release or discharge of such Person from its Senior Note Guarantee in accordance with the Senior Notes Indenture, such Person ceases to be a Guarantor unless such Person is required to provide a guarantee under the covenant described under "*—Certain Covenants—Limitation on Issuances of Guarantees of Indebtedness*".

"*Hedging Obligations*" means, with respect to any specified Person, the obligations of such Person under:

(1) interest rate swap agreements, (whether from fixed to floating or from floating to fixed), interest rate cap agreements and interest rate collar agreements;

(2) other agreements or arrangements designed to manage interest rates or interest rate risk; and

(3) other agreements or arrangements designed to protect such Person against fluctuations in currency exchange rates, including Currency Exchange Protection Agreements, or commodity prices.

"*IFRS*" means International Financial Reporting Standards as endorsed by the European Union and in effect on the date of any calculation or determination required hereunder.

"*Indebtedness*" means, with respect to any specified Person, any indebtedness of such Person (excluding accrued expenses and trade payables):

(1) in respect of borrowed money;

(2) evidenced by bonds, notes, debentures or similar instruments for which such Person is responsible or liable;

(3) representing reimbursement obligations in respect of letters of credit, bankers' acceptances or similar instruments (except to the extent such reimbursement obligations relate to trade payables and such obligations are satisfied within 60 days of incurrence);

(4) representing Capital Lease Obligations;

(5) representing the balance deferred and unpaid of the purchase price of any property or services due more than twelve months after such property is acquired or such services are completed; or

(6) representing any Hedging Obligations,

if and to the extent any of the preceding items (other than letters of credit and Hedging Obligations) would appear as a liability upon a balance sheet (excluding the footnotes thereto) of the specified Person prepared in accordance with IFRS. In addition, the term "Indebtedness" includes all Indebtedness of others secured by a Lien on any asset of the specified Person (whether or not such Indebtedness is assumed by the specified Person) and, to the extent not otherwise included, the guarantee by the specified Person of any Indebtedness of any other Person to the extent guaranteed by such Person; *provided*, *however*, that in the case of Indebtedness secured by a Lien, the amount of such Indebtedness will be the lesser of (a) the fair market value of such asset at such date of determination (as determined in good faith) by the Senior Notes Issuer and (b) the amount of such Indebtedness of such other Person.

The term "Indebtedness" shall not include:

(1) Subordinated Shareholder Debt;

(2) any lease of property which would be considered an operating lease under IFRS and any guarantee given by the Senior Notes Issuer or a Restricted Subsidiary in the ordinary course of business solely in connection with, and in respect of, the obligations of the Senior Notes Issuer or a Restricted Subsidiary under any operating lease;

(3) Contingent Obligations incurred in the ordinary course of business;

(4) in connection with the purchase by the Senior Notes Issuer or any Restricted Subsidiary of any business, any post-closing payment adjustments to which the seller may become entitled to the extent such payment is determined by a final closing balance sheet or such payment depends on

the performance of such business after the closing; *provided, however*, that, at the time of closing, the amount of any such payment is not determinable and, to the extent such payment thereafter becomes fixed and determined, the amount is paid within 180 days thereafter;

(5) the avoidance of doubt, any contingent obligations in respect of workers' compensation claims, early retirement or termination obligations, pension fund obligations or contributions or similar claims, obligations or contributions or social security or wage Taxes;

(6) deferred or prepaid revenues;

(7) obligations under or in respect of CICE Financing, Receivables Financings and CIR Financing and accrued liabilities incurred in the ordinary course of business that are not more than 90 days past due;

(8) prepayments of deposits received from clients or customers in the ordinary course of business;

(9) obligations under any license or permit or (or guarantees given in respect of such obligations) incurred prior to the Senior Notes Issue Date or in the ordinary course of business;

(10) non-interest bearing installment obligations and accrued liabilities Incurred in the ordinary course of business that are not more than 90 days past due;

(11) Indebtedness in respect of the Incurrence by the Senior Notes Issuer or any Restricted Subsidiary of Indebtedness in respect of standby letters of credit, performance bonds or surety bonds provided by the Senior Notes Issuer or any Restricted Subsidiary in the ordinary course of business to the extent such letters of credit or bonds are not drawn upon or, if and to the extent drawn upon are honored in accordance with their terms and if, to be reimbursed, are reimbursed no later than the fifth Business Day following receipt by such Person of a demand for reimbursement following payment on the letter of credit or bond;

(12) Indebtedness incurred by the Senior Notes Issuer or one of the Restricted Subsidiaries in connection with a transaction where (A) such indebtedness is borrowed from a bank or trust company, having a combined capital and surplus and undivided profits of not less than €250 million, whose debt has a rating immediately prior to the time such transaction is entered into, of at least A or the equivalent thereof by S&P and A2 or the equivalent thereof by Moody's and (B) a substantially concurrent Investment is made by the Senior Notes Issuer or a Restricted Subsidiary in the form of cash deposited with the lender of such indebtedness, or a Subsidiary or Affiliate thereof, in amount equal to such indebtedness;

(13) for the avoidance of doubt, any amounts payable to Oséo, Bpifrance Financement or other French governmental entities for CICE subsidies received; and

(14) any liability for Taxes.

"*Initial Public Offering*" means the first Public Offering of common stock or common equity interests of the Senior Notes Issuer or any Parent Entity (the "*IPO Entity*") following which there is a Public Market.

"*Intercreditor Agreement*" means the intercreditor agreement dated on or about the Original Senior Secured Notes Issue Date made between, among others, the Senior Notes Issuer, the Trustee, Natixis, as facility agent under the Revolving Credit Facility, the lenders under the Revolving Credit Facility, and U.S. Bank Trustees Limited, as Security Agent, as amended, restated or otherwise modified or varied from time to time.

"*Investment Grade Status*" shall occur when the Senior Notes are rated Baa3 or better by Moody's and BBB− or better by S&P (or, if either such entity ceases to rate the Senior Notes, the equivalent investment grade credit rating from any other Rating Agency).

"*Investments*" means, with respect to any Person, all direct or indirect investments by such Person in other Persons (including Affiliates) in the forms of loans (including guarantees or other obligations, but excluding advances or extensions of credit to customers or suppliers made in the ordinary course of business), advances or capital contributions (excluding commission, travel and similar advances to officers and employees made in the ordinary course of business), purchases or other acquisitions for consideration of Indebtedness, Equity Interests or other securities, together with all items that are or would be classified as Investments on a balance sheet (excluding the footnotes) prepared in accordance with IFRS. If the Senior Notes Issuer or any Restricted Subsidiary sells or otherwise disposes of any Equity Interests of any direct or indirect Restricted Subsidiary such that, after giving effect to any such sale or disposition, such Person is no longer a Restricted Subsidiary, the Senior Notes Issuer will be deemed to have made an Investment on the date of any such sale or disposition equal to the Fair Market Value of the Senior Notes Issuer's Investments in such Restricted Subsidiary that were not sold or disposed of in an amount determined as provided in the final paragraph of the covenant described above under the caption "*—Certain Covenants—Restricted Payments*". The acquisition by the Senior Notes Issuer or any Restricted Subsidiary of a Person that holds an Investment in a third Person will be deemed to be an Investment by the Senior Notes Issuer or such Restricted Subsidiary in such third Person in an amount equal to the Fair Market Value of the Investments held by the acquired Person in such third Person in an amount determined as provided in the final paragraph of the covenant described above under the caption "*—Certain Covenants—Restricted Payments*". Except as otherwise provided in the Senior Notes Indenture, the amount of an Investment will be determined at the time the Investment is made and without giving effect to subsequent changes in value and, to the extent applicable, shall be determined based on the equity value of such Investment.

"*IPO Market Capitalization*" means an amount equal to (1) the total number of issued and outstanding shares of the common stock or common equity interests of the IPO Entity at the time of closing of the Initial Public Offering multiplied by (2) the price per share at which such shares of common stock or common equity interests are sold in such Initial Public Offering.

"*Lien*" means, with respect to any asset, any mortgage, lien, pledge, charge, security interest or encumbrance of any kind in respect of such asset, whether or not filed, recorded or otherwise perfected under applicable law, including any conditional sale or other title retention agreement or any lease in the nature thereof.

"*Management Advances*" means loans or advances made to, or guarantees with respect to loans or advances made to, directors, officers, managers, employees or consultants of the Senior Notes Issuer or any Restricted Subsidiary:

(1) in respect of travel, entertainment or moving related expenses incurred in the ordinary course of business;

(2) in respect of moving related expenses incurred in connection with any closing or consolidation of any facility or office; or

(3) (in the case of this clause (3)) not exceeding €5.0 million in the aggregate outstanding at any time.

"*Management Group*" means the group consisting of (i) any shareholders of the Target who reinvested in the Senior Notes Issuer or any Parent Entity all or part of its investment in the Target and (ii) persons who are or become officers or management personnel of Target or any Parent Entity, as applicable, and its Subsidiaries following the Completion Date (other than in connection with a transaction that would otherwise be a Change of Control if such persons were not included in the definition of "Permitted Holders"), or (in each case) family members thereof, or trusts, partnerships or limited liability companies for the benefit of any of the foregoing, or any of their heirs, executors, successors and legal representatives, who at any date beneficially own or have the right to acquire, directly or indirectly, Equity Interests of UK TopCo.

"*Market Capitalization*" means an amount equal to (i) the total number of issued and outstanding shares of common stock or common equity interests of the IPO Entity on the date of the declaration of the relevant dividend multiplied by (ii) the arithmetic mean of the closing prices per share of such common stock or common equity interests for the 30 consecutive trading days immediately preceding the date of declaration of such dividend.

"*Moody's*" means Moody's Investors Service, Inc.

"*Net Proceeds*" means the aggregate cash proceeds received by the Senior Notes Issuer or any of its Restricted Subsidiaries in respect of any Asset Sale (including, without limitation, any cash received upon the sale or other disposition of any Designated Non-cash Consideration or other consideration received in non-cash form or Cash Equivalents substantially concurrently received in any Asset Sale), net of the direct costs relating to such Asset Sale and the sale of such Designated Non-cash Consideration or other consideration received in non-cash form, including, without limitation, legal, accounting and investment banking fees, and sales commissions, and any relocation expenses incurred as a result of the Asset Sale, taxes paid or payable as a result of the Asset Sale, and all distributions and other payments required to be made to minority interest holders (other than the Senior Notes Issuer or any Subsidiary) in Subsidiaries or joint ventures as a result of such Asset Sale, and any reserve for adjustment or indemnification obligations in respect of the sale price of such asset or assets established in accordance with IFRS.

"*New Transactions*" means the transactions contemplated by the German Acquisition Agreement and as described in this offering memorandum under the heading "*Summary—The Transactions—The Synlab Acquisition*," including the issuance of the Senior Notes, entry into the amendment and restatement of the Revolving Credit Facility and the payment of related fees and expenses.

"*Non-Recourse Debt*" means Indebtedness as to which neither the Senior Notes Issuer nor any of its Restricted Subsidiaries (1) provides credit support of any kind (including any undertaking, agreement or instrument that would constitute Indebtedness) or (2) is directly or indirectly liable as a guarantor or otherwise.

"*Obligations*" means any principal, interest, penalties, fees, indemnifications, reimbursements, damages and other liabilities payable under the documentation governing any Indebtedness.

"*Officer*" means, with respect to any Person, the Chief Executive Officer, Chief Financial Officer, President, any manager, director, Executive Vice President, Senior Vice President or Vice President, the Treasurer or the Secretary of such Person or any other person that the board of directors of such Person shall designate for such purpose.

"*Officer's Certificate*" means a certificate signed by an Officer.

"*Opinion of Counsel*" means a written opinion from legal counsel reasonably satisfactory to the Trustee. The counsel may be an employee of or counsel to the Senior Notes Issuer or any of its Subsidiaries.

"*Original Senior Secured Notes Issue Date*" means June 17, 2015.

"*Original Transactions*" means the transactions contemplated by the Acquisition Agreement and as described in this offering memorandum under the heading "*Summary—The Transactions—The Labco Acquisition*," including the issuance of the Existing Senior Secured Notes, entry into the Revolving Credit Facility and the payment of related fees and expenses.

"*Parent Entity*" means any direct or indirect parent company or entity of the Senior Notes Issuer.

"*Parent Expenses*" means:

(1) costs (including all professional fees and expenses) incurred by any Parent Entity in connection with reporting obligations under or otherwise incurred in connection with compliance with applicable laws, rules or regulations of any governmental, regulatory or self-regulatory body or stock exchange, the Senior Notes Indenture or any other agreement or instrument relating to Indebtedness of the Senior Notes Issuer or any Restricted Subsidiary, including in respect of any reports filed with respect to the U.S. Securities Act or the U.S. Exchange Act or the respective rules and regulations promulgated thereunder;

(2) customary indemnification obligations of any Parent Entity owing to directors, officers, employees or other Persons under its charter or by-laws or pursuant to written agreements with any such Person to the extent relating to the Senior Notes Issuer and its Subsidiaries;

(3) obligations of any Parent Entity in respect of director and officer insurance (including premiums therefor) to the extent relating to the Senior Notes Issuer and its Subsidiaries;

(4) fees and expenses payable by any Parent Entity in connection with the Transactions;

(5) general corporate overhead expenses, including (a) professional fees and expenses and other operational expenses of any Parent Entity related to the ownership or operation of the business of the Senior Notes Issuer or any of its Restricted Subsidiaries, and (b) costs and expenses with respect to the ownership, directly or indirectly, of the Senior Notes Issuer and its Restricted Subsidiaries by any Parent Entity, (c) any Taxes and other fees and expenses required to maintain such Parent Entity's corporate existence and to provide for other ordinary course operating costs, including customary salary, bonus and other benefits payable to, and indemnities provided on behalf of, officers and employees of such Parent Entity and (d) to reimburse reasonable out of pocket expenses of the Board of Directors of such Parent Entity;

(6) other fees, expenses and costs relating directly or indirectly to activities of the Senior Notes Issuer and its Subsidiaries or any Parent Entity or any other Person established for purposes of or in

connection with the Transactions or which holds directly or indirectly any Capital Stock or Subordinated Shareholder Debt of the Senior Notes Issuer, in an amount not to exceed € 1.0 million in any fiscal year;

(7) any income taxes, to the extent such income taxes are attributable to the income of the Senior Notes Issuer and its Restricted Subsidiaries and, to the extent of the amount actually received in cash from its Unrestricted Subsidiaries, in amounts required to pay such taxes to the extent attributable to the income of such Unrestricted Subsidiaries; provided, however, that the amount of such payments in any fiscal year do not exceed the amount that the Senior Notes Issuer and its Subsidiaries would be required to pay in respect of such Taxes on a consolidated basis on behalf of an affiliated group consisting only of the Senior Notes Issuer and such Subsidiaries; and

(8) expenses incurred by any Parent Entity in connection with any public offering or other sale of Capital Stock or Indebtedness (a) where the net proceeds of such offering or sale are intended to be received by or contributed to the Senior Notes Issuer or a Restricted Subsidiary; (b) in a pro-rated amount of such expenses in proportion to the amount of such net proceeds intended to be so received or contributed; or (c) otherwise on an interim basis prior to completion of such offering so long as any Parent Entity shall cause the amount of such expenses to be repaid to the Senior Notes Issuer or the relevant Restricted Subsidiary out of the proceeds of such offering promptly if completed.

"*Pari Passu Debt*" means (a) any Indebtedness of the Senior Notes Issuer that ranks equally in right of payment with the Senior Notes or (b) any Indebtedness of a Guarantor that ranks equally in right of payment to its Senior Note Guarantee.

"*Permitted Biologist Payments*" means the amount of dividends paid in cash in respect of the relevant period to Biologist Shareholders.

"*Permitted Business*" means (i) any business, services or activities engaged in by the Senior Notes Issuer or any of its Restricted Subsidiaries (including the Target and its Subsidiaries) on the Completion Date, and (ii) any businesses, services and activities that are related, complementary, incidental, ancillary or similar to any of the foregoing, or are extensions or developments of any thereof.

"*Permitted Collateral Liens*" means (x) Liens on the Senior Notes Collateral that are described in one or more of clauses (2), (3), (5), (6), (7), (8), (9), (14), (18) and (28) of the definition of "Permitted Liens" and that, in each case, would not materially interfere with the ability of the Security Agent to enforce the security interest in the Senior Notes Collateral; (y) Liens on the Senior Notes Collateral to secure the Senior Notes or the Senior Note Guarantees (including any Additional Senior Notes or guarantees of Additional Senior Notes) or any "parallel debt" obligations under the Intercreditor Agreement, any Additional Intercreditor Agreement or the Security Documents; and (z) Liens on any Senior Debt or any Pari Passu Debt permitted to be incurred under "*—Certain Covenants—Incurrence of Indebtedness and Issuance of Preferred Stock*", and any Permitted Refinancing Indebtedness in respect of such Indebtedness; *provided, however*, that, in each case, such Lien ranks equal or junior to Liens securing the Senior Notes and the Senior Note Guarantees (and junior to Liens securing the Senior Notes and the Senior Note Guarantees if the Lien secures Subordinated Indebtedness of the Senior Notes Issuer or the relevant Guarantor) (in each case including, for the avoidance of doubt, to distributions of proceeds from enforcement of the Senior Notes Collateral), except that (1) Liens on the Senior Notes Collateral (other than the SUN Only Collateral) in favor of Senior Debt incurred under "*—Certain Covenants—Incurrence of Indebtedness and Issuance of Preferred Stock*" may rank senior to Liens securing the Senior Notes and the Senior Note Guarantees, (2) a Lien securing Indebtedness ("*Refinancing Indebtedness*") need not rank equally with Liens in favor of other Indebtedness if such Refinancing Indebtedness was incurred to refinance Indebtedness and such unequal ranking is due solely to operation of law arising as a consequence of such refinancing and (3) lenders under any Credit Facilities may provide for any ordering of payments under the various tranches of such Credit Facilities. Permitted Collateral Liens shall include any extension, renewal or replacement, in whole or in part, of any Lien described in the immediately preceding sentence; *provided* that any such extension, renewal or replacement will be no more restrictive in any material respect than the Lien so extended, renewed or replaced and will not extend in any material respect to any additional property or assets. For purposes of determining compliance with this definition, (a) Liens need not be incurred solely by reference to one category of Permitted Collateral Liens described in this definition but are permitted to be incurred in part under any combination thereof and of any other available exemption and (b) in the event that a Lien (or any portion thereof) meets the criteria of one or more of the categories of Permitted Collateral Liens, the Senior Notes Issuer will, in its sole discretion, classify or reclassify such Lien (or any portion thereof) in any manner that complies with this definition.

"*Permitted Holders*" means each of (i) the Equity Investors and any Affiliate or Related Person of any of them, (ii) the Management Group, and (iii) any group (within the meaning of Section 13(d)(3) or Section 14(d)(2) of the Exchange Act or any successor provision) of which the Persons described in clauses (i) and/or (ii) are members; *provided* that, without giving effect to the existence of such group or any other group, the Persons described in clauses (i) and/or (ii), collectively, beneficially own Voting Stock representing more than 50% of the total voting power of the Voting Stock of the Senior Notes Issuer or any of its Parent Entities held by such group. Any Person or group, together with its Affiliates, whose acquisition of Beneficial Ownership constitutes (i) a Change of Control in respect of which a Change of Control Offer is made in accordance with the requirements of the Senior Notes Indenture or (ii) a Change of Control which is also a Specified Change of Control Event, will thereafter, together with its Affiliates (other than any Affiliate that is an operating portfolio company of any Person that is a financial sponsor), constitute an additional Permitted Holder.

"*Permitted Investments*" means:

(1) any Investment in the Senior Notes Issuer or in a Restricted Subsidiary;

(2) any Investment in cash and Cash Equivalents;

(3) any Investment by the Senior Notes Issuer or any Restricted Subsidiary in a Person, if as a result of such Investment:

  (a) such Person becomes a Restricted Subsidiary; or

  (b) such Person is merged, consolidated or amalgamated with or into, or transfers or conveys substantially all of its assets to, or is liquidated into, the Senior Notes Issuer or a Restricted Subsidiary;

(4) any Investment made as a result of the receipt of non-cash consideration from an Asset Sale that was made pursuant to and in compliance with the covenant described above under the caption "*—Repurchase at the Option of Holders—Asset Sales*";

(5) any Investments received in compromise or resolution of (a) obligations of trade creditors or customers that were incurred in the ordinary course of business of the Senior Notes Issuer or any of its Restricted Subsidiaries, including pursuant to any plan of reorganization or similar arrangement upon the bankruptcy or insolvency of any trade creditor or customer; or (b) litigation, arbitration or other disputes;

(6) Investments in receivables owing to the Senior Notes Issuer or any Restricted Subsidiary created or acquired in the ordinary course of business, including Investments in connection with any CICE Financing, Receivables Financings and CIR Financing, including any Investment in a Receivables Subsidiary or any Investment by a Receivables Subsidiary in any other Person;

(7) Investments represented by Hedging Obligations, which obligations are permitted by clause (8) of the second paragraph of the covenant entitled "*—Certain Covenants—Incurrence of Indebtedness and Issuance of Preferred Stock*";

(8) Investments in the Senior Notes (including any Additional Senior Notes) and any other Indebtedness of the Senior Notes Issuer or any Restricted Subsidiary;

(9) any guarantee of Indebtedness or performance and surety bonds not prohibited by the covenant described above under the caption "*—Certain Covenants—Incurrence of Indebtedness and Issuance of Preferred Stock*" and loans, guarantees, keepwells and similar arrangements in the ordinary course of business, including guarantees of the obligations of, and loans to, franchisees;

(10) any Investment existing on, or made pursuant to binding commitments existing on, the Senior Notes Issue Date and any Investment consisting of an extension, modification or renewal of any Investment existing on, or made pursuant to a binding commitment existing on, the Senior Notes Issue Date; *provided* that the amount of any such Investment may be increased (a) as required by the terms of such Investment as in existence on the Senior Notes Issue Date or (b) as otherwise permitted under the Senior Notes Indenture;

(11) Investments acquired after the Original Senior Secured Notes Issue Date as a result of the acquisition by the Senior Notes Issuer or any Restricted Subsidiary of another Person, including by way of a merger, amalgamation or consolidation with or into the Senior Notes Issuer or any of its Restricted Subsidiaries in a transaction that is not prohibited by the covenant described above under the caption "*—Certain Covenants—Merger, Consolidation or Sale of Assets*" after the Original Senior Secured Notes Issue Date to the extent that such Investments were not made in contemplation of such acquisition, merger, amalgamation or consolidation and were in existence on the date of such acquisition, merger, amalgamation or consolidation;

(12) pledges or deposits (x) with respect to leases or utilities provided to third parties in the ordinary course of business or (y) otherwise described in the definition of "Permitted Liens" or made in connection with Liens permitted under the covenant described under "*—Certain Covenants—Incurrence of Indebtedness and Issuance of Preferred Stock*";

(13) any Investment to the extent made using as consideration Capital Stock of the Senior Notes Issuer (other than Disqualified Stock), Subordinated Shareholder Debt or Capital Stock of any Parent Entity;

(14) Management Advances;

(15) other Investments in any Person having an aggregate Fair Market Value (measured on the date each such Investment was made and without giving effect to subsequent changes in value), when taken together with all other Investments made pursuant to this clause (15) that are at the time outstanding not to exceed the greater of €35.0 million and 3.0% of Total Assets; *provided* that if an Investment is made pursuant to this clause in a Person that is not a Restricted Subsidiary and such Person subsequently becomes a Restricted Subsidiary or is subsequently designated a Restricted Subsidiary pursuant to the covenant described above under the caption "*—Certain Covenants—Restricted Payments*", such Investment shall thereafter be deemed to have been made pursuant to clause (1) or (3) of the definition of "Permitted Investments" and not this clause;

(16) Investments in joint ventures of the Senior Notes Issuer or any of its Restricted Subsidiaries not to exceed at any one time in the aggregate outstanding, the greater of €30.0 million and 2.5% of Total Assets; *provided*, that if any Investment pursuant to this clause (16) is made in any Person that is not a Restricted Subsidiary of the Senior Notes Issuer at the date of the making of such Investment and such Person becomes a Restricted Subsidiary of the Senior Notes Issuer after such date, such Investment shall thereafter be deemed to have been made pursuant to clause (1) above and shall cease to have been made pursuant to this clause (16) for so long as such Person continues to be a Restricted Subsidiary; and

(17) so long as no Default or Event of Default has occurred and is continuing (or would result therefrom), (a) minority Investments in any Person engaged in a Permitted Business and (b) Investments in joint ventures that conduct a Permitted Business; *provided that*, on the date of any such Restricted Investment, the Consolidated Leverage Ratio for the Senior Notes Issuer and its Restricted Subsidiaries does not exceed 4.25 to 1.0 on a *pro forma* basis after giving effect thereto.

For purposes of determining compliance with this definition, (a) Permitted Investments need not be made solely by reference to one category of Permitted Investments described in this definition but are permitted to be made in part under any combination thereof and of any other available exemption and (b) in the event that a Permitted Investment (or any portion thereof) meets the criteria of one or more of the categories of Permitted Investments, the Senior Notes Issuer will, in its sole discretion, classify or reclassify such Permitted Investment (or any portion thereof) in any manner that complies with this definition.

"*Permitted Liens*" means:

(1) Liens in favor of the Senior Notes Issuer or any of the Restricted Subsidiaries;

(2) Liens on property (including Capital Stock) of a Person existing at the time such Person becomes a Restricted Subsidiary or is merged with or into, consolidated with, amalgamated with or otherwise combined with (including pursuant to any acquisition of assets and assumptions of related liabilities) the Senior Notes Issuer or any Restricted Subsidiary or Liens securing Indebtedness in relation to any such acquisition, merger, consolidation, amalgamation or combination; *provided* that such Liens do not extend to any assets other than those of the Person

that becomes a Restricted Subsidiary or is merged with or into or consolidated with the Senior Notes Issuer or any Restricted Subsidiary;

(3) Liens to secure the performance of statutory obligations, trade contracts, insurance, surety or appeal bonds, workers' compensation obligations, leases, performance bonds or other obligations of a like nature incurred in the ordinary course of business (including Liens to secure letters of credit issued to assure payment of such obligations);

(4) Liens to secure Indebtedness permitted by clause (4) of the second paragraph of the covenant entitled "*—Certain Covenants—Incurrence of Indebtedness and Issuance of Preferred Stock*";

(5) (a) Liens existing on, or provided for or required to be granted under written agreements existing on, the Senior Notes Issue Date, after giving *pro forma* effect to the use of the proceeds of the Senior Notes and the Transactions as described in this offering memorandum and the offering memorandum relating to the Existing Senior Secured Notes or (b) with respect to the Target and its Subsidiaries, Liens existing on, or provided for or required to be granted under written agreements existing on, the Completion Date;

(6) Liens for taxes, assessments or governmental charges or claims that (x) are not yet due and payable or (y) are being contested in good faith by appropriate proceedings and for which a reserve or other appropriate provision, if any, as will be required in conformity with IFRS will have been made;

(7) Liens imposed by law, such as carriers', warehousemen's, landlord's and mechanics' Liens, in each case, incurred in the ordinary course of business;

(8) survey exceptions, easements or reservations of, or rights of others for, licenses, rights-of-way, sewers, electric lines, telegraph and telephone lines and other similar purposes, or zoning or other restrictions as to the use of real property that were not incurred in connection with Indebtedness and that do not in the aggregate materially adversely affect the value of said properties or materially impair their use in the operation of the business of such Person;

(9) Liens created for the benefit of (or to secure) the Senior Notes (or any Senior Note Guarantee);

(10) Liens securing Indebtedness under Hedging Obligations, which obligations are permitted by clause (8) of the second paragraph of the covenant described above under the caption "*—Certain Covenants—Incurrence of Indebtedness and Issuance of Preferred Stock*";

(11) Liens to secure any Permitted Refinancing Indebtedness permitted to be incurred under the Senior Notes Indenture (excluding Liens to secure Permitted Refinancing Indebtedness initially secured pursuant to clause (26) of this definition); *provided*, *however*, that:

   (a) the new Lien is limited to all or part of the same property and assets that secured or, under the written agreements pursuant to which the original Lien arose, could secure the original Lien (plus improvements and accessions to, such property or proceeds or distributions thereof); and

   (b) the Indebtedness secured by the new Lien is not increased to any amount greater than the sum of (x) the outstanding principal amount, or, if greater, committed amount, of the Indebtedness renewed, refunded, refinanced, replaced, defeased or discharged with such Permitted Refinancing Indebtedness and (y) an amount necessary to pay any fees and expenses, including premiums, related to such renewal, refunding, refinancing, replacement, defeasance or discharge;

(12) Liens on insurance policies and proceeds thereof, or other deposits, to secure insurance premium financings;

(13) filing of Uniform Commercial Code financing statements under U.S. state law (or similar filings under other applicable jurisdictions) in connection with operating leases in the ordinary course of business;

(14) bankers' Liens, rights of setoff or similar rights and remedies as to deposit accounts, Liens arising out of judgments or awards not constituting an Event of Default and notices of lis pendens and associated rights related to litigation being contested in good faith by appropriate proceedings and for which adequate reserves have been made;

(15) Liens on cash, Cash Equivalents or other property arising in connection with the defeasance, discharge or redemption of Indebtedness;

(16) Liens on specific items of inventory or other goods (and the proceeds thereof) of any Person securing such Person's obligations in respect of bankers' acceptances issued or created in the ordinary course of business for the account of such Person to facilitate the purchase, shipment or storage of such inventory or other goods;

(17) leases, licenses, subleases and sublicenses of assets in the ordinary course of business;

(18) Liens arising out of conditional sale, title retention, consignment or similar arrangements for the sale of assets entered into in the ordinary course of business;

(19) (a) mortgages, liens, security interests, restrictions, encumbrances or any other matters of record that have been placed by any developer, landlord or other third party on property over which the Senior Notes Issuer or any Restricted Subsidiary has easement rights or on any real property leased by the Senior Notes Issuer or any Restricted Subsidiary and subordination or similar agreements relating thereto and (b) any condemnation or eminent domain proceedings or compulsory purchase order affecting real property;

(20) Liens on Receivables Assets or related assets incurred in connection with any CICE Financing, Receivables Financings and CIR Financing;

(21) Liens on property or assets under construction (and related rights) in favor of a contractor or developer or arising from progress or partial payments by a third party relating to such property or assets;

(22) Liens securing or arising by reason of any netting or set-off arrangement entered into in the ordinary course of banking or other trading activities;

(23) Liens (including put and call arrangements) on Capital Stock or other securities of any Unrestricted Subsidiary that secure Indebtedness of such Unrestricted Subsidiary;

(24) limited recourse Liens in respect of the ownership interests in, or assets owned by, any joint ventures which are not Restricted Subsidiaries securing obligations of such joint ventures;

(25) Liens on property at the time the Senior Notes Issuer, the Target or a Restricted Subsidiary acquired the property, including any acquisition by means of a merger or consolidation with or into the Senior Notes Issuer, the Target or any Restricted Subsidiary; *provided* that such Liens are not created, incurred or assumed in connection with, or in contemplation of, such acquisition and do not extend to any other property owned by the Senior Notes Issuer, the Target or any Restricted Subsidiary;

(26) Liens incurred with respect to Indebtedness that does not exceed the greater of €25.0 million and 2.0% of Total Assets at any one time outstanding;

(27) any interest or title of a lessor under any operating lease;

(28) Liens on Escrowed Proceeds for the benefit of the related holders of debt securities or other Indebtedness (or the underwriters or arrangers thereof) or on cash set aside at the time of the incurrence of any Indebtedness or government securities purchased with such cash, in either case to the extent such cash or government securities prefund the payment of interest on such Indebtedness and are held in an escrow account or similar arrangement to be applied for such purpose;

(29) (a) Liens over cash paid into an escrow account pursuant to any purchase price retention arrangement as part of any permitted disposal by the Senior Notes Issuer or a Restricted Subsidiary on condition that the cash paid into such escrow account in relation to a disposal does not represent more than 15% of the net proceeds of such disposal; (b) Liens over cash paid into an escrow account to fund an acquisition or pay related fees and expenses pending the closing of such acquisition by the Senior Notes Issuer or any Restricted Subsidiary; and (c) Liens over cash paid into an escrow account pursuant to any purchase price retention arrangement or deferred consideration in connection with the acquisition by the Senior Notes Issuer or any Restricted Subsidiary; and

(30) Liens securing any Senior Debt.

For purposes of determining compliance with this definition, (a) Liens need not be incurred solely by reference to one category of Permitted Liens described in this definition but are permitted to be incurred in part under any combination thereof and of any other available exemption and (b) in the event that a Lien (or any portion thereof) meets the criteria of one or more of the categories of Permitted Liens, the Senior Notes Issuer will, in its sole discretion, classify or reclassify such Lien (or any portion thereof) in any manner that complies with this definition.

"*Permitted Refinancing Indebtedness*" means any Indebtedness of the Senior Notes Issuer or any of its Restricted Subsidiaries issued in exchange for, or the net proceeds of which are used to renew, refund, refinance, replace, exchange, defease or discharge other Indebtedness of the Senior Notes Issuer or any of its Restricted Subsidiaries (other than intercompany Indebtedness (other than any proceeds loan)); *provided* that:

(1) the aggregate principal amount (or accreted value, if applicable), or if issued with original issue discount, aggregate issue price) of such Permitted Refinancing Indebtedness does not exceed the principal amount (or accreted value, if applicable, or if issued with original issue discount, aggregate issue price) of the Indebtedness renewed, refunded, refinanced, replaced, exchanged, defeased or discharged (plus all accrued interest on the Indebtedness and the amount of all fees and expenses, including premiums, incurred in connection therewith);

(2) such Permitted Refinancing Indebtedness has (a) a final maturity date that is either (i) no earlier than the final maturity date of the Indebtedness being renewed, refunded, refinanced, replaced, exchanged, defeased or discharged or (ii) after the final maturity date of the Senior Notes and (b) has a Weighted Average Life to Maturity that is equal to or greater than the Weighted Average Life to Maturity of the Indebtedness being renewed, refunded, refinanced, replaced, defeased or discharged;

(3) if the Indebtedness being renewed, refunded, refinanced, replaced, defeased or discharged is expressly, contractually, subordinated in right of payment to the Senior Notes or any Senior Note Guarantee, as the case may be, such Permitted Refinancing Indebtedness is subordinated in right of payment to the Senior Notes or such Senior Note Guarantee, as the case may be, on terms at least as favorable to the holders of Senior Notes or the Senior Note Guarantee, as the case may be, as those contained in the documentation governing the Indebtedness being renewed, refunded, refinanced, replaced, exchanged, defeased or discharged; and

(4) if the Senior Notes Issuer or any Guarantor was the obligor on the Indebtedness being renewed, refunded, refinanced, replaced, defeased or discharged, such Indebtedness is incurred either by the Senior Notes Issuer, a Finance Subsidiary or by a Guarantor.

"*Permitted Reorganization*" means (a) any amalgamation, demerger, merger, voluntary liquidation, consolidation, reorganization (including reorganization of the shareholding structure of the Restricted Subsidiaries), winding up or corporate reconstruction involving the Senior Notes Issuer or any of its Restricted Subsidiaries (a "*Reorganization*") that is made on a solvent basis; *provided* that (1) any payments or assets distributed in connection with such Reorganization remain within the Senior Notes Issuer and its Restricted Subsidiaries and (2) if any shares or other assets form part of the Senior Notes Collateral, substantially equivalent Liens must be granted over such shares or assets of the recipient such that they form part of the Senior Notes Collateral and (b) any transaction contemplated by the Tax Structure Report, including any optional step.

"*Person*" means any individual, corporation, partnership, joint venture, association, joint-stock company, trust, unincorporated organization, limited liability company or government or other entity.

"*Pre-Expansion European Union*" means the European Union as of January 1, 2004, including the countries of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, The Netherlands, Portugal, Spain, Sweden and the United Kingdom, but not including any country which became or becomes a member of the European Union after January 1, 2004.

"*Public Debt*" means any Indebtedness consisting of bonds, debentures, notes or other similar debt securities issued in (a) a public offering registered under the U.S. Securities Act or (b) a private placement to institutional investors that is underwritten for resale in accordance with Rule 144A or Regulation S under the U.S. Securities Act, whether or not it includes registration rights entitling the holders of such debt securities to registration thereof with the U.S. Securities and Exchange Commission ("*SEC*") for public resale.

"*Public Market*" means any time after:

(1) a Public Offering of the IPO Entity has been consummated; and

(2) at least 20% of the total issued and shares of common stock or common equity interests of the IPO Entity has been distributed to investors other than the Permitted Holders or their Related Parties or any other direct or indirect shareholders of the Senior Notes Issuer as of the Senior Notes Issue Date.

"*Public Offering*" means, with respect to any Person, a bona fide underwritten primary public offering of the shares of common stock or common equity interests of such Person, either:

(1) pursuant to a flotation on the main market of the London Stock Exchange or any other nationally recognized regulated stock exchange or listing authority in a member state of the Pre-Expansion European Union; or

(2) pursuant to an effective registration statement under the U.S. Securities Act (other than a registration statement on Form S-8 or otherwise relating to Equity Interests issued or issuable under any employee benefit plan).

"*Rating Agencies*" means Moody's and S&P or, in the event Moody's or S&P no longer assigns a rating to the Senior Notes, any other "nationally recognized statistical rating organization" within the meaning of Rule 15c3-1(c)(2)(vi)(F) under the U.S. Exchange Act selected by the Senior Notes Issuer as a replacement agency.

"*Receivables Assets*" means any assets (including receivables pursuant to CICE) that are or will be the subject of a Receivables Financing.

"*Receivables Fees*" means distributions or payments made directly or by means of discounts with respect to any participation interest issued or sold in connection with, and other fees paid to a Person that is not a Restricted Subsidiary in connection with, any CICE Financing, Receivables Financing and CIR Financing.

"*Receivables Financing*" means any transaction or series of transactions that may be entered into by the Senior Notes Issuer or any of its Subsidiaries pursuant to which the Senior Notes Issuer or any of its Subsidiaries may sell, convey or otherwise transfer to (a) a Restricted Subsidiary or a Receivables Subsidiary (in the case of a transfer by the Senior Notes Issuer or any of its Subsidiaries), or (b) any other Person, or may grant a security interest in, Receivables Assets, any accounts receivable (and related assets) (whether now existing or arising in the future) of the Senior Notes Issuer or any of its Subsidiaries, including all collateral securing such accounts receivable, all contracts and all guarantees or other obligations in respect of such accounts receivable, proceeds of such accounts receivable and other assets which are customarily transferred or in respect of which security interest are customarily granted in connection with asset securitization transactions or invoice discounting involving accounts receivable, asset securitizations and invoice discounting facilities, and any Hedging Obligations entered into by the Senior Notes Issuer or any such Subsidiary in connection with such accounts receivable.

"*Receivables Repurchase Obligation*" means any obligation of a seller of receivables in a CICE Financing, Receivables Financing and CIR Financing to repurchase receivables arising as a result of a breach of a representation, warranty or covenant or otherwise, including as a result of a receivable or portion thereof becoming subject to any asserted defense, dispute, off-set or counterclaim of any kind as a result of any action taken by, any failure to take action by or any other event relating to the seller.

"*Receivables Subsidiary*" means a Subsidiary of the Senior Notes Issuer (or another Person formed for the purposes of engaging in a CICE Financing, Receivables Financing or CIR Financing with the Senior Notes Issuer in which the Senior Notes Issuer or any Subsidiary of the Senior Notes Issuer makes an Investment and to which the Senior Notes Issuer or any Subsidiary of the Senior Notes Issuer transfers Receivables Assets, accounts receivable and related assets) which engages in no activities other than in connection with the financing of accounts receivable of the Senior Notes Issuer and its Subsidiaries, all proceeds thereof and all rights (contractual or other), collateral and other assets relating thereto, and any business or activities incidental or related to such business, and which is designated by the Board of Directors of the Senior Notes Issuer (as provided below) as a Receivables Subsidiary.

"*Related Party*" means:

(1) any controlling stockholder, partner or member, or any 50% (or more) owned Subsidiary, or immediate family member (in the case of an individual), of any Equity Investor; or

(2) any trust, corporation, partnership or other entity, the beneficiaries, stockholders, partners, owners or Persons beneficially holding a 50% or more controlling interest of which consist of any one or more Equity Investors and/or such other Persons referred to in the immediately preceding clause.

"*Related Taxes*" means any Taxes, including sales, use, transfer, rental, ad valorem, value added, stamp, property, consumption, franchise, license, capital, registration, business, customs, net worth, gross receipts, excise, occupancy, intangibles or similar Taxes (other than (x) Taxes measured by income and (y) withholding imposed on payments made by any Parent Entity), required to be paid (*provided* such Taxes are in fact paid) by any Parent Entity by virtue of its:

(a) being incorporated or otherwise being established or having Capital Stock outstanding (but not by virtue of owning stock or other equity interests of any corporation or other entity other than, directly or indirectly, the Senior Notes Issuer or any of the Senior Notes Issuer's Subsidiaries);

(b) issuing or holding Subordinated Shareholder Debt;

(c) being a Holding Company, directly or indirectly, of the Senior Notes Issuer or any of the Senior Notes Issuer's Subsidiaries;

(d) receiving dividends from or other distributions in respect of the Capital Stock of, directly or indirectly, the Senior Notes Issuer or any of the Isuer's Subsidiaries; or

(e) having made any payment with respect to any of the items for which the Senior Notes Issuer is permitted to make payments to any Parent Entity pursuant to "*—Certain Covenants—Restricted Payments*".

"*Restricted Investment*" means an Investment other than a Permitted Investment.

"*Restricted Subsidiary*" means any Subsidiary of the Senior Notes Issuer that is not an Unrestricted Subsidiary.

"*Revolving Credit Facility*" means the credit agreement for an amount of up to €140.0 million entered into on or about the Original Senior Secured Notes Issue Date among, *inter alios*, the Senior Notes Issuer, certain lenders party thereto, and Natixis, as facility agent, as amended, restated or otherwise modified or varied from time to time and to which the Target and certain of its Subsidiaries will accede as "borrower" or "guarantor" on or after the Completion Date.

"*S&P*" means Standard & Poor's Ratings Group.

"*Security Documents*" means the security documents, pledge agreements and other instruments and documents executed and delivered pursuant to the Senior Notes Indenture or otherwise or any of the foregoing, as the same may be amended, supplemented or otherwise modified from time to time and pursuant to which the Senior Notes Collateral is pledged, assigned or granted to or on behalf of the Security Agent for the benefit of the holders of the Senior Notes and the Trustee or notice of such pledge, assignment or grant is given.

"*Senior Debt*" means, whether outstanding on the Senior Notes Issue Date or thereafter incurred, all amounts payable by, under or in respect of all other Indebtedness of any Guarantor, including premiums and accrued and unpaid interest (including interest accruing on or after the filing of any petition in bankruptcy or for reorganization relating to such Guarantor at the rate specified in the documentation with respect thereto whether or not a claim for post filing interest is allowed in such proceeding) and fees relating thereto; *provided*, that Senior Debt will not include:

(a) any Indebtedness incurred in violation of the Senior Notes Indenture;

(b) any obligation of any Guarantor to any Restricted Subsidiary;

(c) any liability for taxes owed or owing by any Guarantor;

(d) any accounts payable or other liability to trade creditors arising in the ordinary course of business (including guarantees thereof or instruments evidencing such liabilities);

(e) any Indebtedness, guarantee or obligation of any Senior Notes Guarantor that is expressly subordinate or junior in right of payment to any other Indebtedness, guarantee or obligation of such Guarantor;

(f) Pari Passu Debt, Subordinated Indebtedness or Subordinated Shareholder Debt; or

(g) any Capital Stock.

"*Senior Note Guarantee*" means a guarantee by each Guarantor of the Senior Notes Issuer's obligations under the Senior Notes Indenture and the Senior Notes, executed pursuant to the provisions of the Senior Notes Indenture and subject to the provisions of the Intercreditor Agreement.

"*Senior Notes Collateral*" means the rights and assets securing the Senior Notes and the Senior Note Guarantees as described in the section entitled "*—Security*" and any rights or assets over which a Lien has been granted to secure the Obligations of the Senior Notes Issuer and the Guarantors under the Senior Notes, the Senior Note Guarantees and the Senior Notes Indenture.

"*Senior Notes Issue Date*" means August 6, 2015.

"*Senior Secured Notes*" means any notes issued by the Senior Secured Notes Issuer from time to time under the Senior Secured Notes Indenture.

"*Senior Secured Notes Indenture*" means the indenture dated June 17, 2015, between, among others, the Senior Secured Notes Issuer and U.S. Bank Trustees Limited, as the trustee and the security agent, as amended from time to time.

"*Senior Secured Notes Issuer*" means Ephios Bondco PLC.

"*Significant Subsidiary*" means, at the date of determination, any Restricted Subsidiary that together with its Subsidiaries which are Restricted Subsidiaries (i) for the most recent fiscal year, accounted for more than 10% of the consolidated revenues of the Senior Notes Issuer or (ii) as of the end of the most recent fiscal year, was the owner of more than 10% of the consolidated assets of the Senior Notes Issuer.

"*Specified Change of Control Event*" means the occurrence of any event that would constitute a Change of Control pursuant to the definition thereof; provided that giving *pro forma* effect thereto, the Consolidated Leverage Ratio (calculated on a gross basis) of the Senior Notes Issuer and the Restricted Subsidiaries would have been less than (1) 6.2 to 1.0 for any Change of Control occurring on or prior to the 18 month anniversary of the Completion Date or (2) 5.7 to 1.0 for any Change of Control occurring thereafter.

"*Sponsor*" means one or more investment funds advised or managed by Cinven Capital Management (V) Limited Partnership Incorporated in its capacity as general partner of such investment funds, acting through its general partner Cinven Capital Management (V) General Partner Limited, in each case (whether individually or as a group), Affiliates of the foregoing (but excluding any operating portfolio companies of the foregoing).

"*Standard Securitization Undertakings*" means representations, warranties, covenants, indemnities and guarantees of performance entered into by the Senior Notes Issuer or any Subsidiary of the Senior Notes Issuer which are reasonably customary in securitization of receivables transactions.

"*Stated Maturity*" means, with respect to any installment of interest or principal on any series of Indebtedness, the date on which the payment of interest or principal was scheduled to be paid in the documentation governing such Indebtedness as of the Original Senior Secured Notes Issue Date, and will not include any contingent obligations to repay, redeem or repurchase any such interest or principal prior to the date originally scheduled for the payment thereof.

"*Subordinated Indebtedness*" means (a) with respect to the Senior Notes Issuer, any Indebtedness of the Senior Notes Issuer which is by its terms subordinated in right of payment to the Senior Notes and (b) with respect to a Guarantor, any Indebtedness of such Guarantor which is by its terms subordinated in right of payment to its Senior Note Guarantee, *provided that* Subordinated Shareholder Debt is excluded from this definition.

"*Subordinated Shareholder Debt*" means, collectively, any debt provided to the Senior Notes Issuer by any direct or indirect parent of the Senior Notes Issuer or any Permitted Holder or Related Party, in exchange for or pursuant to any security, instrument or agreement other than Capital Stock, together with any such security, instrument or agreement and any other security or instrument other than Capital Stock issued in payment of any obligation under any Subordinated Shareholder Debt; *provided* that such Subordinated Shareholder Debt:

(1) does not (including upon the happening of any event) mature or require any amortization or other payment of principal prior to the first anniversary of the Stated Maturity of the Senior Notes (other than through conversion or exchange of any such security or instrument for Equity Interests of the Senior Notes Issuer (other than Disqualified Stock) or for any other security or instrument meeting the requirements of the definition);

(2) does not (including upon the happening of any event) require the payment of cash interest prior to the first anniversary of the Stated Maturity of the Senior Notes;

(3) does not (including upon the happening of any event) provide for the acceleration of its maturity nor confers on its shareholders any right (including upon the happening of any event) to declare a default or event of default or take any enforcement action, in each case, prior to the first anniversary of the Stated Maturity of the Senior Notes;

(4) is not secured by a lien on any assets of the Senior Notes Issuer or a Restricted Subsidiary and is not guaranteed by any Subsidiary of the Senior Notes Issuer;

(5) is subordinated in right of payment to the prior payment in full in cash of the Senior Notes in the event of any default, bankruptcy, reorganization, liquidation, winding up or other disposition of assets or pursuant to its terms or the terms of the Intercreditor Agreement, an Additional Intercreditor Agreement or another intercreditor agreement;

(6) does not (including upon the happening of any event) restrict the payment of amounts due in respect of the Senior Notes or compliance by the Senior Notes Issuer with its obligations under the Senior Notes and the Senior Notes Indenture;

(7) does not (including upon the happening of an event) constitute Voting Stock; and

(8) is not (including upon the happening of any event) mandatorily convertible or exchangeable, or convertible or exchangeable at the option of the holder, in whole or in part, prior to the date on which the Senior Notes mature other than into or for Capital Stock (other than Disqualified Stock) of the Senior Notes Issuer,

provided, *however*, that any event or circumstance that results in such Indebtedness ceasing to qualify as Subordinated Shareholder Debt, such Indebtedness shall constitute an incurrence of such Indebtedness by the Senior Notes Issuer, and any and all Restricted Payments made through the use of the net proceeds from the incurrence of such Indebtedness since the date of the original issuance of such Subordinated Shareholder Debt shall constitute new Restricted Payments that are deemed to have been made after the date of the original issuance of such Subordinated Shareholder Debt.

"*Subsidiary*" means, with respect to any specified Person:

(1) any corporation, association, *société d'exercice libéral* or other business entity of which more than 50% of the total voting power of shares of Capital Stock entitled (without regard to the occurrence of any contingency and after giving effect to any voting agreement or stockholders' agreement that effectively transfers voting power) to vote in the election of directors, managers or trustees of the corporation, association or other business entity is at the time owned or controlled, directly or indirectly, by that Person or one or more of the other Subsidiaries of that Person (or a combination thereof); *provided that* any corporation, association or other business entity shall also be considered a Subsidiary if either (a)(i) such corporation, association or other business entity is organized under the laws of the Republic of France and is subject to limitations on the amount of total voting power of shares of Capital Stock entitled (without regard to the occurrence of any contingency and after giving effect to any voting agreement or stockholders' agreement that effectively transfers voting power) to vote in the election of directors, managers or trustees of the corporation, association or other business entity that may be held by persons other than laboratory doctors and (ii) such Person owns an amount equal to at least the lesser of 45% and the maximum percentage that such Person is permitted to hold under applicable law of the total voting power of shares of Capital Stock entitled (without regard to the occurrence of any contingency and after giving effect to any voting agreement or stockholders' agreement that effectively transfers voting power) to vote in the election of directors, managers or trustees of such corporation, association or other business entity, or (b) such corporation, association or

other business entity is consolidated in the financial statements of such Person according to the full consolidation method in accordance with applicable IFRS; and

(2) any partnership or limited liability company (other than entities covered by clause (1) of this definition) of which (a) more than 50% of the capital accounts, distribution rights, total equity and voting interests or general and limited partnership interests, as applicable, are owned or controlled, directly or indirectly, by such Person or one or more of the other Subsidiaries of that Person or a combination thereof, whether in the form of membership, general, special or limited partnership interests or otherwise, and (b) such Person or any Subsidiary of such Person is a controlling general partner or otherwise controls such entity.

"*Tax*" means any present or future tax, duty, levy, impost, assessment or other governmental charge (including penalties, interest and any other additions thereto, and, for the avoidance of doubt, including any withholding or deduction for or on account of Tax) imposed by any government or other taxing authority.

"*Taxes*" and "*Taxation*" shall be construed to have corresponding meanings.

"*Tax Sharing Agreement*" means any tax sharing or profit and loss pooling or similar agreement (such as a French tax consolidation agreement (*convention d'intégration fiscale* relating to an *intégration fiscale* in accordance with article 223 A et seq. of the French *Code général des impôts*) with customary or arm's-length terms entered into with any Parent Entity or Unrestricted Subsidiary, as the same may be amended, supplemented, waived or otherwise modified from time to time in accordance with the terms thereof and of the Senior Notes Indenture, and any arrangements or transactions made between the Senior Notes Issuer and/or any of its Subsidiaries and any Parent Entity in order to satisfy the obligations arising under any such Tax Sharing Agreement (including, for the avoidance of doubt, distributions for purposes of compensating accounting losses in relation to a profit and loss pooling agreement and/or upstream loans to any Parent Entity to enable a Parent Entity to compensate the Senior Notes Issuer or such Subsidiary for losses incurred which may need to be compensated by a Parent Entity under any profit and loss pooling agreement).

"*Tax Structure Report*" means the tax structure memo dated June 9, 2015 and entitled "Project Zeus— Structure Report".

"*Temporary Senior Secured Notes*" means the €685.0 million aggregate principal amount of Temporary Senior Secured Notes that will be issued by the Senior Secured Notes Issuer pursuant to the Temporary Senior Secured Notes Indenture, consisting of €400.0 million aggregate principal amount of 6.25% Temporary Senior Secured Fixed Rate Notes due 2022 and €285.0 million aggregate principal amount of Temporary Senior Secured Floating Rate Notes due 2022.

"*Temporary Senior Secured Notes Indenture*" means the indenture dated the Senior Notes Issue Date between, among others, the Senior Secured Notes Issuer and U.S. Bank Trustees Limited, as the trustee and the security agent (in such capacity, the "*Security Agent*"), pursuant to which the Senior Secured Notes Issuer will issue the Temporary Senior Secured Notes.

"*Total Assets*" means the consolidated total assets of the Senior Notes Issuer and its Restricted Subsidiaries, as shown on the most recent balance sheet of the Senior Notes Issuer, and may give *pro forma* effect to any acquisition under the conditions, *mutatis mutandis*, set forth under clause (1) of the second paragraph of the definition of "Consolidated Leverage Ratio".

"*Transactions*" means, collectively, the Original Transactions and the New Transactions.

"*UK TopCo*" means the entity defined as such elsewhere in this offering memorandum.

"*Unrestricted Subsidiary*" means any Subsidiary of the Senior Notes Issuer (other than the Senior Notes Issuer or any successor to the Senior Notes Issuer) that is designated by the Board of Directors of the Senior Notes Issuer as an Unrestricted Subsidiary pursuant to a resolution of the Board of Directors but only to the extent that at the time of such designation such Subsidiary:

(1) has no Indebtedness other than Non-Recourse Debt;

(2) except as permitted by the covenant described above under the caption "—*Certain Covenants—Transactions with Affiliates*", is not party to any agreement, contract, arrangement or understanding with the Senior Notes Issuer or any Restricted Subsidiary unless the terms of any such agreement, contract, arrangement or understanding are no less favorable to the Senior

Notes Issuer or such Restricted Subsidiary than those that might be obtained at the time from Persons who are not Affiliates of the Senior Notes Issuer; and

(3) is a Person with respect to which neither the Senior Notes Issuer nor any Restricted Subsidiary has any direct or indirect obligation (a) to subscribe for additional Equity Interests or (b) to maintain or preserve such Person's financial condition or to cause such Person to achieve any specified levels of operating results.

"*Voting Stock*" of any specified Person as of any date means the Capital Stock of such Person that is at the time entitled to vote in the election of the Board of Directors of such Person.

"*Weighted Average Life to Maturity*" means, when applied to any Indebtedness at any date, the number of years obtained by dividing:

(1) the sum of the products obtained by multiplying (a) the amount of each then remaining installment, sinking fund, serial maturity or other required payments of principal, including payment at final maturity, in respect of the Indebtedness, by (b) the number of years (calculated to the nearest one-twelfth) that will elapse between such date and the making of such payment; by

(2) the then outstanding principal amounts of such Indebtedness.

"*Working Capital Intercompany Loan*" means any loan to or by the Senior Notes Issuer or any of its Restricted Subsidiaries to or from the Senior Notes Issuer or any of its Restricted Subsidiaries from time to time (1) for purposes of consolidated cash and tax management and working capital management and (2) for a duration of less than one year; *provided* that if such Working Capital Intercompany Loan exceeds the greater of €5.0 million and 0.5% of Total Assets, it shall be expressed to be Subordinated Indebtedness.

BOOK-ENTRY; DELIVERY AND FORM

General

Each series of Notes sold within the United States to qualified institutional buyers in reliance on Rule 144A will initially be represented by one or more global notes in registered form without interest coupons attached (the "Rule 144A Global Notes"). Each series of Notes sold outside the United States in reliance on Regulation S will initially be represented by one or more global notes in registered form without interest coupons attached (the "Regulation S Global Notes" and, together with the Rule 144A Global Notes, the "Global Notes"). The Global Notes will be deposited, on the closing date, with, or on behalf of, a common depositary and registered in the name of the nominee of the common depositary for the accounts of Euroclear and Clearstream, Luxembourg.

Ownership of interests in the Rule 144A Global Notes (the "Rule 144A Book-Entry Interests") and ownership of interests in the Regulation S Global Notes (the "Regulation S Book-Entry Interests" and, together with the Rule 144A Book-Entry Interests, the "Book-Entry Interests") will be limited to persons that have accounts with Euroclear and/or Clearstream, Luxembourg or persons that hold interests through such participants. Euroclear and Clearstream, Luxembourg will hold interests in the Global Notes on behalf of their participants through customers' securities accounts in their respective names on the books of their respective depositaries. Except under the limited circumstances described below, Book- Entry Interests will not be issued in definitive form.

Book-Entry Interests will be shown on, and transfers thereof will be effected only through, records maintained by Euroclear and Clearstream, Luxembourg and their participants. The laws of some jurisdictions, including certain states of the United States, may require that certain purchasers of securities take physical delivery of those securities in definitive form. The foregoing limitations may impair your ability to own, transfer or pledge Book-Entry Interests. In addition, while the Notes are in global form, holders of Book-Entry Interests will not be considered the owners or "holders" of Notes for any purpose.

So long as the Notes are held in global form, Euroclear and/or Clearstream, Luxembourg (or their respective nominees), as applicable, will be considered the sole holders of the Global Notes for all purposes under the Indentures. In addition, participants must rely on the procedures of Euroclear and Clearstream, Luxembourg, and indirect participants must rely on the procedures of Euroclear and Clearstream, Luxembourg and the participants through which they own Book-Entry Interests, to transfer their interests or to exercise any rights of holders of Notes under the Indentures.

None of us, the Paying Agent, the Transfer Agent, the Registrar or the Trustees will have any responsibility, or be liable, for any aspect of the records relating to the Book-Entry Interests.

Definitive Registered Notes

Under the terms of the Indentures, owners of the Book-Entry Interests will receive definitive registered Notes in certificated form ("Definitive Registered Notes") only:

(1) if either Euroclear or Clearstream, Luxembourg notifies the relevant Issuer that it is unwilling or unable to continue to act as depositary and a successor depositary is not appointed by the relevant Issuer within 120 days; or

(2) if the owner of a Book-Entry Interest requests such exchange in writing delivered through Euroclear or Clearstream, Luxembourg following an event of default under the applicable Indentures and enforcement action is being taken in respect thereof under such Indentures.

Euroclear and Clearstream, Luxembourg have advised the Issuers that upon request by an owner of a Book-Entry Interest described in the immediately preceding clause (2), their current procedure is to request that the relevant Issuer issue or cause to be issued Notes in definitive registered form to all owners of Book-Entry Interests.

In such an event, the Registrar will issue Definitive Registered Notes, registered in the name or names and issued in any approved denominations, requested by or on behalf of Euroclear, Clearstream, Luxembourg or the relevant Issuer, as applicable (in accordance with their respective customary procedures and based upon directions received from participants reflecting the beneficial ownership of Book-Entry Interests), and such Definitive Registered Notes will bear the restrictive legend as provided in the applicable Indenture, unless that legend is not required by the applicable Indentures or applicable law.

To the extent permitted by law, each of the Issuers, the Trustees, the Paying Agent, the Transfer Agent and the Registrar shall be entitled to treat the registered holder of any Global Note as the absolute owner thereof and no person will be liable for treating the registered holder as such. Ownership of the Global Notes will be evidenced through registration from time to time at the registered office of each of the Issuers, and such registration is a means of evidencing title to the Notes.

We will not impose any fees or other charges in respect of the Notes; however, owners of the Book-Entry Interests may incur fees normally payable in respect of the maintenance and operation of accounts in Euroclear and Clearstream, Luxembourg.

Redemption of the Global Notes

In the event that any Global Note (or any portion thereof) is redeemed, Euroclear and/or Clearstream, Luxembourg, as applicable, will redeem an equal amount of the Book-Entry Interests in such Global Note from the amount received by them in respect of the redemption of such Global Note. The redemption price payable in connection with the redemption of such Book- Entry Interests will be equal to the amount received by Euroclear and Clearstream, Luxembourg, as applicable, in connection with the redemption of such Global Note (or any portion thereof). We understand that, under the existing practices of Euroclear and Clearstream, Luxembourg, if fewer than all of the Notes are to be redeemed at any time, Euroclear and Clearstream, Luxembourg will credit their participants' accounts on a proportionate basis (with adjustments to prevent fractions), by lot or on such other basis as they deem fair and appropriate (including the pool factor); *provided, however, that* no Book-Entry Interest of less than €100,000 principal amount may be redeemed in part.

Payments on Global Notes

Each of the Issuers will make payments of any amounts owing in respect of the Global Notes (including principal, premium, if any, interest and additional amounts, if any) to the common depositary or its nominee for Euroclear and Clearstream, Luxembourg. The common depositary will distribute such payments to participants in accordance with their customary procedures. We will make payments of all such amounts without deduction or withholding for, or on account of, any present or future taxes, duties, assessments or governmental charges of whatever nature, except as may be required by law and as described under "*Description of the Senior Secured Notes—Additional Amounts*" and "*Description of the Senior Notes—Additional Amounts*." If any such deduction or withholding is required to be made, then, to the extent described under "*Description of the Senior Secured Notes—Additional Amounts*" and "*Description of the Senior Notes—Additional Amounts*," we will pay additional amounts as may be necessary in order for the net amounts received after such deduction or withholding to equal the net amounts that would have otherwise been received, absent such withholding or deduction. We expect that standing customer instructions and customary practices will govern payments by participants to owners of Book-Entry Interests held through such participants.

Under the terms of the Indentures, each of the Issuers, the Trustees, the Transfer Agent, the Registrar and the Paying Agent will treat the registered holders of the Global Notes (i.e., the common depositary for Euroclear or Clearstream, Luxembourg (or their respective nominees)) as the owners thereof for the purpose of receiving payments and for all other purposes. Consequently, none of us, the Trustee, the Paying Agent, the Transfer Agent or the Registrar, or any of their respective agents has or will have any responsibility or liability for:

- any aspect of the records of Euroclear, Clearstream, Luxembourg or any participant or indirect participant relating to, or payments made on account of, a Book-Entry Interest, for any such payments made by Euroclear or Clearstream, Luxembourg or any participant or indirect participant or for maintaining, supervising or reviewing the records of Euroclear or Clearstream, Luxembourg or any participant or indirect participant relating to, or payments made on account of, a Book-Entry Interest;
- any other matters relating to the actions and practices of Euroclear, Clearstream, Luxembourg or any participant or indirect participant; or
- the records of the common depositary.

Payments by participants to owners of Book-Entry Interests held through participants are the responsibility of such participants.

Currency of Payment for the Global Notes

The principal of, premium, if any, and interest on, and all other amounts payable in respect of, the Global Notes will be paid to holders of interests to such Notes through Euroclear or Clearstream, Luxembourg in euro.

Action by Owners of Book-Entry Interests

Euroclear and Clearstream, Luxembourg have advised us that they will take any action permitted to be taken by a holder of Notes (including the presentation of Notes for exchange as described above) only at the direction of one or more participants to whose account the Book-Entry Interests in the Global Notes are credited and only in respect of such portion of the aggregate principal amount of Notes as to which such participant or participants has or have given such direction. Euroclear and Clearstream, Luxembourg will not exercise any discretion in the granting of consents, waivers or the taking of any other action in respect of the Global Notes. However, if there is an event of default under the Notes, Euroclear and Clearstream, Luxembourg, at the request of the holders of the Notes, reserve the right to exchange the Global Notes for Definitive Registered Notes and to distribute such Definitive Registered Notes to their participants.

Transfers

Transfers between participants in Euroclear or Clearstream, Luxembourg will be effected in accordance with Euroclear and Clearstream, Luxembourg's rules and will be settled in immediately available funds. If a holder of Notes requires physical delivery of Definitive Registered Notes for any reason, including to sell Notes to persons in states that require physical delivery of such securities or to pledge such securities, such holder of Notes must transfer its interests in the Global Notes in accordance with the normal procedures of Euroclear and Clearstream, Luxembourg and in accordance with the procedures set forth in the Indentures.

The Global Notes will bear a legend to the effect set forth under "*Transfer Restrictions*." Book-Entry Interests in the Global Notes will be subject to the restrictions on transfers and certification requirements discussed under "*Transfer Restrictions*."

Transfers of Rule 144A Book-Entry Interests to persons wishing to take delivery of Rule 144A Book-Entry Interests will at all times be subject to such transfer restrictions.

Rule 144A Book-Entry Interests may be transferred to a person who takes delivery in the form of a Regulation S Book-Entry Interest only upon delivery by the transferor of a written certification (in the form provided in the Indentures) to the effect that such transfer is being made in accordance with Regulation S or Rule 144 or any other exemption (if available under the U.S. Securities Act).

Regulation S Book-Entry Interests may be transferred to a person who takes delivery in the form of a Rule 144A Book-Entry Interest only upon delivery by the transferor of a written certification (in the form provided in the Indentures) to the effect that such transfer is being made to a person whom the transferor reasonably believes is a "qualified institutional buyer" within the meaning of Rule 144A in a transaction meeting the requirements of Rule 144A or otherwise in accordance with the transfer restrictions described under "*Transfer Restrictions*" and in accordance with any applicable securities laws of any other jurisdiction.

In connection with transfers involving an exchange of a Regulation S Book-Entry Interest for a Rule 144A Book-Entry Interest, appropriate adjustments will be made to reflect a decrease in the principal amount of the Regulation S Global Note and a corresponding increase in the principal amount of the Rule 144A Global Note.

Definitive Registered Notes may be transferred and exchanged for Book- Entry Interests in a Global Note only as described under "*Description of the Senior Secured Notes—Transfer and Exchange*" and "*Description of the Senior Notes—Transfer and Exchange*" and, if required, only if the transferor first delivers to the Trustee a written certificate (in the form provided in the Indentures) to the effect that such transfer will comply with the appropriate transfer restrictions applicable to such Notes. See "*Transfer Restrictions*."

Any Book-Entry Interest in one of the Global Notes that is transferred to a person who takes delivery in the form of a Book-Entry Interest in any other Global Note will, upon transfer, cease to be a Book-Entry Interest in the first-mentioned Global Note and become a Book-Entry Interest in such other Global Note, and accordingly will thereafter be subject to all transfer restrictions, if any, and other procedures applicable to Book-Entry Interests in such other Global Note for as long as it remains such a Book-Entry Interest.

Information Concerning Euroclear and Clearstream, Luxembourg

All Book-Entry Interests will be subject to the operations and procedures of Euroclear and Clearstream, Luxembourg, as applicable. We have provided the following summaries of those operations and procedures solely for the convenience of investors. The operations and procedures of the settlement system are controlled by the settlement system and may be changed at any time. Neither we, the Initial Purchasers, the Trustee, the Paying Agent, the Registrar nor the Transfer Agent are responsible for those operations or procedures.

We understand as follows with respect to Euroclear and Clearstream, Luxembourg: Euroclear and Clearstream, Luxembourg hold securities for participating organizations. They facilitate the clearance and settlement of securities transactions between their participants through electronic book- entry changes in accounts of such participants. Euroclear and Clearstream, Luxembourg provide various services to their participants, including the safekeeping, administration, clearance, settlement, lending and borrowing of internationally traded securities. Euroclear and Clearstream, Luxembourg interface with domestic securities markets. Euroclear and Clearstream, Luxembourg participants are financial institutions such as underwriters, securities brokers and dealers, banks, trust companies and certain other organizations. Indirect access to Euroclear and Clearstream, Luxembourg is also available to others such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a Euroclear and Clearstream, Luxembourg participant, either directly or indirectly.

Because Euroclear and Clearstream, Luxembourg can only act on behalf of participants, who in turn act on behalf of indirect participants and certain banks, the ability of an owner of a beneficial interest to pledge such interest to persons or entities that do not participate in the Euroclear and/or Clearstream, Luxembourg system, or otherwise take actions in respect of such interest, may be limited by the lack of a definitive certificate for that interest. The laws of some jurisdictions require that certain persons take physical delivery of securities in definitive form. Consequently, the ability to transfer beneficial interests to such persons may be limited. In addition, owners of beneficial interests through the Euroclear or Clearstream, Luxembourg systems will receive distributions attributable to the Rule 144A Global Notes only through Euroclear or Clearstream, Luxembourg participants.

Global Clearance and Settlement Under the Book-Entry System

The Notes represented by the Global Notes are expected to be listed on the Official List of the Irish Stock Exchange and admitted for trading on the Global Exchange Market thereof. Transfers of interests in the Global Notes between participants in Euroclear or Clearstream, Luxembourg will be effected in the ordinary way in accordance with their respective system's rules and operating procedures.

Although Euroclear and Clearstream, Luxembourg currently follow the foregoing procedures in order to facilitate transfers of interests in the Global Notes among participants in Euroclear or Clearstream, Luxembourg, they are under no obligation to perform or continue to perform such procedures, and such procedures may be discontinued or modified at any time. None of the Issuers, any Guarantor, the Initial Purchasers, the Trustees, the Transfer Agents, the Registrars or the Paying Agents will have any responsibility for the performance by Euroclear, Clearstream, Luxembourg or their participants or indirect participants of their respective obligations under the rules and procedures governing their operations.

Initial Settlement

Initial settlement for the Notes will be made in euro. Book-Entry Interests owned through Euroclear or Clearstream, Luxembourg accounts will follow the settlement procedures applicable to conventional bonds in registered form. Book-Entry Interests will be credited to the securities custody accounts of Euroclear and Clearstream, Luxembourg holders on the business day following the settlement date against payment for value of the settlement date.

Secondary Market Trading

The Book-Entry Interests will trade through participants of Euroclear and Clearstream, Luxembourg and will settle in same-day funds. Since the purchase determines the place of delivery, it is important to establish at the time of trading of any Book-Entry Interests where both the purchaser's and the seller's accounts are located to ensure that settlement can be made on the desired value date.

Trustee's Powers

In considering the interests of the holders of Notes, while title to the Notes is registered in the name of a nominee of a clearing system, the relevant Trustee may have regard to, and rely on, any information provided to it by that clearing system as to the identity (either individually or by category) of its accountholders with entitlements to Notes and may consider such interests as if such accountholders were the holders of the Notes.

Enforcement

For the purposes of enforcement of the provisions of the Indentures against the relevant Trustee, the persons named in a certificate of the holder of the Notes in respect of which a Global Note is issued shall be recognized as the beneficiaries of the trusts set forth in the Indentures to the extent of the principal amounts of their interests in the Notes set forth in the certificate of the holder, as if they were themselves the holders of Notes in such principal amounts.

TRANSFER RESTRICTIONS

You are advised to consult legal counsel prior to making any offer, resale, pledge or other transfer of any of the Notes offered hereby or the Notes.

The Notes and the Guarantees have not been and will not be registered under the U.S. Securities Act or any state securities laws and, unless so registered, may not be offered or sold except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Notes offered hereby are being offered and sold only to qualified institutional buyers (as defined in Rule 144A) in reliance on Rule 144A and outside the United States in offshore transactions in reliance on Regulation S.

We have not registered and will not register the Notes or the Guarantees under the U.S. Securities Act and, therefore, the Notes may not be offered or sold within the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act. Accordingly, we are offering and selling the Notes to the Initial Purchasers for re-offer and resale only:

- in the United States to "qualified institutional buyers," commonly referred to as "QIBs," as defined in Rule 144A in compliance with Rule 144A; and
- outside the United States in offshore transactions in accordance with Regulation S.

We use the terms "offshore transaction" and "United States" with the meanings given to them in Regulation S.

Each purchaser of Notes, by its acceptance thereof, will be deemed to have acknowledged, represented to and agreed with the Issuers and the Initial Purchasers as follows:

(1) It understands and acknowledges that the Notes and the Guarantees have not been registered under the U.S. Securities Act or any other applicable state securities laws, and that the Notes are being offered for resale in transactions not requiring registration under the U.S. Securities Act or any state securities law, including sales pursuant to Rule 144A, and, unless so registered, may not be offered, sold or otherwise transferred except in compliance with the registration requirements of the U.S. Securities Act or any other applicable state securities laws, pursuant to an exemption therefrom or in any transaction not subject thereto and in each case in compliance with the conditions for transfer set forth in paragraphs (4) and (5) below.

(2) It is not an "affiliate" (as defined in Rule 144) of the Issuers or acting on behalf of the Issuers and it is either:

(i) a QIB and is aware that any sale of Notes to it will be made in reliance on Rule 144A, and the acquisition of Notes will be for its own account or for the account of another QIB; or

(ii) it is purchasing the Notes in an offshore transaction in accordance with Regulation S.

(3) It acknowledges that none of the Issuers, the Guarantors, the Trustees, the Paying Agents, the Transfer Agents, the Registrars or the Initial Purchasers, or any person representing any of them, have made any representation to it with respect to the offering or sale of any Notes, other than the information contained in this offering memorandum, which offering memorandum has been delivered to it and upon which it is relying in making its investment decision with respect to the Notes. It has had access to such financial and other information concerning us, the Issuers and its subsidiaries and the Notes as it has deemed necessary in connection with its decision to purchase any of the Notes, including an opportunity to ask questions of, and request information from, the Issuers and the Initial Purchasers.

(4) It is purchasing the Notes for its own account, or for one or more investor accounts for which it is acting as a fiduciary or agent, in each case for investment, and not with a view to, or for offer or sale in connection with, any distribution thereof in violation of the U.S. Securities Act or any state securities laws, subject to any requirement of law that the disposition of its property or the property of such investor account or accounts be at all times within its or their control and subject to its or their ability to resell such Notes pursuant to Rule 144A, Regulation S or any other exemption from registration available under the U.S. Securities Act.

(5) Each holder of Notes issued in reliance on Rule 144A ("Rule 144A Notes") agrees on its own behalf and on behalf of any investor account for which it is purchasing the Notes, and each subsequent holder of the Rule 144A Notes by its acceptance thereof will be deemed to agree, to

offer, sell or otherwise transfer such Notes prior to the date (the "Resale Restriction Termination Date") that is one year after the later of the Issue Date and the last date on which the Issuers or any of their affiliates was the owner of such Notes (or any predecessor thereto) only (i) to the Issuers, the Guarantors or any subsidiary thereof, (ii) pursuant to a registration statement that has been declared effective under the U.S. Securities Act, (iii) for so long as the Notes are eligible for resale pursuant to Rule 144A, to a person it reasonably believes is a QIB that purchases for its own account or for the account of a QIB to whom notice is given that the transfer is being made in reliance on Rule 144A, (iv) pursuant to offers and sales that occur outside the United States in compliance with Regulation S or (v) pursuant to any other available exemption from the registration requirements of the U.S. Securities Act, subject in each of the foregoing cases to any requirement of law that the disposition of its property or the property of such investor account or accounts be at all times within its or their control and in compliance with any applicable state securities laws, and any applicable local laws and regulations, and further subject to the Issuers' and the Trustee's rights prior to any such offer, sale or transfer (I) pursuant to clause (iv) or (v) above to require the delivery of an opinion of counsel, certification and/or other information satisfactory to each of them and (II) in each of the foregoing cases, to require that a certificate of transfer in the form appearing on the reverse of the security is completed and delivered by the transferor to the Trustee. The foregoing restrictions on resale will not apply subsequent to the Resale Restriction Termination Date.

Each purchaser acknowledges that each Global Note will contain a legend substantially to the following effect:

THIS SECURITY HAS NOT BEEN AND WILL NOT BE REGISTERED UNDER THE U.S. SECURITIES ACT OF 1933, AS AMENDED (THE "U.S. SECURITIES ACT"), OR THE SECURITIES LAWS OF ANY STATE OR OTHER JURISDICTION. NEITHER THIS SECURITY NOR ANY INTEREST OR PARTICIPATION HEREIN MAY BE OFFERED, SOLD, ASSIGNED, TRANSFERRED, PLEDGED, ENCUMBERED OR OTHERWISE DISPOSED OF IN THE ABSENCE OF SUCH REGISTRATION OR UNLESS SUCH TRANSACTION IS EXEMPT FROM, OR NOT SUBJECT TO, THE REGISTRATION REQUIREMENTS OF THE U.S. SECURITIES ACT.

THE HOLDER OF THIS SECURITY BY ITS ACCEPTANCE HEREOF, AGREES TO OFFER, SELL OR OTHERWISE TRANSFER SUCH SECURITY, PRIOR TO THE DATE (THE "RESALE RESTRICTION TERMINATION DATE") THAT IS ONE YEAR AFTER THE LATER OF THE ORIGINAL ISSUE DATE HEREOF AND THE LAST DATE ON WHICH THE ISSUERS OR ANY AFFILIATE OF THE ISSUERS WAS THE OWNER OF THIS SECURITY (OR ANY PREDECESSOR OF THIS SECURITY) ONLY (A) TO THE ISSUERS, THE GUARANTORS OR ANY SUBSIDIARY THEREOF, (B) PURSUANT TO A REGISTRATION STATEMENT THAT HAS BEEN DECLARED EFFECTIVE UNDER THE U.S. SECURITIES ACT, (C) FOR SO LONG AS THE SECURITIES ARE ELIGIBLE FOR RESALE PURSUANT TO RULE 144A UNDER THE U.S. SECURITIES ACT ("RULE 144A"), TO A PERSON IT REASONABLY BELIEVES IS A "QUALIFIED INSTITUTIONAL BUYER" AS DEFINED IN RULE 144A THAT PURCHASES FOR ITS OWN ACCOUNT OR FOR THE ACCOUNT OF A QUALIFIED INSTITUTIONAL BUYER TO WHOM NOTICE IS GIVEN THAT THE TRANSFER IS BEING MADE IN RELIANCE ON RULE 144A, (D) PURSUANT TO OFFERS AND SALES THAT OCCUR OUTSIDE THE UNITED STATES IN COMPLIANCE WITH REGULATION S UNDER THE U.S. SECURITIES ACT, OR (E) PURSUANT TO ANY OTHER AVAILABLE EXEMPTION FROM THE REGISTRATION REQUIREMENTS OF THE U.S. SECURITIES ACT, SUBJECT IN EACH OF THE FOREGOING CASES TO ANY REQUIREMENT OF LAW THAT THE DISPOSITION OF ITS PROPERTY OR THE PROPERTY OF SUCH INVESTOR ACCOUNT OR ACCOUNTS BE AT ALL TIMES WITHIN ITS OR THEIR CONTROL AND IN COMPLIANCE WITH ANY APPLICABLE STATE SECURITIES LAWS, AND ANY APPLICABLE LOCAL LAWS AND REGULATIONS, AND FURTHER SUBJECT TO THE ISSUER'S AND THE TRUSTEE'S RIGHTS PRIOR TO ANY SUCH OFFER, SALE OR TRANSFER (I) PURSUANT TO CLAUSE (D) OR (E) TO REQUIRE THE DELIVERY OF AN OPINION OF COUNSEL, CERTIFICATION AND/OR OTHER INFORMATION SATISFACTORY TO EACH OF THEM, (II) IN EACH OF THE FOREGOING CASES, TO REQUIRE THAT A CERTIFICATE OF TRANSFER IN THE

FORM APPEARING ON THE REVERSE OF THIS NOTE IS COMPLETED AND DELIVERED BY THE TRANSFEROR TO THE TRUSTEE; AND AGREES THAT IT WILL GIVE TO EACH PERSON TO WHOM THIS NOTE IS TRANSFERRED A NOTICE SUBSTANTIALLY TO THE EFFECT OF THIS LEGEND.

If it purchases Notes, it will also be deemed to acknowledge that the foregoing restrictions apply to holders of beneficial interests in these Notes as well as to holders of these Notes.

(6) It agrees that it will give to each person to whom it transfers the Notes notice of any restrictions on transfer of such Notes.

(7) It acknowledges that the Registrar will not be required to accept for registration or transfer any Notes acquired by it except upon presentation of evidence satisfactory to the Issuers and the Registrar that the restrictions set forth therein have been complied with.

(8) It acknowledges that the Issuers, the Initial Purchasers, the Trustees, the Transfer Agents, the Registrars and others will rely upon the truth and accuracy of the foregoing acknowledgements, representations, warranties and agreements and agrees that if any of the acknowledgements, representations, warranties and agreements deemed to have been made by its purchase of the Notes is no longer accurate, it shall promptly notify the Initial Purchasers. If it is acquiring any Notes as a fiduciary or agent for one or more investor accounts, it represents that it has sole investment discretion with respect to each such investor account and that it has full power to make the foregoing acknowledgements, representations and agreements on behalf of each such investor account.

(9) It understands that no action has been taken in any jurisdiction (including the United States) by the Issuers, any of the Guarantors or the Initial Purchasers that would result in a public offering of the Notes or the possession, circulation or distribution of this offering memorandum or any other material relating to us or the Notes in any jurisdiction where action for such purpose is required. Consequently, any transfer of the Notes will be subject to the selling restrictions set forth under "*Plan of Distribution*."

CERTAIN TAX CONSIDERATIONS

Certain German Tax Considerations

The following is a general discussion of certain German tax consequences of the acquisition, holding and disposal of the Notes. It does not purport to be a comprehensive description of all German tax considerations that may be relevant to a decision to purchase Notes and, in particular, does not consider any specific facts or circumstances that may apply to a particular purchaser. This summary is based on the tax laws of Germany currently in force and as applied on the date of this offering memorandum, which are subject to change, possibly with retroactive or retrospective effect.

PROSPECTIVE PURCHASERS OF THE NOTES ARE ADVISED TO CONSULT THEIR OWN TAX ADVISORS AS TO THE TAX CONSEQUENCES OF THE PURCHASE, OWNERSHIP AND DISPOSAL OF THE NOTES, INCLUDING THE EFFECT OF ANY STATE, LOCAL OR CHURCH TAXES, UNDER THE TAX LAWS OF GERMANY AND ANY COUNTRY OF WHICH THEY ARE RESIDENT OR WHOSE TAX LAWS APPLY TO THEM FOR OTHER REASONS.

Tax Residents

Persons (individuals and corporate entities) who are tax resident in Germany (in particular, persons having a residence, habitual abode, seat or place of management in Germany) are subject to income taxation (income tax or corporate income tax, as the case may be, plus solidarity surcharge thereon plus church tax and/or trade tax, if applicable) on their worldwide income, regardless of its source, including interest from debt of any kind (such as the Notes) and, in general, capital gains.

Taxation if the Notes are held as private assets (Privatvermögen)

In the case of German tax-resident individual investors (*unbeschränkt Steuerpflichtige*) holding the Notes as private assets (*Privatvermögen*), the following applies:

Income

The Notes should qualify as other capital receivables (*sonstige Kapitalforderungen*) in terms of section 20 para 1 no 7 German Income Tax Act ("ITA"—*Einkommensteuergesetz*).

Accordingly, payments of interest on the Notes should qualify as taxable savings income (*Einkünfte aus Kapitalvermögen*) pursuant to section 20 para 1 no 7 ITA.

Capital gains / capital losses realised upon sale of the Notes, computed as the difference between the acquisition costs and the sales proceeds reduced by expenses directly and factually related to the sale, qualify as positive or negative savings income in terms of section 20 para 2 sentence 1 no 7 ITA. Where the Notes are acquired and/or sold in a currency other than euro, the acquisition costs will be converted into euro at the time of acquisition, the sales proceeds will be converted into euro at the time of sale and the difference will then be computed in euro. If the Notes are assigned, redeemed, repaid or contributed into a corporation by way of a hidden contribution (*verdeckte Einlage in eine Kapitalgesellschaft*) rather than sold, as a rule, such transaction is treated like a sale. Losses from the sale of Notes can only be offset against other savings income and, if there is not sufficient other positive savings income, carried forward in subsequent assessment periods.

Pursuant to a tax decree issued by the Federal Ministry of Finance dated October 9, 2012, as amended on, inter alia, December 9. 2014, a sale shall be disregarded where the transaction costs exceed the sales proceeds, which means that losses suffered from such "sale" shall not be tax-deductible. Similarly, a bad debt loss (*Forderungsausfall*) (i.e., should an Issuer become insolvent) and a waiver of a receivable (*Forderungsverzicht*), to the extent the waiver does not qualify as a hidden contribution, shall not be treated like a sale. Accordingly, losses suffered upon such bad debt loss or waiver shall not be tax-deductible. The same shall apply where, based on an agreement with the depositary institution, the transaction costs are calculated on the basis of the sale proceeds taking into account a deductible amount.

German withholding tax (Kapitalertragsteuer)

With regard to savings earnings (*Kapitalerträge*) (e.g., interest or capital gains) German withholding tax (*Kapitalertragsteuer*) will be levied if the Notes are held in a custodial account which the investor maintains with a German branch of a German or non-German credit or financial services institution or with a German securities trading business or a German securities trading bank (a "German Disbursing Agent") and such German Disbursing Agent credits or pays out the earnings.

The tax base is, in principle, equal to the taxable gross income as set out above (i.e. prior to withholding). However, in the case of capital gains, if the custodial account has changed since the time of acquisition of the Notes and the acquisition costs of the Notes are not proven to the German Disbursing Agent in the form required by law (e.g., if the Notes had been transferred from a non-EU custodial account prior to the sale), withholding tax is applied to 30% of the proceeds from the redemption or sale of the Notes. When computing the tax base for withholding tax purposes, the German Disbursing Agent has to deduct any negative savings income (negative *Kapitalerträge*) or paid accrued interest (*Stückzinsen*) in the same calendar year or unused negative savings income of previous calendar years.

German withholding tax will be levied by a German Disbursing Agent at a flat withholding tax rate of 26.375% (including solidarity surcharge) plus, if applicable, church tax. Church tax, if applicable, will be collected by the German Disbursing Agent by way of withholding unless the investor has filed a blocking notice (*Sperrvermerk*) with the German Federal Central Tax Office (*Bundeszentralamt für Steuern*). In the latter case, the investor has to include the savings income in the tax return and will then be assessed to church tax.

No German withholding tax will be levied if the investor has filed a withholding tax exemption certificate (*Freistellungsauftrag*) with the German Disbursing Agent, but only to the extent the savings income does not exceed the exemption amount shown on the withholding tax exemption certificate. Currently, the maximum exemption amount is €801 (€1,602 in the case of jointly assessed investors). Similarly, no withholding tax will be levied if the investor has submitted a certificate of non-assessment (*Nichtveranlagungs-Bescheinigung*) issued by the relevant local tax office to the German Disbursing Agent.

The Issuers are not obliged to levy German withholding tax in respect of payments on the Notes.

Tax assessment

The taxation of savings income shall take place mainly by way of levying withholding tax (please see above). If and to the extent German withholding tax has been levied, such withholding tax shall, in principle, become definitive and replace the investor's income taxation. If no withholding tax has been levied other than by virtue of a withholding tax exemption certificate (*Freistellungsauftrag*) and in certain other cases, the investor is nevertheless obliged to file a tax return, and the savings income will then be taxed within the assessment procedure. If the investor is subject to church tax and has filed a blocking notice (*Sperrvermerk*) with the German Federal Central Tax Office (*Bundeszentralamt für Steuern*), the investor is also obliged to include the savings income in the tax return for church tax purposes.

However, also in the assessment procedure, savings income is principally taxed at a separate tax rate for savings income (*gesonderter Steuertarif für Einkünfte aus Kapitalvermögen*) being identical to the withholding tax rate (26.375%—including solidarity surcharge (*Solidaritätszuschlag*) plus, if applicable, church tax). In certain cases, the investor may apply to be assessed on the basis of its personal tax rate if such rate is lower than the above tax rate. Such application can only be filed consistently for all savings income within the assessment period. In case of jointly assessed investors the application can only be filed for savings income of both investors.

When computing the savings income, the saver's lump sum amount (*Sparer-Pauschbetrag*) of €801 (€1,602 in the case of jointly assessed investors) will be deducted. The deduction of the actual income related expenses, if any, is excluded. That holds true even if the investor applies to be assessed on the basis of its personal tax rate.

Taxation if the Notes are held as business assets (Betriebsvermögen)

In the case of German tax-resident corporations or individual investors (*unbeschränkt Steuerpflichtige*) holding the Notes as business assets (*Betriebsvermögen*), interest payments and capital gains will be subject to corporate income tax at a rate of 15% or income tax at a rate of up to 45%, as the case may be, (in each case plus 5.5% solidarity surcharge thereon). In addition, trade tax may be levied, the rate of which depends on the municipality where the business is located. Further, in the case of individuals, church tax may be levied. Business expenses that are connected with the Notes are deductible.

The provisions regarding German withholding tax (*Kapitalertragsteuer*) apply, in principle, as set out above for private investors. However, investors holding the Notes as business assets cannot file a withholding tax exemption certificate with the German Disbursing Agent. Instead, no withholding tax will be levied on capital gains from the redemption, sale or assignment of the Notes if, for example, (a) the Notes are held by a corporation or (b) the proceeds from the Notes qualify as income of a domestic business and the investor notifies this to the German Disbursing Agent by use of the officially required form.

Any withholding tax levied is credited as prepayment against the German (corporate) income tax amount. If the tax withheld exceeds the respective (corporate) income tax amount, the difference will be refunded within the tax assessment procedure.

Non Tax Residents

Persons who are not tax resident in Germany are not subject to tax with regard to income from the Notes unless (i) the Notes are held as business assets (*Betriebsvermögen*) of a German permanent establishment (including a permanent representative) which is maintained by the investor or (ii) the income from the Notes qualifies for other reasons as taxable German source income. If a non-resident person is subject to tax with its income from the Notes, in principle, similar rules apply as set out above with regard to German tax resident persons (please see above).

If the income is subject to German tax as set out in the preceding paragraph, German withholding tax will be applied like in the case of a German tax resident person.

Inheritance and Gift Tax

A gratuitous transfer of Notes by reason of death or as a gift will be subject to German inheritance or gift tax if the decedent or donor or the heir, donee or other beneficiary is at the time of the transfer a resident or deemed to be a resident of Germany. If neither the holder nor the recipient is a resident or deemed to be a resident of Germany at the time of the transfer, no German inheritance or gift taxes will be levied unless the Notes are attributable to a German trade or business for which a permanent establishment is maintained or a permanent representative has been appointed in Germany. Exceptions from this rule apply to certain German citizens who previously maintained a residence in Germany.

Other Taxes

No stamp, issue or registration taxes or such duties will be payable in Germany in connection with the issuance, delivery or execution of the Notes. Currently, net assets tax (*Vermögensteuer*) is not levied in Germany.

Certain European Taxation Considerations

EU Savings Directive

On June 3, 2003, the European Council of Economic and Finance Ministers adopted Directive 2003/48/EC on the taxation of savings income in the form of interest payments (the "Savings Directive"). Pursuant to the Savings Directive and subject to a number of conditions being met, Member States are required, since July 1, 2005, to provide to the tax authorities of another Member State, among other things, details of payments of interest within the meaning of the Savings Directive (interest, premium or other debt income) made by a paying agent located within its jurisdiction to, or for the benefit of, an individual resident or certain limited types of entities established in that other Member State (the "Disclosure of Information Method").

For these purposes, the term "paying agent" is defined widely and includes, in particular, any economic operator who is responsible for making interest payments, within the meaning of the Savings Directive, for the immediate benefit of individuals. In the case at hand (i) the Issuer, (ii) Euroclear and Clearstream, Luxembourg, (iii) Euroclear's and Clearstream, Luxembourg's common depositary, (iv) Euroclear's and Clearstream, Luxembourg's common depositary's nominee or (v) another entity may be considered a paying agent within the meaning of the Savings Directive depending on (a) the legal status of (ii), (iii) and (iv) and (b) the modalities of the payments made to the holders of the Notes.

However, for a transitional period, Luxembourg and Austria, instead of using the Disclosure of Information Method used by other Member States, decided to withhold an amount of interest payments unless the relevant beneficial owner of such payment elects otherwise for the Disclosure of Information Method or the tax certificate procedure. As Luxembourg decided to apply automatic exchange of information as from January 1, 2015, Austria is the last Member State applying the withholding tax system. The rate of this withholding tax is currently 35%. A number of non-EU countries and dependent or associated territories have agreed to adopt similar measures (transitional withholding or exchange of information).

On March 24, 2014, the Council of the European Union adopted the EU Council Directive 2014/48/EU amending the Savings Directive and broadening the scope of the requirements described above. Member States are required to implement national legislation necessary to comply with this amending directive before January 1, 2016 and to apply these new requirements from January 1, 2017 (except Austria which has until January 1, 2018 to apply these new requirements). The changes will expand the range of payments covered by the Savings Directive, in particular to include additional types of income payable on securities. The Savings Directive will also expand the circumstances in which payments that indirectly benefit an individual resident in a Member State must be reported. This approach may apply to payments made to or by, or secured for or by, persons, entities or legal arrangements (including trusts), where certain conditions are satisfied, and may in some cases apply where the person, entity or arrangement is established or effectively managed outside of the European Union.

Furthermore, the Council of the European Union gave a mandate to the EU Commission to negotiate amended savings tax agreements with Switzerland, Liechtenstein, Monaco, Andorra and San Marino to ensure that these five countries continue to apply measures that are equivalent to the Savings Directive, as amended. In March 2014, the European Council asked the EU Commission to continue the negotiations with a view to concluding them until the end of year 2014. The negotiations are still ongoing.

On October 14, 2014, the Council of the European Union agreed on a draft EU Council Directive extending the scope for the mandatory automatic exchange of information between tax administrations, in the form of an amendment to the existing EU Council Directive 2011/16/EU on administrative cooperation in the field of direct taxation.

On December 9, 2014, the Council of the European Union adopted the EU Council Directive 2014/107/EU (the "DAC Directive") amending the existing EU Council Directive 2011/16/EU on administrative cooperation. The DAC Directive brings interest, dividends and other income, as well as account balances and sales proceeds from financial assets, within the scope of the automatic exchange of information and intends to mirror the global standard of automatic information exchange agreed by the G20. Member States will have to begin the automatic exchange of information under the DAC Directive no later than end of September 2017. The DAC Directive entered into on January 5, 2015. Member States shall adopt and publish by December 31, 2015, their local laws, regulations and administrative provisions necessary to comply with the DAC Directive and apply it as from January 1, 2016. Given that the DAC Directive covers a wide scope of income and capital, including most of that covered by the Savings Directive, the Commission, as requested by the Council of the European Union, previously stated that they will now consider the repeal of the Savings Directive. However, depending on the timing of events, there may be a period where institutions need to report the same income under both directives.

If a payment were to be made or collected through a Member State which has opted for a withholding system and an amount of, or in respect of tax were to be withheld from that payment, neither the Issuer nor any Paying Agent nor any other person would be obliged to pay additional amounts with respect to any Note as a result of the imposition of such withholding tax.

The Issuer is required to maintain a paying agent in a Member State that will not be obliged to withhold or deduct tax pursuant to the Savings Directive.

Prospective investors should inform themselves of, and where appropriate take advice from tax advisers on, the impact of the Savings Directive prior to taking an investment decision in the Notes.

The Proposed Financial Transactions Tax ("FTT")

On February 14, 2013, the European Commission published a proposal (the "Commission's proposal") for a Directive for a common FTT in Belgium, Germany, Estonia, Greece, Spain, France, Italy, Austria, Portugal, Slovenia and Slovakia (the "Participating Member States").

The Commission's proposal has a very broad scope and could, if introduced in its current form, apply to certain dealings in the Notes (including secondary market transactions) in certain circumstances. Primary market transactions referred to in Article 5(c) of Regulation (EC) No 1287/2006 are exempt.

Under the Commission's proposal, FTT could apply in certain circumstances to persons both within and outside of the Participating Member States. Generally, it would apply to certain dealings in the Notes where at least one party is a financial institution, and at least one party is established in a Participating Member State. A financial institution may be, or be deemed to be, "established" in a Participating Member State in a broad range of circumstances, including (i) by transacting with a person established in a Participating Member State or (ii) where the financial instrument which is subject to the dealings is issued in a Participating Member State.

Joint statements issued by ten of the Participating Member States indicate an intention to implement the FTT by January 1, 2016, such that it would initially apply to shares and certain derivatives, with this initial implementation occurring by January 1, 2016.

On October 31, 2014 and December 4, 2014 the President of the Council of the European Union issued reports addressed to such Council on the progress that has been made in relation to the project of introducing the FTT in the Participating Member States since the ECOFIN Council Meeting held on May 6, 2014. These reports include, *inter alia*, proposals for: (i) an exemption for transactions in listed shares of smaller companies which fall below a market capitalization threshold calculated by reference to the Participating Member State in question and (ii) the ability for Participating Member States to opt to tax transactions in non-listed shares of companies located in their jurisdiction (which would otherwise fall outside the FTT regime), marking progress towards introducing the tax on share transactions initially.

However, they acknowledge no consensus among Participating Member States on the types of derivatives which would fall within the FTT or on the application of the key "issuance" and "residence" principles in the collection of the FTT and in revenue allocation between Participating Member States.

The FTT proposal remains subject to negotiation between the Participating Member States. It may therefore be altered prior to any implementation, the timing of which remains unclear. Additional EU Member States may decide to participate.

Prospective holders of the Notes are advised to seek their own professional advice in relation to the FTT.

General—Payments by a Guarantor

If a Guarantor makes any payments in respect of interest on the Notes (or other amounts due under the Notes other than the repayment of principal under the Notes) it is possible that such payments may be subject to withholding tax at applicable rates, subject to such relief as may be available under the provisions of any applicable double taxation treaty, or to any other exemption which may apply.

Certain United Kingdom Taxation Considerations

The following is a summary of the United Kingdom withholding taxation treatment at the date hereof in relation to payments of principal and interest in respect of the Notes and the stamp duty and stamp duty reserve tax considerations on the issue or transfer of the Notes. It is based on current law and the practice of Her Majesty's Revenue and Customs ("HMRC"), which may be subject to change, sometimes with retrospective effect. The comments do not deal with other UK tax aspects of acquiring, holding or disposing of Notes. The comments relate only to the position of persons who are absolute beneficial owners of the Notes. The following is a general guide for information purposes and should be treated with appropriate caution. It is not intended as tax advice and it does not purport to describe all of the tax considerations that may be relevant to a prospective purchaser. Holders of the Notes who are in any doubt as to their tax position should consult their professional advisors. Holders of the Notes who may be liable to taxation in jurisdictions other than the United Kingdom in respect of their acquisition, holding or disposal of the Notes are particularly advised to consult their professional advisors as to whether they are so liable (and if so under the laws of which jurisdictions), since the following comments relate only to certain UK taxation aspects of payments in respect of the Notes. In particular, holders of the Notes should be aware that they may be liable to taxation under the laws of other jurisdictions in relation to payments in respect of the Notes even if such payments may be made without withholding or deduction for or on account of taxation under the laws of the United Kingdom.

For the purpose of the following summary, references to Notes are to the Temporary Senior Secured Notes, the Additional Senior Secured Notes, the Existing Senior Secured Notes and the Senior Notes.

UK Withholding Tax on UK Source Interest

Notes Listed on a Recognised Stock Exchange

The Notes issued by the Issuers which carry a right to interest will constitute "quoted Eurobonds" provided they are and continue to be listed on a recognised stock exchange. While the Notes are and continue to be quoted Eurobonds, payments of interest on the Notes may be made without withholding or deduction for or on account of UK income tax.

Securities will be "listed on a recognised stock exchange" for this purpose if they are admitted to trading on an exchange designated as a recognised stock exchange by an order made by the Commissioners for HMRC and either they are included in the UK official list (within the meaning of Part 6 of the Financial Services and Markets Act 2000) or they are officially listed, in accordance with provisions corresponding to those generally applicable in EEA states, in a country outside the United Kingdom in which there is a recognised stock exchange.

The Irish Stock Exchange is a recognised stock exchange. The Issuer's understanding of current HMRC practice is that securities which are officially listed and admitted to trading on the Global Exchange Market of that Exchange may be regarded as "listed on a recognised stock exchange" for these purposes.

All Notes

In all cases falling outside the exemption described above, interest on the Notes may fall to be paid under deduction of UK income tax at the basic rate (currently 20%) subject to such relief as may be available following a direction from HMRC pursuant to the provisions of any applicable double taxation treaty, or to any other exemption which may apply.

Payments by Guarantor

If the Guarantor makes any payments in respect of interest on Notes issued by the Issuer (or other amounts due under such Notes other than the repayment of amounts subscribed for the Notes) such payments may be subject to UK withholding tax at the basic rate (currently 20%) subject to such relief as may be available under the provisions of any applicable double taxation treaty or to any other exemption which may apply. Such payments by the Guarantor may not be eligible for the exemption described above.

Provision of Information

HMRC have powers to obtain information, including in relation to interest or payments treated as interest and payments derived from securities. This may include details of the beneficial owners of the Notes (or the persons for whom the Notes are held), details of the persons to whom payments derived from the Notes are or may be paid and information in connection with transactions relating to the Notes. Information obtained by HMRC may be provided to tax authorities in other countries.

Other Rules Relating to United Kingdom Withholding Tax

Where Notes are to be, or may fall to be, redeemed at a premium, as opposed to being issued at a discount, then any such element of premium may constitute a payment of interest. Payments of interest are subject to UK withholding tax and reporting requirements as outlined above.

Where interest has been paid under deduction of UK income tax, holders of the Notes who are not resident in the United Kingdom may be able to recover all or part of the tax deducted if there is an appropriate provision in any applicable double taxation treaty.

The references to "interest" in the above mean "interest" as understood in UK tax law. The statements above do not take any account of any different definitions of "interest" or "principal" which may prevail under any other law or which may be created by the terms and conditions of the Notes or any related documentation. Holders of the Notes should seek their own professional advice as regards the withholding tax treatment of any payment on the Notes which does not constitute "interest" or "principal" as those terms are understood in UK tax law. Where a payment on a Note does not constitute (or is not treated as) interest for UK tax purposes, and the payment has a UK source, it would potentially be subject to UK withholding tax if, for example, it constitutes (or is treated as) an annual payment or a manufactured payment for UK tax purposes. In such a case, the payment may fall to be made under deduction of UK tax (the rate of withholding depending on the nature of the payment), subject to such relief as may be available following a direction from HMRC pursuant to the provisions of any applicable double taxation treaty, or to any other exemption which may apply.

The above description of the UK withholding tax position assumes that there will be no substitution of an issuer and does not consider the tax consequences of any such substitution.

Stamp Duty and Stamp Duty Reserve Tax

Provided that the Notes do not carry and will not at any time carry (i) a right to interest the amount of which exceeds a reasonable commercial return on the nominal amount of the capital and (ii) a right on repayment to an amount which exceeds the nominal amount of the capital and is not reasonably comparable with what is generally repayable (in respect of a similar nominal amount of capital) under the terms of issue of loan capital listed in the Official List of the Financial Conduct Authority acting in its capacity as the competent authority for the purposes of Part VI of the Financial Services and Markets Act 2000, no UK stamp duty or stamp duty reserve tax is payable on the issue of the Notes or on a transfer of, or agreement to transfer, full legal and beneficial ownership of any Note. The statement in relation to the transfer of, or agreement to transfer, the Notes assumes that neither legal nor covenant defeasance has been exercised at the time of the transfer of, or agreement to transfer, such Notes.

No UK stamp duty or stamp duty reserve tax should be payable on the automatic exchange, as set out in "*Description of the Temporary Senior Secured Notes*," of the Temporary Senior Secured Notes for Additional Senior Secured Notes on completion.

Certain U.S. Federal Income Tax Consequences

The following is a summary of certain U.S. federal income tax consequences of the purchase, ownership and disposition of the Notes and of the automatic exchange of the Temporary Senior Secured Notes for Additional Senior Secured Notes, and except for the discussion below under "*—Additional Notes*" and "*—Foreign Account Tax Compliance Act*," is only addressed to investors that are U.S. holders (as defined below). This discussion does not purport to be a complete analysis of all potential tax effects relating to an investment in the Notes. This summary deals only with Notes that are held as capital assets (generally, property held for investment) by an investor who acquires Notes upon original issuance at their "issue price," which is set out on the cover page of this offering memorandum).

For purposes of this discussion, a "U.S. holder" means a beneficial owner of Notes that is, for U.S. federal income tax purposes, any of the following:

- an individual who is a citizen or resident of the United States;
- a corporation (or any other entity treated as a corporation for U.S. federal income tax purposes) created or organized in or under the laws of the United States, any state thereof or the District of Columbia;
- an estate, the income of which is subject to U.S. federal income taxation regardless of its source; or
- a trust if it (1) is subject to the primary supervision of a court within the United States and one or more U.S. persons have the authority to control all substantial decisions of the trust or (2) has a valid election in effect under applicable U.S. Treasury Regulations (the "Treasury Regulations") to be treated as a U.S. person.

This summary is based upon provisions of the U.S. Internal Revenue Code of 1986, as amended (the "Code"), final, temporary and proposed Treasury Regulations promulgated thereunder, judicial authority, published administrative positions and procedures of the U.S. Internal Revenue Service (the "IRS") and other applicable authorities, all as in effect on the date of this offering memorandum. Changes in such rules, or new interpretations thereof, may have retroactive effect and could significantly affect the U.S. federal income tax consequences described below. We have not sought any ruling from the IRS with respect to the statements made and the conclusions reached in the following summary and there can be no assurance that the IRS or a court will agree with our statements and conclusions or that a court would not sustain any challenge by the IRS in the event of litigation.

This summary is general in nature and does not purport to address all aspects of U.S. federal taxation or all tax considerations that may be relevant to a U.S. holder in light of its particular circumstances. In addition, it does not address the U.S. federal income tax consequences applicable to you if you are subject to special treatment under the U.S. federal income tax laws. For example, this summary does not address:

- tax consequences to holders who may be subject to special tax treatment, such as dealers in securities or currencies, traders in securities that elect to use the mark-to-market method of accounting for their securities, banks, financial institutions, individual retirement and other tax-deferred accounts, regulated investment companies, real estate investment trusts, S corporations, mutual funds, investors in partnerships or other pass-through entities for U.S. income tax purposes, tax-exempt entities or insurance companies;
- tax consequences to persons holding the Notes as part of a hedging, integrated, constructive sale or conversion transaction or a straddle;
- tax consequences to a U.S. holder of the Notes whose "functional currency" is not the U.S. dollar;
- tax consequences to U.S. expatriates or entities covered by the U.S. anti-inversion rules;
- tax consequences to persons who are not U.S. holders (except for the discussion below under "*—Additional Notes*" and "*—Foreign Account Tax Compliance Act*");
- persons who are resident in any jurisdiction other than the United States or have a taxable presence therein;
- alternative minimum tax consequences, if any; or
- any U.S. federal tax consequences other than income taxation or any state, local or non-U.S. tax consequences.

If a partnership (or other entity treated as a partnership for U.S. federal income tax purposes) holds the Notes, the tax treatment of a partner generally will depend upon the status of the partner and the activities of the partner and the partnership. If you are a partner of a partnership holding Notes, you should consult your own tax advisor.

The following discussion is for informational purposes only and is not a substitute for careful tax planning and advice. If you are considering the purchase of Notes, you should consult your own tax advisor concerning the particular U.S. federal income tax consequences to you of the purchase, ownership and disposition of the Notes, as well as the consequences to you arising under any other federal tax laws, under the laws of any other taxing jurisdiction or due to changes in tax law.

The automatic exchange of the Temporary Senior Secured Notes for Additional Senior Secured Notes will not be a taxable event for U.S. federal income tax purposes.

Additional Payments

We may be required to pay additional amounts if certain taxes are withheld or deducted from payments on the Notes (as described under "*Description of the Senior Secured Notes—Additional Amounts*" and "*Description of the Senior Notes—Additional Amounts*") or make additional payments in redemption of the Notes in addition to their stated principal amount and accrued interest (as described under "*Description of the Senior Secured Notes—Repurchase at the Option of Holders—Change of Control*" and "*Description of the Senior Notes—Repurchase at the Option of Holders—Change of Control*" and "*Description of the Senior Secured Notes—Optional Redemption*" and "*Description of the Senior Notes—Optional Redemption*"). Although the issue is not free from doubt, we intend to take the position that the possibility of paying such additional amounts, or making additional payments in redemption of the Notes, does not result in the Notes being treated as contingent payment debt instruments under the applicable Treasury Regulations. If we become obligated to pay additional amounts, then we intend to take the position that such amounts will be treated as ordinary interest income and taxed as described under "*—Payments of Stated Interest*" below. If we become obligated to make additional payments in redemption, then we intend to take the position that such payments will be treated as additional proceeds and taxed as described under "*—Sale, Exchange or Retirement of Notes*." These positions will be based in part on our determination that, as of the date of the issuance of the Notes, the possibility that additional amounts will have to be paid, or additional payments in redemption of the Notes will have to be made, was a remote or incidental contingency within the meaning of the applicable Treasury Regulations.

Our determination that these contingencies are remote or incidental is binding on a holder, unless the holder explicitly discloses to the IRS on its tax return for the year during which such holder acquires the

Notes that it is taking a different position. However, our position is not binding on the IRS. If the IRS takes a contrary position to that described above, a holder may be required to accrue interest income on the Notes based upon a comparable yield, regardless of its method of accounting. The "comparable yield" is the yield at which we would issue a fixed rate debt instrument with no contingent payments, but with terms and conditions otherwise similar to those of the Notes. In addition, any gain on the sale, exchange, redemption or other taxable disposition of the Notes would be recharacterized as ordinary income. Each holder should consult its own tax advisor regarding the tax consequences of the Notes being treated as contingent payment debt instruments. The remainder of this discussion assumes that the Notes will not be treated as contingent payment debt instruments.

Payments of Stated Interest

Subject to the discussion below under "*—Pre-issuance Accrued Interest*" and "*—Amortizable Bond Premium*," stated interest on a Note will be included in the gross income of a U.S. holder as ordinary income at the time that such interest is accrued or received, in accordance with the holder's method of accounting for U.S. federal income tax purposes.

If you use the cash basis method of accounting for U.S. federal income tax purposes, you will be required to include in income the U.S. dollar value of the amount of stated interest received on the Notes, determined by translating the euros received at the "spot rate" on the date such payment is received regardless of whether the payment is in fact converted into U.S. dollars. Under applicable Treasury Regulations, the "spot rate" generally means a rate that reflects a fair market rate of exchange available to the public for currency under a "spot contract" in a free market and involving representative amounts. A "spot contract" is a contract to buy or sell a currency on the nearest conventional settlement date, generally two business days following the date of the execution of the contract. If such a spot rate cannot be demonstrated, the IRS has the authority to determine the spot rate.

If you use the accrual method of accounting for U.S. federal income tax purposes or are otherwise required to accrue interest prior to receipt, you may determine the amount of income recognized with respect to such stated interest on the Notes in accordance with either of two methods. Under the first method, you will be required to include in income for each taxable year the U.S. dollar value of the stated interest that has accrued during such year, determined by translating such interest at the average rate of exchange for the period or periods during which such interest accrued. Under the second method, you may elect to translate stated interest income at the spot rate on (i) the last day of the accrual period, (ii) if the accrual period straddles your taxable year, the last day of the taxable year with respect to each partial accrual period or (iii) the date on which the stated interest payment is received if such date is within five business days of the end of the accrual period. This election will apply to all debt obligations you hold from year to year and cannot be changed without the consent of the IRS. You should consult your own tax advisor as to the availability and advisability of making such election.

Upon receipt of a stated interest payment on a Note (including the receipt of proceeds that include amounts attributable to accrued interest previously included in income), a U.S. holder that uses the accrual method of accounting for tax purposes or is otherwise required to accrue interest prior to receipt generally will recognize U.S. source ordinary gain or loss in an amount equal to the difference between the U.S. dollar value of such payment (determined by translating the euros received at the "spot rate" on the date such payment is received) and the U.S. dollar value of the stated interest income you previously included in income with respect to such payment.

You may be entitled to deduct or credit foreign taxes, if any, imposed on stated interest (including any additional amounts), subject to certain limitations (including that the election to deduct or credit foreign taxes applies to all of your other applicable foreign taxes for a particular tax year). Stated interest income (including any additional amounts and without reduction for any amounts withheld) on a Note generally will be considered foreign source income and, for purposes of the U.S. foreign tax credit, generally will be considered passive category income. You generally will be denied a foreign tax credit for foreign taxes imposed with respect to the Notes where you do not meet a minimum holding period requirement during which you are not protected from risk of loss. The rules governing the foreign tax credit are complex and this paragraph discusses those rules only at a high level of generality. You are urged to consult your tax advisor regarding the availability of the foreign tax credit under your particular circumstances.

Pre-Issuance Accrued Interest

A portion of the price paid for the Temporary Senior Secured Notes may be allocable to interest that accrued prior to the date the Note is purchased (the "**pre-issuance accrued interest**"). The Senior Secured Issuer intends to take the position that, on the first interest payment date, a portion of the interest received in an amount equal to the pre-issuance accrued interest will be treated as a return of the pre-issuance accrued interest and not as a payment of interest on the Note. Based on this treatment, a U.S. holder's basis in the Note will not include the portion of the purchase price allocable to the pre-issuance accrued interest and, amounts treated as a return of pre-issuance accrued interest should not be taxable when received (except that a U.S. holder generally would be required to recognize exchange gain or loss, as discussed below, in an amount equal to the difference, if any, between the U.S. dollar value of the pre-issuance accrued interest at the time of purchase and at the time the payment of such pre-issuance accrued interest is received, as determined at the spot rate in effect on each such date). U.S. holders should consult their tax advisors with regard to the tax treatment of the pre-issuance accrued interest on the Notes.

Amortizable Bond Premium

If a U.S. holder purchases a Note for an amount (not including any amount paid for pre-issuance accrued interest, as discussed above) that exceeds the amount payable at maturity, the U.S. holder will be considered to have purchased the Note with amortizable bond premium equal in amount to such excess. The U.S. holder may elect to amortize this premium, using a constant yield method, over the remaining term of the Note as an offset to stated interest. A U.S. holder who elects to amortize bond premium may recognize exchange gain or loss each period equal to the difference between the U.S. dollar value of bond premium with respect to such period determined on the date the interest attributable to such period is received and the U.S. dollar value of such amortized bond premium determined on the date of the acquisition of the relevant Notes. A U.S. holder who elects to amortize bond premium must reduce its tax basis in the Note by the amount of the premium amortized in any year. An election to amortize bond premium applies to all taxable debt obligations then owned and thereafter acquired by the U.S. holder and may be revoked only with the consent of the IRS. If a U.S. holder does not elect to amortize bond premium, that premium will decrease the gain or increase the loss such U.S. holder would otherwise recognize on the disposition of the Note.

The Notes are subject to call provisions at our option at various times. A U.S. holder will calculate the amount of amortizable bond premium based on the amount payable on an applicable call date if the use of the call price and the call date results in a smaller amortizable bond premium for the period before the call date. In the event that we do not exercise our call rights on such call date, solely for purposes of calculating amortizable bond premium, the Note generally should be treated as reissued on the call date for the call price, and the U.S. holder will recalculate the amount of any amortizable bond premium on such Note pursuant to the principles described above. The foregoing rules may eliminate, reduce or defer any amortization deductions.

You should consult your own tax advisor regarding the existence of bond premium and the application of these rules.

Additional Notes

Each Issuer may issue additional Notes as described under "*Description of the Senior Secured Notes*" and "*Description of the Senior Notes*." These Notes, even if they are treated for non-tax purposes as part of the same series as the original Notes in some cases may be treated as a separate series for U.S. federal income tax purposes. In such case, the additional Notes may be considered to have original issue discount which may affect the market value of the original Notes, if the additional Notes are not otherwise distinguishable from the original Notes.

Sale, Exchange or Retirement of Notes

If you sell or exchange a Note, or if a Note that you hold is retired, you generally will recognize gain or loss equal to the difference between the amount you realize on the transaction (less any amount attributable to accrued but unpaid interest which, to the extent you have not previously included it in income, will be subject to tax in the manner described under "*—Payments of Stated Interest*" and any amount attributable to pre-issuance accrued interest) and your adjusted tax basis in the Note. Your adjusted tax basis in a Note generally will equal the U.S. dollar value of your purchase price for the Note on the date of such purchase decreased by any bond premium previously amortized on the Note and by the portion of the purchase price allocable to any pre-issuance accrued interest and by the aggregate amount of any payments (other than stated interest) on such Note previously made to you. If you sell or exchange a Note for euros, or receive euros on the retirement of a Note, the amount you will realize for U.S. federal income tax purposes generally will be the U.S. dollar value of the euros that you receive on the date of such sale, exchange or retirement. If the Note is traded on an established securities market, a cash-basis U.S. holder (or, if it so elects, an accrual-basis U.S. holder) will determine the U.S. dollar value of euros paid or received by translating such amount at the spot rate of exchange on the settlement date of the purchase. Any such election made by an accrual-basis U.S. holder must be applied consistently to all debt instruments from year to year and cannot be changed without the consent of the IRS.

Except as discussed below with respect to foreign currency gain or loss, any gain or loss that you recognize on the sale, exchange or retirement of a Note generally will be U.S.-source capital gain or loss, and will be long-term capital gain or loss if you have held the Note for more than one year on the date of disposition. Long-term capital gains of individuals generally are eligible for reduced rates of taxation. The deductibility of capital losses is subject to limitations.

Despite the foregoing, gain or loss that you recognize on the sale, exchange or retirement of a Note generally will be treated as U.S.-source ordinary income or loss to the extent that the gain or loss is exchange gain or loss with respect to the principal of such Note. For these purposes, the principal amount of the Note is your purchase price and the amount of exchange gain or loss recognized generally will be equal to the difference between (i) the U.S. dollar value of your purchase price for the Note, decreased by any amortized bond premium, calculated in euros as of the date of such sale, exchange or retirement and (ii) the U.S. dollar value of your purchase price for the Note, decreased by any amortized bond premium, calculated as of the date you purchased the Note (or, in the case of a cash-basis or electing accrual-basis U.S. holder, the settlement dates of such purchase and taxable disposition, if the Note is treated as traded on an established securities market for U.S. federal income tax purposes). The amount of exchange gain or loss (including with respect to accrued interest) will be limited to the amount of overall gain or loss realized on your disposition of the Note.

Exchange of Foreign Currencies

A U.S. holder's tax basis in the euro received as interest on a Note will be the U.S. dollar value of such euro at the spot rate in effect on the date that the euro are received. On the sale, exchange or retirement of a Note, if the Notes are traded on an established securities market, a cash-basis or electing accrual-basis U.S. holder will have a basis in the euro received equal to the U.S. dollar value of such euro at the spot rate in effect on the settlement date of such sale, exchange, or retirement (that is, the same date that the euro are valued for purposes of determining the amount realized on the Note). In all other cases, since the amount realized is based on the spot rate in effect on the date of the sale, exchange or retirement of the Note, (i) the U.S. holder will realize foreign exchange gain or loss to the extent the U.S. dollar value of the euro received (based on the spot rate in effect on the date of receipt) differs from the U.S. dollar value of the euro on the date of the sale, exchange, or retirement of the Note, and (ii) the U.S. holder's basis in the euro received will equal the U.S. dollar value of the euro, based on the spot rate in effect on the date of receipt. Any gain or loss recognized by a U.S. holder on a sale, exchange or other disposal of the euro will be ordinary income or loss and generally will be U.S. source income or loss for U.S. foreign tax credit purposes.

Reportable Transactions

You may be subject to reporting requirements with respect to your investment in the Notes on IRS Form 8886 (Reportable Transaction Disclosure Statement) if you recognize foreign currency exchange loss that exceeds certain threshold amounts. You are urged to consult your own tax advisor to determine the reporting obligations, if any, with respect to an investment in the Notes, including any requirement to file IRS Form 8886.

Foreign Financial Asset Reporting

Certain U.S. holders (including individuals) are subject to reporting requirements on the holding of certain foreign financial assets, including debt of foreign entities, if the aggregate value of all of these assets exceeds certain threshold amounts. The Notes are expected to constitute foreign financial assets subject to these requirements, unless the Notes are held in an account at certain financial institutions. U.S. holders should consult their tax advisors regarding the application of this legislation.

Medicare Contribution Tax

Certain U.S. holders that are individuals, estates or trusts will be required to pay up to an additional 3.8% tax on interest and capital gains. You are urged to consult your own tax advisor regarding the effect, if any, of such additional tax on your ownership and disposition of the Notes.

Backup Withholding and Information Reporting

Payments in respect of the Notes that are made within the United States or through certain U.S.-related financial intermediaries are subject to information reporting and may be subject to backup withholding at a rate of 28% unless you (i) properly establish you are a corporation or other exempt recipient or (ii) in the case of backup withholding, provide an accurate taxpayer identification number and certify that no loss of exemption from backup withholding has occurred.

Backup withholding is not an additional tax. Amounts withheld as backup withholding may be credited against your U.S. federal income tax liability. You may obtain a refund of any excess amounts withheld under the backup withholding rules by timely filing the appropriate claim for refund with the IRS and furnishing any required information.

Foreign Account Tax Compliance Act

Pursuant to Sections 1471 through 1474 of the Code (provisions commonly known as "FATCA"), a "foreign financial institution" may be required to withhold U.S. tax on debt instruments and the gross proceeds from the disposition of such debt instruments, unless the recipient of payments or gross proceeds establishes an exemption from such tax. However, the application of these rules is not clear. If the Issuers were treated as a foreign financial institution, Notes issued on or prior to the date that is six months after the date on which applicable final regulations are filed generally would be "grandfathered" unless materially modified after such date. No such regulations have yet been issued. Accordingly, even if withholding under FATCA were otherwise potentially applicable to payments on or with respect to the Notes, such withholding will not apply to those payments under the grandfathering rules, unless the Notes were materially modified after the applicable date. However, if additional Notes are issued after the expiration of the grandfathering period, such additional Notes have the same ISIN or common code as the Notes, and such additional Notes are subject to withholding under FATCA, then withholding agents may treat all Notes, as subject to withholding under FATCA. Non-U.S. governments have entered into agreements with the United States (and additional non-U.S. governments are expected to enter into such agreements) to implement FATCA in a manner that may alter the rules described herein. Holders should consult their own tax advisors on how these rules may apply to their investment in the Notes. In the event any withholding under FATCA is imposed with respect to any payments on the Notes, there generally will be no additional amounts payable to compensate for the withheld amount.

LIMITATIONS ON VALIDITY AND ENFORCEABILITY OF THE GUARANTEES AND THE SECURITY INTERESTS AND CERTAIN INSOLVENCY LAW CONSIDERATIONS

Set forth below is a summary of certain limitations on the enforceability of the guarantees and the security interests, and a summary of certain insolvency law considerations in each of the jurisdictions in which the Issuers and Guarantors are organized. This is a summary only, and bankruptcy, insolvency or similar proceedings could be initiated in any of these jurisdictions and in the jurisdiction of organization of a future guarantor of the Notes. The application of these various laws in multiple jurisdictions could trigger disputes over which jurisdictions' law should apply and could adversely affect your ability to enforce your rights and to collect payment in full under the Notes, the guarantees and the security interests on the Collateral.

European Union

Pursuant to Council Regulation (EC) no. 1346/2000 on insolvency proceedings, as amended from time to time (the "EU Insolvency Regulation"), the court that shall have jurisdiction to open main insolvency proceedings in relation to a company is the court of the EU Member State where the company concerned has its "centre of main interests" (as that term is used in Article 3(1) of the EU Insolvency Regulation). The determination of where any such company has its "centre of main interests" is a question of fact on which the courts of the different EU Member States may have differing and even conflicting views (note that the EU Regulation does not apply in Denmark).

The term "centre of main interests" is not a static concept. Although there is a rebuttable presumption under Article 3(1) of the EU Insolvency Regulation that any such company has its "centre of main interests" in the EU Member State in which it has its registered office, Preamble 13 of the EU Insolvency Regulation states that the "centre of main interests" of a debtor should correspond to the place where the debtor conducts the administration of its interests on a regular basis and "is therefore ascertainable by third parties." In that respect, factors such as where board meetings are held, the location where the company conducts the majority of its business and the location where the large majority of the company's creditors are established may all be relevant in the determination of the place where the company has its "centre of main interests."

If the "centre of main interests" of a company is and will remain located in the state in which it has its registered office, the main insolvency proceedings in respect of the company under the EU Insolvency Regulation would be commenced in such jurisdiction and accordingly a court in such jurisdiction would be entitled to commence the types of insolvency proceedings referred to in Annex A to the EU Insolvency Regulation. Main insolvency proceedings opened in one EU Member State under the EU Insolvency Regulation are to be recognized in the other EU Member States. Under Article 3(2) of the EU Insolvency Regulation, the courts of an EU Member State where the company does not have its "center of main interest" have jurisdiction to open "territorial proceedings" or "secondary proceedings" only in the event that such debtor has an "establishment" in the territory of such other EU Member State. The effects of secondary proceedings are restricted to the assets of the debtor situated in the territory of such other EU Member State. If the company does not have an establishment (within the meaning of Article 2(h) of the EU Insolvency Regulation) in any other EU Member State, no court of any other EU Member State has jurisdiction to open territorial or secondary proceedings in respect of such company under the EU Insolvency Regulation. In the event that any one or more of the Issuers, the Guarantors or any of the Issuer's subsidiaries experience financial difficulties, it is not possible to predict with certainty in which jurisdiction or jurisdictions insolvency or similar proceedings would be commenced, or the outcome of such proceedings. Applicable insolvency laws may affect the enforceability of the obligations and the security of the Issuers and the Guarantors.

Where main proceedings have been opened in the EU Member State in which the company has its "centre of main interests" any proceedings opened subsequently in another EU Member State in which the company has an establishment (secondary proceedings) are limited to "winding-up proceedings" listed in Annex B of the EU Insolvency Regulation. Where main proceedings in the EU Member State in which the company has its "centre of main interests" have not yet been opened, territorial insolvency proceedings can only be opened in another EU Member State where the company has an establishment where either (i) insolvency proceedings cannot be opened in the EU Member State in which the company's "centre of main interests" is situated under that EU Member State's law; or (ii) the territorial insolvency proceedings are opened at the request of a creditor that is domiciled, habitually resident or has its registered office in the other EU Member State where the establishment is situated or whose claim arises from the operation of that establishment.

The courts of all EU Member States must recognize the judgment of the court opening main proceedings which will be given the same effect in the other EU Member States so long as no territorial proceedings have been opened there. The liquidator appointed by a court in a EU Member State that has jurisdiction to open main proceedings (because the company's "centre of main interests" is there) may exercise the powers conferred on him or her by the law of that EU Member State in another EU Member State (such as to remove assets of the company from that other EU Member State) subject to certain limitations so long as no insolvency proceedings have been opened in that other EU Member State nor any preservation measure to the contrary has been taken there further to a request for the opening of insolvency proceedings in that other EU Member State.

The EU Insolvency Regulation has been replaced by the Regulation (EU) 2015/848 of the European Parliament and of the Council dated May 20, 2015 (the "New EU Insolvency Regulation") which became effective as of June 26, 2015, and which will be applicable to insolvency proceedings opened after June 26, 2017. The EU Insolvency Regulation remains applicable to insolvency proceedings opened before that date.

The New EU Insolvency Regulation includes, among others, specifications regarding the identification of the center of main interests. Pursuant to Article 3(1) of the New EU Insolvency Regulation, in the case of a company or legal person, the center of main interests is presumed to be located in the country of the registered office in the absence of proof to the contrary. That presumption shall only apply if the registered office has not been moved to another member state within the three-month period prior to the request for the opening of insolvency proceedings. Specifically, the presumption of the center of main interests being at the place of the registered office should be rebuttable if the company's central administration is located in another member state than the one where it has its registered office, and where a comprehensive assessment of all the relevant factors establishes, in a manner that is ascertainable by third parties, that the company's actual center of management and supervision and the center of the management of its interests is located in that other member state. In this regard, special consideration should be given to creditors and their perception as to where a debtor conducts the administration of its interests. In the event of a shift in the center of main interests, this may require informing the creditors of the new location from which the debtor is carrying out its activities in due course (e.g. by drawing attention to the change of address in commercial correspondence or otherwise making the new location public through other appropriate means). Another change under the New EU Insolvency Regulation focuses on the definition of "establishment" as a prerequisite to open "territorial proceedings" (secondary proceedings). From June 26, 2017 onwards, "establishment" will mean any place of operations where a debtor carries out or has carried out in the three-month period prior to the request to open main insolvency proceedings a non-transitory economic activity with human means and assets.

Austria

Insolvency

Certain Guarantors are organized under the laws of Austria and may have their centre of main interest in Austria or assets located in Austria (each, an "Austrian Guarantor"). Consequently, any insolvency proceedings with respect to these Guarantors will therefore likely be opened in Austria and governed by the Austrian Insolvency Code (*Insolvenzordnung, IO*). The insolvency laws of Austria and, in particular, the provisions of the Austrian Insolvency Code, may not be as favorable to creditors as the insolvency laws of other jurisdictions, and hence may limit the ability of creditors to recover payments due on the Notes to an extent exceeding the limitations arising under other insolvency laws.

The following is a brief description of certain aspects of the insolvency laws of Austria.

The Austrian Insolvency Code

The Austrian Insolvency Code regulates (i) bankruptcy proceedings (*Konkursverfahren*) in which the debtor's assets or business as a whole are sold and the proceeds are distributed among its creditors, after the deduction of the costs of the proceedings and the insolvency administrator, and (ii) restructuring proceedings (*Sanierungsverfahren*) which enable the debtor to discharge its liabilities by quota payments and to continue its activities under certain conditions.

A court is required to open insolvency proceedings upon application by the debtor or a creditor, if it can be satisfactorily shown that the relevant company is (i) insolvent (*zahlungsunfähig*), i.e., in principle, unable to pay its debts as and when they fall due, or (ii) over-indebted in terms of insolvency law (*insolvenzrechtlich überschuldet*), which is generally the case, if the company's liabilities exceed its assets at liquidation values under Austrian GAAP on a standalone basis and if there is a negative forecast on the company's future survival (negative going-concern prognosis (*negative Fortbestehensprognose*)), provided that the insolvency estate's value is sufficient to cover at least the costs of the insolvency proceedings. A court may also open restructuring proceedings (*Sanierungsverfahren*), if the risk of the debtor's inability to pay its debts is at least imminent (*drohende Zahlungsunfähigkeit*) and the debtor files an application for the opening of such proceedings.

Depending on whether or not an acceptable restructuring plan (*Sanierungsplan*) is presented together with the application for the opening of insolvency proceedings, the court will designate the insolvency proceedings as restructuring proceedings (*Sanierungsverfahren*) or bankruptcy proceedings (*Konkursverfahren*). If the debtor applies for the opening of insolvency proceedings in the form of restructuring proceedings and presents an acceptable restructuring plan (*Sanierungsplan*) that offers a quota of at least 20% to the unsecured creditors payable within a maximum of two years (in case of entrepreneurs), the insolvency proceedings will be designated as restructuring proceedings. A debtor may also present a restructuring plan in the course of bankruptcy proceedings; however, if the restructuring plan is presented after the opening of the proceedings, the relevant proceedings will continue to be designated as bankruptcy proceedings. If the debtor applies for the opening of insolvency proceedings and presents qualified documents together with a restructuring plan offering a quota of at least 30% to the unsecured creditors payable within a maximum of two years, it is entitled to self-administration (*Sanierungsverfahren mit Eigenverwaltung unter Aufsicht eines Verwalters*). The entitlement may be withdrawn, if, for example, negative effects on the creditors' positions can be expected.

A restructuring plan generally intends to discharge the debtor from a portion of its debts (up to 80%) and to enable the debtor to continue its business activities. The restructuring plan requires the approval of a qualified simple majority of the unsecured creditors (*Insolvenzgläubiger*) (i.e., the majority of all unsecured creditors present at the hearing, provided that the total sum of these creditors' claims amounts to more than 50% of the unsecured claims present at the hearing). If the restructuring plan is accepted by the creditors, confirmed by the court and fulfilled by the debtor, the latter is released from the remainder of its debts. If the implementation of a restructuring plan fails, the insolvency proceedings will be continued as bankruptcy proceeding.

Unless the debtor meets the requirements for self-administration, the debtor may no longer dispose of the assets subject to insolvency, i.e., the insolvency estate (*Insolvenzmasse*), following the opening of the insolvency proceedings. In this case, the court appoints an insolvency administrator (*Insolvenzverwalter*), and, if necessary in light of the specifics or size of the debtor's business or in case certain legal requirements are met (e.g., the intended sale of the entire business of the debtor), a creditors' committee (*Gläubigerausschuss*) to assist the insolvency administrator. The opening of the proceedings takes effect as of 0:00 a.m. on the day following the publication of the insolvency order (*Insolvenzedikt*) in the Austrian electronic Insolvency Register (*Ediktsdatei*). Following the opening of insolvency proceedings without self-administration (i.e., bankruptcy proceedings or restructuring proceedings without self-administration), any legal acts of the debtor in relation to its estate take no effect towards creditors and only the insolvency administrator is entitled to act on behalf of the debtor's estate. The insolvency administrator's main task is to administer and realize the assets of the insolvent's estate. The insolvency administrator is generally required to continue the debtor's business in order to enable a potential reorganization of the debtor's business either by implementing the debtor's restructuring plan or by a sale of the debtor's business or assets. If neither a restructuring plan nor the sale of the debtor's business or assets is possible, the insolvency administrator will dissolve the company and the bankruptcy proceedings will ultimately lead to the sale and distribution of the debtor's assets, with the debtor remaining liable for its residual debts.

If the debtor meets the requirements for self-administration, the debtor is monitored by a court appointed restructuring administrator (*Sanierungsverwalter*). Certain transactions are reserved to the restructuring administrator.

Unsecured creditors must file their claims with the competent court within the time period prescribed by the court order regarding the opening of insolvency proceedings. At the so-called examination hearing (*Prüfungstagsatzung*), which is held at the competent court, the insolvency administrator is required to declare whether he acknowledges or contests the filed claims. If the insolvency administrator acknowledges a creditor's claim, the relevant creditor is entitled to participate in the insolvency proceedings, which means that the creditor will finally receive the quota that is distributed to the unsecured creditors. If the insolvency administrator contests a creditor's claim, the creditor is required to assert its claim in civil proceedings in order to maintain its right to participate in the insolvency proceedings.

In the insolvency proceedings, claims of unsecured creditors that were created before the opening of the proceedings rank *pari passu*. Wages and salaries are not, as such, privileged or preferential claims under Austrian insolvency law, and the same generally applies to taxes and social security contributions. Any claims against the debtor's estate that lawfully came into existence after the opening of the proceedings (including the costs of the insolvency proceedings), so-called privileged claims (*Masseforderungen*), or claims that are secured by collateral (such as by a mortgage, a pledge over bank accounts or shares, a pledge or an assignment of receivables for security purposes or a pledge or security transfer of moveable assets), as well as so-called preferential claims (*Absonderungsrechte*), enjoy priority in the insolvency proceedings.

Creditors who are entitled to preferential treatment may only participate in the pro rata distribution to the extent that (i) the proceeds from the realization of the assets charged to them do not cover their claims or (ii) they have waived their right to preferential treatment. Secured creditors do not have a voting right on the restructuring plan to the extent their claim is covered by security.

Generally, creditors who have a right to request the separation of assets (*Aussonderungsberechtigte*), such as creditors who have retained title to assets of the debtor (*Eigentumsvorbehalt*) in a situation where the insolvency administrator does not choose to perform the contract, remain unaffected by the opening of insolvency proceedings. They may, however, be barred from exercising their rights for a maximum period of six months following the opening of the insolvency proceedings, if the exercise of such rights would endanger the continuance of the debtor's business (unless the ban causes severe personal or economic damage to the privileged creditor and the monetization of other assets of the debtor has not (or is likely to not) fully satisfy such creditor's claims). The same applies to secured creditors of preferential claims (*Absonderungsberechtigte*).

Once formal proceedings have been opened, it is no longer possible to obtain an execution lien. All execution proceedings against the debtor are stayed (*Vollstreckungssperre*). Execution liens obtained within the last 60 days before formal proceedings were opened expire.

Section 25a paragraph 1 of the Austrian Insolvency Code provides that, for a period of six months from the opening of the insolvency proceedings, contractual partners of the debtor may only terminate contracts for cause. In this context, the deterioration of the economic situation or the lack of timely performance by the debtor prior to the opening of insolvency proceedings is not considered as sufficient cause. This restriction only applies if the termination of a contract would jeopardize the continuation of the debtor's business. No restrictions apply in certain circumstances, including if the termination of a contract is necessary to prevent the other party from suffering severe personal or economic damage or if the debtor fails to timely perform its contractual obligations after the opening of the insolvency proceedings.

Pursuant to section 25b paragraph 2 of the Austrian Insolvency Code, a contractual provision that entitles the other party to withdraw from an agreement or that provides for automatic termination in the event of the opening of insolvency proceedings is not enforceable (with the exception of close-out netting arrangements).

Powers of attorney granted by the insolvent debtor terminate automatically upon the opening of insolvency proceedings.

The Right of Avoidance (Contestation) in the Event of Insolvency Proceedings

Legal actions and legal transactions that were made within certain suspect periods prior to the opening of insolvency proceedings may be subject to an avoidance claim pursuant to the avoidance rules of the Austrian Insolvency Code. In general, the requirements for avoidance are: (i) the avoidance must result in an increase of the insolvency estate (*Befriedigungstauglichkeit*); (ii) the challenged legal action or challenged legal transaction must have caused a direct or indirect discrimination of the other creditors (*Gläubigerbenachteiligung*); and (iii) the avoidance claim generally must be filed by the insolvency administrator within one year after the opening of the insolvency proceedings at the latest.

In particular, the following legal transactions and legal acts are voidable:

- Avoidance on the grounds of intent to discriminate (*Anfechtung wegen Benachteiligungsabsicht*): Transactions within 10 years prior to the opening of insolvency proceedings that were made with the intention to discriminate other creditors may be challenged if the other party was aware of the debtor's intention to discriminate other creditors. If the other party was not aware but should have been aware of the debtor's intention to discriminate its other creditors, the period is shortened to two years prior to the opening of the insolvency proceedings. If the legal act was concluded with or for the benefit of a close relative (relatives, in-laws), the affected relative must either evidence that the debtor did not intend to discriminate its creditors, or that the close relative itself was neither aware nor should have been aware of any such intention. If the debtor is a legal entity that can sue and be sued, members of its management and supervisory bodies, shareholders with unlimited liability as well as shareholders pursuant to section 5 of the Austrian Act on Equity Replacements (*Eigenkapitalersatzgesetz, EKEG*) (i.e., in particular shareholders controlling the debtor or holding a stake of at least 25% or other persons who are not shareholders but exercise a dominant influence comparable to a majority shareholder) are deemed to be close relatives. The same applies to any person who was a "relative" in the year preceding the opening of insolvency proceedings.
- Avoidance on the grounds of squandering assets (*Anfechtung wegen Vermögensverschleuderung*): Certain contracts, including purchase, supply and exchange contracts, entered into by the debtor within one year prior to the opening of insolvency proceedings, that are considered a squandering of assets at the expense of other creditors, may be challenged if the counterparty to the contract was or should have been aware of such squandering. Squandering of assets is assumed if an obvious incongruity exists between performance and consideration.
- Avoidance of transactions with no consideration and analogous transactions (*Anfechtung wegen unentgeltlicher und ihnen gleichgestellter Verfügungen*): Dispositions of the debtor that were made free of charge or are equivalent to such dispositions within two years prior to the opening of insolvency proceedings may be challenged. A disposition free of charge requires that the disposing person acts with the intention to not receive any consideration in return. The disposition amounts to a sacrifice by the debtor. Examples for such dispositions are: donations, acknowledgement of a debt, security for liabilities, and payment of someone else's debt.
- Avoidance on the grounds of preferential treatment (*Anfechtung wegen Begünstigung*): The payment of a creditor's claims or the granting of security to a creditor (*Befriedigung oder Sicherstellung*) by the insolvent debtor (i) after its material insolvency or (ii) after the filing of an application for the opening of insolvency proceedings or (iii) within 60 days prior to each may be avoided if (i) the creditor obtained a security or satisfaction to which it was not (or was not in that way or at that time) entitled to, unless it was not favored by this transaction in comparison to other creditors (objective preferential treatment) or (ii) the transaction was entered into for the benefit of a close relative (as described above), unless such relative did not know and should not have known of the debtor's intention of preferential treatment or (iii) the transaction was entered into for the benefit of any other creditor who knew or should have known of the debtor's intention to favor him or her (subjective preferential treatment). Material insolvency means inability to pay debts as and when they fall due (*Zahlungsunfähigkeit*) or over-indebtedness in terms of insolvency law (*insolvenzrechtliche Überschuldung*). Objective preferential treatment does not require any subjective elements on part of the counterparty. In particular, the counterparty's knowledge of the debtor's financial condition is irrelevant. Subjective preferential treatment requires the debtor's intention and the creditor's knowledge of the debtor's intention to favor a creditor. Transactions carried out more than one year before the opening of the insolvency proceedings may not be contested on the grounds of preferential treatment. In case of transactions to the benefit of close relatives, the insolvency administrator, in particular, benefits from certain reliefs regarding burden of proof.
- Avoidance on the grounds of knowledge of insolvency (*Anfechtung wegen Kenntnis der Zahlungsunfähigkeit*): Any of the following actions carried out by an insolvent debtor after becoming effectively insolvent or filing for the opening of insolvency proceedings may be challenged: (i) payment by the debtor of claims of a close relative or a particular insolvency creditor or the granting of a security to any of these persons and (ii) transactions concluded with any other person or a close relative that are considered disadvantageous to other creditors. A transaction is considered disadvantageous if it reduces the likelihood that other creditors' claims will be satisfied.

Each of the above-mentioned actions may be challenged if the debtor's counterparty knew or should have known that the debtor was effectively insolvent or that an insolvency petition was pending. However, if a transaction is only indirectly disadvantageous to creditors (*mittelbare Nachteiligkeit*), the disadvantageous nature of the transaction to the insolvency estate must have also been objectively foreseeable at the time of the transaction. Objective foreseeability is assumed, in particular, if the transaction involves a restructuring plan that is obviously flawed (*offensichtlich untaugliches Sanierungskonzept*). A transaction is considered indirectly disadvantageous if the transaction is objectively balanced, i.e., not directly disadvantageous but the transaction nonetheless lowers the recovery rate of creditors. If the debtor's counterparty is a close relative of the debtor, the burden of proof lies with such close relative. Transactions carried out more than six months before the opening of the insolvency proceedings may not be contested on the grounds of knowledge of insolvency.

In addition to the possibility of the insolvency administrator avoiding transactions in accordance with the Austrian Insolvency Code, a creditor who has obtained an enforcement order (*Vollstreckungstitel*) could possibly also avoid any transactions in accordance with the Austrian Avoidance Act (*Anfechtungsordnung, AO*) outside of formal insolvency proceedings. The conditions for such action vary to a certain extent from the rules described above, and the avoidance periods are calculated from the date when such other creditor exercises its rights of avoidance in the courts.

The Austrian Business Reorganization Act

The rights of creditors may also be affected by the Austrian Business Reorganization Act (*Unternehmensreorganisationsgesetz, URG*). The Austrian Business Reorganization Act regulates the reorganization of companies in temporary financial distress in order to enable them to continue to do business after having undergone a reorganization procedure. Only the relevant company itself may apply for the opening of a reorganization procedure, provided, however, that it is still solvent at the time of its application. The relevant criteria for the opening of a business reorganization procedure are (i) an equity ratio (*Eigenmittelquote*) of less than 8% and a fictitious duration of debt redemption (*fiktive Schuldentilgungsdauer*) of more than 15 years, in each case as defined in the Business Reorganization Act. Pursuant to the Austrian Business Reorganization Act, a contractual provision that entitles the other party to withdraw from an agreement or that provides for its automatic termination in the event of the opening of reorganization proceedings is not enforceable.

Limitations on Validity and Enforceability of the Guarantees and the Security Interests

The granting and enforcement of a guarantee or a security interest by an Austrian limited liability company (*Gesellschaft mit beschränkter Haftung*) or Austrian stock corporation (*Aktiengesellschaft*) is limited by strict capital maintenance rules imposed by Austrian corporate law, including the Austrian Act on Limited Liability Companies (*Gesetz über Gesellschaften mit beschränkter Haftung, GmbHG*) and the Austrian Stock Corporation Act (*Aktiengesetz, AktG*). These rules protect the assets of an Austrian corporation for the benefit of its respective creditors. The entire set of corporate assets, including those exceeding the stated capital, is subject to the capital maintenance rules. Disbursments of assets to shareholders by an Austrian corporation may only be made in explicitly specified circumstances. The most important of these explicitly specified exceptions is the shareholders' right to receive dividends up to the amount of net profits set forth in the approved annual standalone financial statements under Austrian GAAP and provided that (i) such payments are not prohibited by law or by the respective company's articles of association and (ii) the shareholders have resolved on the disbursement of such dividend payment. An Austrian company may not make any other asset-reducing payments to a group company (not being a direct or indirect 100% subsidiary), except (i) in the context of repayments within the scope of stated capital decreases, or (ii) payments and other consideration within the scope of permitted arm's length transactions. Any contribution or payment to an affiliated company (other than a direct or indirect 100% subsidiary) or to a third party for the benefit of such an affiliated company without an adequate consideration would be considered as a violation of the Austrian capital maintenance rules.

A violation of Austrian capital maintenance rules by an Austrian company would, as a prohibited repayment of equity (*verbotene Einlagenrückgewähr*), generally result in the invalidity and unenforceability of the relevant transaction between that subsidiary and the shareholder or, as applicable, affiliated company in question and, under certain circumstances, in the invalidity and unenforceability of the relevant transaction between an Austrian company and the third party (e.g., financing bank) in case an Austrian company has provided an upstream or cross stream guarantee or a security interest for the benefit of such third party for the financing to the parent company. According to established case law and unanimous doctrine, the creation of personal security (such as guarantees) or security interest (such as a pledge over shares or bank accounts) securing obligations of other group companies constitutes such a benefit for the third party (e.g., financing bank) within the meaning of the above interpretation and may, hence, violate Austrian capital maintenance rules.

Under the Austrian Supreme Court case law upstream and cross-stream guarantees/collateral would only be in compliance with the Austrian capital maintenance rules provided that the corporate bodies of an Austrian corporation are satisfied, acting reasonably, that such up-stream and cross-stream "financial assistance" is in the best interest of the Austrian company and fully justified by a business purpose, i.e., a corporate benefit (*betriebliche Rechtfertigung)* from the standalone perspective of the Austrian entity. The Austrian Supreme Court has not yet defined the meaning of "corporate benefit."

There remains the risk that the granting of a Guarantee and/or Collateral by an Austrian Guarantor violates the Austrian capital maintenance rules (due to a lack of corporate benefit). Potential consequences of a violation of Austrian capital maintenance rules include the invalidity of the granting of a Guarantee and/or Collateral by an Austrian Guarantor as such or the limitation of the enforceability of such Guarantee and/or Collateral to an amount corresponding to the monetary corporate benefit received by the Austrian Guarantor from the financing transaction (from a standalone perspective).

In order to mitigate such risk, it is market standard to provide for limitations on any guarantee that is intended to secure obligations of other group companies. The Guarantees and other Collateral granted by the Austrian entities contain standard limitation language stating that, inter alia, all obligations thereunder shall be limited to the maximum amount permitted under Austrian capital maintenance rules (which amount may be zero or close to zero). It should be noted that while this approach is customary in comparable Austrian transactions, there is no case law or legal writing supporting this approach.

We cannot assure you that future court rulings may not further limit the validity and enforceability of the up-stream and cross-stream Guarantees and other Collateral granted by Austrian Guarantors, which could negatively affect our ability to make payment on the Notes offered hereby or the ability of the subsidiaries to make payments on the guarantees.

Parallel Debt

Under Austrian law, certain accessory security interests such as pledges require that the pledgee and the creditor be the same person. Such security interests cannot be held on behalf of third parties who do not hold the secured claim. The holders of the Senior Secured Notes will not be party to the security documents relating to the Collateral. In order for the holders of the Senior Secured Notes to benefit from security interests under accessory Collateral, the Intercreditor Agreement or a Debtor Accession Deed applicable to a given Debtor provide for the creation of a parallel debt. Pursuant to the parallel debt, the Security Agent becomes the holder of a claim equal to each amount payable by an obligor under the Notes and the Guarantees. The pledges governed by Austrian law will directly secure the parallel debt. The parallel debt concept as such is not known under Austrian law and a parallel debt governed by a foreign law (such as UK law) has not been tested under Austrian law, and there is no certainty that it will be held enforceable under Austrian law.

England and Wales

The Issuers are companies incorporated under the laws of England and Wales. It is envisaged that the Issuers' shares will be held directly or indirectly by UK Holdco I, an entity also incorporated under the laws of England and Wales. One or more companies incorporated in England and Wales, or which have their centre of main interests in England and Wales, may be Guarantors. Any insolvency proceedings by or against the Issuers, their parent and an English Guarantor would likely under English insolvency laws. However, pursuant to the EU Insolvency Regulation, where a company incorporated under English law has its "centre of main interests" in a member state of the European Union other than England and Wales the main insolvency proceedings for that company may be opened in the EU Member State in which the company's centre of main interest is located and be subject to the laws of that EU Member State. (see "—*European Union*").

English insolvency law is different to the laws of the United States and other jurisdictions with which investors may be familiar. Formal insolvency proceedings under the laws of England and Wales may be initiated in a number of ways, including by the company or creditor making an application for administration, in or out of court, or by a creditor filing a petition to wind up the company or the company resolving to do so (in the case of liquidation). A company may be wound up if it is unable to pay its debts, and may be placed into administration if it is, or is likely, to become unable to pay its debts, and the administration is reasonably likely to achieve one of three statutory purposes.

Administration

Assuming that the company's centre of main interests is in England and Wales, the company, its directors or the holder of a "qualifying floating charge" may appoint an administrator using an out of court route. Different procedures apply according to the identity of the appointer. In order to constitute a qualifying floating charge, the floating charge must be created by an instrument which (a) states that the relevant statutory provision applies to it; (b) purports to empower the holder to appoint an administrator of the company or (c) purports to empower the holder to appoint an administrative receiver within the meaning given by Section 29(2) of the Insolvency Act. The holder of a qualifying floating charge may appoint an administrator if such floating charge security, together (if necessary) with other forms of security, relates to the whole or substantially the whole of the property of the relevant English company and at least one such security interest is a qualifying floating charge. An administrator can also be appointed by the English courts in respect of a company with its centre of main interests in England in certain circumstances. An administration order can be made if the court is satisfied that the relevant company is or is likely to become "unable to pay its debts" and that the administration order is reasonably likely to achieve one of three statutory purposes. The court may, upon the petition of a creditor, place a company into liquidation, and the company and its directors may resolve to place the company into liquidation, if the company it unable to pay its debts.

Under section 123 of the Insolvency Act 1986, as amended (the "Insolvency Act"), a company is insolvent if it is unable to pay its debts. A company is unable to pay its debts if it is insolvent on a "cash flow" basis (unable to pay its debts as they fall due), if it is insolvent on a "balance sheet" basis (the value of the company's assets is less than the amount of its liabilities, taking into account its contingent and prospective liabilities), if it fails to satisfy a creditor's statutory demand for a debt exceeding £750 or if it fails to satisfy in full a judgment debt (or similar court order).

There is a general prohibition against the appointment of an administrative receiver to an English company by the holder of a debenture or floating charge. Exceptions to that prohibition are if the qualifying floating charge is contained in a security document which pre-dates 15 September 2003 or falls within one of the exceptions in the Insolvency Act as amended by the Enterprise Act 2002 to the prohibition on the appointment of administrative receivers. The most relevant exception to the prohibition on the appointment of an administrative receiver is the exception relating to "capital market arrangements" (as defined in the Insolvency Act), which may apply if the issue of the Notes creates a debt of at least £50.0 million for the relevant company under the arrangement and the arrangement involves the issue of a "capital markets investment" (which is defined in the Insolvency Act, and is generally a rated, listed or traded debt instrument).

If an administrative receiver has been appointed, an administrator can only be appointed by the court (and not by the company, its directors or the holder of a qualifying charge using the out of court procedure) and then only if the person who appointed the administrative receiver consents or the court considers that the security pursuant to which the administrative receiver was appointed is invalid. If an administrator is appointed, any administrative receiver will vacate office, and any receiver of part of the company's property, must resign if required to do so by the administrator.

English insolvency laws and other limitations could limit the enforceability of a Guarantee against a Guarantor and the enforceability of security interests over the Collateral, to the extent that those security interests are subject to English law or have been granted by an English incorporated company or a company which has its centre of main interests in England and Wales (an "English Guarantor"). The Issuers' parent will provide security in respect of its shareholding in the Issuers and the Issuers will in turn provide security in respect of its shareholding in BidCo (together, the "Share Pledges"). Further security interests may be provided by the Issuers and/or the English Guarantor. The following is a brief description of certain aspects of English insolvency law relating to certain limitations on a Guarantee provided by an English Guarantor (an "English Guarantee"), the Share Pledges and any other security interests provided by the English incorporated entities. The application of these laws could adversely affect investors, their ability to enforce their rights under the English Guarantee, the Share Pledges and/or other security in respect of the Notes and an English guarantee and therefore may limit the amounts that investors may receive in an insolvency of an English Guarantor and the Issuers.

Fixed and Floating Charges

Fixed charge security, as the Share Pledges may be (but see the next paragraph concerning the recharacterization of fixed charges as floating), has a number of advantages over floating charge security: (a) an administrator appointed to the company which granted the floating charge can dispose of floating charge assets for cash or collect receivables charged by way of floating charge and use the proceeds and/or cash subject to a floating charge, to meet administration expenses (which can include the costs of continuing to operate the charging company's business while in administration) in priority to the claims of the floating charge holder; (b) a fixed charge over assets, even if created after the date of a floating charge over the assets, will rank prior to the floating charge over the same charged assets providing that the floating charge has not crystallized at the time the fixed charge was granted; (c) general costs and expenses (including the liquidator's remuneration) properly incurred in a winding-up are payable out of floating charge assets to the extent the assets of the company available for creditors generally are otherwise insufficient to meet them (subject to certain restrictions for the costs of litigation) in priority to floating charge claims; (d) until the floating charge security crystallizes, a company is entitled to deal with assets that are subject to floating charge security in the ordinary course of its business, meaning that such assets can be effectively disposed of by the charging company so as to give a third party good title to the assets free of the floating charge; (e) floating charge security is subject to certain challenges under English insolvency law (see "*—Grant of Floating Charge*"); and (f) floating charge security is subject to the claims of preferential creditors (such as occupational pension scheme contributions and salaries owed to employees (subject to a cap per employee) and holiday pay owed to employees) and, where the floating charge is not a security financial collateral arrangement, to the claims of unsecured creditors in respect of a ring-fenced amount of the proceeds (see "*—Moratoria and Other Considerations*").

Under English law there is a possibility that a court could recharacterize as floating charges any security interests expressed to be created by a security document as fixed charges where the chargee does not have the requisite degree of control over the relevant chargor's ability to deal with the relevant assets and the proceeds thereof or does not exercise such control in practice as the description given to the charges in the relevant security document as fixed charges is not determinative. Where the chargor is free to deal with the secured assets without the consent of the chargee, the court is likely to hold that the security interest in question constitutes a floating charge, notwithstanding that it may be described as a fixed charge.

Moratoria and Other Considerations

As stated above, an administrator can be appointed in respect of a company with its centre of main interests in England. An administrator must perform his or her functions in order to achieve the purpose of administration. The purpose of an administration is comprised of three objectives that must be looked at successively: rescuing the company as a going concern or, if that is not reasonably practicable, achieving a better result for the company's creditors as a whole than if the company went into immediate liquidation or, if neither of those objectives is reasonably practicable, and the interests of the creditors as a whole are not unnecessarily harmed thereby realizing property, to make a distribution to secured or preferential creditors.

During the administration, in general no proceedings or other legal process may be commenced or continued against such company, or security enforced over such company's property, except with permission of the court or the consent of the administrator. This moratorium does not, however, apply to a "security financial collateral arrangement" (such as a charge over cash or financial instruments such as shares, bonds or tradable capital market debt instruments) under the Financial Collateral Arrangements (No. 2) Regulations 2003 (the "Financial Collateral Arrangements Regulations"). During the administration of a company, a creditor would not be able to enforce any security interest (other than valid security financial collateral arrangements) including in respect of a guarantee granted by it (although a demand for payment could be made under such guarantee) without the consent of the administrator or the permission of the court. In addition, a secured creditor cannot appoint an administrative receiver while an administrator is in office although, in certain circumstances (principally where one of the exceptions to the general prohibition on the appointment of an administrative receiver applies as set out in the Insolvency Act or pursuant to a debenture dated earlier than 15 September 2003), the holder of a floating charge can block the appointment of an administrator where it can appoint an administrative receiver.

A moratorium is also available pursuant to Schedule A1 to the Insolvency Act for "small companies" that are proposing a company voluntary arrangement with creditors, which can be for a period of up to 28 days, with the option for creditors to extend this protection for up to a further two months (although the Secretary of State for Trade and Industry may, by order, extend or reduce the duration of either period). Small companies are those which meet eligibility criteria as regards the number of employees, turnover and balance sheet total as set out in section 382 of the Companies Act 2006. The position as to whether or not a company is a "small company" may change from financial period to financial period, depending on its financial position and average number of employees during that particular period. The Secretary of State for Trade and Industry may, by regulations, also modify the qualifications for eligibility of a company for a moratorium and may also modify the present definition of a "small company." Accordingly, a company may, at any given time, come within the ambit of the "small companies" provisions, such that the company may (subject to the exemptions referred to below) be eligible to seek a moratorium, in advance of a company voluntary arrangement. This moratorium is not available to companies which have entered into certain capital market arrangements (whereby the company has incurred or is expected to incur a debt of at least £10 million and the arrangement involves the issue of a capital market investment) as detailed in Schedule A1 to the Insolvency Act. The definitions of "capital market arrangement" and "capital market investment" are broad and are such that, in general terms, any company which is a party to an arrangement which involves at least £10 million of debt, the granting of security to a trustee, and the issue of a rated, listed or traded debt instrument, is excluded from being eligible for a moratorium. The Secretary of State for Trade and Industry may modify the criteria by reference to which a company otherwise eligible for a moratorium is excluded from being so eligible. Further, a company voluntary arrangement itself cannot bind secured creditors without their permission. However, if the small companies' moratorium were to apply to the company, its effects would include prohibitions on enforcement of security that are similar to those that arise upon an administration moratorium. Therefore, to the extent the small companies' moratorium applies, there would be a moratorium on legal proceedings and execution or other legal process being commenced or continued and the levy of distress, against the company or its property (except with the permission of the court). No other steps may be taken to enforce any security over the company's property except with the permission of the court. The company may dispose of charged property if the holder of the security consents or the court gives permission. Further, the company may not make any payment or disposal of its own property unless there are reasonable grounds for believing that the disposal will benefit the company and the payment or disposal is approved by the committee (if established) or, where there is no such committee, by the nominee of the company voluntary arrangement.

Liquidation

Liquidation is a procedure under which the assets of the company are realized and distributed by the liquidator to creditors in the statutory order of priority prescribed by the Insolvency Act. At the end of the liquidation process the company will be dissolved. A liquidator has the power to bring or defend legal proceedings on behalf of the company; to carry on the business of the company as far as it is necessary for its beneficial winding up; to sell the company's property and execute documents in the name of the company; and to challenge antecedent transactions.

In the case of a liquidation commenced by way of a court order, no proceedings or other actions may be commenced or continued against the company except by leave of the court and subject to such terms as the court may impose (although security enforcement is not affected). In proceedings where the company or its directors has resolved to place the company into liquidation, the liquidator (or creditor or shareholder) can apply to the court for an order that no proceedings or other actions may be commenced or continued against the company.

Priority of Claims

Under English insolvency law, a liquidator has the power to disclaim any onerous property, which is any unprofitable contract and any other property of the company that cannot be sold, readily sold or may give rise to a liability to pay money or perform any other onerous act. A contract may be unprofitable if it gives rise to prospective liabilities and imposes continuing financial obligations on the company that may be detrimental to creditors. However, this power does not apply to a contract pursuant to which all the obligations have been performed nor can it be used to disturb accrued rights and liabilities.

Under English insolvency laws, the liabilities of any English Guarantor under its guarantee would be paid only after certain of its other debts which are entitled to priority under English law, as set out below.

The general priority of claims on insolvency is as follows (in descending order of priority):

- *First*-ranking claims: holders of fixed charge security and creditors with a proprietary interest in assets of the debtor;
- *Second*-ranking claims: expenses of the insolvent estate (there are statutory provisions setting out the order of priority in which expenses are paid);
- *Third*-ranking claims: preferential creditors and the Prescribed Part (as defined below). Preferential debts include (but are not limited to) debts owed by the insolvent company in relation to: (i) contributions to occupational and state pension schemes; (ii) wages and salaries of employees for work done in the four months before the insolvency date, up to a maximum of £800 per person; and (iii) holiday pay due to any employee whose contract has been terminated, whether the termination takes place before or after the insolvency date. As between one another, preferential debts rank equally;
- *Fourth*-ranking claims: holders of floating charge security, according to the priority of their security. However, before distributing asset realizations to the holders of floating charges, the Prescribed Part (as defined below) must be set aside for distribution to unsecured;
- *Fifth*-ranking claims: unsecured creditors. However, any secured creditor not repaid in full from the realization of assets subject to its security can also claim the remaining debt due to it (a shortfall) from the insolvent estate as an unsecured claim. To pay a shortfall, the officeholder can only use realization from unsecured assets, as secured creditors are not entitled to any distribution from the Prescribed Part in respect of a shortfall unless the Prescribed Part is sufficient to pay out all unsecured creditors;
- *Sixth*-ranking claims: shareholders. If after the repayment of all unsecured creditors in full, any remaining funds exist, these will be distributed to the shareholders of the insolvent company.

An administrator, receiver (including an administrative receiver) or liquidator of the company will be required to ring fence a certain percentage of the proceeds of enforcement of floating charge security for the benefit of unsecured creditors (the "Prescribed Part"). Under current law, this applies to 50% of the first £10,000 of floating charge realizations and 20% of the remainder over £10,000, with a maximum aggregate cap of £600,000. The obligation on such insolvency officeholder to set aside the Prescribed Part for unsecured parties does not apply if the net floating charge realizations are less than £10,000 and the officeholder is of the view that the costs of making a distribution to unsecured parties would be disproportionate to the benefits. The Prescribed Part will apply to all floating charges created on or after September 15, 2003 regardless of whether they fall within one of the exceptions in the Insolvency Act as amended by the Enterprise Act 2002 to the prohibition on the appointment of administrative receivers.

Challenges to Guarantees and Security

There are circumstances under English insolvency law in which the granting by an English company or a company whose centre of main interests is in England and Wales of security and guarantees can be challenged. In most cases this will only arise if an administrator or liquidator is appointed to the company within a specified period (as set out in more detail below) of the granting of the guarantee or security. Therefore, if during the specified period an administrator or liquidator is appointed to a company, the administrator or liquidator may challenge the validity of the security or guarantee given by such company. The Issuers cannot be certain that, in the event of the onset of an English Guarantor's or Issuer's insolvency that is within any of the requisite time periods set forth below, the grant of any security, such as the Share Pledges, or the English Guarantee will not be challenged or that a court would uphold the transaction as valid.

Transaction at an Undervalue

Under English insolvency law, (pursuant to section 238 of the Insolvency Act), a liquidator or administrator of a company could apply to the court for an order to set aside a security interest (in certain cases) or a guarantee granted by the company (or give other relief) on the grounds that the creation of such security interest or guarantee constituted a transaction at an undervalue. The grant of a security interest or guarantee will only be a transaction at an undervalue if the transaction constitutes a gift or is made on terms that provide that the company receives no consideration or if the company receives consideration of significantly less value, in money or in money's worth, than the consideration given by such company. For a challenge to be made, the guarantee or security must be granted within a period of two years ending with the onset of insolvency (as defined in section 240 of the Insolvency Act and discussed further below). In addition, the company must be "unable to pay its debts" (as defined by section 123 of the Insolvency Act, as explained above) when it grants the security or become unable to pay its debts as a result of the granting of security.

A court will not make an order in respect of a transaction at an undervalue if it is satisfied that the company entered into the transaction in good faith and for the purpose of carrying on its business and that, at the time it did so, there were reasonable grounds for believing the transaction would benefit the company. Subject to this, if the court determines that the transaction was a transaction at an undervalue the court can make such order as it thinks fit to restore the position to what it would have been if the transaction had not been entered into (which could include reducing payments under the guarantees or setting aside any security interests granted or guarantees although there is protection for a third party that benefits from the transaction and has acted in good faith and for value). In any challenge proceedings, it is for the administrator or liquidator to demonstrate that the company was unable to pay its debts unless a beneficiary of the transaction was a "connected person" (as defined in the Insolvency Act and discussed further below), in which case there is a presumption that the company was unable to pay its debts and the connected person must demonstrate that the company was not unable to pay its debts at the time of the transaction.

Preference

Under English insolvency law (pursuant to section 239 of the Insolvency Act), a liquidator or administrator of a company could apply to the court for an order to set aside a security interest or a guarantee granted by such company (or give other relief) on the grounds such security interest or such guarantee constituted a preference. The grant of a security interest or guarantee is a preference if it has the effect of placing a creditor (or a surety or guarantor of the company) in a better position in the event of the company's insolvent liquidation than if the security interest or guarantee had not been granted. For a challenge to be made, the decision to prefer must be made within the period of six months ending with the onset of insolvency (as defined in section 240 of the Insolvency Act and discussed further below) if the beneficiary of the security interest or the guarantee is not a connected person or two years if the beneficiary is a connected person. In addition, the company must have been "unable to pay its debts" at the time it gave the preference or become unable to pay its debts as a result. A company's inability to pay its debts in this context has the same meaning as in the case of a transaction at an undervalue save that, in the case of a preference, there is no presumption of insolvency if the parties are connected. A court will not make an order in respect of a preference of a person unless it is satisfied that the company in deciding to give the preference was influenced by a desire to put that person in a better position. If the court determines that the transaction was a preference, the court can make such order as it thinks fit to restore the position to what it would have been if that preference had not been given (which could include reducing payments under the guarantees or setting aside the security interests or guarantees). There is protection for a third party that benefits from the transaction and acted in good faith and for value. In any proceedings, it is for the administrator or liquidator to demonstrate that the company was unable to pay its debts and that the company was influenced by a desire to produce the preferential effect, unless the beneficiary of the transaction was a connected person, in which case there is a presumption that the company was influenced by a desire to produce the preferential effect and the connected person must demonstrate in such proceedings that there was no such influence.

Grant of Floating Charge

Under English insolvency law, if a company is unable to pay its debts at the time of (or as a result of) granting a floating charge then such floating charge can be avoided on the action of a liquidator or administrator if it was granted in the period of one year ending with the onset of insolvency (as defined in section 245 of the Insolvency Act and discussed further below). The floating charge, however, will be validated to the extent of the value of the consideration provided for the creation of the charge in the form of money paid to, or goods or services supplied to, or any discharge or reduction of any debt of, the relevant company at the same time as or after the creation of the floating charge plus interest payable on such amounts. Where the floating charge is granted to a "connected person" (as discussed further below), the charge can be challenged if given within two years of the onset of insolvency and the prerequisite to challenge that the company is unable to pay its debts does not apply. However, if the floating charge qualifies as a "security financial collateral arrangement" under the Financial Collateral Arrangements Regulations, as explained further above, the floating charge will not be subject to challenge as described in this paragraph.

Onset of Insolvency

The date of the onset of insolvency, for the purposes of transactions at an undervalue, preferences and invalid floating charges, depends on the insolvency procedure in question. In administration the onset of insolvency is the date on which (a) the court application for an administration order is issued or (b) the notice of intention to appoint an administrator is filed at court, or (c) otherwise, the date on which the appointment of an administrator takes effect. In a compulsory liquidation the onset of insolvency is the date the winding-up petition is presented to court, whereas in a voluntary liquidation it is the date the company passes a winding-up resolution. Where liquidation follows administration, the onset of insolvency will be as for the initial administration.

Connected Persons

A connected person for the purposes of transactions at an undervalue, preferences and invalid floating charges, is a party who is a director, shadow director, an associate of such director, or an associate, of the relevant company. A party is associated with an individual if a relative of the individual or the individual's husband, wife or civil partner, or the husband, wife or civil partner of a relative of the individual or the individual's husband, wife or civil partner. A party is associated with a company if employed by that company. A company is associated with another company if the same person has control of both companies, or a person has control of one and persons who are his associates, or he and persons who are his associates, have control of the other, or if a group of two or more persons has control of each company, and the groups either consist of the same persons or could be regarded as consisting of the same persons by treating (in one or more cases) a member of either group as replaced by a person of whom he is an associate.

Transaction Defrauding Creditors

Under English insolvency law, a liquidator or an administrator of a company, or a person who is a "victim" of the relevant transaction can apply to the court pursuant to section 423 of the Insolvency Act for an order to set aside a security interest or guarantee granted by that company on the grounds the security interest or guarantee was a transaction defrauding creditors.

A transaction will constitute a transaction defrauding creditors if it is a transaction at an undervalue (as outlined above) and the court is satisfied the substantial purpose of a party to the transaction was to put assets beyond the reach of actual or potential claimants against it or to prejudice the interest of such persons.

If the court determines that the transaction was a transaction defrauding creditors, then it may make such order as it may deem fit to restore the position to what it was prior to the transaction or protect the victims of the transaction (including reducing payments under the guarantee or setting aside the security interest or guarantees) but there is protection for a third party acting in good faith and for value without notice of the relevant circumstances. Any "victim" of the transaction (with the permission of the court if the company is in liquidation or administration) may apply to court under this provision and not just liquidators or administrators. There is no time limit in the English insolvency legislation within which the company must enter insolvency proceedings and the relevant company does not need to have been unable to pay its debts at the time of the transaction.

Extortionate Credit Transaction

An administrator or a liquidator can apply to court to set aside an extortionate credit transaction. The court can review extortionate credit transactions entered into by an English company up to three years before the day on which the English company entered into administration or went into liquidation. A transaction is "extortionate" if, having regard to the risk accepted by the person providing the credit, the terms of it are (or were) such as to require grossly exorbitant payments to be made (whether unconditionally or in certain contingencies) in respect of the provision of the credit or it otherwise grossly contravened ordinary principles of fair dealing.

Post-Petition Interest

Any interest accruing under or in respect of amounts due under the Notes or an English Guarantee to which an English Guarantor is a party in respect of any period after the commencement of administration or liquidation proceedings would only be recoverable by the Noteholders from any surplus remaining after payment of all other debts proved in an English Guarantor's insolvency proceedings and accrued and unpaid interest up to the date of the commencement of those proceedings *provided that* such interest may, if there are sufficient realizations from the secured assets, be discharged out of such security recoveries.

Dispositions in Winding-up

Under section 127 of the Insolvency Act, any dispositions of a company's property made after a winding-up has commenced are, unless the court orders otherwise, void. The compulsory winding-up of a company by the court is deemed to start when a winding-up petition is presented by a creditor against the company, rather than the date on which the court makes the winding-up order (if any), other than in limited circumstances. However, this will not apply to any property or security interest subject to a disposition or otherwise arising under a financial collateral arrangement under the Financial Collateral Arrangements Regulations and will not prevent a close-out netting provision taking effect in accordance with its terms.

Limitation on Enforcement

The grant of a guarantee or security by the Issuers or an English Guarantor in respect of the obligations of another group company must satisfy certain legal requirements. More specifically, such a transaction must be allowed by the respective company's memorandum and articles of association. To the extent that the above do not allow such an action, there is the risk that the grant of the guarantee and the subsequent security can be found to be void and the respective creditor's rights unenforceable. Some comfort may be obtained for third parties if they are dealing with the Issuers or an English Guarantor in good faith; however, the relevant legislation is not without difficulties in its interpretation. Further, corporate benefit must be established for the Issuers or an English Guarantor in question by virtue of entering into the proposed transaction. Section 172 of the Companies Act 2006 provides that a director must act in the way that he considers, in good faith, would be most likely to promote the success of the Issuers or an English Guarantor, as the case may be, for the benefit of its members as a whole. If the directors enter into a transaction where there is no or insufficient commercial benefit, they may be found as abusing their powers as directors and such a transaction may be vulnerable to being set aside by a court.

Under the Companies Act 2006, any security (including where not governed by English law) granted by the Issuers or the English Guarantor (together with prescribed particulars of the security constituted thereby) must be received by the Registrar of Companies in England and Wales for registration within 21 days after the date of creation of the security constituted by the applicable security document. Such security, if not registered within the 21-day period, will be deemed to be void against a liquidator, administrator and a creditor of the Issuers or the English Guarantor. Further, failure to register also means that the debt which was intended to be secured is deemed to have become immediately payable.

In the event where the relevant security document is not registered, the Issuers or the English Guarantor may be required to enter into a new security document and register that with Companies House within 21 days of its creation.

Alternatively it may be possible to apply to the English courts for an order to rectify the position and allow the charge to be registered after the 21 day period has expired. This application can be made by the Issuers or the English Guarantor or by any person interested in the relevant security. The court will grant leave to register the security out of time if it considers it "just and expedient" to do so, and will have particular regard to whether the failure to register was merely accidental and whether a late registration will prejudice the position of creditors or shareholders. The court order will have to be enclosed with any delayed application for registration of the security.

Security created on or after October 1, 2011 by overseas companies over assets in England and Wales do not need to be registered with the Registrar of Companies (although they may still need to be registered with the applicable asset registry).

Guarantees and security granted by the Issuers or the English Guarantor are also subject to limitations to the extent they would result in unlawful financial assistance within the meaning of the Companies Act 2006.

Foreign Currency

Under English insolvency law, where creditors are asked to submit formal proofs of claim for their debts, any debt of a company payable in a currency other than British Pounds (such as euro in the case of the Notes) must be converted into British Pounds at the "official exchange rate" prevailing at the date when the company went into liquidation or administration. This provision overrides any agreement between the parties. The "official exchange rate" for these purposes is the middle market rate in the London Foreign Exchange Market at close of business as published for the date in question or, if no such rate is published, such rate as the court determines.

Schemes of Arrangement

Pursuant to Part 26 of the Companies Act 2006 the English courts have jurisdiction to sanction the compromise of a company's liabilities where such company (i) is liable to be wound-up under the Insolvency Act and (ii) has "sufficient connection" to the English jurisdiction.

Before the court considers the sanction of a scheme of arrangement, affected creditors will vote on a detailed debt compromise. Such compromise can be proposed by the company or its creditors. If 75% by number and 50% by value of those creditors present and voting at the creditor meeting(s) vote in favor of the proposed compromise, irrespective of the terms and approval thresholds contained in the finance documents, that compromise will be binding on all affected creditors, including those affected creditors who did not participate in the vote on the scheme of arrangement and those who voted against the scheme of arrangement.

France

Insolvency

Various companies of our group conduct a part of their business activity in France and, to the extent that the center of our main interests ("COMI") of any company of the group (such as French Guarantors) is deemed to be in France, such company could be subject to French main insolvency proceedings affecting creditors, including "safeguard" or "accelerated safeguard" or "accelerated financial safeguard" proceedings (*sauvegarde* or *sauvegarde accélérée* or *sauvegarde financière accélérée*), judicial reorganization or liquidation proceedings (*redressement* or *liquidation judiciaire*). Similarly, any company of our group having an establishment in France and its COMI in another EU Member State could be subject to French territorial insolvency proceedings. Any company of the group having its registered office or an establishment in France could also be subject to court-assisted pre-insolvency proceedings, namely *mandat ad hoc* or *conciliation* proceedings, both of which however do not fall within the scope of the EU Insolvency Regulation. In general, French insolvency legislation favors the continuation of a business and protection of employment over the payment of creditors and could limit your ability to enforce your rights under the Notes and/or the guarantees granted by the French Guarantors and corresponding security interests.

The following is a general discussion of insolvency proceedings governed by French law for informational purposes only and does not address all the French legal considerations that may be relevant to holders of the Notes.

Grace Periods

In addition to and independently of insolvency laws discussed below, you could, like any other creditors, be subject to Article 1244-1 *et seq.* of the French Civil Code (*Code civil*).

Pursuant to these provisions, French courts may, in any civil proceeding involving the debtor, defer or otherwise reschedule over a maximum period of two years the payment dates of payment obligations and decide that any amounts, the payment date of which is thus deferred or rescheduled, will bear interest at a rate that is lower than the contractual rate (but not lower than the legal rate as published annually by decree) or that payments made shall first be allocated to repayment of principal. A court order made under Article 1244-1 of the French Civil Code will suspend any pending enforcement measures, and any contractual interest or penalty for late payment will not accrue or be due during the grace period ordered by the relevant judge. When the debtor benefits from a conciliation proceeding, these statutory provisions shall be read in combination with Article L. 611-7 of the French Commercial Code (see below).

Insolvency Test

Under French law, a company is considered to be insolvent (*en état de cessation des paiements*) when it is unable to pay its debts as they fall due with its available assets taking into account available credit lines, existing debt rescheduling agreements and moratoria.

If judicial reorganization or liquidation proceedings are commenced, the date of insolvency (*cessation des paiements*) is deemed to be the date of the court order commencing proceedings, unless the court sets an earlier date, which may be up to 18 months before the date of the court order. Except for fraud, the date of insolvency may not be fixed at an earlier date than the date of the final court decision that approved an agreement (*homologation*) in the context of conciliation proceedings. The date of insolvency is important because it marks the beginning of the suspect period (see below).

Court-Assisted Pre-insolvency Proceedings

A French company facing difficulties may request the opening of court-assisted pre-insolvency proceedings (*mandat ad hoc* or *conciliation*), the aim of which is to help the company reach an agreement with its main creditors and stakeholders, thanks to the support of a court-appointed mediator (the *mandataire ad hoc* in *mandat ad hoc* and the *conciliateur* in *conciliation*). *Mandat ad hoc* and *conciliation* are informal proceedings which can only be initiated by the debtor and are carried out under the supervision of the president of the relevant court, which do not involve any stay of the pending proceedings. As a consequence, creditors are not barred from taking legal action against the company to recover their claims, but, in practice, they usually accept not to do so for a certain period of time, to try to negotiate a consensual solution with the company.

Mandat ad hoc and conciliation proceedings may also be used at the request of the debtor, and after the opinion of the participating creditors has been sought, to prepare the sale of all or part of the business of the debtor with a view to implementing such sale in a subsequent insolvency proceeding, in a so-called *plan de cession*.

Contractual provisions modifying the terms of an outstanding contract, by diminishing the rights or increasing the obligations of the debtor (such as an acceleration of the debts) solely by reason of the appointment of a *mandataire ad hoc* or the opening of *conciliation* proceedings, are deemed null and void.

Equally, contractual provisions that would, as the sole result of the opening of *a mandat ad hoc* proceedings or the opening of *conciliation* proceedings, make the debtor bear the fees of the creditor's counsel relating to such proceedings for the portion that would exceed three quarters of the total fee of the relevant counsel are null and void.

French law does not provide for detailed rules in respect of *mandat ad hoc*. In practice, *mandat ad hoc* proceedings are used by debtors that are facing difficulties of an economic or financial nature but are not insolvent (*en état de cessation de paiements*). *Mandat ad hoc* proceedings are confidential (save for their disclosure to statutory auditors if any) and are not limited in time. The agreement reached by the parties (if any) with the help of the court-appointed mediator (*mandataire ad hoc*, whose name can be suggested by the debtor) can be reported by the latter to the President of the court but is not sanctioned by the court and as a consequence the agreement does not have the force of a judicial decision. The restructuring agreement between the company and its main creditors will be negotiated on a purely consensual and voluntary basis; those creditors not willing to take part cannot be bound by the arrangement.

Conciliation proceedings are available to a debtor that faces actual or foreseeable difficulties of a legal, economic or financial nature but which is not insolvent (*en cessation des paiements*) or has been insolvent for less than 45 days. The debtor petitions the President of the relevant court for the appointment of a "conciliator" (whose name he can suggest) in charge of assisting the debtor in negotiating with all or part of its creditors and/or other stakeholders an agreement providing for the restructuring of its indebtedness.

Conciliation proceedings are confidential (save for their disclosure to statutory auditors if any and subject to the below) and may last up to five months. During the proceedings, creditors may continue to sue individually the debtor for payment of their claims but they usually accept not to do so for a certain period of time, to try to negotiate a consensual solution with the company.

The debtor retains the right to petition the President of the relevant court for a grace period that may last up to two years pursuant to Article 1244-1 of the Civil Code. Pursuant to Article L. 611-7 of the French Commercial Code, the judge having opened conciliation proceedings has jurisdiction to grant such a grace period *provided that* the debtor has received a formal notice requesting payment or faces enforcement measures. This judge also has jurisdiction to grant such a grace period during the implementation of the conciliation agreement (i.e., after the end of the conciliation proceedings), in relation to claims of creditors (other than public creditors) who were asked to participate in the conciliation but refused to sign the restructuring agreement (*provided that* this agreement has been either acknowledged or approved by a court decision, as described below).

The agreement (a "conciliation agreement") can be either:

- upon all parties' request, acknowledged (*constaté*) by the President of the court, which makes it immediately enforceable. This acknowledgement decision is not made public; or
- upon the debtor's request, approved (*homologué*) by the relevant court if (i) the debtor is not insolvent at the time or if the rescheduling agreement has the effect of putting an end to the debtor's insolvency, and (ii) the agreement effectively ensures that the company will survive as a going concern and (iii) the agreement does not infringe upon the rights of the non-signatory creditors. All the terms of the agreement are not made public but (i) the existence of the court decision approving the agreement is made public and (ii) this court decision discloses the guarantees or security interests granted to the parties and the claims that benefit from the so-called new money privilege, if any (see below).

  Approval (*homologation*) by the court entails several consequences, including in particular the following:

  (i) a "new money privilege," granting a priority of payment over all pre-opening and post-opening claims (except as regards certain pre-opening employment claims and post-opening procedural costs) in the event of subsequent safeguard, judicial reorganization or liquidation proceedings, can be granted in favor of creditors who provided new money, goods or services designed to ensure the continuation of the business of the distressed company in the course of conciliation proceedings leading to an approved conciliation agreement or in accordance with an approved conciliation agreement (other than shareholders providing new equity in the context of a capital increase);

  (ii) in the event of subsequent judicial reorganization proceedings or judicial liquidation proceedings, the date of insolvency (*date de cessation des paiements*) cannot be set by the courts at a date earlier than the date of the approval of the agreement, except in case of fraud; and

  (iii) in the event of subsequent safeguard, accelerated safeguard, accelerated financial safeguard, judicial reorganization or liquidation proceedings, the payment date of claims benefiting from the new money privilege may not be rescheduled by the court without their holders' consent (however, it is debated whether such claims could be rescheduled or restructured in the framework of creditor's committees, in accordance with the process described below).

While an acknowledged or approved agreement is being implemented, (i) any individual proceedings by creditors with respect to the claims included in the agreement are suspended and (ii) accrued interest of the claims governed by the restructuring agreement cannot bear themselves interest (notwithstanding Article 1154 of the French Civil Code).

A third party having granted a guarantee (*sûreté personnelle*) or a security interest (*sûreté réelle*) can benefit from the grace periods granted to the debtor during conciliation proceedings as well as from the provisions of the approved or acknowledged agreement.

In the event of a breach of the agreement, any party to the agreement can petition the court for its termination. The commencement of subsequent insolvency proceedings will automatically put an end to the conciliation agreement, in which case the creditors will recover any claims and security interests that they accepted to waive in the conciliation agreement, but will be entitled to retain any amounts already paid to them.

Conciliation proceedings, in the context of which a draft restructuring plan has been negotiated and is supported by a large majority of creditors without reaching unanimity, will be a mandatory preliminary step of the accelerated safeguard and accelerated financial safeguard proceedings as described below.

Court-Administered Pre-insolvency and Insolvency Proceedings—Safeguard, Reorganization and Liquidation Proceedings

Court-administered insolvency proceedings may be initiated:

- in the event of safeguard proceedings, accelerated safeguard and accelerated financial safeguard proceedings, upon petition by the debtor only; and
- in the event of judicial reorganization (*redressement judiciaire*) or liquidation, upon petition by the debtor, any creditor or the public prosecutor.

The debtor may file for safeguard proceedings at any time it is facing difficulties that it cannot overcome, as long as it is not insolvent. Accelerated safeguard or accelerated financial safeguard proceedings may be opened although the debtor is already insolvent, *provided that* it was not insolvent for more than 45 days when it initially requested the opening of the preliminary conciliation proceedings.

The debtor is required to petition for the opening of either judicial reorganization proceedings (if recovery is possible) or judicial liquidation proceedings (if recovery is manifestly not possible) within 45 days of the date upon which the insolvency (*cessation des paiements*) occurred, unless it requested within this period of time the opening of conciliation proceedings. If it fails to do so, its directors and officers are subject to civil liability.

The period from the date of the court decision commencing the proceedings (whether a safeguard or a judicial reorganization) up to the date on which the court takes a decision on the outcome of the proceedings is called the "observation period" and may last up to six months, which may be extended once for another six months, plus an additional six months under exceptional circumstances. During the observation period, a court-appointed administrator (whose name can be suggested by the debtor and the public prosecutor in case of safeguard proceedings, and by the public prosecutor in case of a judicial reorganization), investigates the business of the company. In safeguard proceedings, the administrator's mission is limited to either supervising or assisting the debtor's management and assisting it in preparing a safeguard plan for the company. In judicial reorganization proceedings, the administrator's mission is usually to assist the management and to make proposals for the reorganization of the company, which may include a business continuation plan (similar to a safeguard plan) and/or the sale of all or part of the company's business to a third party, in the framework of a *plan de cession*. In judicial reorganization, the court may also decide that the administrator will manage the company alone by replacing the debtor's management.

At the end of the observation period, if it considers that the company can survive as a going concern, the court can adopt a safeguard or reorganization plan which will entail a restructuring and/or rescheduling of debts and may entail the divestiture of some or all of the debtor's assets and businesses (a sale of the entire business is not possible in a safeguard plan). At any time during safeguard proceedings, the court may convert such proceedings into reorganization proceedings (i) if the debtor appears to have been insolvent (*en état de cessation des paiements*) before the opening of the proceedings, or (ii) if the debtor has become insolvent (*en état de cessation des paiements)* after the opening of the proceedings, or (iii) in case no plan has been adopted by the creditors' committees and, if any, the bondholders' assembly (as described below), if the approval of a safeguard plan is manifestly impossible and if the company would shortly become insolvent should safeguard proceedings be closed. At any time during safeguard or reorganization proceedings (and subject to the same conditions), the court may also convert such proceedings into liquidation proceedings rather than into reorganization proceedings, if recovery of the debtor is manifestly impossible.

There is no observation period in the case of judicial liquidation proceedings being opened *vis à vis* the debtor. A court-appointed liquidator becomes the company's sole legal representative. The outcome of these proceedings, which is decided by the court without a vote of the creditors, may be a sale of the business as a going concern (i.e., a *plan de cession*) and/or a piecemeal sale of the debtor's assets in order to discharge the debtor's liabilities. In case a plan for the sale of the business is considered, the court can authorize a temporary continuation of the business for a maximum period of three months (renewable once at the Public Prosecutor's request).

Any contractual provision imposing the automatic termination of a contract or the anticipated maturity of unmatured debts or imposing tougher terms and conditions upon the opening of insolvency proceedings, is deemed null and void.

Creditors' Committees and Adoption of the Safeguard or Reorganization Plan

In safeguard and judicial reorganization proceedings, in the case of large companies (i.e., if the debtor (a) has more than 150 employees or a turnover greater than €20 million and (b) its accounts are certified by a statutory auditor or carried out by a certified public accountant), or where authorized by the supervising judge for smaller companies, two creditors' committees must be established: one for credit institutions and "similar entities" having a claim against the debtor, and the other for suppliers of goods and services having a claim that represents more than 3% of the total amount of the claims of all the debtor's suppliers.

If there are any outstanding debt securities in the form of *obligations* (such as bonds or notes), a general meeting gathering all holders of such debt securities will be established whether or not there are different issuances and no matter what the applicable law of those *obligations* is (the "bondholders' general assembly"). The Notes constitute *obligations* for the purposes of a safeguard or reorganization proceeding.

These two committees and the bondholders' general assembly will be consulted on the safeguard or reorganization plan drafted by the debtor's management, together with the judicial administrator, during the observation period. In addition, any member of a committee may also submit an alternative safeguard or reorganization plan to the vote of the committees and bondholders general assembly it being specified that these alternative plans are subject (i) to the preparation of a report for each alternative plan from the administrator and (ii) to the same two-thirds majority vote in each committee and in the bondholders' general assembly (although the bondholders are not permitted to present their own alternative plan) for their approval.

A safeguard or reorganization plan may notably include debt rescheduling and debt write-offs as well as debt-to-equity swaps. The plan may provide for a different treatment of creditors if the differences in their situations so justify. The plan submitted to the creditors' committees and the bondholders' general assembly must take into account intercreditor subordination agreements entered into prior to the opening of the proceedings.

Each creditor member of a creditors committee and each note holder must, if applicable, inform the judicial administrator of the existence of any agreement which makes the exercise of its vote subject to any conditions or whose purpose is the full or total payment by a third party of its claim as well as of any subordination agreement. The judicial administrator shall then submit to the creditor/note holder a proposal for the computation of its voting rights in the creditors' committee/bondholders general meeting. In the event of a disagreement, the creditor/note holder or the judicial administrator may request that the matter be decided by the president of the applicable court in summary proceedings (*en référé*).

The plan must firstly be approved by each of the two creditors' committees. Such approval requires the affirmative vote of creditors holding at least two-thirds of the amounts of the claims held by the members of such committee that participated in such vote.

Following the approval of the plan by the two creditors' committees, the plan will be submitted for approval to the bondholders' general meeting. The approval of the plan at such meeting requires the affirmative vote of bondholders representing at least two thirds of the amount of the *obligations* held by creditors who voted in the bondholders' general assembly.

Those creditors whose repayment terms are not affected by the draft safeguard or reorganization plan, or for which the draft plan provides for full repayment in cash upon endorsement of the plan or admission of their claims, are not consulted and do not vote.

Following approval by the creditors' committees and the bondholders' general assembly, the plan has to be approved (*arrêté*) by the court. In considering such approval, the court has to verify that the interests of all creditors are sufficiently protected. Once approved by the relevant court, the safeguard or reorganization plan accepted by the committees and the bondholders' general assembly will be binding on all the members of the creditors' committees and all bondholders (including those who voted against the adoption of the plan).

In the event the safeguard or reorganization plan has not been approved by both the committees and the bondholders' general assembly within the first six months of the observation period (it being noted that this 6 months period may be extended by the court at the request of the judicial administrator to the extent it does not exceed the duration of the observation period), either because they do not vote on the plan or because they reject it, the plan will not be approved by the court and a consultation of the creditors on an individual basis will take place. Creditors will be asked whether they accept debt deferrals, write-offs and/or debt-for-equity swaps provided for in the draft plan. Where the consultation is in writing, the creditor is deemed to have accepted the debt rescheduling and/or write-offs proposal if he or she fails to respond within 30 days from the receipt of the court-appointed creditors' representative's letter (however, with respect to debt-to-equity swap proposals, the creditors' representative must obtain the agreement of each individual creditor in writing). With respect to creditors rejecting the debt restructuring proposals made under the draft plan, the court may impose uniform debt deferrals over a maximum period of 10 years (but it cannot impose debt reductions). The first payment must be made within a year of the judgment adopting the plan. In the third and subsequent year, the amount of each annual installment must be at least of 5% of the total amount of the debt (subject to specific rules regarding loans whose maturity date falls after the first installment of the restructuring plan or after the end of the restructuring plan).

In the judgment adopting the plan, the court may mandate the administrator to convene the shareholders' general meeting, in order to vote on the modifications of the articles of association provided by the plan. In such a case, the administrator may decide that the general meeting will rule on first convening, by the majority of the votes held by the shareholders attending the meeting or represented at the meeting, *provided that* said shareholders hold at least half the shares with voting rights. On second convening, the common law provisions relating to the quorum and majority requirements shall apply.

In judicial reorganization proceedings, if certain (restrictive) conditions are met, the administrator may request the appointment of an official that will be entitled to (i) convene a shareholders' meeting to vote on a share capital increase in favor of persons that undertake to comply with the plan and (ii) to exercise the voting rights of certain shareholders that are opposed to such a share capital increase.

Accelerated Safeguard Proceedings and Accelerated Financial Safeguard Proceedings

Envisaged as a means of facilitating "pre-pack" insolvency proceedings in France, accelerated safeguard and accelerated financial safeguard proceedings permit a debtor, the majority but not all of the creditors (or financial creditors in case of fast track financial safeguard proceedings) of which support a conciliation agreement, to begin safeguard proceedings, allowing a restructuring plan to be rapidly approved by the two-thirds vote of the creditors' committees and bondholders' general meeting applicable in safeguard proceedings. The regime applicable to accelerated safeguard or accelerated financial safeguard proceedings is roughly the regime applicable to the regular safeguard proceeding to the extent compatible with the accelerated timing of the proceedings; i.e., a maximum of three months for accelerated safeguard proceedings and two months for accelerated financial safeguard proceedings.

In accelerated financial safeguard proceedings, only financial creditors are subject to a stay of their claims and actions and subsequently affected by such a restructuring plan (i.e., in particular it does not entail suspension of payments to suppliers or public creditors), as opposed to accelerated safeguard proceedings, which affect all creditors.

To be eligible to accelerated safeguard or accelerated financial safeguard proceedings, the debtor must fulfill the following conditions:

- the debtor must be subject to ongoing *conciliation* proceedings when it applies for the opening of the accelerated safeguard or accelerated financial safeguard proceedings;
- the debtor must not have been insolvent for more than 45 days when it initially requested the opening of *conciliation*;
- as is the case for regular safeguard proceedings, the debtor must face difficulties that it is not in a position to overcome;
- in the context of *conciliation* proceedings, the debtor must have prepared a draft safeguard plan that aims to protect its operations in the long run and which is likely to be supported, within the group of those creditors who will be affected by the accelerated safeguard proceedings, by a sufficiently large majority of them to allow a likely adoption of the plan by the relevant creditors' committees and bondholders' general assembly if any within the duration of the procedure;
- the debtor must (i) have its accounts certified by a statutory auditor or established by an accounting expert and have either (x) more than 20 employees; or (y) a turnover greater than €3 million excluding any applicable taxes; or (z) total assets in its balance sheet greater than €1.5 million or (ii) establish consolidated financial statements in accordance with Article L. 233-16 of the French Commercial Code.

Judicial Reorganization or Liquidation Proceedings

Judicial reorganization or liquidation proceedings (*redressement* or *liquidation judiciaire*) may be initiated against or by a company only if it is insolvent (*en cessation des paiements)* and, for the liquidation proceedings only, if the company's recovery is manifestly impossible (see above).

The possible outcomes of reorganization proceedings are either the adoption of a reorganization plan (see above for the conditions of its adoption) or a plan for the sale of the business (*plan de cession*), whereby the court orders the sale of all or part of the business as a going concern (and therefore the transfer of assets, contract and employees) to a third party. At any time during the observation period, if the adoption of a viable restructuring plan proves impossible, the court can order the liquidation of the company.

The two possible outcomes of liquidation proceedings are either a plan for the sale of the business (*plan de cession)*, or a piecemeal sale of the assets (via auction sales or through a private sale upon authorization of the insolvency judge).

Status of Creditors During Safeguard, Accelerated Safeguard, Accelerated Financial Safeguard, Judicial Reorganization or Judicial Liquidation Proceedings

Contractual provisions that would accelerate the payment of the company's obligations upon the occurrence of the opening of safeguard, accelerated safeguard or accelerated financial safeguard proceedings, or reorganization proceedings are not enforceable under French law. The opening of liquidation proceedings, however, automatically accelerates the maturity of all of a company's obligations unless the continued operation of the business with a view to the adoption of a plan for the sale of the business (*plan de cession*) is ordered by the court (for up to three months, renewable once), in which case the acceleration of the obligations will only occur on the date of the court decision adopting the plan for the sale of the business or on the date on which the continued operation of the business ends. Contractual provisions pursuant to which the opening of the proceedings constitutes an event of default are not enforceable against the debtor, as well as, according to a decision of the French Supreme Court dated 14 January 2014, no. 12-22.909, "contractual provisions modifying the conditions of continuation of an ongoing contract, diminishing the rights or increasing the obligations of the debtor solely upon the opening of reorganization proceedings" (which should also apply in case of safeguard, accelerated safeguard or accelerated financial safeguard proceedings).

The court-appointed administrator or liquidator may elect not to continue performing ongoing contracts (*contrats en cours*), and he or she may also request the supervisory judge (*juge-commissaire*) to terminate such ongoing agreements, *provided that* certain conditions are met. On the contrary, he or she may require the continuation of such contracts *provided that* the company fully performs its post-opening contractual obligations. During reorganization proceedings, when the ongoing contract involves the payment of a sum of money, this payment no longer benefits from any payment terms, unless the administrator obtains extended payment deadlines from the contractual partner of the debtor (whereas in safeguard proceedings, payment terms still apply).

In addition, after the opening of the insolvency proceedings:

- accrual of interest is suspended as a matter of principle, except in respect of loans providing for a term of at least one year or contracts providing for a payment that is differed by at least one year (but in any case, accrued interests cannot bear themselves interest, notwithstanding Article 1154 of the French Civil Code).
- the debtor is prohibited from paying (i) debts arising prior to the date of the court decision commencing the proceedings, subject to specified exceptions which essentially cover the set-off of related (*connexes*) debts and payments authorized by the supervising judge to recover assets for which recovery is justified by the continued operation of the business and (ii) debts arising after the opening of the proceedings if such debts are not useful to the proceedings (post-opening, non-privileged debts); and
- creditors may not pursue any individual legal action against the debtor (or a guarantor of the debtor provided such guarantor is an individual) with respect to any claim arising prior to the court decision commencing the proceedings if the objective of such legal action is:
    - to obtain an order for payment of a sum of money by the debtor to the creditor (however, the creditor may require that a court determine the amount due);

- to terminate a contract for nonpayment of pre-opening amounts owed to the creditor; or
- to enforce the creditor's rights against any assets of the debtor (except under specific circumstances, in particular where such asset—whether tangible or intangible, movable or immovable—is located in another Member State within the European Union, in which case the rights *in rem* of creditors thereon would not be affected by the French insolvency proceedings, in accordance with the terms of Article 5 of EC Regulations 1346/2000).

In accelerated financial safeguard, the above rules only apply to the creditors that are subject to the accelerated financial safeguard (i.e., credit institutions and similar entities that are eligible to the credit institutions' committee, and bondholders, which are eligible to the bondholders' general assembly described above).

As a general rule, creditors domiciled in France whose debts arose prior to the commencement of proceedings must file a proof of claim with the creditors' representative within two months of the publication of the court decision in the *Bulletin Officiel des annonces civiles et commerciales* (by exception, the deadline starts upon receipt of an individual notification for those creditors whose claim arose out of a published contract or who benefit from a published security interest); this period is extended to four months for creditors domiciled outside France. Where the debtor has informed the creditors' representative of the existence of a claim and no proof of claim has been filed yet, such claim is deemed filed with the creditors' representative. Creditors who have not submitted their claims during the relevant period are, except with respect to very limited exceptions, barred from receiving distributions made in connection with the proceedings. Employees are not subject to limitations and are preferential creditors under French law.

In accelerated safeguard and accelerated financial safeguard proceedings, the debts held by creditors that took part in the conciliation negotiation are listed by the debtor and certified by its statutory auditor (or, in its absence, its accountant). Although such creditors can file proofs of claim pursuant to the regular process, they may also avail themselves of this simplified alternative and merely adjust the amounts of their claims as set forth on the list prepared by the debtor (within the two or four months' time limit). Those creditors who did not take part in the conciliation proceeding and are subject to the accelerated safeguard or accelerated financial safeguard proceedings would have to file their proofs of claim within the aforementioned legal time limit.

If the court adopts a safeguard plan or reorganization plan, claims of creditors included in the plan will be paid according to the terms of the plan. The court can also set a time period during which the assets that it deems to be essential to the continued business of the debtor may not be sold without its consent.

In either judicial liquidation proceedings or in judicial reorganization proceedings (in the latter case, if no restructuring plan is drafted or if the draft restructuring plans appears obviously incapable of restoring the debtor's viability), the court may also decide to adopt a so-called *plan de cession* (i.e., plan for the sale of the business (together with a certain number of employees and contracts) to a third party) without any need to obtain the consent of either the debtor, creditors or co-contractors. Any third party may make a bid to that effect as from the opening of judicial reorganization of judicial liquidation proceedings. If such a plan is adopted, the proceeds of the sale will be allocated for the repayment of the creditors according to the ranking of their claims. The sale price is frequently significantly lower than the aggregate value of the assets, as the courts tend to give priority to the preservation of jobs over the repayment of creditors.

If the court decides to order the judicial liquidation of the debtor, the court will appoint a liquidator in charge of managing the company, selling the assets of the company and settling the relevant debts in accordance with their ranking. However, in practice, where the sale of the business plan is considered, the court will usually appoint a judicial administrator to manage the company and organize the sale process.

French insolvency law assigns a certain order of priority to the payment of certain preferred creditors (i.e., certain pre-opening employee claims, post-opening legal costs (essentially, fees of the officials appointed by the insolvency court), creditors who, as part of an approved *conciliation* agreement, have provided new money or goods or services (the "new money privilege"), creditors having security over real estate assets (in case of judicial liquidation only; in case of judicial reorganization, they rank behind post-opening creditors), post-opening creditors whose claims meet certain criteria (such claims being subject to a specific order of priority among themselves), and the other pre-opening or post-opening creditors, whose order of priority among themselves depends on various factors (in particular, the French State and other public institutions benefit from a favorable ranking with respect to taxes and social charges)). Some creditors may nevertheless bypass this order or priority, (e.g., if they benefit from a retention right over certain assets).

The "Suspect Period" in Judicial Reorganization and Liquidation Proceedings

The insolvency date (*date de cessation des paiements*) is generally deemed to be the date on which the judicial reorganization or liquidation proceedings are commenced, but the court may declare that a debtor's insolvency date occurred up to 18 months prior to the commencement date of such proceedings. This marks the beginning of the "suspect period" (*période suspecte*). Certain transactions entered into by the debtor during the suspect period are automatically void or voidable by the court.

Automatically void transactions include in particular transactions or payments entered into during the suspect period that may constitute voluntary preferences for the benefit of some creditors to the detriment of other creditors. Such transactions or payments must be set aside by the court if a claimant (such as an insolvency officer or the public prosecutor) so requests. These include, notably, transfers of assets for no consideration, contracts under which the reciprocal obligations of the debtor significantly exceed those of the other party, payments of debts not due at the time of payment, payments made in a manner that is not commonly used in the ordinary course of business and security granted for debts (including a security granted to secure a guarantee obligation) previously incurred and provisional measures (unless the right of attachment or seizure predates the date of cessation of payments), the transfer of any assets or rights to a trust arrangement (*fiducie*) (unless such transfer is made as a security for debt incurred at the same time), and any amendment to a trust arrangement (*fiducie*) that dedicates assets or rights as a guaranty of pre-existing debts.

Transactions voidable by the court include any payments made on accrued debts, transfers of assets for consideration and notices of attachments made to third parties (*avis à tiers détenteur*), seizures (*saisie attribution*) and oppositions made during the suspect period, and more generally any agreement entered into with the debtor, if the court determines that the creditor knew of the cessation of payments of the debtor. Transactions relating to the transfer of assets for no consideration are also voidable when made during the six-month period preceding the suspect period. Unlike with respect to void transactions, which must be set aside by the court if so requested, the court has discretion to decide whether or not it appropriate to set aside transactions that are only "voidable."

See *"Risk Factors—Risks Related to the Senior Secured Notes and the Senior Notes—The insolvency laws of France, Germany and other applicable jurisdictions may not be as favorable to you as the insolvency laws of the United States or those of another jurisdiction with which you are familiar; other limitations on the Guarantees and the Security Interests, including fraudulent conveyance statutes, may adversely affect their validity and enforceability" and "—Fraudulent Conveyance."*

Creditors' Liability

Pursuant to Article L. 650-1 of the French Commercial Code, where insolvency proceedings (including safeguard proceedings) have been commenced, creditors may be held liable for the losses suffered as a result of facilities granted to the debtor only if evidence is brought (i) of either a fraud; or (ii) of a wrongful interference with the management of the debtor; or (iii) that the security or guarantees taken to support the facilities are disproportionate to such facilities. Case law has recently set out that this liability would also require that the granting of the facility be deemed to be wrongful. In addition, any security or guarantees taken to support facilities in respect of which a creditor is found liable can be cancelled or reduced by the court.

Limitations on Enforcement

Limitations on Guarantees

The liabilities and obligations of each French Guarantor under its Note Guarantee are subject to:

- certain exceptions, including to the extent any obligations which, if incurred, would constitute prohibited financial assistance within the meaning of Article L. 225-216 of the French *Code de Commerce* or infringement of the provisions of Articles L. 241-3, L. 242-6 or L. 244-1 of the French *Code de Commerce*; and
- a financial limitation corresponding to an amount equal to the proceeds from the Offerings of the Notes (including any additional Notes) which the Issuers have (i) applied for the direct or indirect

benefit of each French Guarantor or its controlled subsidiaries through the intercompany loans or similar arrangements or (ii) used to refinance (directly or indirectly) any indebtedness previously on-lent directly or indirectly to a French Guarantor or its controlled subsidiaries through the intercompany loans or similar arrangements and that are, in each case, outstanding on the date a payment is requested to be made by such French Guarantor.

Accordingly, the guarantees by the French Guarantors are limited to amounts that represent either (i) the amounts of such proceeds made available to such French Guarantor, and the controlled subsidiaries of that French Guarantor, via intra-group loan agreements or otherwise or (ii) the amount of the proceeds of the Notes used to refinance any indebtedness previously on-lent directly or indirectly to a French Guarantor or its controlled subsidiaries. Consequently, in the absence of any proceeds from the Senior Notes made available to any French Guarantor or its controlled subsidiaries by way of intra-group loan agreements, the Senior Note Guarantee granted by each French Guarantor will have no monetary value and therefore the amount of any such Senior Note Guarantee will be equal to zero. See "*Description of the Senior Secured Notes—The Senior Secured Note Guarantees*" and "*Description of the Senior Notes—The Senior Note Guarantees*."

In case the proceeds of the Notes are used to refinance (directly or indirectly) any indebtedness previously on-lent directly or indirectly to a French Guarantor or its controlled subsidiaries through the intercompany loans, such intercompany loans would be maintained (and their termination date would be extended) due to the incurrence by such French Guarantor of obligations and liabilities under its Note Guarantee. Any payment made by such French Guarantor under its Guarantee in respect of the obligations of any other obligor shall reduce *pro tanto* the outstanding amount of the intercompany loans due by such French Guarantor or its subsidiaries under the intercompany loan arrangements referred to above.

The purpose of those limitations is to mitigate the risk that the granting of a Guarantee by a French Guarantor could be viewed to fall outside its corporate benefit. However, the existence of corporate benefit is a factual matter which is determined on a case-by-case basis, and we cannot be certain as to the standard a French court would use to determine the French Guarantor's corporate benefit, any limit on the applicable Note Guarantee or whether such Note Guarantee would be deemed void.

In light of the foregoing, the contractual liabilities of a French Guarantor under its Note Guarantee (as the same is limited in accordance with the above description) could be materially reduced or eliminated.

It is also possible that a French Guarantor, or a creditor of a French Guarantor, or the bankruptcy trustee in the case of a bankruptcy of a French Guarantor, may contest the validity and enforceability of the French Guarantor's Note Guarantee on any of the above grounds and that the applicable court may determine that such Note Guarantee should be limited or voided.

In addition, if a French Guarantor receives, in return for issuing the guarantee, an economic return that is less than the economic benefit such French Guarantor would obtain in a transaction entered into on an arm's-length basis, the difference between the actual economic benefit and that in a comparable arm's-length transaction could be taxable under certain circumstances.

Limitations on enforcement of security interests and cash amount (soulte)

Security interests governed by French law may only secure a creditor up to the secured amount that is due and unpaid to it. Pledges over securities (whether in the form of a pledge over securities account or in the form of a pledge over shareholding interests (*parts sociales*)) may generally be enforced at the option of the secured creditors either (i) by way of a sale of the pledged securities in a public auction (the proceeds of the sale being paid to the secured creditors) or (ii) by way of judicial foreclosure (*attribution judiciaire*) or contractual foreclosure (*pacte commissoire*) of the pledged securities to the secured creditors, following which the secured creditors become the legal owner of the pledged securities. If the secured creditors choose to enforce by way of foreclosure (whether a judicial foreclosure or contractual foreclosure), the secured liabilities would be deemed extinguished up to the value of the foreclosed securities. Such value is determined either by the court in the context of a judicial attribution or by a pre-contractually agreed expert in the context of a contractual foreclosure. If the value of the Collateral exceeds the amount of secured debt under the pledge, the secured creditor may be required to pay the pledgor a cash amount (*soulte*) equal to the difference between the value of the securities as so determined and the amount of the secured debt under the pledge. This is true regardless of the actual amount of proceeds ultimately received by the secured creditor from a subsequent on-sale of the Collateral.

If the value of such securities is less than the amount of the secured debt under the pledge, the relevant amount owed to the relevant creditors will be reduced by an amount equal to the value of such securities, and the remaining amount owed to such creditors will be unsecured in that respect.

An enforcement of the pledged securities could be undertaken through a public auction in accordance with applicable law. If enforcement is implemented through a public auction procedure, it is possible that the sale price received in any such auction might not reflect the value of the securities since the latter will not be sold pursuant to a competitive bid process and/or a private sale organized by an investment bank and controlled by the vendor on the basis of a value determined pursuant to the methods usually used for the purpose of the acquisition of companies or groups of companies.

In addition, in view of the area of activity of the Group or certain members of the Group, it should be noted that foreign investments in companies or businesses which operate in certain sectors (notably where their activities relate to equipment, products or services which are critical to the interests of France in terms of public order, public safety or national security, in particular in the areas of energy and water supply, public health, public transport and electronic communication) may require the prior authorization of the French authorities. This requirement may interfere with the enforcement of the Collateral consisting of shares or a business.

Where any of the above sectors are involved, the following shall constitute foreign investments which are subject to the prior authorization procedure:

A transaction as a result of which a non-EU investor (i) acquires the control (within the meaning of Article L. 233-3 of the French Commercial Code), (ii) acquires all or part of a business (*branche d'activité*) or (iii) crosses the threshold of 33.33% of the share capital, in each case of a company whose registered office is located in France.

A transaction as a result of which an EU investor (i) acquires the control (within the meaning of Article L. 233-3 of the French Commercial Code) or (ii) acquires all or part of a business, in either case of a company whose registered office is located in France.

A transaction as a result of which a French investor under non-French control acquires all or part of a business of a company whose registered office is located in France.

When a foreign investment is subject to the authorization of the French authorities as above, the transaction cannot be completed prior to authorization. The foreign investor must submit a formal application for prior authorization to the French authorities which must render a decision within two months of receipt of the application (failing which authorization shall be deemed to have been granted).

Parallel Debt

Under French law, certain "accessory" security interests such as pledges require that the pledgee and the creditor be the same person. Such security interests cannot be held on behalf of third parties who do not hold the secured claim, unless they act as fiduciary under Article 2011 of the French Civil Code or as security agent under Article 2328-1 of the French Civil Code. The beneficial holders of interest in the Senior Secured Notes from time to time will not be parties to the Security Documents. The Intercreditor Agreement provides for the creation of a "parallel debt" in favor of the Security Agent directly. Pursuant to the parallel debt, the Security Agent becomes the holder of a claim equal to each amount payable by an obligor under the Indenture and the Intercreditor Agreement. The pledges governed by French law will directly secure the parallel debt, and may not directly secure the obligations under the Notes and the other indebtedness secured by the Collateral. The holders of the Notes will not be entitled to take enforcement actions in respect of such security interests except through the Security Agent. Although the enforceability in France of certain rights (the filing of claims in safeguard proceedings) of a security agent benefiting from a parallel debt was recognized for the first time by the French Supreme Court (*Cour de Cassation*) on September 13, 2011, there is no assurance that such a structure will be effective in all cases before French courts. Indeed, such a decision should not be considered as a general recognition of the enforceability in France of the rights of a security agent benefiting from a parallel debt. To the extent that the security interests in the Collateral created under the parallel debt structure are successfully challenged by other parties, holders of the Notes will not receive any proceeds from an enforcement of the security interest in the Collateral.

Further, under a parallel debt structure, the holders of the Notes will bear the risks associated with the possible insolvency or bankruptcy of the Security Agent as the beneficiary of the parallel debt.

The Trustee has certain assigned duties and rights under the Indenture that become particularly important following Defaults or Events of Default, and acts as trustee in a fiduciary capacity in the best interests of the holders of the Notes.

The concept of "trust" has been recognized by the French Tax Code and the French Supreme Court (*Cour de cassation*), which has held, in the same published decision referred to above (Cass. com. 13 September 2011 n°10-25533 Belvedere) that a trustee validly appointed under a trust governed by the laws of the State of New York could validly be regarded as a creditor in safeguard proceedings commenced in France. However, while certain comfort may be derived from the above, France has not ratified the Hague Convention of July 1, 1985 on the law applicable to trusts and on their recognition, and two *réponses ministérielles* dated January 24, 2008 and January 8, 2009 indicated its reluctance to do so to avoid conflicts between the "trust" and the French *fiducie,* so that the concept of "trust" has not been generally recognized under French law.

Recognition of Intercreditor Arrangements by French Courts

There is no law or published decision of the French courts of appeal or of the French Supreme Court (*Cour de cassation*) on the validity or enforceability of the obligations of an agreement such as the Intercreditor Agreement, except for Article L. 626-30-2 of the French Commercial Code which states that, in the context of safeguard proceedings, the safeguard plan which is put to the vote of the creditors' committees takes into consideration (*prend en compte*) the provisions of subordination agreements between creditors which were entered into prior to the commencement of the safeguard proceedings. As a consequence, except to the extent referred to above (which, as at the date of this offering memorandum, has received no judicial interpretation), we cannot rule out that a French court would not give effect to certain provisions of the Intercreditor Agreement.

Lower-Ranking Security in France

The Intercreditor Agreement and the Security Documents provide for a mechanism allowing the implementation of second or lower ranking pledges.

The creation and enforcement of lower-ranking pledges over certain assets (such as receivables) has not been tested before French courts, and there can be no assurance that lower-ranking pledges would be upheld if tested. Accordingly, there is a risk that a lower-ranking pledge over such assets may held void or unenforceable by a French court, but this would not affect the validity and enforceability of a prior-ranking security granted over the same assets. Although there is no express prohibition under French law on granting a lower-ranking pledge over a securities account in which the shares or other securities of a French company are registered, some legal commentators have queried whether a lower-ranking pledge is legally permissible to the extent that a pledge of a securities account is deemed, under French law, to confer a retention right (*droit de rétention*) over the securities credited on the securities account, thereby preventing such grantor from granting a further lower-ranking pledge thereon. Consequently, no assurance can be given that a court would concur with the view that a lower ranking pledge over securities account is valid. Therefore, there is a risk that the second or lower ranking pledge over the securities account in which the shares of such company are respectively registered may be held void or unenforceable by a French court, which in turn could materially adversely affect the recovery under the Notes or Notes Guarantees (as applicable) following an enforcement event.

A pledge over the shares of a stock company (*société par actions*) governed by French law is a pledge over the relevant securities account (*nantissement de compte de titres financiers*) in which the shares of such company are registered. In France, no lien searches are available for security interests which are not registered, such as pledges over securities accounts (*nantissements de comptes de titres financiers*). As a result, no assurance can be given on the priority of a pledge over a securities account in which the shares of such a company are registered.

Fraudulent Conveyance

French law contains specific provisions dealing with fraudulent conveyance both in and outside of insolvency proceedings, called *action paulienne* provisions. The *action paulienne* offers creditors protection against a decrease in their means of recovery. A legal act performed by a debtor (including, without limitation, an agreement pursuant to which it guarantees the performance of the obligations of a third party or agrees to provide or provides security for any of its or a third party's obligations, enters into additional agreements benefiting from existing security and any other legal act having similar effect) can be challenged either (a) in insolvency proceedings of the relevant debtor by the insolvency officers of the relevant debtor, or (b) in or outside insolvency proceedings by any of the creditors of such debtor who was prejudiced in its means of recovery as a consequence of the act, and may be declared unenforceable against third parties if: (i) the debtor performed such acts without an obligation to do so; (ii) the creditor concerned or, in the case of the debtor's insolvency, any creditor, was prejudiced in its means of recovery as a consequence of the act; and (iii) at the time the act was performed both the person and the counterparty to the transaction knew or should have known that one or more of its creditors (existing or future) would be prejudiced in their means of recovery, unless the act was entered into for no consideration (*à titre gratuit*), in which case such knowledge of the counterparty is not necessary for a successful challenge on grounds of fraudulent conveyance. If a court found that the issuance of the Notes, the grant of the security interests in the Collateral or the granting of a guarantee involved a fraudulent conveyance that did not qualify for any defense under applicable law, then the issuance of the Notes, the granting of the security interests in the Collateral or the granting of such guarantee could be declared unenforceable against third parties or declared unenforceable against the creditor that lodged the claim in relation to the relevant act. As a result of such successful challenges, holders of the Notes may not enjoy the benefit of the Notes, the guarantees or the security interests in the Collateral and the value of any consideration that holders of the Notes received with respect to the Notes, the security interests in the Collateral or the guarantees could also be subject to recovery from the holders of the Notes and, possibly, from subsequent transferees. In addition, under such circumstances, holders of the Notes might be held liable for any damages incurred by prejudiced creditors of the Issuers or the Guarantors as a result of the fraudulent conveyance.

Spain

Insolvency of the Spanish Guarantors

In the event of insolvency of a Guarantor incorporated under the laws of the Kingdom of Spain (a "Spanish Guarantor"), insolvency proceedings may proceed under, and be governed by, the Spanish Insolvency Act (*Ley 22/2003, de 9 de Julio, concursal*), as amended (the "Spanish Insolvency Act").

The following is a brief description of certain aspects of the insolvency laws of Spain.

Concept and Petition for Insolvency

In Spain, insolvency proceedings are only triggered in the event of a debtor's insolvency (either imminent or current insolvency). A debtor is deemed insolvent when it becomes unable to meet regularly its obligations as they become due and payable (current insolvency) or when it expects that it will shortly be unable to do so (imminent insolvency). The insolvency proceedings may be initiated either by the debtor ("voluntary insolvency") or by any of its creditors ("compulsory insolvency") (*provided that* it has not acquired the credit within the six months prior to the filing of the petition for insolvency, for *inter vivos* acts, on a singular basis and once the credit was mature) or by certain other interested third parties. However, only the debtor may file a petition for insolvency on the basis of its imminent insolvency. Whether insolvency proceedings are voluntary or compulsory will affect the basis for the insolvency, as well as impact upon the debtor's capacity.

Voluntary Insolvency

A debtor is required to apply for insolvency proceedings when it is not able to regularly meet its current obligations and is entitled (but not obliged) to apply when it expects that it will shortly be unable to do so in the near future (i.e., imminent insolvency). If the debtor files the insolvency petition, it must prove its current or imminent insolvency. The debtor is obligated to file a petition for a declaration of insolvency within two months after it becomes aware, or should have become aware, of the insolvency situation. It is presumed that the debtor becomes aware of its state of insolvency, unless otherwise proved, if any of the circumstances that qualify as the basis for a petition for compulsory insolvency occur.

A debtor may file for insolvency, or may file with the insolvency court a communication under Article 5.*bis* of the Spanish Insolvency Act (a "pre-insolvency notice") informing that it has started negotiations with its creditors to seek support for either (i) a collective refinancing agreement in the terms of article 71.*bis*.1 of the Spanish Insolvency Act, (ii) a Spanish "scheme of arrangements" provided under the 4th Additional Provision of the Spanish Insolvency Act, (iii) an early composition agreement (*convenio anticipado*), or (iv) an out-of-court repayment agreement under Articles 231 *et seq.* of the Spanish Insolvency Act. In such scenario, it will have a three-month additional grace period in which the obligation to file for insolvency is stayed, and one more month to file for insolvency if it does not reach an agreement with its creditors, *provided that* it files the pre-insolvency notice before the court within two months of becoming insolvent.

In the event of the debtor failing to file a petition for insolvency within the time period established by law, it may be unable to exercise certain courses of action (including, among others, the possibility of submitting a proposed settlement in advance) and the personal liability of the members of the management body is increased.

Compulsory Insolvency

If a creditor requests the insolvency, it must provide evidence of the debtor's insolvency in the terms and by the means stated under Section 2.4 of the Spanish Insolvency Act, such as (i) a generalized default on payments by the debtor, (ii) the occurrence of generalized attachments on the debtor's assets, (iii) a hasty or loss-making liquidation of assets, or (iv) a generalized default on certain tax, social security and employment obligations during the applicable statutory period (three months). Upon receipt of an insolvency petition by a creditor, the insolvency court may issue provisional interim measures to protect the assets of a debtor and may request a guarantee from the petitioning creditor asking for the adoption of such measures to cover damages caused by the preliminary protective measures.

The debtor will be entitled to file an opposition to such petition, and will have to prove that it is not insolvent. The court will then summon the parties to a hearing, and will finally render a court ruling either dismissing the application filed by the creditor, or declaring the insolvency proceeding of the debtor.

Conclusion of Insolvency: Proposal of Agreement or Liquidation

The Spanish Insolvency Act provides that insolvency proceedings conclude following either the implementation of an agreement between the creditors and the debtor, the liquidation of the debtor, or payment of the total debt to the debtor's creditors.

Effects of the Insolvency for the Debtor

The insolvency court will issue a court order either rejecting the petition or declaring the insolvency. In the event of declaration of insolvency, the insolvency court order will appoint a court administrator or receiver (*administración concursal*) and will order the publication of such declaration of insolvency in the State Official Gazette (*Boletín Oficial del Estado*). The declaration of insolvency shall also be filed in the Commercial Registry (*Registro Mercantil*) and in the Public Registry of Insolvency (*Registro Público Concursal*).

As a general rule, and subject to certain exceptions, if the insolvency is voluntary, the debtor's directors retain their power to manage and dispose of the business, albeit under supervision by the insolvency administrator and in case the insolvency is compulsory, then the debtor's directors are removed from their power over the company's assets, which become subject to management by the insolvency administrator. However, the court has the power to modify this general regime subject to the specific circumstances of the case. In addition, upon the insolvency administrator request, the court has the power to swap the intervention regime for a suspension regime or *vice versa*.

Actions carried out by the debtor that breach any required supervision of the insolvency administrator may be declared null and void.

Enforcement and Termination in a Pre-insolvency Scenario

The obligations under the Notes, the guarantees and/or the security interest might not necessarily be enforced in accordance with their respective terms in every circumstance, such enforcement being subject to, *inter alia*, the nature of the remedies available in the Spanish Courts, the acceptance by such court of jurisdiction, the discretion of the courts, the power of such courts to stay proceedings, the provisions of the Spanish Law on Civil Procedure (*Ley 1/2000, de 7 de enero, de Enjuiciamento Civil*) regarding remedies and enforcement measures available under Spanish law, the provisions of the Spanish Insolvency Law and other principles of law of general application. In this regard:

- Spanish law does not expressly recognize the concept of an indemnity. Section 1,152 of the Spanish Civil Code establishes that any penalty (*cláusula penal*) agreed by the parties in an agreement will substitute damages (*indemnización de daños*) and the payment of interest (*abono de intereses*) in an event of breach, unless otherwise agreed. Spanish courts may modify the penalty agreed on an equitable basis if the debtor has partially or irregularly performed its obligations, unless the penalty (liquidated damages) was aimed at such partial performance. There is doubt as to the enforceability in Spain of punitive damages.

- Where obligations are to be performed in a jurisdiction outside Spain, they may not be enforceable in Spain to the extent that performance would be illegal under the laws of the applicable jurisdiction.

- Spanish law precludes the validity and performance of contractual obligations to be left at the discretion of one of the contracting parties. Therefore, Spanish courts may refuse to uphold and enforce terms and conditions of an agreement giving discretionary authority to one of the contracting parties.

- Spanish law, as applied by the Spanish Supreme Court, precludes an agreement being terminated on the basis of a breach of obligations, undertakings or covenants which are merely ancillary or complementary to the main undertakings foreseen under the relevant agreement (such as payment obligations under financing agreements), and allows Spanish courts not to enforce any such termination.

- Under Spanish law, acts carried out in accordance with the terms of a legal provision whenever said acts seek a result which is forbidden by or contrary to law, shall be deemed to have been executed in circumvention of law (*fraude de ley*) and the provisions whose application was intended to be avoided shall apply.

Effects of the Insolvency on Contracts

Under Section 61 of the Spanish Insolvency Act, all clauses that entitle any party to terminate an agreement with reciprocal obligations based solely on the other party's declaration of insolvency are deemed void. The declaration of insolvency does not affect agreements with reciprocal obligations pending performance by either the insolvent or the other party and the obligations of the insolvent debtor will be fulfilled against the insolvent estate. However, the insolvency administrator (together with the insolvent or by their sole discretion if the insolvent is not allowed to carry on its business) may request the court to terminate the relevant contract (on the grounds of convenience in the insolvency proceedings) or at the request of the non-insolvent party if there has been a breach of such contract. The termination of such contracts may result in the insolvent debtor having to return and indemnify damages to its counterpart against the insolvency estate (*con cargo a la masa*). On the other hand, the judge may decide to cure any breach of the insolvent debtor at its request or the insolvency administrators' request (assumption) (*mantenimiento del contrato en interés del concurso*), in which case the non-insolvent party shall be entitled to seek specific performance against the insolvency estate (pre-deductible claim from the estate). There are cases in which the Spanish law expressly allows to establish an agreement for termination in the event of insolvency (e.g., agency contracts).

In addition, the declaration of insolvency determines that interest accrual is suspended, except credit rights secured with an *in rem* right, in which case interest accrues up to the value of the security, and except for any wage credits in favor of employees, which will accrue the legal interest set forth in the corresponding Law of the State Budget (*Ley de Presupuestos del Estado*).

As a general rule, insolvency proceedings are not compatible with other enforcement proceedings which can have an effect on the estate (excluding enforcement proceedings with regard to financial collateral (as defined in Royal Decree Law 5/2005). When compatible, in order to protect the interests of the debtor and creditors, the Spanish Insolvency Act extends the jurisdiction of the court dealing with insolvency proceedings, which is then legally authorized to handle any enforcement proceedings or interim measures affecting the debtor's assets (whether based upon civil, labor, or administrative law).

The enforcement of any security over certain assets that are necessary to the continuation of the commercial or professional activity of the insolvent company (*in rem* securities) is prohibited until the earlier of: (i) an arrangement of a composition agreement being reached, *provided that* the composition agreement does not affect such right; or (ii) one year having elapsed as of the declaration of the insolvency without the opening of the liquidation phase. Nevertheless, shares/quota shares held by an insolvent debtor in another company whose only activity is the holding of a material asset and servicing the financing provided in connection with the acquisition of that asset, are not considered to be an asset necessary for the debtor's business activity as long as the foreclosure of the relevant security interest that has been granted over such shares/quota shares does not bring about an early termination or amendment of the contractual relations permitting the economic exploitation of the relevant asset.

Rules on Priority of Creditors

Creditors are required to report their claims to the insolvency administrators within one month from the day following the last official publication of the court order declaring the insolvency, providing documentation to justify such claims. Based on the documentation provided by the creditors and documentation held by the debtor, the court administrators draw up a list of acknowledged creditors/ claims and classify them according to the categories established in the Spanish Insolvency Act.

Under the Spanish Insolvency Act, claims are classified in two groups:

- Estate Claims (*créditos contrala masa*): Section 84 of the Spanish Insolvency Act sets out the so-called "estate claims" which are pre-deductible claims from the estate (excluding those assets of the insolvent debtor subject to *in rem* security). Debt against the insolvency estate includes, among others, (i) certain amounts of the employee payroll, (ii) costs and expenses of the insolvency proceedings, (iii) certain amounts arising from services provided by the insolvent debtor under reciprocal contracts and outstanding obligations that remain in force after insolvency proceedings are declared and deriving from obligations to return and indemnity in cases of voluntary termination or breach by the insolvent debtor, (iv) those that derive from the exercise of a claw-back action within the insolvency proceedings of acts performed by the insolvent debtor and correspond to a refund of consideration received by it (except in cases of bad faith), (v) certain amounts arising from obligations created by law or from the non-contractual liability of the insolvent debtor after the declaration of insolvency and until its conclusion, (vi) certain debts incurred by the debtor following the declaration of insolvency; (vii) in case of liquidation, the credit rights granted to the debtor under a composition agreement in accordance with Section 100.5 of the Spanish Insolvency Law, (viii) 100% of the new funds lent under a refinancing arrangement entered into in compliance with the requirements set forth in Section 71.*bis* or the 4th Additional Provision of the Spanish Insolvency Law, *provided that* such arrangement has been entered into after 9 March 2014 and (ix) 100% of the new funds lent by the debtor itself or by persons being in a special relationship with the debtor in the context of a refinancing arrangement entered into in compliance with the requirements set forth in Section 71.*bis* or the 4th Additional Provision of the Spanish Insolvency Law, *provided that* such arrangement has been entered into after 9 March 2014 and *provided further that* such new funds do not result from a share capital increase. From 2 October 2016, only 50% of the new funds referred to in subsection (viii) will be considered as claims against the insolvency estate, and funds referred to in subsection (ix) will no longer be considered as claims against the insolvency estate, unless granted by a special related person. As an exception, new money granted pursuant to an out-of-court workout regulated under Section 71.*bis* or the 4th Additional Provision of the Spanish Insolvency Act, which also contemplates a debt-for-equity swap executed before the granting of fresh money, shall not be subordinated under Section 92.5° of the Spanish Insolvency Act. This is an incentive to promote fresh money and debt- for-equity swaps in order to remove insolvency out-of-court. These claims are preferred to all others except for specially privileged claims specifically with regard to the assets subject to the relevant security interest or special privilege.
- Insolvency Claims: Insolvency claims are classified as follows:
  - Specially Privileged Claims: Creditors benefiting from special privileges, representing security over certain assets (*in rem* securities) up to the amount of the value of their security, *provided that* such security is listed in the creditors' list (in this regard, the value of a security shall be 90% of the reasonable value of the secured asset minus those claims that hold higher ranking security over such asset). The part of the claim exceeding the value of their security will be

classified according to the nature of the claim. These claims benefiting from special privileges may entail separate proceedings, though subject to certain restrictions derived from a waiting period that may last up to one year and certain additional limitations set forth in the Spanish Insolvency Law. However, within such waiting period or while any enforcement proceedings remain suspended under the Spanish Insolvency Law, the insolvency administrator has the option to pay the relevant claims against the insolvency estate under specific payment rules.

- Generally Privileged Claims: Creditors benefiting from a general privilege, including, among others, specific labour claims and specific claims brought by public entities or authorities are recognized for half their amount, and claims held by the creditor taking the initiative to apply for the insolvency proceedings, for up to 50% of the amount of such debt. From 2 October 2016, new funds under a refinancing arrangement entered into in compliance with the requirements set forth in Article 71.*bis* of the Spanish Insolvency Law in the amount not admitted as a debt against the insolvency estate (*crédito contra la masa*) will also be credits with general privileges.
- Ordinary Claims: Ordinary creditors (non-subordinated and non- privileged claims) are paid *pro rata* once estate claims and privileged claims have been paid.
- Subordinated Claims: Subordinated creditors (thus classified by virtue of an agreement or pursuant to law), include, among others: credits communicated late (outside the specific one-month period mentioned above); credits which are contractually subordinated *vis-à-vis* all other credits of the debtor; credits relating to unpaid interest claims (including default interest) except for those credits secured with an *in rem* right up to the secured amount; fines; and claims of creditors which are "specially related parties" to the insolvent debtor. In the case of individuals, this includes their relatives, legal entities controlled by the debtor or its relatives, the factual or legal administrators of such legal entities, any other legal entity forming part of the same group of companies and the legal entities in respect of which the people described in this paragraph are their factual and legal administrators. In the case of a legal entity, the following shall be deemed as "specially related parties": (i) shareholders with unlimited liability (in case such shareholders are natural persons it would include any special related party to these shareholders, as described herein); (ii) limited liability shareholders holding, directly or indirectly, 10% or more of the insolvent company's share capital (or 5% if the company is listed); or (iii) directors (either *de jure* or *de facto*) insolvency liquidators and those holding general powers of attorney from the insolvent company (including those people that have held these position during the two years prior to the insolvency declaration); and (iv) companies pertaining to the same group as the debtor and their common shareholders provided such shareholders meet the minimum shareholding requirements set forth in (ii) above. Notwithstanding the above, creditors who have directly or indirectly capitalized their credit rights pursuant to a refinancing arrangement entered into in compliance with the requirements set forth in Section 71.*bis* or the 4th Additional Provision of the Spanish Insolvency Law shall not be considered as being in a special relationship with the debtor, in respect of credits against the debtor, as a result of the financing granted under such refinancing arrangement. Claims related to accrued and unpaid interest unless and to the extent they are secured by an *in rem* right are also subordinated. Subordinated creditors are second- level creditors; they may not vote on a composition agreement and have limited chances of collection. Furthermore, in the absence of evidence to the contrary, assignees or awardees of claims belonging to any of the persons mentioned in this paragraph are presumed to be persons specially related to the insolvent debtor as long as the acquisition has taken place within two years prior to the insolvency proceedings being declared open.

Limitations to Enforcement by Unsecured and Secured Creditors

From the moment a pre-insolvency notice is submitted and during the pre- insolvency period, court or out-of-court enforcement proceedings may not be initiated for the enforcement of assets or rights necessary for the continuation of the debtor's professional or business activity, and proceedings already initiated will be stayed.

Furthermore, individual enforcements sought by holders of financial liabilities cannot be initiated (or, if they have already been initiated, will be stayed) when it is justified that a percentage not lower than 51%

of creditors holding financial liabilities have supported the start of negotiations of a refinancing agreement, undertaking not to initiate enforcements in the meantime.

Enforcements of *in rem* securities can be commenced after the aforementioned pre-insolvency notice is submitted, but such enforcement becomes stayed for the time explained above. On the contrary, enforcement of claims subject to Public Law are not affected by the submission of this pre- insolvency notice.

Enforcement is also stayed in case a refinancing agreement submitted for homologation is admitted by the Court, until the time the Court decides to homologate it or not.

Upon the court declaration of insolvency, as a general rule, the enforcement rights of unsecured creditors are stayed. Unsecured creditors cannot initiate any enforcement proceedings against the debtor company's assets after the declaration of insolvency.

Notwithstanding the rules on priority mentioned in "*Rules on Priority of Creditors*" above, in the event of the debtor's insolvency and in accordance with the provisions of the Spanish Insolvency Act, the ability of a secured creditor to enforce the collateral is limited if the asset is necessary for the continuation of the debtor's professional or business activity.

In such instances, the enforcement or realization of security may not be commenced until (a) either (i) a composition is approved (the content of which does not affect this right except in certain cases) or (ii) one year elapses from the insolvency declaration without liquidation taking place, and (b) unless at the time of the insolvency declaration, the announcements to auction the collateral had been published. The stay will only be lifted when the court hearing the insolvency proceedings determines that the asset is not necessary for the survival of the debtor's professional or business activities.

When it comes to determining which assets of the debtor are used for its professional or business activities, courts have generally embraced a broad interpretation and will likely include most of the debtor's assets. In particular, the Spanish Insolvency Act establishes that the shares or quotas of companies exclusively destined to hold assets and the liabilities necessary for their financing will not be consider necessary for the continuation of the debtor's business, *provided that* the enforcement of the security over the shares or quotas does not constitute a cause of termination or modification of those contractual relationships of the company that allow the debtor to continue exploiting such assets.

Settlement

Once the debtor's assets and liabilities have been identified, the Spanish Insolvency Act encourages creditors to reach an agreement regarding payment of the insolvent party's debts. This agreement may be proposed either by the debtor or by the creditors, and it shall set forth how, when and up to what amount creditors are to be paid. Once executed, this agreement must be honored by the debtor and respected by the creditors.

The settlement or composition should contain proposals for write-off and grace period. It may contain alternative proposals for all creditors or for certain classes, including conversion of the credit into shares or into profit- sharing credits. It may also include proposals for allocation of all assets or of certain assets to a specific person with a commitment from the acquirer to continue the activity and to pay off the debt as determined in the settlement.

The proposals in the settlement shall include a payment schedule.

In order for a settlement or composition to be deemed approved by the creditors, the following majorities shall be met at the creditors' meeting:

(a) If creditors whose claims amount to at least 50% of the unsecured liabilities (ordinary creditors and privileged creditors who waive their privilege) have voted for such settlement or composition, they shall be subject to write-offs equal to or less than 50% of the claims; to deferrals in the payment of principal, interest or any other outstanding amount, for a period not exceeding five years; or, in the case of creditors other than those related to the public administration or employment matters, to the conversion of debt into profit-sharing loans over the same period. Notwithstanding the above, a vote by creditors representing a portion of the unsecured liabilities that is greater than the vote against will suffice when the settlement consists of (i) full payment of ordinary or unsecured claims within a period not exceeding three years or (ii) immediate repayment of outstanding ordinary unsecured claims applying a write-off of less than 20%.

(b) If the creditors whose claims amount to 65% of the unsecured liabilities (ordinary creditors and privileged creditors who waive their privilege) vote for the settlement or composition, they shall be subject to deferrals of more than five years, but in no case more than ten; to write- offs in excess of 50% of the claims; and, in the case of creditors other than those related to the public administration or employment matters, to the conversion of debt into profit-sharing loans over the same period and subject to certain measures.

The holders of subordinated credits and those specially related to the debtor company are not entitled to vote, but they will have to abide to the terms of the settlement reached by ordinary creditors. However, in their case, the deferral period will commence to run once the settlement in relation to ordinary creditors has been fully complied with.

Although in principle secured creditors are not subject to an approved settlement or composition, there is an exception: the effects of an approved composition can be extended to secured and preferential creditors (in respect of the part of the claim covered by the reasonable value of the security), *provided that* the relevant composition of creditors has been approved by the following majorities of creditors: (a) when 60% of the preferential creditors, vote in favor of the composition in cases where the composition consists of a write-off (or debt discharges) equal to or less than 50% of the claim, deferrals for a period no longer than five years and conversion of debt into profit-sharing loans, also for a period no longer than five years (in the case of creditors different from public and employment creditors); and (b) when 75% of the preferential creditors, vote in favor of the composition of creditors in cases where the composition consists of write-off (or debt discharges) of more than 50% of the claim; deferrals (for a period between five and ten years) and conversion of debt into profit-sharing loans, also for a period between five and ten years (in the case of creditors different from public and employment creditors).

A special case arises with an advance proposal for settlement. This has two main advantages: (i) in terms of time—it may be submitted along with the petition for voluntary insolvency or until the conclusion of the term for creditors to send their statements of claim to the court receivers, allowing for it to be accepted prior to the settlement phase, and it may be approved by the court upon conclusion of the common phase; and (ii) in terms of content—if the proposed settlement requires a write-off or grace period in excess of those allowed by Spanish law, the court may allow such legal limits to be exceeded. There is a condition, however, whereby the proposal must be submitted with the prior support of at least 20% of the total debt (or 10%, if submitted along with the voluntary insolvency petition) and it may only be submitted by diligent debtors (i.e., not those affected by legal prohibitions).

Liquidation

Liquidation is conceived as an outcome subsidiary to settlement. It operates where a composition is not reached or when it is decided upon by the debtor. The debtor is also obligated to file a petition for liquidation if, during the period while the settlement is in force, it becomes aware that it is no longer able to meet the payment commitments and obligations undertaken after the approval of such settlement. If the debtor is a company, its dissolution will be declared, as well as the removal of its directors and liquidators. Deferred credits will compulsorily fall due and credits consisting of other benefits are converted into cash credits.

The insolvency administrator (who at this stage replaces the debtor's directors if this has not happened yet) is required to prepare a liquidation plan that must be approved by the court. The aim of the Spanish Insolvency Act is to preserve companies or production units through their allocation as a block, except where it is more protective for the interests of the insolvency proceedings to divide them up or sell some or all the elements separately, with preference given to the alternatives allowing the continuity of the business.

The insolvency administrator is required to report quarterly on the liquidation and has one year to complete it. If the liquidation is not completed within one year, the court may appoint a different insolvency administrator.

Limitations on Enforcement

Under Spanish law, claims may become time-barred (15 years being the general term established for obligations *in personam* under Article 1,964 of the Spanish Civil Code (*Código Civil*)) or may be or become subject to the defence of set-off or counterclaim.

The terms "enforceable," "enforceability," "valid," "legal," "binding" and "effective" (or any combination thereof) mean that all of the obligations assumed by the relevant party under the relevant documents are of a type enforced by Spanish courts; the terms do not mean that these obligations will necessarily be enforced in all circumstances in accordance with their terms.

Enforcement before the courts will in any event be subject to:

- the nature of the remedies available in the courts; and
- the availability of defence such as (without limitation) set-off (unless validly waived), circumvention of law (*fraude de ley*), abuse in the exercise of rights (*abuso de derecho*), misrepresentation, force majeure, unforeseen circumstances, undue influence, duress, abatement and counterclaim.

Under Spanish law there are some provisions on capitalization which have to be taken into account when security interests are enforced. For example, when the enforcement of the security interests cause the amount of the relevant Spanish subsidiary net equity (*patrimonio neto*) to fall below half of its share capital, the Spanish subsidiary will need to be wound up (*disolverse*), unless its share capital is increased or decreased in the required amount to reestablish the balance between its net equity and its share capital, and *provided that* it is not required to declare its insolvency.

Spanish law prohibits financial assistance for publicly held limited liability companies (*sociedades anónimas*) in relation to the acquisition of their own shares or the shares of any direct or indirect parent company. Therefore, any guarantee or indemnity granted or assumed pursuant to the Indenture by any Guarantor incorporated under the laws of Spain shall not extend to any payment obligation incurred by the Issuers for the purpose of acquiring the shares of such Guarantor or the shares of its direct or indirect parent company, to the extent that such guarantee or indemnity would constitute unlawful financial assistance within the meaning of Article 149 or 150 of Spanish Decree 1/2010 dated 2 July 2010 on Spanish Corporations (*Ley de Sociedades de Capital*). Furthermore, any guarantee or indemnity granted or assumed pursuant to the Indenture by any Spanish Guarantor shall not apply to the extent the proceeds are used to repay existing indebtedness of the Issuers if such existing indebtedness was used for the purposes described above. No whitewash procedures are available.

For the purposes of the paragraph above, a reference to a "parent company" of an Spanish Guarantor shall mean the company which, directly or indirectly, owns the majority of the voting rights of such Spanish Guarantor or that may have a dominant influence on such Spanish Guarantor. It shall be presumed that one company has a dominant influence on another company when:

(i) any of the scenarios set out in section 1 of Article 42 of the Spanish Commercial Code (*Código de Comercio*) are met; or

(ii) when at least half plus one of the members of the managing body of the Spanish Guarantor are also members of the managing body or top managers (*altos directivos*) of the dominant company or of another company controlled by such dominant company.

Spanish law is based, among other things, on the principle of specialty (*principio de especialidad*), by virtue of which a security interest can secure only a main obligation and its ancillary obligations, such as interest, costs, etc. As a general principle, where two different main obligations are to be secured, two different security interests must be created.

Security interests subject to Spanish law

(A) Principle of specialty (*principio de especialidad*).

Spanish law is based, inter alia, on the principle of specialty ("*principio de especialidad*"), by virtue of which a security interest can secure only one main obligation and its ancillary obligations, such as interest, costs, etc. As a general principle, where two different main obligations are to be secured, two different security interests must be created.

Whilst there is no express legal recognition of the grant of two or more pledges over the same asset or right, its permissibility has been based on the acceptance of the application by analogy of the provisions under the article 153 bis. of the Decree of February 8, 1946, approving the Spanish Mortgage Act (*Decreto de 8 de febrero de 1946, por el que se aprueba la nueva redacción oficial de la Ley Hipotecaria*), which sets forth that certain mortgages may be created as security for more than one obligation. Although it is a widespread market practice and is generally considered acceptable in Spanish academic literature, there are significant doubts (in particular as regards security documents governed by the regional laws of

Catalonia (*Derecho Civil Catalán*)) about the validity and enforceability of simultaneous first-ranking pledges over the same assets, as such structures are yet to be scrutinized before the Spanish courts. On the one hand, second and subsequent pledges are expressly prohibited by the Law 5/2006 of 10 May of the Fifth Book of the Catalonian Civil Code relating to the rights in rem (unless they are created for the benefit of the same creditors and the secured obligations are split among them).

Given the above, a court ruling may come to the conclusion that any security interest governed by the laws of Spain (particularly if governed by the regional laws of Catalonia (*Derecho Civil Catalán*), may secure only one obligation and, therefore, may consider such security interest to be void and null.

(B) Security agency structure—Spanish formalities.

Security interests must be granted in favor of each and every one of the secured parties under the relevant security document, and each secured party must accept said security interest.

Spanish law neither expressly recognizes the concept of security agent nor the concept of trustee and, therefore, the security agency or security trustee structure may not be recognized by Spanish courts. Therefore, in those cases where an entity acts as security agent of the actual beneficiaries of the security interest or a guarantee (i.e. the creditors of the secured obligations), such security agent must be duly empowered for that purpose at the time it acts as security agent. Otherwise the security interest or guarantee will not be validly created in favor of its purported beneficiaries.

The holders of the Notes, from time to time, shall be the beneficial holders of any Spanish law security interests, however, it is envisaged that they will not be parties to the Spanish law security documents that will be executed by the Security Agent on their behalf and the holders of the Notes will not be entitled to take enforcement actions in respect of such security interests except through the Security Agent (even if they are the direct beneficiaries of the security interests).

Although it could be argued that article 429 of the Spanish Companies Act (*Ley de Sociedades de Capital*)—which basically states that the representative of the syndicate of noteholders (*comisario*) may enforce any security interest on behalf of all noteholders under certain circumstances—could apply by analogy, it cannot be disregarded that, if enforcement of the security interest is carried out by the Security Agent, it may be necessary to prove that the Security Agent is duly and expressly empowered for such purpose by means of a power of attorney granted in favor of the Security Agent by each of the secured parties duly notarized and, if necessary, with the Apostille of The Hague Convention dated 5 October 1961 or legalized.

In the absence of the abovementioned powers of attorney, the Security Agent may not be able to enforce the relevant Spanish security interest on behalf of all of the secured creditors (including the holders of the Notes), and there is a risk that the Security Agent would only be able to enforce the security interest against the debt that it individually holds, and not for the full amount owed to creditors for whom it may be acting as Security Agent. Further, those benefial holders of the security who has not accepted the security or duly empowered (by means of notarial and apostilled powers of attorney) the Security Agent to do so may be treated, from a Spanish law perspective including without limitation in an insolvency scenario, as unsecured creditors.

Further, it is worth noting that there is a risk that the relevant court or notary public before whom any Spanish security interest may eventually be enforced might request both the notarization of the documents from which the relevant obligations arise, and the notarization of each and every one of the transfer certificates regarding each and every transfer of the Notes.

Hardening Periods and Fraudulent Transfer

There is no claw-back date by operation of law. Therefore, there are no prior transactions that automatically become void as a result of the initiation of insolvency proceedings, but instead the insolvency administrators must expressly challenge those transactions. The Spanish Insolvency Act provides that the Spanish insolvency court may only declare null and void acts and challenge actions that took place before the declaration of insolvency that are detrimental to the insolvency estate, as follows:

- Actions carried out in the two years preceding the declaration of insolvency may be challenged, even in the absence of fraudulent intent.

- Such actions must be "to the detriment of the insolvency estate," which is presumed, but not limited to:
  - without admission of proof to the contrary: (x) in actions of disposal for no consideration, except for ordinary largesse (*liberalidades de uso*); or (y) regarding payments or other actions cancelling obligations with a due date after the declaration of insolvency (unless they were secured); or
  - with admission of proof to the contrary: (x) in actions for valuable consideration carried out for any specially related party to the debtor (as defined by the Spanish Insolvency Act); (y) in granting of *in rem* security covering pre-existing debts or new debts incurred to cancel pre-existing debts (except in the case of certain refinancing agreements as explained below); or (z) cancellation of secured obligations falling due after the declaration of insolvency.

  Otherwise, the damage must be proved by the person seeking rescission.

  - under no circumstances can actions carried out in the debtor's ordinary course of professional or entrepreneurial business and under market conditions be rescinded.

Up-stream and cross-stream guarantees or security have been considered detrimental to the insolvency estate where no consideration was paid for them and no actual corporate benefit of guarantor or security provider was evidenced.

In addition to insolvency claw-back, these actions may be subject to civil rescission.

Special Regimes for Certain Refinancing Agreements:

- (A) Neither refinancing agreements, nor any transactions, acts and payments accomplished or any guarantees instituted in the performance of such agreements, will be subject to claw back (save in the case of fraud) under the Spanish Insolvency Act, *provided that*: (i) the refinancing agreement gives rise to a "significant increase" in the funds available to the borrower, or a modification of the terms of the initial financing by extending the maturity date or by replacing the existing obligations with new ones, *provided that* they meet a viability plan that allows the continuity of the debtor's business in the short and medium term and, prior to the insolvency declaration, (ii) the agreement has been entered into with creditors whose credits represent at least three-fifths of the debtor's liabilities as of the date of the agreement; (iii) a certification is issued by the auditors of the debtor, on the sufficiency of the liabilities required to adopt the agreement; and (iv) the refinancing agreement and the documents substantiating performance of conditions (ii) and (iii) above are executed by way of a Spanish public deed.(B) Together with the refinancing agreements described above, no action for rescission will be either available (save in case of fraud) for those refinancing agreements that meet all the following criteria: (i) the ratio of assets to liabilities is greater under the refinancing agreement than before the agreement took effect; (ii) the resulting current assets are equal to or higher than the then current liabilities prior to reaching that private agreement; (iii) the value of the security that would be provided to the relevant creditors does not exceed either 90% of the value of the debt owed to those creditors, or the ratio of security to outstanding debt that the creditors had the benefit of prior to the agreement taking effect; (iv) the rate of interest relating to the debt under the refinancing agreement for the creditors concerned is no more than one-third of the rate applicable to the debt before the refinancing; and (v) the agreement has been executed as a deed by all parties concerned.

Certain refinancing agreements (those that have been approved by at least 51% of the financial creditors and meet the criteria under (A) above) may be sanctioned by the court (*homologación judicial*) and be imposed to certain dissenting creditors:

- all those that have a financial claim against the debtor, irrespective of whether they are subject to financial supervision or not;
- any other creditors that have voluntarily signed up to the refinancing agreement, with the exception of trade and public sector creditors; and
- secured creditors in certain circumstances.

An additional rule has also been introduced for cases where the relevant debt includes debt under syndicated loans. This additional rule states that refinancing proposals will be deemed to have been agreed to by all creditors under a syndicated loan when voted for by lenders representing 75% of the amount of the syndicated debt (or less, if the relevant loan agreement allows decisions to be passed by consent from a lower majority of lenders).

The following cramdown effects of homologated refinancing agreements may be imposed on (i) dissenting or non-participating unsecured financial creditors or (ii) on secured financial creditors to the extent of that part of their secured claim not covered by their security interest, as such security interest is to be valued in accordance with the rules set out by the latest reform of the Spanish Insolvency Act:

(a) If the judicially sanctioned refinancing agreement is supported by creditors representing at least 60% of the debtor's financial liabilities, stays of payments may be granted for up to five years or the debt converted into so-called profit participation loans (*préstamos participativos*) of duration up to five years.

(b) Further, these effects may be extended to the amount of secured claims of non-participating or dissenting creditors, when the agreement has been entered into by financial creditors holding secured claims which represent at least 65% of the value of all secured claims of the debtor.

(c) If the homologated refinancing agreement is supported by creditors representing at least 75% of the debtor's aggregate financial liabilities:

   (i) stays of payments for up to ten years;

   (ii) haircuts (note that a cap has not been established);

   (iii) capitalization of debt. Nevertheless, those creditors that have not supported such refinancing agreement (either because they did not sign the agreement or because they oppose it) may choose between (i) the debt for equity swap contemplated by the agreement; or (ii) a discharge of their claims equal to the nominal amount (including any share premium) of the shares/quota shares that would have corresponded to that creditor as a consequence of the relevant debt for equity swap;

   (iv) conversion of debt into profit participation loans of up to ten years, convertible obligations, subordinated loans, payment in kind facilities, or in any other financial instrument with a ranking, maturity and features different to the original debt; and

   (v) assignment of assets or rights as assignment in kind for total or partial payment of the debt (*datio pro soluto*).

Further, these effects may be extended to the amount of secured claims of non-participating or dissenting creditors, when the agreement has been entered into by financial creditors holding secured claims which represent at least 80% of the value of all secured claims of the debtor.

Sanctioned refinancing agreements are not subject to claw-back action under the Spanish Insolvency Act.

Parallel Debt

Under Spanish law, a security interest created as security for the benefit of third parties who are not direct parties to the relevant agreement creating the security interest are unenforceable by such parties. However, given the costs and formalities required for a creditor to be part to a security agreement subject to Spanish law, it is not unusual that only the security agent subscribes the security agreements on behalf of all the creditors. In this regard, it might be the case that the holders of the Notes from time to time will not be identified among the secured parties under the security interests created by agreements governed by Spanish law. In order to address this eventual issue, the Intercreditor Agreement provides for the creation of a parallel debt structure (as an abstract obligation independent from the obligation under the Notes) whereby, subject to the terms of the Intercreditor Agreement, all the Debtors (as defined therein) undertake to pay to the Security Agent any amount payable by them under the Notes in case of enforcement of the relevant security interests. The use of parallel debt in Spanish deals is a relatively new concept, and although we are not aware of any court precedent on this, we understand that there is a serious risk of this debt being considered not having a cause (*sin causa*) and, therefore being considered contrary to Spanish public policy. Such mechanism would be contractually binding among the parties to the Intercreditor Agreement but would in principle not be binding, nor display effects, upon third parties (and in an eventual insolvency scenario the insolvency administrator shall not be bound by those provisions of the Intercreditor Agreement that contravene the provisions of the Spanish Insolvency Law). Taking into account the risks deriving from creating security or guarantees securing or guaranteeing the parallel debt, neither Spanish security nor Spanish obligors will secure or guarantee the parallel debt.

Belgium

To the extent any Guarantor is incorporated under the laws of Belgium (a "Belgian Guarantor"), and provided Belgium is the territory in which the center of such Belgian Guarantor's main interests is situated, main insolvency proceedings may be initiated in Belgium. Such proceedings would then be governed by Belgian law. Under certain circumstances, Belgian law also allows insolvency proceedings to be opened in Belgium over the assets of companies that are not established under Belgian law.

The following is a brief description of certain aspects of Belgian insolvency laws. Belgian insolvency laws provide for two types of insolvency proceedings: judicial reorganization proceedings (*gerechtelijke reorganisatie/réorganisation judiciaire*) and bankruptcy proceedings (*faillissement/faillite*). Note that in addition, Belgian law allows for liquidation in deficit (*deficitaire vereffening/liquidation déficitaire*). The latter proceedings will not be further discussed.

Pre-bankruptcy Judicial Reorganization

The judicial reorganization proceedings are regulated by the Act of 31 January 2009 on the Continuity of Enterprises (the "Act on the Continuity of Enterprises") as amended by the Act of 27 May 2013.

Scope

Judicial reorganization proceedings are available (notably) to debtors that qualify as (i) a merchant (*commerçant/koopman*) or (ii) a civil company in the form of a commercial company *provided that* it does not exercise a liberal profession, subject to certain exceptions for credit institutions and certain other entities active on the financial and insurance markets.

Out-of-Court Amicable Settlement

Instead of entering into formal reorganization proceedings as provided by the Act of 31 January 2009, the debtor can opt for an amicable settlement by drawing an agreement and joint payment scheme plan with at least two creditors in order to settle its debts. If an agreement is reached for reorganization purposes, it is submitted in the court and entered into a register. Such an amicable settlement will remain enforceable in the event of a later bankruptcy, subject to certain exceptions.

Commencement of the Reorganization Proceedings

A debtor may file a petition for judicial reorganization if "the continuity of the enterprise is at risk," whether immediately or in the future. The contents of this principle are broad and are defined in practice by the courts. If the net assets of the company have fallen below 50% of the company's registered capital, the continuity of the enterprise is always presumed to be at risk. The court may accept a petition for judicial reorganization in other circumstances, for instance, if the activity of the company may be hampered or shut down by creditors. The fact that the conditions for bankruptcy are met (entailing that the debtor has the legal obligation to declare bankruptcy under the 8 August 1997 Bankruptcy Act), does not preclude the debtor from applying for judicial reorganization. Since 2013 the petition for judicial reorganization must indicate the measures and proposals which will be taken or made by the debtor to carry out the reorganization. A number of documents must also be attached to the petition, including, but not limited to, an interim balance sheet and income statement, prepared under the supervision of an auditor, an external expert accountant or a certified tax accountant.

As from the filing of the petition and as long as the court overseeing a judicial reorganization has not issued a ruling on the reorganization petition, the debtor cannot be declared bankrupt or wound up by court order.

In addition, during the period between the filing of the petition and the court's decision, subject to certain exceptions, none of the debtor's assets may be disposed of by any of its creditors as a result of the enforcement of any security interests that such creditors may hold with respect to such assets.

The Act on the Continuity of Enterprises provides that, within a period of 14 days as from the filing of the petition, the court will hear the debtor and/or his lawyer on the petition for reorganization and will hear the report from the delegated judge. After this hearing, the court will rule within eight days on the petition for judicial reorganization. If the conditions for judicial reorganization appear to be met, and all required documents have been provided, the court will declare that the reorganization proceedings are open, allowing a temporary moratorium for a maximum period of six months. At the request of the debtor and pursuant to the report issued by the delegated judge, the moratorium period can thereafter be extended but cannot exceed twelve months (or, in exceptional circumstances, 18 months).

Moratorium

The moratorium will operate as a stay of enforcement. No enforcement measures with respect to pre-existing claims can be continued or initiated against the debtor's assets from the time that the moratorium is granted until the end of the period, subject to certain exceptions.

Conservatory attachments/seizures that existed prior to the opening of the judicial reorganization retain their conservatory character, but the court may order their release, *provided that* such release does not have a material adverse effect on the situation of the creditor concerned.

If receivables are pledged by the debtor in favor of a creditor prior to the opening of the judicial reorganization proceedings, such pledge will not be affected by the moratorium, provided the receivables are pledged specifically to that creditor from the moment when the pledge is created; hence the holder of such pledged receivables is permitted to take enforcement measures against the estate of the initial counterparty of the debtor (e.g., the debtor's customers) during the moratorium. A pledge on financial instruments within the meaning of the Financial Collateral Law of 15 December 2004 (the "Belgian Law on Financial Collateral") can be enforced notwithstanding the enforcement prohibition imposed by the moratorium (unless considered an abuse of right). In the case of a pledge on cash held on accounts, the enforcement prohibition applies, save in case of payment default or if certain other conditions are met. Personal guarantees granted by third parties in favor of the debtor's creditors are not covered by the enforcement prohibition imposed by the moratorium, nor are the debts payable by co-debtors, subject to certain exceptions or qualifications in respect of guarantees granted by individuals. The moratorium also does not prevent the voluntary payment by the debtor of claims covered by the moratorium, to the extent such payment is necessary for the continuity of the enterprise.

During the judicial reorganization proceedings, the board of directors and management of the debtor continue to exercise their management functions. However, upon request of the debtor the court may appoint a company mediator (*ondernemingsbemiddelaar/médiateur d'entreprise*) to the extent it is deemed useful for reaching the aims of the restructuring. Furthermore, the court may appoint, in its decision to open the judicial reorganization proceedings or at any other point in time during the course of the procedure, a judicial administrator (*gerechtsmandataris/mandataire de justice*) to assist the debtor during the restructuring. The court may also appoint a judicial administrator, upon request of any interested party or the public prosecutor, in the event of manifestly grave shortcomings or bad faith of the debtor or any of its corporate bodies, to either exercise particular tasks indicated by the court or to replace the debtor or any of its corporate bodies for the duration of the moratorium.

The reorganization proceedings aim to preserve the continuity of a company as a going concern. Consequently, the initiation of the procedure does not terminate any contracts.

Since the Act of 27 May 2013 modifying the 2009 Act on the Continuity of Enterprises the delegated judge, appointed to assist the debtor in the realization of the goal of the reorganization, has additional powers and can for instance require the court to end the reorganization prematurely when he considers that the debtor is clearly not in state to ensure the continuity of the whole or part of his business.

Contractual provisions which provide for the early termination or the acceleration of the contract upon the initiation or approval of a reorganization procedure, and certain contractual terms such as default interest, may not be enforceable during such a procedure. Moreover, the Act on the Continuity of Enterprises provides that a creditor may not terminate a contract on the basis of a debtor's default that occurred prior to the reorganization procedure if the debtor remedies such default within a 15-day period following the notification of such default.

As an exception to the general rule of continuity of contracts, the debtor may even cease performing a contract during the reorganization proceedings *provided that* the debtor notifies the creditor and the decision is necessary for the debtor to be able to propose a reorganization plan to its creditors or to transfer all or part of the company or its assets. The exercise of this right does not preclude the creditor from suspending the performance of its own obligations.

The Act on the Continuity of Enterprises provides for three types of reorganization: (i) amicable settlement between the debtor and two or more of his creditors; (ii) a collective agreement; or (iii) the transfer of (part of) the activities.

The type of reorganization may change during the proceedings and may also depend on the position of the court and/or third parties.

In the case of an amicable settlement, the parties to such amicable settlement will be bound by the terms they have agreed.

In the case of a judicial reorganization by collective agreement, the creditors agree to a reorganization plan during the reorganization procedure.

For that purpose, within a period of 14 days following the ruling declaring the judicial reorganization proceedings open, the debtor must inform each of its creditors individually of the amount of their claims against the debtor as recorded in the books of the debtor, as well as of details regarding security interests, if applicable. Creditors with pre-existing claims, as well as any other interested party that claims to be a creditor, can challenge the amounts and the ranking of the secured claims declared by the debtor. The court can determine the disputed amounts and the ranking of such claims on a preliminary basis for the purpose of the reorganization procedure. In addition, the court can, upon joint request by the debtor and the creditor, change the amount and the ranking of the claim initially declared by the debtor at the latest 15 days before the date on which the creditors will vote on the reorganization plan. If a creditor has not challenged the amount and the ranking of its claim at least 14 days in advance of the date on which the creditors will vote on the approval of the reorganization plan, the amount of its claim will remain unchanged for voting purposes as well as for the purposes of the reorganization plan.

The debtor must use the moratorium period to complete and finalize a reorganization plan, with the assistance of the court-appointed administrator, if applicable. The plan may include measures, such as the reduction or rescheduling of liabilities and interest obligations, and the swap of debt into equity, and may be based on a differentiated treatment for certain various categories of liabilities.

The plan must be filed with the Clerk's Office of the Commercial Court at least 20 days in advance of the date on which the creditors will vote on the approval of the restructuring plan. The plan will be approved if a double majority (both in headcount and in principal amount due) of the creditors vote in favor, it being understood that the court needs to ratify the reorganization plan prior to it taking effect. The plan, will be binding on the debtor and on all creditors (including the ones who voted against the plan, or abstained).

The court-ordered transfer of all or part of the debtor's enterprise can be requested by the debtor in its petition or at a later stage in the procedure. It can be requested by the public prosecutor, by a creditor or by any party who has an interest in acquiring, in whole or in part, the debtor's enterprise, and the court can order such transfer in specific circumstances.

The court-ordered transfer will be organized by a judicial administrator (*gerechtsmandataris/mandataire de justice*) appointed by the court. Following the transfer, the recourse of the creditors will be limited to the transfer price.

Bankruptcy

The Belgian bankruptcy procedure is essentially governed by the Bankruptcy Act of 8 August 1997, by diverse subsequent remedial acts and by the extensive case law that helped to fine tune the provisions of the 1997 Bankruptcy Act.

Proceedings may be initiated by the debtor, by unpaid creditors or upon the initiative of the Public Prosecutor's office, or the provisional administrator of the debtor's assets, by the liquidator of the debtor's assets or by the liquidator of "main insolvency proceedings" opened in another EU Member State (other than Denmark) in accordance with the EU Insolvency Regulation. Once the court ascertains that the requirements for bankruptcy are met, the court will establish a date by which all creditors' claims must be submitted to the court for verification.

Only a merchant (physical person or merchant company) can be declared bankrupt. Conditions for a bankruptcy order (*faillietverklaring/déclaration de faillite*) are that the debtor must be in a situation of cessation of payments (*staking van betaling/cessation de paiements*) and be unable to obtain further credit (*wiens krediet geschokt is/ébranlement de crédit*). Cessation of payments is generally accepted to mean that the debtor is not able to pay its debts as they fall due. Such situation must be persistent and not merely temporary. The mere fact that a merchant has more debts than assets does not entail the bankruptcy conditions are met with. Companies whose liquidation has been started can be declared bankrupt up to six months after the judgments of the closing of the liquidation.

In bankruptcy, the debtor loses all authority and decision rights concerning the management of the bankrupt business. The bankruptcy receiver (*curator/curateur*), appointed by the court, becomes responsible for the operation of the business and implements the sale of the debtor's assets, the distribution of the sale proceeds to creditors and the liquidation of the debtor. The rights of creditors in the process are limited to being informed of the course of the bankruptcy proceedings on a regular basis by the receiver. Creditors may oppose the sale of assets by bringing an action before the court, or may request the temporary continued operation of the business.

The receiver must decide whether or not to continue performance of ongoing contracts (i.e., contracts existing before the bankruptcy order). The receiver may decide not to continue performance of a, or several ongoing contracts, subject to certain limitations, according to case law. The other party to an ongoing contract may summon the receiver to take a decision within 15 days. If no extension of the 15-day term is agreed upon or if the receiver does not take any decision, the ongoing contract is presumed to be terminated after the expiration of the 15-day term. If the receiver decides not to continue performance of an ongoing contract or if an ongoing contract is terminated due to the expiration of the 15-day term, the other party to the contract may be entitled to claim damages, in which case its claim will rank *pari passu* with claims of all other unsecured creditors.

The receiver may elect to continue the business of the debtor, provided the receiver obtains the authorization of the court and such continuation does not cause any prejudice to the creditors. However, two exceptions apply:

- the parties to an agreement may contractually agree that the occurrence of a bankruptcy constitutes an early termination or acceleration event; and
- *intuitu personae* contracts (i.e., contracts whereby the identity of the other party constitutes an essential element upon the signing of the contract) are automatically terminated as of the bankruptcy judgment since the debtor is no longer responsible for the management of the company. Parties can agree to continue to perform under such contracts.

As a general rule, the enforcement rights of individual creditors are suspended upon the rendering of the court order opening bankruptcy proceedings, and after such order is made, only the bankruptcy trustee may proceed against the debtor and liquidate its assets. However, such suspension does not apply to a pledge of financial instruments or cash held on account falling with the scope of the Belgian Law on Financial Collateral. Further exceptions exist with regard to estate credits.

For creditors with claims secured by movable assets, such suspension would normally be limited to the period required for the verification of the claims. At the request of the bankruptcy receiver, the suspension period may be extended for up to one year from the bankruptcy judgment. Such extension requires a specific order of the court which can only be made if the further suspension will allow for a realization of the assets in the interest of all creditors in the interest of all creditors without prejudicing the secured creditors and *provided that* those secured creditors have been given the opportunity to be heard by the court.

For creditors with claims secured by immovable assets, the intervention of the bankruptcy receiver is necessary to pursue the sale of the assets.

The receiver will do so upon an order of the court, given either at its request or at the request of a mortgagee. A first-ranking mortgagee will generally be entitled to pursue the enforcement of its mortgage as soon as the report of claims has been finalized; the court may suspend such enforcement for a period of not more than one year from the date of the bankruptcy if the suspension will allow for a realization of the assets without prejudicing the mortgagee *provided that* the mortgagee has been given the opportunity to be heard by the court.

If a security, such as a pledge, has been granted over assets that, at the time of opening of an insolvency proceeding, are located in another EU Member State, the rights the creditor has under such security shall, in accordance with the Insolvency Regulation, not be affected by the opening of such insolvency proceedings.

As from the date of the bankruptcy judgment, no further interest accrues against the bankrupt debtor on its unsecured debt, or debts secured by a general privilege, like tax administration or social security.

The debts of the bankrupt estate generally will be ranked as to priority on the basis of complex rules. The following is a general overview of only the main principles:

- *Estate debt:* Costs and indebtedness incurred by the receiver during the bankruptcy proceedings, the "estate debts," have a senior priority. In addition, if the receiver has contributed to the realization and enforcement of secured assets, such costs will be paid to the receiver in priority out of the proceeds of the realized assets before distributing the remainder to the secured creditors.
- *Security interests:* Creditors that hold a security interest have a priority right over the secured asset (whether by means of appropriation of the asset or on the proceeds upon realization).
- *Privileges:* Creditors may have a particular privilege on certain or all assets (e.g., tax claims, claims for social security premiums, etc.). Privileges on specific assets rank before privileges on all assets of the debtor.
- *Unsecured creditors* (*pari passu*): Once all estate debts and creditors having the benefit of security interests and privileges have been satisfied, the proceeds of the remaining assets will be distributed by the receiver among the unsecured creditors who rank *pari passu* (unless a creditor agreed to be subordinated).
- Subordinated creditors will receive the remainder (if any).

Subsidiary Guarantee and Collateral

The grant of a guarantee or collateral by a Belgian company for the obligations of another group company must fall within the grantor's legal and corporate purpose and be for the own corporate benefit of the granting company and comply with any applicable financial assistance rules. The assessment of whether or not the grant of a guarantee is in a Belgian company's corporate interest, is largely dependent on factual considerations and is to be determined on a case-by-case basis by the directors of that Belgian company, and to be reviewed ultimately on a case-by-case basis by the competent courts. Consideration has to be given to any actual or real benefit (be it direct or indirect) that the company would actually derive from the transaction; this is particularly relevant for upstream or cross-stream guarantees and security interests. At least the following principles apply to such evaluation: (i) the risk taken by the Belgian Guarantor in issuing the guarantee must be proportional to the direct and/or indirect benefit derived from the transaction; and (ii) the financial support granted by the Belgian Guarantor should not exceed its financial capabilities. The responsibility for such assessment is that of the directors/managers of the Belgian Guarantor.

If the corporate benefit requirement is not met, the directors of the company may be held liable (i) by the company for negligence in the management of the company and (ii) by third parties in tort. Moreover, the guarantee or collateral could be declared null and void and, under certain circumstances, the creditor that benefits from the guarantee or collateral could be held liable for up to the amount of the guarantee. Alternatively, the guarantee or collateral could be reduced to an amount corresponding to the corporate benefit or the creditor may be held liable for any guarantee amount in excess of such amount. These rules have been seldom tested under Belgian law, and there is only limited case law on this issue.

In order to enable Belgian subsidiaries to grant a guarantee and collateral to secure liabilities of a direct or indirect parent or sister company without the risk of violating Belgian rules on corporate benefit, it is standard market practice for indentures, credit agreements, guarantees and security documents to contain "limitation language" in relation to subsidiaries incorporated or established in Belgium. Accordingly, the Indenture and the security documents will contain such limitation language and the guarantee of a Belgian Guarantor and the security will be so limited.

Financial Assistance

Any guarantees or security interest granted by a Belgian Guarantor which constitute a breach of the provisions on financial assistance as defined by article 329 and 629 of the Belgian Companies Code will not be enforceable.

Security Trustee and Parallel Debt

Belgian law does not have the concept of trust; security is an "accessory" which must be granted to the same person to whom the secured debt is owed, except in the case of financial collateral within the meaning of the Belgian Law on Financial Collateral.

In order to enable the Security Agent to hold security created under certain applicable laws (including Belgian law), the Intercreditor Agreement will provide for the creation of the Parallel Debt, mirroring the obligations of the Issuers and the Guarantors towards the holders of the Notes under or in connection with the Indenture. The parallel debt structure is indeed commonly used for the purposes of taking Belgian law security in the context of transactions of this nature.

In the case of an insolvency of the Security Agent, the parallel debt structure means that the secured parties may be exposed to credit risk on the Security Agent, if payments in respect of the Parallel Debt and any proceeds received by the Security Agent cannot be separated from its other assets.

The Issuers have been advised that the Parallel Debt creates a claim of the Security Agent which can be validly secured by a Belgian security agreement, but that there is no Belgian case law in this respect.

Lastly, Belgian pledges over financial collateral (such as shares of Belgian companies or bank accounts) may be granted to the Security Agent acting for itself and for the account of the secured parties pursuant to Article 5 of the Belgian Law on Financial Collateral. This provision indeed allows for the creation of security over financial collateral held by an agent acting as representative for secured parties, *provided that* the secured parties are determinable on the basis of the security agreement.

Hardening Period and Fraudulent Transfer

In the event of bankruptcy proceedings governed by Belgian law, the insolvency receiver may challenge certain transactions that have been concluded or performed by the debtor during the "hardening period."

In principle, the cessation of payments (which constitutes a condition for filing for bankruptcy) is deemed to have occurred as of the date of the bankruptcy order. The court issuing the bankruptcy order may determine, based on serious and objective indications that the cessation of payments occurred on an earlier date. Such earlier date may not be earlier than six months before the date of the bankruptcy order, except in the case where the bankruptcy order relates to a company that was dissolved more than six months before the date of the bankruptcy order in circumstances suggesting an intent to defraud its creditors, in which case the date of cessation of payments may be determined as being the date of such decision to dissolve the company. The period from the date of cessation of payments up to the declaration of bankruptcy is referred to as the "hardening period" (*verdachte periode/période suspecte*).

The transactions entered into or performed during the hardening period which may be declared ineffective against third parties include, among others, (i) gratuitous transactions or transactions entered into at an undervalue, (ii) payments for debts which are not due, (iii) payments other than in cash for debts due, and (iv) security provided for pre-existing debts.

Other transactions entered into or performed during the hardening period may be declared ineffective against third parties *provided that* the counterparty was aware of the debtor's cessation of payment.

In particular, a guarantee entered into during the hardening period may be declared ineffective against third parties (i) if it is regarded as having been granted gratuitously or at an undervalue (ii) if the beneficiaries of the guarantee were aware of the company's cessation of payments or (iii) if it is granted to secure pre-existing debts.

If the guarantee given by the Belgian guarantor was successfully avoided (based on the above), noteholders would cease to have any claim in respect thereof and would be under an obligation to repay any amounts received pursuant to such guarantee.

Furthermore, even in the absence of bankruptcy proceedings, a third party creditor may obtain a court ruling that an act or transaction (such as a guarantee) is not enforceable against it if it can establish that the challenged act or transaction was effected with the fraudulent intent to adversely affect its position as an existing creditor (*actio pauliana*).

Italy

Insolvency

A number of the Guarantors are incorporated under the laws of Italy (the "Italian Guarantors") and may be subject to Italian laws governing creditors' rights and bankruptcy and restructuring proceedings.

The following is a brief description of certain aspects of the insolvency laws of Italy.

Italian creditors' rights and insolvency laws are generally considered to be more favorable to debtors than the regimes of certain other jurisdictions. In Italy, the courts play a central role in the insolvency process; moreover, the enforcement of security interests by creditors in Italy can be time consuming. A recent reform of Italian insolvency laws provided for out-of-court reorganization proceedings.

Under Italian law, the state of insolvency (*insolvenza*) of a company is ascertained and declared by a court. Insolvency occurs at a time when a debtor is no longer able to regularly meet its obligations as they fall due. This must be a permanent, and not a temporary, status.

The following restructuring or insolvency remedies and proceedings are available under Italian law for companies facing financial difficulties or in a state of temporary crisis, and for insolvent companies: debt restructuring arrangements with creditors (*accordi di ristrutturazione dei debiti*) pursuant to article 182-*bis* of the Italian royal decree n. 267 of 16 March 1942 (the "Italian Bankruptcy Law") and reorganization plans (*piani di risanamento*) pursuant to article 67, paragraph 3(d) of the Italian Bankruptcy Law; court-supervised prebankruptcy composition with creditors (*concordato preventivo*); extraordinary administration for large insolvent companies pursuant to Italian Legislative Decree No. 270/99 (*amministrazione straordinaria delle grandi imprese in crisi di cui alla Legge Prodi bis*); extraordinary administration proceedings for large insolvent companies pursuant to Italian Law Decree No. 347/2003, as amended (*amministrazione straodinaria delle grandi imprese in crisi di cui alla Legge Marzano*); bankruptcy (*fallimento*); and post-bankruptcy composition with creditors (*concordato fallimentare*).

During bankruptcy (*fallimento*), debt restructuring arrangements with creditors (*accordi di ristrutturazione dei debiti*) and court-supervised pre-bankruptcy composition with creditors (*concordato preventivo*), activities of credit recovery are interrupted (subject to certain exceptions).

Bankruptcy

A request to declare a debtor bankrupt and to commence a bankruptcy proceeding (*fallimento*) for the judicial liquidation of its assets can be filed by the same debtor, one or more creditors and, in certain cases, by the public prosecutor. The bankruptcy is declared by a competent bankruptcy court. The entities that can be declared bankrupt are the commercial enterprises (*imprenditori commerciali*) if any of the following thresholds are met:

(a) have had in each of the last three years (from the bankrupt petition or from its incorporation) assets (*attivo patrimoniale*) in an aggregate amount higher than €300,000; and

(b) have reached in each of the last three years (from the bankruptcy petition or its incorporation) annual gross proceeds (*ricavi lordi*) higher than €200,000; and

(c) have debts (including debts not yet due) for an amount higher than €500,000.

Upon the commencement of a bankruptcy proceeding:

- subject to certain exceptions, all actions of creditors are stayed and creditors must file claims within a defined period; in particular, under certain circumstances, secured creditors may enforce against the secured property as soon as their claims are admitted as preferred claims. Any outstanding balance will be considered unsecured and rank *pari passu* with all of the bankrupt entity's other unsecured debt. Subject to certain exceptions, the *in rem* secured creditor may sell the secured asset only after it has obtained authorization from the designated judge (*giudice delegato*). After hearing the bankruptcy receiver (*curatore fallimentare*) and the creditors' committee, the designated judge decides whether to authorize the sale, and sets forth the timing in its decision;
- the administration of the debtor and the management of its assets pass from the debtor to the receiver appointed by the competent bankruptcy court (*curatore fallimentare*); and
- any act (including payments, pledges and issuances of guarantees) made by the debtor, other than those made through the receiver, after (and in certain cases even before for a limited period of

time) a declaration of bankruptcy with respect to the creditors is (or could be if made before) ineffective.

The bankruptcy proceeding is carried out and supervised by a court-appointed receiver, a deputy judge (*giudice delegato*) and a creditors' committee. The receiver is not a representative of the creditors and the creditors' committee, as specifically provided for by law, has in some cases authorization power over the receiver and, in general, consultation functions over the latter and vigilance authority over the bankruptcy proceedings. The receiver is responsible for the liquidation of the assets of the debtor for the satisfaction of creditors. The proceeds from the liquidation are distributed in accordance with statutory priority rights. The liquidation of a debtor can take a considerable amount of time, particularly in cases where the debtor's assets include real estate property. Italian law provides for priority to the payment of certain preferential creditors, including the bankruptcy receiver, employees and the Italian judicial and social security authorities employees and the Italian judicial and social security authorities.

The following features of bankruptcy proceedings also merit mention:

- *Statutory priorities:* the statutory priority assigned to creditors under Italian law may be different from priorities in the United States and certain other European jurisdictions. Under Italian law, the highest priority claims are the claims of preferential creditors (*crediti prededucibili*), which include the claims associated with the bankruptcy proceedings as set out in specific legislation. The next priority is secured creditors with privileges (*crediti privilegiati*; a preference in payment in most circumstances, but not exclusively, provided for by law), mortgages (*crediti ipotecari*) and pledges (*crediti garantiti da pegno*), then debts having a general priority such as claims for salaries, social contributions, and taxes and then unsecured creditors (*crediti chirografari*). In particular, creditors with mortgages (*crediti ipotecari*) and pledges (*crediti garantiti da pegno*) have priority in the distribution of what has been eventually obtained from the liquidation of the relevant secured assets.
- *Bankruptcy arrangement with creditors (concordato fallimentare):* a bankruptcy proceeding can terminate prior to liquidation through a bankruptcy arrangement proposal with creditors. The relevant petition can be filed by one or more creditors or third parties starting from the declaration of bankruptcy, whereas the debtor or its subsidiaries are admitted to file such a proposal only after one year following such declaration but before two years from the decree granting effectiveness to the bankruptcy's estate. The petition may provide for the placing of creditors into different classes (thereby proposing different treatments among the classes), the restructuring of debts and the satisfaction of creditors' claims in any manner. The petition may provide the possibility that secured claims are paid only in part. The *concordato fallimentare* proposal must be approved by the creditors' committee and the creditors holding the majority of claims (and, if classes are formed, by a majority of the claims in a majority of the classes). Final court confirmation is also required.

Pre-insolvency Proceedings

The Italian Bankruptcy Law provides for three models of pre-insolvency proceedings, namely: (1) court pre-bankruptcy composition with creditors (*concordato preventivo*) ("CP"), (2) debt restructuring agreements (*accordi di ristrutturazione dei debiti*) ("DRA") and (3) certified restructuring plans (*piani attestati di risanamento*) ("CRP"); however, it should be noted that only the CP is listed in Annex A to the EU Insolvency Regulation. Restructuring plans may cover up to a five-year period.

It should be noted that all of the above mentioned pre-insolvency proceedings often require creditors to compromise on their right to be fully satisfied. The debtor may offer to creditors (with the exclusion of secured creditors in the CP proceeding) partial settlement of their claims.

Restructuring Outside of a Judicial Process

Restructuring generally takes place through a formal judicial process because it is more favorable to the debtor and because out-of-court arrangements put in place as a result of an out-of-court restructuring (other than those put in place under the safe harbor of an out-of-court reorganization CRP pursuant to Article 67, Paragraph 3(d) of the Italian Bankruptcy Law, which exempts—provided all actions indicated in the plan are fully implemented—debt restructuring agreements with creditors and court supervised pre-bankruptcy arrangement with creditors from insolvency claw-back and the exemption from certain criminal law provisions on bankruptcy with reference to those transactions executed as part of the CRP) are vulnerable to being reviewed by a court in the event of a subsequent insolvency, and possibly challenged as voidable transactions, and may trigger civil or criminal liabilities in the event of a subsequent bankruptcy.

Certified Restructuring Plans Pursuant to Article 67, Paragraph 3(d) of the Italian Bankruptcy Law (piani attestati di risanamento)

Out-of-court CRPs (*piani attestati di risanamento*) are based on restructuring plans (*piani di risanamento attestati*) prepared by companies for the purpose of restructuring their indebtedness and ensuring the recovery of their financial condition, the feasibility of which, together with the truthfulness of debtor's business (and accounting) data, must be assessed by an independent expert directly appointed by the debtor. The expert can only be selected and appointed among those possessing certain specific professional requisites and qualifications (e.g., being registered in the auditors' registrar), and meeting the requirements under Article 2399 of the Italian Civil Code. The expert may be subject to liability in case of misrepresentation or false certification.

CRPs are not under any form of judicial control or approval and, therefore, no application is required to be filed with the court or other supervising authority. CRPs do not require to be approved and consented by a specific majority of all outstanding claims. Following a restructuring plan, there is no entrustment of business to another entity, therefore the debtor remains entitled to manage its business.

The terms and conditions of the restructuring plans are freely negotiable. Unlike in CP and DRA proceedings, out-of-court reorganization plans do not offer the debtor any protection against enforcement proceedings and/or precautionary actions of third-party creditors. The Italian Bankruptcy Law provides that, should these plans fail and the debtor be declared bankrupt, the payments and/or acts carried out for the implementation of the reorganization plan, subject to certain conditions (a) are not subject to claw-back action; and (b) are exempted from the potential application of certain criminal sanctions. Neither ratification by the court nor publication in the companies' register are needed (although, upon request of the debtor, a CRP can be published in the relevant companies' register and, in such case creditors would benefit from a reduction in debtor tax liability).

Debt Restructuring Agreements with Creditors Pursuant to Article 182-bis of the Italian Bankruptcy Law (accordi di ristrutturazione dei debiti)

Out-of-court agreements for the restructuring of indebtedness entered into with creditors representing at least 60% of the outstanding company's debts must be ratified (*omologati*) by a court. An independent expert, directly appointed by the debtor, must assess—in addition to the truthfulness of the debtor's business data—that the agreement is feasible and, in particular, that it ensures that the non-participating creditors can be fully satisfied within 120 days from (i) the ratification (*omologazione*) of the DRA by the court, in case the relevant claims are already due and payable to the non-participating creditors as at the date of the ratification (*omologazione*) of the debt restructuring agreement by the court or (ii) from the date on which the relevant debts fall due, in case the relevant claims are not yet due and payable to the nonparticipating creditors as of the date of the sanctioning of the restructuring agreement by the court. Only a debtor who is in a situation of "financial distress" (i.e., facing financial distress which does not yet amount to insolvency) can initiate such process and request the court's confirmation (*omologazione*) of the DRA, which must be entered into with creditors representing not less than 60% of the company's debts.

The DRA, which may consist of separate agreements reached with each creditor, must be published in the Italian companies' register and is effective as of the day of its publication. Starting from the date of such publication and for 60 days thereafter, creditors cannot start or continue any interim relief or enforcement actions over the assets of the debtor in relation to pre-existing claims and cannot obtain any new and additional security interest in relation to the pre-existing debts, overdue prior to the DRA formation. Such moratorium can be requested, pursuant to Article 182-*bis*, Paragraph 6, of the Italian Bankruptcy Law, by the debtor to the court pending negotiations with creditors (prior to the DRA's execution and publication) subject to the fulfillment of certain conditions. A DRA may also contain a proposed tax settlement for the partial or deferred payment of certain overdue taxes, as provided in Article 182-*ter* of the Italian Bankruptcy Law.

The application for a moratorium must be published in the companies' register and becomes effective as of the date of publication. The court, having verified the completeness of the documentation, sets the date for the hearing within 30 days from the filing of the request and orders the company to file the relevant documentation in relation to the moratorium to the creditors. In such hearing, the court assesses whether the conditions for granting the moratorium are in place and, if they are, orders, that no interim relief or enforcement action may be started or continued, nor can security interests (unless agreed) be acquired over the assets of the debtor, and sets a deadline (not exceeding 60 days) within which such order has to be published in the companies' register and it sets the deadline to finalize the DRA. The court's order may be challenged within 15 days of its publication. Within the same time frame, an application for the CP (as described below) may be filed, without prejudice to the effect of the moratorium.

Creditors may oppose the agreement within 30 days from the publication of the agreement in the companies' register. After having settled the oppositions (if any) the court will validate the agreement by issuing a decree, which can be appealed within 15 days of its publication.

Pursuant to Article 182-*quater* of the Italian Bankruptcy Law, financings granted to a debtor "in execution of" (*in esecuzione di*) a DRA, as well as of a CP benefit of a super senior status. Additionally, even the financings granted "in view of" (*in funzione di*) the filing of a petition for the sanctioning (*omologazione*) of an agreement pursuant to Article 182-*bis* or a *concordato preventivo* procedure benefit of the same super senior status in case of subsequent bankruptcy of the debtor where such financings are contemplated under the underlying restructuring plan and the super priority status is expressly recognized by the court in the context of the sanctioning (*omologazione*) of the Article 182-*bis* agreement or the approval of the *concordato preventivo* procedure. Same provisions apply to financings granted by shareholders up to 80% of their amount.

Moreover, pursuant to the new Article 182-*quinquies* of the Italian Bankruptcy Law, the Court, pending the sanctioning (*omologazione*) of the DRA agreement pursuant to Article 182-*bis*, Paragraph 1, or after the filing of the moratorium application pursuant to Article 182-*bis*, Paragraph 6, of the Italian Bankruptcy Law or a petition pursuant to Article 161, Paragraph 6, (in relation to the court supervised pre-bankruptcy arrangement with creditors procedure described below) may authorize the debtor, as introduced by Decree Law 27 June, 2015 No. 83, such authorization may be given also before the filing of the additional documentation pursuant to Article 161(6) as outlined under "*—Pre-application for the Composition with Creditors (concordato preventivo), Even in View of a Restructuring Agreement (accordo di ristrutturazione del debito)*", if so expressly requested: (i) to incur in new super senior indebtedness and to secure such indebtedness with *in rem* securities (*garanzie reali*), *provided that* the expert appointed by the debtor declares that the new financing aims at providing a better satisfaction of the creditors, and (ii) to pay pre-existing debts deriving from the supply of services or goods, already payable and due, *provided that* the expert declares that such payments are essential for the company to operate. This possibility may be available to the applicant whereas its business activity is kept as a going concern.

As introduced by Decree Law 27 June, 2015 No. 83, pending the sanctioning (*omologazione*) of the DRA agreement pursuant to Article 182-*bis*, Paragraph 1, or after the filing of the moratorium application pursuant to Article 182-*bis*, Paragraph 6, of the Italian Bankruptcy Law or a petition pursuant to Article 161, Paragraph 6, also in the absence of the plan pursuant to article 161, Paragraph 2, letter (e), the Court may also authorize the debtor to incur in new super senior indebtedness, aimed at providing urgent financial requirements related to the company's business. The company, filing such request of authorization, shall specify (i) the purposes of the financing (ii) that it is not able to obtain the financing otherwise and (iii) that, the absence of such financing will entail an imminent and irreparable prejudice to the company.

It should be specified that the provision of Article 182-*quinquies* of the Italian Bankruptcy Law applies to both DRA and to CP.

Court-Supervised Pre-bankruptcy Arrangement with Creditors Pursuant to Article 161 of the Italian Bankruptcy Law (concordato preventivo)

The CP proceeding can be commenced if the thresholds indicated under the first paragraph of "*Limitations on Validity and Enforceability of the Guarantees and the Security Interests and Certain Insolvency Law Considerations—Italy—Bankruptcy*" are met.

A company, which is a situation of "financial distress and/or crisis" that has not been declared insolvent by the court, has the option to seek an arrangement with its creditors, under court supervision, in order to compose its overall indebtedness and/or reorganize its business, thereby avoiding a declaration of insolvency and the initiation of bankruptcy proceeding.

Only the debtor company can file a petition at court for a CP which must be accompanied and supported by a restructuring plan proposed to the creditors and an independent expert report assessing, *inter alia*, the feasibility of the arrangement proposal and the truthfulness of the business data on which the plan is grounded. Following the filing of the petition with the court, the petition is published by the court in the companies' register. Between the publishing in the companies' register of the CP proposal and its sanction by the court, all enforcement actions by the creditors (whose title to enforcement arose before filing with the court) are stayed. In addition, during this time, pre-existing creditors cannot obtain security interests (unless authorized by the court) and the mortgages registered within 90 days preceding the date on which the petition for the CP is published in the Italian companies' register are ineffective against such pre-existing creditors. In addition, the arrangement proposal may provide for, *inter alia*: (i) the restructuring of debts and the satisfaction of creditors' claims, in any manner, including by way of example, through extraordinary transactions such as the granting to creditors and their subsidiaries or affiliated companies of shares, bonds (also convertible into shares), or other financial instruments and debt securities; (ii) the transfer to a receiver (*assuntore*) of the operations of the business involved in the proposed arrangement agreement; (iii) the placing of creditors into different classes (thereby proposing different treatments among the classes); and (iv) different treatments for creditors belonging to different classes.

The arrangement proposal may provide that: (i) the debtor's company's business continues to be run by the debtor company as a going concern; or (ii) the business is transferred to one or more companies and any assets which are no longer necessary to run the business are liquidated. In both cases, the petition for the CP should fully describe the costs and revenues which are expected as a consequence of the continuation of the business as a going concern, as well as the financial resources and support which will be necessary. The report of the independent expert shall also certify that the continuation of the business is conductive to the satisfaction of creditors' claim to a greater extent than if such arrangement proposal was not implemented. Furthermore the going concern-based arrangement with creditors can provide also the winding-up of those assets which are not functional to the business. The arrangement agreement may also provide a proposed tax settlement for the partial or deferred payment of certain taxes.

The court determines whether the proposal for the arrangement is admissible, in which case the court, *inter alia*, delegates a judge (*giudice delegato*) to follow the procedure, appoints one or more judicial officers (*commissari giudiziali*) and calls a creditor meeting. During the implementation of the arrangement, the company is managed by its corporate bodies (usually its board of directors) under the supervision of such judicial officer(s) and under the supervision of a judge delegated by the court the debtor is allowed to carry out urgent extraordinary transactions, only upon the prior court's authorization, while ordinary transactions may be carried out without authorizations. Third-party claims, related to the interim acts legally carried out by the debtor, are super-senior pursuant to Article 111 of the Italian Bankruptcy Law.

The CP proposal is voted on at a creditors' meeting and must be approved with the favorable vote of creditors representing the majority of credits entitled to vote. If the proposal provides for different classes of creditors, the approval of the plan also requires the favorable vote of creditors representing the majority of credits admitted to within each class and the approval of the majority of such class. Creditors who, being entitled to vote, did not do so and whom did not express their dissent (including failing to notify their objection via telegraph, fax, mail or certified e-mail) within 20 days of the closure of the minutes of the creditors' meeting are deemed to have consented to the CP. Secured creditors do not generally vote on the proposal of CP as they carry preferential claims, which must be fully satisfied. Secured creditors may vote if they waive their security or if the CP provides that, based on an independent expert appraisal on the value of the secured assets, they will not be fully satisfied (in which case they can vote only in respect of the part of the debt affected by the proposal).

The court may also approve the CP (notwithstanding the circumstance that one or more classes objected to the CP) if (i) the majority of the classes has approved the CP and (ii) the court deems that the interests of the dissenting creditors would be adequately safeguarded through the CP compared to other solutions known as a "cram down." If the proposal does not provide for classes of creditors and if any objection to the implementation of the CP is filed by at least 20% of the creditors entitled to vote, or in case there are different classes of creditors, by a creditor belonging to a dissenting class, entitled to vote, the court nevertheless confirms the CP if it deems that the relevant creditors' claims are likely to be satisfied to a greater extent as a result of the CP than would be otherwise be the case.

After the creditors' approval, the court (after having settled possible objections raised by the dissenting creditors, if any) must confirm the CP proposal by issuing a confirmation order.

If the approval of the CP fails, the court may, upon request of the public prosecutor or a creditor and after having ascertained the condition for declaration of bankruptcy, declare the company bankrupt.

Pre-application for the Composition with Creditors (concordato preventivo), Even in View of a Restructuring Agreement (accordo di ristrutturazione del debito)

The filing of the application for the certification of a restructuring arrangement (*accordo di ristrutturazione del debito*) and the application for a composition with creditors (*concordato preventivo*) may be pre-empted by the filing by the debtor distressed company of a pre-application for a composition with creditors (*concordato preventivo*). In particular, according to Article 161(6) of the Italian Bankruptcy Law, the distressed company may file a pre-application for the composition with creditors together with (i) the financial statements of the last three financial years and, pursuant to the recent law Italian Law Decree No. 69/2013 as converted into law No. 98 of 9 August 2013 ("Law Decree 69/2013") (ii) the list of creditors with the reference to the amount of their respective receivables, asking the competent court to set a deadline, between 60 and 120 days (subject to a further extension of up to 60 days where there are reasonable grounds (*giustificati motivi*)) for the filing of additional documents required for the filing of a petition at court for a CP. Pursuant to Law Decree 69/2013, the court, if accepts such pre-application, may appoint a judicial commissioner to overview the company, who, in the event that the debtor has carried out one of the activities under Article 173 of the Italian Bankruptcy Law (e.g., concealment of part of assets, omission to report one or more claims, declaration of nonexistent liabilities or commission of other fraudulent acts), shall report it to the court, which, upon further verification, may reject the petition at court for a *concordato preventivo* and (ii) sets forth reporting and information duties of the company during the above mentioned period. The debtor company may not file such pre application where it had already done so in the previous two years without the admission to the CP (or the certification of a DRA) having followed. The decree setting the term for the presentation of the documentation contains also the periodical information requirements (relating also to the financial management of the company and to the activities carried out for the purposes of the filing of the application and the restructuring plan) that the company has to fulfill, at least on a monthly basis, until the lapse of the term established by the court. The debtor company shall file, on a monthly basis, the company's financial position, which is published, the following day, in the companies register. Noncompliance with these requirements results in the application for the composition with creditors being declared inadmissible and, upon request of the creditors or the public prosecutor and *provided that* the relevant requirements are verified, in the adjudication of the distressed Issuer(s) into bankruptcy. If the activities carried out by the debtor company appear to be clearly inappropriate to the preparation of the application and the restructuring plan, the court may, *ex officio*, after hearing the debtor and—if appointed—the judicial commissioner, reduce the time for the filing of additional documents. Following the filing of the pre application and until the decree of admission to the composition with creditors, the distressed company may (i) carry out acts pertaining to its ordinary activity and (ii) seek the court's authorization to carry out acts pertaining to its extraordinary activity, to the extent they are urgent. Claims arising from acts lawfully carried out by the distressed company are treated as super senior (*prededucibili*) pursuant to Article 111 of the Italian Bankruptcy Law and the related acts, payments and security interests granted are exempted from the claw-back action provided under Article 67 of the Italian Bankruptcy Law. Law No. 9 of 21 February 2014 specified that the super-seniority of the claims—which arise out of loans granted with a view to allowing the filing of the pre-application for the composition with creditors (*domanda di pre-concordato*)—is granted, pursuant to Article 111 of the Italian Bankruptcy Law, conditional upon the proposal, the plan and all other required documents being filed within the term set by the court and the company being admitted to the CP within the same proceeding opened with the filing of the pre-application.

Extraordinary Administration for Large Insolvent Companies (amministrazione straordinaria delle grandi imprese in stato di insolvenza)

This is an extraordinary administration procedure available under Italian law for large industrial and commercial enterprises (commonly referred to as the "Prodi-bis procedure"). The same rules set forth for bankruptcy proceeding with respect to creditors' claims largely apply to an extraordinary administration proceeding as well as the hierarchy of claims to be adhered to in distributing any available asset. Preferential payment is granted to those credits (even unsecured) accrued to allow the conduct of the company business activity.

To qualify for this procedure, the company must have employed at least 200 employees in the previous year. In addition, it must have debts equal to at least two-thirds of its assets as shown in its financial statements and two-thirds of its income from sales and services during its last financial year. The procedure may be commenced by petition of one or more creditors, the debtor, the public prosecutor or upon the competent court's own initiative.

There are two main phases within the Prodi-bis procedure: an administrative phase and a judicial phase.

In the administrative phase, the court determines whether the company meets the admission criteria and whether it is insolvent. It then issues a decision to that effect and appoints a judicial receiver (or up to three) (*commissiario giudiziale*) to investigate whether there are serious prospects for recovery via a business sale or reorganization. The judicial receiver submits a report to the court (within 30 days from insolvency declaration) together with an opinion from the Italian Ministry of Economic Development (the "Ministry").

The court has 30 days to decide whether to admit the company to the Prodi-bis procedure or declare it bankrupt.

Assuming that the company is admitted to the extraordinary administration procedure, the judicial phase begins and the extraordinary commissioner(s), appointed by the Ministry, prepare a restructuring plan. The plan can provide for either the sale of the business as a going concern within one year (unless extended by the Ministry) (the "Disposal Plan") or a turnaround leading to the company's economic and financial recovery within two years (unless extended by the Ministry) (the "Recovery Plan"). It may also include an arrangement with creditors (e.g., debt for equity swap, issue of shares in a new company to whom the assets of the Issuer(s) have been transferred).

The plan must be approved by the Ministry within 30 days from submission by the extraordinary commissioner(s). The procedure ends upon successful completion of either a Disposal Plan or Recovery Plan; however, should either plan fail, the company will be declared bankrupt.

Industrial Restructuring of Large Insolvent Companies (ristrutturazione industriale di grandi imprese in stato di insolvenza)

New extraordinary administration proceedings have been enacted (Italian Law Decree No. 347 of 23 December 2003, as converted into Law No. 39 of 2004 and subsequently amended). This is a new extraordinary administration procedure introduced in 2003, known as the "Marzano procedure." It is complementary to the Prodi-bis procedure and, except as otherwise provided, the same provisions apply. The Marzano procedure is intended to be faster than the Prodi-bis procedure. For example, although a company must be insolvent, the application to the Ministry can be made before the court commences the administrative phase.

The Marzano procedure only applies to large insolvent companies which, on a consolidated basis, have at least 500 employees in the year before the procedure is commenced and at least €300 million of debt (including those from outstanding guarantees). The decision whether to open a Marzano procedure is taken by the Ministry following the debtor's request (who must also file an application for the declaration of insolvency). The Ministry assesses whether the relevant requirements are met and then appoints the extraordinary commissioner(s) who will manage the company. The court also decides on the company's insolvency.

The extraordinary commissioner(s) submits a Disposal Plan or Recovery Plan within 180 days from his appointment (or 270 days if the Ministry so agrees). The restructuring through the Disposal Plan or the Recovery Plan must be fully implemented within, respectively, one year (extendable to two years) and two years. If no Disposal or Recovery Plan is approved by the Ministry, the court will declare the company bankrupt and start bankruptcy proceedings.

In 2008, the Italian government enacted an amendment to Law No. 39 of 2004. The reform introduced certain specific provisions applying to large companies carrying out services considered essential to the public.

Limitations on Guarantees and Security Interests

Under Italian Law the guarantee obligations under the Indenture of an Italian Guarantor are subject to compliance with the rules on corporate benefit and corporate authorization. If the guarantee is being provided in the context of an acquisition, group reorganization or restructuring, financial assistance issues may also be triggered.

An Italian company granting a guarantee must receive a real and adequate benefit in exchange for the guarantee. The concept of real and adequate benefit is not defined in the applicable legislation and is determined on a case-by-case basis. In particular, in case of upstream and cross-stream guarantees for the financial obligations of group companies, examples include financial consideration in the form of a guarantee fee or access to cash flows in the form of intercompany loans from other members of the Group.

The general rule is that the risk assumed by the Italian Guarantor must not be disproportionate to the direct or indirect economic benefit to the guarantor. To this extent, customary "limitation language" is usually inserted in indentures, credit agreements and guarantees for the purpose of limiting the amount guaranteed by the guarantor to an amount that is proportionate for the direct or indirect economic benefit to the guarantor derived from the transaction.

Absence of a real and adequate benefit could render the guarantee or the collateral *ultra vires* and potentially affected by conflict of interest. Thus, civil liabilities may be imposed on the directors of the guarantor if it is assessed that they did not act in the best interest of the guarantor and that the acts they carried out do not fall within the corporate purpose of the guarantor. The lack of corporate benefit could also result in the imposition of civil liabilities on those companies or persons ultimately exercising a power of 'direction and coordination' over the guarantor or having knowingly received an advantage or profit from such improper control. Moreover, there could also be the risk, according to certain interpretations, that a guarantee can be declared null and void if the lack of corporate benefit was known or presumed to be known by the third party and such third party acted intentionally against the interests of the guarantor.

The rules on corporate benefit apply equally to security provided by subsidiaries in relation to the financial obligations of their parent or sister companies.

As to corporate authorizations and financial assistance, the granting of a guarantee or security by an Italian company must be permitted by the articles of association (*statuto*) of the Italian company and cannot include any liability that would result in unlawful financial assistance within the meaning of Article 2358 or 2474 (as applicable) of the Italian Civil Code pursuant to which, subject to specific exceptions, it is unlawful for a company to give financial assistance (whether by means of loans, security, guarantees or otherwise) for the acquisition and refinancing of the acquisition or subscription (directly or indirectly) of its own shares or quotas by a third party.

The guarantees created through pledges on unlisted securities cannot be immediately liquidated.

Under Article 2352 of the Italian Civil Code, in the case of a pledge on shares, the voting rights, unless agreed otherwise, belong the holder of the pledge and in the case of capital increase pursuant to Article 2442 of the Italian Civil Code, the pledge is extended to the newly issued shares.

Parallel Debt

There is no established concept of "trust" or "trustee" under Italian law and the precise nature, effect and enforceability of the duties, rights and powers of the Security Agent as agent or trustee for the holders of the Notes under security interests on Italian assets is debatable under Italian law.

The Intercreditor Agreement provides for the creation of a "parallel debt." Pursuant to the parallel debt and subject to the terms of the Intercreditor Agreement and to applicable law, the Security Agent becomes the holder of a claim equal to each amount payable by an obligor under the Notes. The parallel debt procedure has not been tested in Italian courts, and there is no certainty that it will eliminate or mitigate the risk of unenforceability posed by Italian law.

It is uncertain and untested in Italian courts whether, under Italian law, a security can be created and perfected in favor of creditors (such as the holders of the Notes) that are neither directly parties to the relevant security documents nor are specifically identified therein or in the relevant share certificates and corporate documents or public registries and, therefore, the risk of unenforceability by the holders of the Notes of the Italian security documents posed by Italian law cannot be eliminated or mitigated.

Fraudulent Transfer Provisions

Upon the commencement of a bankruptcy, the following acts would be without effects (*privi di effetto*) as provided for by Articles 64 and 65 of the Italian Bankruptcy Law *vis-à-vis* the creditors:

- transactions entered into by the debtor, should they have been entered into in the two years preceding the declaration of bankruptcy and should they be deemed gratuitous acts (such as those, under certain circumstances, for the benefit of third parties); and
- payments, which fall due on the day of the declaration of bankruptcy or thereafter, made in the two years preceding the declaration of bankruptcy.

In addition, upon the commencement of a bankruptcy, the following acts could be clawed back (*revocati*) pursuant to Article 67 of the Italian Bankruptcy Law (the result of which is a declaration of ineffectiveness as to the bankruptcy), unless the defendant in the related action proves that it was unaware of the state of insolvency of the debtor:

- non-gratuitous acts (including guarantees, agreements and payments), made within one year preceding the declaration of bankruptcy, if the value of the obligation performed or entered into by the debtor exceeds by more than one-quarter of the value of what has been given or promised in exchange to it;
- acts aimed to satisfy the requests of payment of creditors, made by the debtor within one year preceding the declaration of bankruptcy, by non-ordinary means of payment;
- pledges and voluntary mortgages established within one year preceding the declaration of bankruptcy, for pre-existing and unmatured debts; and
- pledges and voluntary and judicial mortgages established within six months preceding the declaration of bankruptcy, for past due debts.

Moreover, should the receiver prove that the defendant in the related action was aware of the state of insolvency of the debtor (and in the absence of the circumstances indicated below), the payment of debts past due and payable, non-gratuitous acts, and acts establishing a pre-emption right for debt including those of third parties, contextually arisen, made within six months preceding the declaration of bankruptcy, could be clawed-back.

Actually a claw-back action cannot be filed in relation to:

(a) payments made for assets and services within the ordinary course of business;

(b) payments made into a bank current account, *provided that* such payments have not considerably reduced over a period of time the indebtedness of the bankrupt *vis-à-vis* the account holding bank;

(c) the sale of real estate for residential purposes at arm's length, to the extent that such real estate is used as a main house by the buyer or his/her relatives and relatives-in-law;

(d) transactions involving payments as well as security taken over the assets of the debtor, *provided that* such payments were made or security was taken in order to implement a plan which is deemed "suitable" to redress the indebtedness of the debtor and to readjust its financial situation;

(e) transactions involving payments as well as security taken over the assets of the debtor, *provided that* such payments were made or security was taken so as to implement a court-supervised prebankruptcy composition with creditors (*concordato preventivo*) or the debt restructuring arrangements with creditors (*accordi di ristrutturazione dei debiti*);

(f) payments of the amounts due for the services carried out by the employees and the independent contractors of the debtor entity; and

(g) payments of due and payable obligations in order to obtain services which are auxiliary to the access to the controlled management.

In any case, the receiver—who is the individual deputed to bring the above actions—could always resort to the action described in the following paragraph (as provided for by Article 66 of the above-mentioned Royal Decree).

In addition, under Italian law, in certain circumstances, as well as in the ordinary course of business, an action can be brought by any creditor of a given debtor (even if the acting creditor owns a credit which is still under condition or term) within five years from the date in which the latter enters into a guarantee, an agreement and any other act by which it disposes of any of its assets, in order to seek a claw-back (*azione revocatoria*) pursuant to Article 2901 of the Italian Civil Code (which results in a declaration of ineffectiveness as to the acting creditor) of the said guarantee, agreement and other act that is purported to be prejudicial to the acting creditor's right of credit. An Italian court could claw back the said guarantee, agreement and other act only if it finds that, in addition to the ascertainment of the prejudice:

- the debtor was aware of the prejudice that the act would cause to the rights of the acting creditor or, if such act was prior to the existence of the claim or credit, that the act was fraudulently designed for the purpose of prejudicing the satisfaction of the claim or credit; or
- in the case of non-gratuitous acts, the third party involved was aware of the said prejudice and, if the act was prior to the existence of the claim or credit, that the said third party participated in the fraudulent scheme.

Germany

Insolvency

Certain Guarantors are organized under the laws of Germany and have their registered offices in Germany. There is a rebuttable presumption that the "centre of main interest" as defined in the Council of the European Union Regulation No 1346/2000 on Insolvency Proceedings is the jurisdiction where the registered office is situated. Consequently, any insolvency proceedings with regard to these certain Guarantors are likely to be initiated in Germany and, if the Guarantors were held to have their centre of main interests within the territory of Germany at the time the application for the opening of insolvency proceedings (*Insolvenzeröffnungsantrag*) is filed, German insolvency law would most likely govern such proceedings. The insolvency laws of Germany and, in particular, the provisions of the German Insolvency Code (*Insolvenzordnung*) may not be as favorable to creditors as the insolvency laws of other jurisdictions, including, *inter alia*, in respect of priority of creditors' claims, the ability to obtain post-petition interest and the duration of the insolvency proceedings, and hence may limit the ability of creditors to recover payments due on the Notes to an extent exceeding the limitations arising under other insolvency laws.

The following is a brief description of certain aspects of the insolvency laws of Germany.

Under German insolvency law, there is no group insolvency concept, which generally means that, despite the economic ties between various entities within one group of companies, there will be one separate insolvency proceeding for each of the entities if and to the extent there exists an insolvency reason on the part of the relevant entity. Each of these insolvency proceedings will be legally independent from all other insolvency proceedings (if any) within the group. In particular, there is no consolidation of assets and liabilities of a group of companies in the event of insolvency and no pooling of claims among the respective entities of a group. A draft act to facilitate the mastering of group insolvencies (*Entwurf eines Gesetzes zur Erleichterung der Bewältigung von Konzerninsolvenzen*) is under discussion in Germany. However, according to this draft act it is mainly intended to provide for coordination of and cooperation between insolvency proceedings of group companies. The draft act does not provide for a consolidation of the insolvency proceedings of the insolvent group companies, or a consolidation of the assets and liabilities of a group of companies or pooling of claims amongst the respective entities of a group, but rather stipulates four key amendments of the German Insolvency Code in order to facilitate an efficient administration of group insolvencies: (i) a single court may be competent for each group entity insolvency proceedings; (ii) the appointment of a single person as insolvency administrator for all group companies is facilitated; (iii) certain coordination obligations are imposed on insolvency courts, insolvency administrators and creditors' committees; and (iv) certain parties may apply for "coordination proceedings" (*Koordinationsverfahren*) and the appointment of a "coordination insolvency administrator" (*Koordinationsverwalter*) with the ability to propose a "coordination plan" (*Koordinationsplan*). It is currently unclear if and when, and whether in its current or modified form, this bill might be adopted by the German parliament.

Under German insolvency law, insolvency proceedings are not initiated by the competent insolvency court *ex officio*, but require that the debtor or a creditor files a petition for the opening of insolvency proceedings. Insolvency proceedings can be initiated either by the debtor or by a creditor in the event of over-indebtedness (*Überschuldung*) of the debtor or in the event that the debtor is unable to pay its debts as and when they fall due (*Zahlungsunfähigkeit*). According to the relevant provision of the German Insolvency Code (*Insolvenzordnung*), a debtor is over-indebted when its liabilities exceed the value of its assets (based on their liquidation values), unless a continuation of the debtor's business as a going concern is predominantly likely (*überwiegend wahrscheinlich*). As a guideline, the debtor is deemed illiquid if it is unable to pay 10% or more of its due and payable liabilities during the subsequent three weeks, unless it is virtually certain that the company can close the liquidity gap shortly thereafter (*demnächst*) and it can be deemed acceptable to the creditor to continue to wait for the payments owed by such debtor (*positive Fortführungsprognose*). If a stock corporation (*Aktiengesellschaft—AG*), a European law stock corporation based in Germany (*Societas Europaea—SE*) or a limited liability company (*Gesellschaft mit beschränkter Haftung—GmbH*) or any company not having an individual as personally liable shareholder becomes illiquid and/or over-indebted, the management of such company and, under certain circumstances, its shareholders are obliged to file for the opening of insolvency proceedings without undue delay, however, at the latest within three weeks after the mandatory insolvency reason (i.e., illiquidity and/or over-indebtedness) occurred. Non-compliance with these obligations exposes management to both severe damage claims as well as sanctions under criminal law. Once illiquidity or over-indebtedness occurred, any payments, including any payments under the Notes, are voidable. In addition, imminent illiquidity (*drohende Zahlungsunfähigkeit*) is a valid insolvency reason under German law which exists if the company currently is able to service its payments obligations, but will presumably not be able to continue to do so at some point in time within a certain prognosis period. However, only the debtor, but not the creditors, is entitled (but not obliged) to file for the opening of insolvency proceedings in the event of an imminent illiquidity of the debtor.

The insolvency proceedings are administered by the competent insolvency court which monitors the due performance of the proceedings. Upon receipt of the insolvency petition, the insolvency court may take preliminary measures (*vorläufige Maßnahmen*) to secure the property of the debtor during the preliminary proceedings (*Insolvenzeröffnungsverfahren*). The insolvency court may prohibit or suspend any measures taken to enforce individual claims against the debtor's assets during these preliminary proceedings. In addition, the court will generally also appoint a preliminary insolvency administrator (*vorläufiger Insolvenzverwalter*), unless the debtor has petitioned for debtor-in-possession status (*Eigenverwaltung*)—an insolvency process in which the debtor's management generally remains in charge of administering the debtor's business affairs under the supervision of a custodian (*Sachwalter*)—provided that no circumstances are known which lead to the expectation that debtor-in-possession status will place the creditors at a disadvantage. Depending on the size of the debtor's business operations, the insolvency court must or may appoint a preliminary creditors' committee (*vorläufiger Gläubigerausschuss*) to form a view on a petition for debtor-in-possession status, or on the profile of the (preliminary) insolvency administrator to be appointed or to suggest a particular individual to be appointed by the court. In case the members of the preliminary creditors' committee unanimously agree on an individual, such suggestion is binding on the court (unless the suggested individual is not eligible; *i.e.*, not competent and/or not impartial). To ensure that the preliminary creditors' committee reflects the interests of all creditor constituencies, it shall comprise a representative of the secured creditors, one for the large creditors and one for the small creditors as well as one for the employees. The duties of the preliminary insolvency administrator are, in particular, to safeguard and to preserve the debtor's assets (which includes the continuation of the business carried out by the debtor), to verify the existence of an insolvency reason and to assess whether the debtor's net assets will be sufficient to cover the costs of the insolvency proceedings. The court orders the opening (*Eröffnungsbeschluss*) of formal insolvency proceedings (*eröffnetes Insolvenzverfahren*) if certain requirements are met, in particular if there are sufficient assets (*Insolvenzmasse*) to cover at least the costs of the insolvency proceedings. If the assets of the debtor are not expected to be sufficient, the insolvency court will only open formal insolvency proceedings if third parties (e.g., creditors) advance the costs themselves. In the absence of such advancement, the petition for the opening of insolvency proceedings will be dismissed for insufficiency of assets (*Abweisung mangels Masse*).

Upon the opening of formal insolvency proceedings, an insolvency administrator (*Insolvenzverwalter*) (usually, but not necessarily, the same person who acted as preliminary insolvency administrator) is appointed by the insolvency court unless a debtor-in-possession status (*Eigenverwaltung*) is ordered. In the absence of a debtor-in-possession status, the right to administer the debtor's business affairs and to dispose of the assets of the debtor passes to the insolvency administrator with the insolvency creditors (*Insolvenzgläubiger*) only being entitled to request the change of the individual appointed as insolvency administrator at the occasion of the first creditors' assembly (*erste Gläubigerversammlung*) with such change requiring that (i) a simple majority of votes cast (by head count and amount of insolvency claims) has voted in favor of the proposed individual becoming the new insolvency administrator and (ii) the proposed individual being eligible as officeholder (i.e., sufficiently qualified, business-experienced and impartial). The insolvency administrator may raise new financial indebtedness and incur other liabilities to continue the debtor's business. These new liabilities incurred by the insolvency administrator qualify as preferential claims against the estate (*Masseverbindlichkeiten*) which are preferred to any insolvency claim of an unsecured creditor (with the residual claim of a secured insolvency creditor remaining after realization of the available collateral (if any) also qualifying as unsecured insolvency claim).

From the perspective of the holders of the Notes, among others, some important consequences of such opening of formal insolvency proceedings against any Guarantor or any of their relevant subsidiaries that are subject to the German insolvency regime would be the following:

- the right to administer and dispose of the assets of such Guarantor or any of their relevant subsidiaries would generally pass to the insolvency administrator (*Insolvenzverwalter*) as sole representative of the insolvency estate, unless the court orders debtor in possession proceedings (*Eigenverwaltung*);
- if the court does not order debtor-in-possession status (*Eigenverwaltung*) with respect to such Guarantor or any of their relevant subsidiaries, disposals effected by the management of such Guarantor or such subsidiary, after the opening of formal insolvency proceedings, are null and void by operation of law;
- if, during the final month preceding the date of filing for insolvency proceedings or thereafter, a creditor in the insolvency proceedings has acquired through execution (e.g., attachment) a security interest in part of such Guarantor's or any of their relevant subsidiaries' property that would normally form part of the insolvency estate, such security becomes null and void by operation of law upon the opening of formal insolvency proceedings;
- claims against such Guarantor or any of their relevant subsidiaries may only be pursued in accordance with the rules set forth in the German Insolvency Code (*Insolvenzordnung*); and
- any person that has a right for separation (*Aussonderungsrecht*) (*i.e.*, the relevant asset of this person does not constitute part of the insolvency estate) does not participate in the insolvency proceedings; the claim for separation must be enforced in the course of ordinary court proceedings against the insolvency administrator.

All creditors, whether secured or unsecured (unless they have a right to separate an asset from the insolvency estate (*Aussonderungsrecht*) as opposed to a preferential right (*Absonderungsrecht*)), wishing to assert claims against the insolvent debtor need to participate in the insolvency proceedings. German insolvency proceedings are collective proceedings and creditors may generally no longer pursue their individual claims separately, but can instead only enforce them in compliance with the restrictions of the German Insolvency Code (*Insolvenzordnung*). Therefore, secured creditors are generally not entitled to enforce any security interest outside the insolvency proceedings. In the insolvency proceedings, however, secured creditors have certain preferential rights (*Absonderungsrechte*). Depending on the legal nature of the security interest entitlement to enforce such security is either vested with the secured creditor or the insolvency administrator. In this context, it should be noted that the insolvency administrator generally has the sole right to realize any moveable assets in his/the debtor's possession which are subject to preferential rights (e.g., liens over movable assets (*Mobiliarsicherungsrechte*) or security transfer of title (*Sicherungsübereignung*)) as well as to collect any claims that are subject to security assignment agreements (*Sicherungsabtretungen*). In the case of creditors secured by pledges over shares or company interests forming part of the insolvency estate it is, in the absence of authoritative case law, uncertain whether the creditors are entitled to initiate the enforcement process in respect of the pledged shares on their own or whether the insolvency administrator has the right to realize the pledges on behalf of and for the benefit of the secured creditors.

In case the enforcement right is vested with the insolvency administrator, the enforcement proceeds, less certain contributory charges for (i) assessing the value of the secured assets (*Feststellungskosten*) and (ii) realizing the secured assets (*Verwertungskosten*) which, in the aggregate, usually add up to 9% of the gross enforcement proceeds plus VAT (if any), are disbursed to the creditor holding a security interest in the relevant collateral up to an amount equal to its secured claims. With the remaining unencumbered assets of the debtor the insolvency administrator has to satisfy the creditors of the insolvency estate (*Massegläubiger*) first (including the costs of the insolvency proceedings as well as any preferred liabilities incurred by the insolvency estate after the opening of formal insolvency proceedings). Thereafter, all other claims (insolvency claims—*Insolvenzforderungen*), in particular claims of unsecured creditors, will be satisfied on a pro rata basis if and to the extent there is value remaining in the insolvency estate (*Insolvenzmasse*) after the security interest and the preferential claims against the estate have been settled and paid in full.

The preferential right (*Absonderungsrecht*) of a creditor may not necessarily prevent the insolvency administrator from using a movable asset that is subject to this right. The insolvency administrator must, however, compensate the creditor for any loss of value resulting from such use.

Other than secured and unsecured creditors, German insolvency law provides for certain creditors to be subordinated by law (including, but not limited to, claims made by shareholders (unless privileged) of the relevant debtor for the return of funds or the payment of a consideration), while claims of a person who becomes a creditor of the insolvency estate only after the opening of insolvency proceedings (*Massegläubiger*) generally rank senior to the claims of regular, unsecured creditors. Under certain circumstances, restrictive covenants and undertakings in finance documents may result in the relevant creditor being considered to hold a "shareholder-like position" (*gesellschafterähnliche Stellung*) in the relevant debtor, guarantor or grantor of security. In that event, in an insolvency proceeding over the assets of such debtor, guarantor or grantor of security, the claims against such debtor, guarantor or grantor of security would be treated as a subordinated insolvency claim (*nachrangige Insolvenzforderungen*) in accordance with the rules applying to shareholder loans. A third party acquiring the claims that are subject to the rules of the treatment of shareholder loans (section 135 of the German Insolvency Code) will itself be exposed to a claw back risk with respect to repayments that have been made within the period of one year. Subordinated insolvency claims are not eligible to participate in the insolvency proceedings over the assets of the debtor (or in any transaction security) unless the insolvency court handling the case has granted special permission allowing these subordinated insolvency claims to be filed which is not granted in the majority of insolvency cases governed by German law. To the extent any creditor that benefited from the transaction security was a subordinated creditor, potential sharing and equalization provisions in the finance documents could result in holders who are not subordinated suffering a shortfall on the amount they recover. Claims of subordinated creditors in the insolvency proceedings (*nachrangige Insolvenzgläubiger*) are satisfied only after the claims of other non-subordinated creditors (including the unsecured insolvency claims) have been fully satisfied.

The insolvency estate shall serve to satisfy the claims held by the creditors against the debtor on the date the insolvency proceedings were opened. The following subordinated claims shall be satisfied ranking below the other unsubordinated claims of insolvency creditors in the order given herein, and in proportion to their amounts if ranking with equal status: (i) interest and penalty payments accrued on the claims of the insolvency creditors from the opening of the insolvency proceedings; (ii) costs incurred by individual insolvency creditors due to their participation in the proceedings; (iii) fines, regulatory fines, coercive fines and administrative fines, as well as such incidental legal consequences of a criminal or administrative offense binding the debtor to pay money; (iv) claims on the debtor's gratuitous performance of a consideration; and (v) claims for the restitution of shareholder loans (*Gesellschafterdarlehen*) or claims resulting from legal transactions corresponding in economic terms to such a loan.

While in ordinary insolvency proceedings aiming at the liquidation of the relevant insolvent debtor, the value of any Guarantor's or any of their relevant subsidiaries' assets may be realized by a piecemeal sale or, as the case may be, by a bulk sale of the entity's business as a going concern, a different approach aiming at the rehabilitation of such entities can be taken based on an insolvency plan (*Insolvenzplan*). Such plan can be submitted by the debtor or the insolvency administrator and requires, among other things and subject to certain exceptions, the consent of such Guarantor or any of their relevant subsidiaries and the consent of each class of creditors in accordance with specific majority rules and the approval of the insolvency court (while a group of dissenting creditors or the debtor can—under certain circumstances—be crammed down). If the debtor is a corporate entity, also the shares or, as the case may be, the membership rights in the debtor can be included in the insolvency plan (e.g., they can be transferred to third parties, including a transfer to creditors based on a debt-to-equity swap). Moreover, if the debtor has filed a petition for the opening of insolvency proceedings based on an insolvency reason other than illiquidity (i.e., imminent illiquidity or over-indebtedness), combined with a petition to initiate such process based on a debtor-in-possession status and can prove that a restructuring of its business is not obviously futile (*offensichtlich aussichtslos*), the court may grant a period of up to three months to utilize an insolvency plan for the debtor business (*Schutzschirm*). During this period, the creditors' rights to enforce security may—upon application of the filing debtor—be suspended. Under these circumstances, the insolvency court has to appoint a preliminary custodian (*vorläufiger Sachwalter*) to supervise the process. The debtor is entitled to suggest an individual to be appointed as custodian with such suggestion being binding on the insolvency court unless the suggested person is obviously not eligible to become a custodian (i.e., is obviously not competent or impartial).

Under the German Insolvency Code, the insolvency administrator (or in case of debtor-in-possession proceedings, the custodian) may void (*anfechten*) transactions, performances or other acts that are deemed detrimental to insolvency creditors and which were effected prior to the commencement of formal insolvency proceedings during applicable voidable periods. Generally, if transactions, performances or other acts are successfully voided by the insolvency administrator, any amounts or other benefits derived from such challenged transaction, performance or act will have to be returned to the insolvency estate. The administrator's right to void transactions can, depending on the circumstances, extend to transactions having occurred up to ten years prior to the filing for the commencement of insolvency proceedings. In the event of insolvency proceedings with respect to any Guarantor or any of their relevant subsidiaries based on and governed by the insolvency laws of Germany, the payment of any amounts to the holders as well as the granting of Collateral for or providing credit support for the benefit of the Notes could be subject to potential challenges (i.e., clawback rights) by an insolvency administrator under the rules of avoidance as set out in the German Insolvency Code (*Insolvenzordnung*). In the event such a transaction is successfully voided (*angefochten*), the holders of the Notes may not be able to recover or retain any amounts under the Notes or the Collateral and may participate in the insolvency proceedings as unsecured creditor only. If payments have already been made under the Notes or Collateral, any amounts received from a transaction that had been voided would have to be repaid to the insolvency estate (*Insolvenzmasse*). In this case, the holders of the Notes would only have a general unsecured claim under the Notes without preference in insolvency proceedings.

In particular, an act (*Rechtshandlung*) or a legal transaction (*Rechtsgeschäft*) (which term includes the granting of a guarantee, the provision of security and the payment of debt) detrimental to the creditors of the debtor may be voided according to the German Insolvency Code (*Insolvenzordnung*) in the following cases:

- any act granting an insolvency creditor, or enabling an insolvency creditor to obtain, security or satisfaction (*Befriedigung*) if such act was taken (i) during the last three months prior to the filing of the petition for the opening of insolvency proceedings, provided that the debtor was illiquid (*zahlungsunfähig*) at the time such act was taken and the creditor knew of such illiquidity (or of circumstances that clearly suggest that the debtor was illiquid) at such time, or (ii) after the filing of the petition for the opening of insolvency proceedings, if the creditor knew of the debtor's illiquidity or the filing of such petition (or of circumstances that clearly suggest such illiquidity or filing);

- any act granting an insolvency creditor, or enabling an insolvency creditor to obtain, security or satisfaction (*Befriedigung*) to which such creditor was not entitled, or which was granted or obtained in a form or at a time to which or at which such creditor was not entitled to such security or satisfaction, if (i) such act was taken during the last month prior to the filing of the petition for the opening of insolvency proceedings or after such filing, (ii) such act was taken during the second or third month prior to the filing of the petition and the debtor was illiquid at such time or (iii) such act was taken during the second or third month prior to the filing of the petition for the opening of insolvency proceedings and the creditor knew at the time such act was taken that such act was detrimental to the other insolvency creditors (or had knowledge of circumstances that clearly suggest such detrimental effect);

- a legal transaction by the debtor that is directly detrimental to the insolvency creditors or by which the debtor loses a right or the ability to enforce a right or by which a proprietary claim against a debtor is obtained or becomes enforceable, if it was entered into (i) during the three months prior to the filing of the petition for the opening of insolvency proceedings and the debtor was illiquid at the time of such transaction and the counterparty to such transaction knew of the illiquidity at such time or (ii) after the filing of the petition for the opening of insolvency proceedings and the counterparty to such transaction knew either of the debtor's illiquidity or of such filing at the time of the transaction;

- any act by the debtor without (adequate) consideration (e.g., whereby a debtor grants security for a third-party debt, which might be regarded as having been granted gratuitously (*unentgeltlich*)), if it was effected in the four years prior to the filing of the petition for the opening of insolvency proceedings;

- any act performed by the debtor during the ten years prior to the filing of the petition for the opening of insolvency proceedings or at any time after the filing, if the debtor acted with the intention of prejudicing its insolvency creditors (*vorsätzliche Gläubigerbenachteiligung*) and the beneficiary of the act knew of such intention at the time of such act;

- any non-gratuitous contract concluded between the debtor and an affiliated party that directly operates to the detriment of the creditors can be voided unless such contract was concluded earlier than two years prior to the filing of the petition for the opening of insolvency proceedings or the other party had no knowledge of the debtor's intention to disadvantage its creditors as of the time the contract was concluded; in relation to corporate entities, the term "affiliated party" includes, subject to certain limitations, members of the management board or supervisory board, general partners and shareholders owning more than 25% of the debtor's share capital, persons or companies holding comparable positions that give them access to information about the economic situation of the debtor, and other persons who are spouses, relatives or members of the household of any of the foregoing persons;
- any act that provides security or satisfaction (*Befriedigung*) for a claim of a shareholder for repayment of a shareholder loan or a similar claim if (i) in the case of the provision of security, the act took place during the last ten years prior to the filing of the petition for the opening of insolvency proceedings or after the filing of such petition or (ii) in the case of satisfaction, the act took place during the last year prior to the filing of the petition for the opening of the insolvency proceedings or after the filing of such petition; or
- any act whereby the debtor grants satisfaction for a loan claim or an economically equivalent claim to a third party if (i) the satisfaction was effected in the last year prior to the filing of a petition for the opening of insolvency proceedings or thereafter, and (ii) a shareholder of the debtor had granted security or was liable as a guarantor (*Garant*) or surety (*Bürge*) (in which case the shareholder must compensate the debtor for the amounts paid (subject to further conditions)).

In this context, "knowledge" is generally deemed to exist if the other party is aware of the facts from which the conclusion must be drawn that the debtor was unable to pay its debts generally as they fell due, that a petition for the opening of insolvency proceedings had been filed, or that the act was detrimental to, or intended to prejudice, the insolvency creditors, as the case may be. A person is deemed to have knowledge of the debtor's intention to prejudice the insolvency creditors if he or she knew of the debtor's imminent illiquidity and that the transaction prejudiced the debtor's creditors. With respect to an "affiliated party," there is a general statutory presumption that such party had "knowledge."

The granting of security concurrently with the incurrence of debt may be qualified as a "cash transaction" and may as such be privileged under certain circumstances under the German Insolvency Code (*Insolvenzordnung*) (*Bargeschäftsprivileg*) by not being subject to voidness rights.

The German legislator is currently discussing a draft amendment concerning the statutory avoidance provisions in the German Insolvency Code (*Insolvenzordnung*). Amendments are envisaged with regards to, among others, the provisions for avoidance claims in connection with wilful intent, for cash transactions (*Bargeschäfte*) and the interest rates on avoidance claims. It is also intended to privilege creditors which have obtained coverage of their claims on the basis of a valid enforcement order. It is currently unclear if and when, and whether in its current or modified form, this bill might be adopted by the German parliament.

Apart from the examples of an insolvency administrator voiding transactions according to the German Insolvency Code (*Insolvenzordnung*) described above, a creditor who has obtained an enforcement order (*Vollstreckungstitel*) could possibly also void any security right or payment performed under the relevant security right according to the German Law of Voidness (*Anfechtungsgesetz*) outside formal insolvency proceedings. The prerequisites vary to a certain extent from the rules described above and the voidance periods are calculated from the date a creditor exercises its rights of voidance in the courts.

Limitations on Validity and Enforceability of the Guarantees and the Security Interests

The granting of guarantees by German Guarantors will be subject to certain German capital maintenance rules of the German Act regarding Companies with Limited Liability (*Gesetz betreffend die Gesellschaften mit beschränkter Haftung*) (the "GmbHG") if that Guarantor is incorporated in Germany in the legal form of a German limited liability company (*Gesellschaft mit beschränkter Haftung*—a "GmbH") or a German limited partnership with a German limited liability company as general partner (a "GmbH & Co. KG") provided that if Synlab were converted into a stock corporation and for as long as it remains a stock corporation, the rules of capital maintenance set out in the German Stock Corporation Act will apply to Synlab and any of its subsidiaries. As a general rule, sections 30 and 31 of the GmbHG ("Sections 30 and 31") prohibit a GmbH from disbursing its assets to its shareholders to the extent that the amount of the GmbH's net assets (*i.e*., assets minus liabilities and liability reserves)—or, in case of a GmbH & Co. KG, its general partner's net assets—is or would fall below the amount of its stated share capital (*Stammkapital*). Guarantees or security interests granted by a GmbH or a GmbH & Co. KG in order to guarantee liabilities of a direct or indirect parent or sister company are considered disbursements under Sections 30 and 31. If Synlab was converted into a stock corporation and for as long as it remains a stock corporation, section 57 of the German Stock Corporation Act prohibits an AG and its direct and indirect (German and foreign) subsidiaries from making any payment to or in favour of its shareholders other than the payment of a dividend or an arms' length transaction. Therefore, in order to enable German subsidiaries to grant guarantees and to provide security interests to secure liabilities of a direct or indirect parent or sister company without the risk of violating Sections 30 and 31 or Section 57 of the German Stock Corporation Act and to limit any potential personal liability of management, it is standard market practice for credit agreements, indentures, guarantees and security documents to contain so- called "limitation language" in relation to subsidiaries incorporated in Germany in the legal form of a GmbH, a GmbH & Co. KG or an AG. Pursuant to such "limitation language," the beneficiaries of the guarantees contractually agree to enforce the guarantees and security interests against the German subsidiary which is a GmbH or GmbH & Co. KG only if and to the extent that such enforcement does not result in the subsidiary's—or, in case of a GmbH & Co. KG, in the general partner's—net assets falling below, or increasing an existing shortfall of, its stated share capital. Pursuant to the limitation language for a stock corporation and its subsidiaries, the beneficiaries agree that the Notes will only benefit from Guarantees and Collateral if a domination agreement is in place, provided that the Guarantees and Collateral shall not be enforceable if the payment under the Guarantee or Collateral will, or must be expected to, result in an annual loss of the stock corporation which cannot be compensated for by a fully valuable compensation claim. In an enforcement scenario it is likely that no such fully valuable compensation claim exists.

Accordingly, as a matter of German corporate law, the Indenture, to the extent provided by a Guarantor incorporated in Germany in a relevant corporate form as described above, contains such contractual limitation language and such Guarantees or Collateral are limited in the manner described. This could lead to a situation in which the respective Guarantee or Collateral granted by such Guarantor cannot be enforced at all.

German capital maintenance rules are subject to evolving case law. We cannot assure you that future court rulings may not further limit the access of shareholders to assets of German Guarantors constituted in the form of a GmbH or a GmbH & Co. KG, which can negatively affect the ability of the Issuers to make payment on the Notes or of the German Guarantors to make payments on the Guarantees or negatively affect the ability to enforce the Collateral.

In addition, it cannot be ruled out that the case law of the German Federal Supreme Court (*Bundesgerichtshof*) regarding so-called "destructive interference" (*existenzvernichtender Eingriff*) (*i.e.*, a situation where a shareholder deprives a GmbH or GmbH & Co. KG or an AG of the liquidity necessary for it to meet its own payment obligations) may be applied by courts with respect to the enforcement of a Guarantee or any Collateral granted by a German Guarantor. In such case, the amount of proceeds to be realized in an enforcement process may be reduced, even to zero. According to a decision of the German Federal Supreme Court (*Bundesgerichtshof*), a security agreement may be void due to tortious inducement of breach of contract if a creditor knows about the distressed financial situation of the debtor and anticipates that the debtor will only be able to grant collateral by disregarding the vital interests of its other business partners. It cannot be ruled out that German courts may apply this case law with respect to the granting of Guarantees and/or Collateral by any of the German Guarantors. Furthermore, the beneficiary of a transaction effecting a repayment of the stated share capital of the grantor of the Guarantee or Collateral could become personally liable under exceptional circumstances. The German Federal Supreme Court (*Bundesgerichtshof*) ruled that this could be the case if, for example, the creditor were to act with the intention of detrimentally influencing the position of the other creditors of the debtor in violation of the legal principle of *bonos mores* (*Sittenwidrigkeit*). Such intention could be present if the beneficiary of the transaction was aware of any circumstances indicating that the grantor of the guarantee and/or collateral was close to collapse (*Zusammenbruch*), or had reason to enquire further with respect thereto.

Accessory security interests / Parallel debt

Under German law, certain security interests such as pledges (*Pfandrechte*) are of strict accessory nature and are therefore dependent on the secured claims and require the security holder and the creditor of the secured claim to be identical. Such accessory security interests (*akzessorische Sicherungsrechte*) (i) will automatically lapse to the extent a secured claim is settled, discharged or novated, (ii) may not be assigned independently, but would automatically follow the claims they secure in case the relevant secured claim is assigned and (iii) may only be granted to the creditor of a claim to be secured by the accessory security interest.

The accessory security interests will also be granted to the Security Agent. The Security Agent is however not a creditor under the Notes. The holders on the other hand are creditors under the Notes and the Guarantees. In order to allow the holders to benefit from the pledges, such pledges will also secure a so- called "parallel debt" obligation created under the Intercreditor Agreement in favor of the Security Agent rather than secure the holders' claims under the Notes directly. The parallel debt is in the same amount and payable at the same time as the obligations of the creditors under the Notes and the Guarantees (the "Principal Obligations"), and any payment in respect of the Principal Obligations will discharge the corresponding parallel debt and any payment in respect of the parallel debt will discharge the corresponding Principal Obligations. Although the Security Agent will have, pursuant to the parallel debt, a claim against the holders and the Guarantors for the full principal amount of the Notes, the legal concept of creating parallel debt obligations has not yet been tested before a German court. Therefore, it cannot be ruled out that such concept will not be recognized by German courts or that it will eliminate or mitigate the risk of invalidity and unenforceability of pledges. Therefore, the ability of the Security Agent to enforce the collateral may be restricted.

Moreover, the Security Agent holds the pledges in trust. This means that in the case of an insolvency of the Security Agent, the insolvency administrator over the insolvency estate of the Security Agent may successfully claim that there is no right for separation (*Aussonderungsrecht*) of the holders with respect to the secured claims. As a consequence the secured claims (including the parallel debt) and the accessory security rights would remain with the (then insolvent) Security Agent.

Switzerland

The liabilities of any Guarantor or security provider organized under the laws of Switzerland (any such Guarantor or security provider, a "Swiss Collateral Guarantor") under any up-stream or cross-stream Guarantee and security interest are at any time (to the extent that such is a requirement of applicable Swiss law in force at the relevant time) limited to a sum equal to the maximum amount of the respective Swiss Collateral Guarantor's reserves and profits available for distribution, provided that such limitations shall not free the respective Swiss Collateral Guarantor from payment obligations in excess of its freely distributable reserves and profits, but merely postpone the payment date of those obligations until such time as payment is permitted notwithstanding such limitations. The payment under the respective Swiss Collateral Guarantor's Guarantee and the enforcement of security interest may require certain prior corporate formalities to be completed including, but not limited to, obtaining an audit report, shareholders' resolutions and board resolutions.

The enforcement of the respective Swiss Collateral Guarantor's Guarantee or any security interest granted by such Swiss Collateral Guarantor may give rise to Swiss withholding taxes on dividends (of up to 53.8% at present rates) to the extent that the payment or enforcement of such Guarantee or security interest, respectively, falls to be regarded as a deemed distribution by the respective Swiss Collateral Guarantor to the Issuers or any other related party.

For the above reasons, it is standard market practice for indenture agreements, credit agreements, guarantees and security documents to contain so-called "limitation language" in relation to the respective Swiss Collateral Guarantor as summarized below under "*—Limitations on Enforcement of Guarantee and Security granted by Swiss Collateral Guarantor*."

Limitations on Enforcement of Guarantee and Security granted by Swiss Collateral Guarantor

If and to the extent that a Swiss Collateral Guarantor under the Indentures or any other Notes documentation and/or Temporary Notes documentation, including any Security Documents, becomes liable for obligations of its direct or indirect affiliates (other than its direct or indirect wholly-owned subsidiaries) and if complying with such obligations would be restricted under then applicable Swiss corporate law (the "Restricted Obligations"), the aggregate liability of the Swiss Collateral Guarantor for Restricted Obligations shall be limited to the amount of unrestricted equity capital surplus available for distribution as dividends to the shareholders of the Swiss Collateral Guarantor (the "Maximum Amount"), provided that this is a requirement under then applicable mandatory Swiss law and understood that such limitation shall not free the Swiss Collateral Guarantor from its obligations in excess of the Maximum

Amount, but that it shall merely postpone the performance date of those obligations until such time or times as performance is again permitted.

The Indentures or any other Notes documentation and/or Temporary Notes documentation provide for actions which may be necessary or useful in order to allow for payment by a Swiss Collateral Guarantor under the Indentures or any Notes documentation and/or Temporary Notes documentation with a minimum of limitations.

Pledges

Under Swiss law, "accessory" security interests such as pledges (Pfandrechte) require that the party secured by the pledge must be identical to the creditor of the secured claim. If and to the extent (beneficial) holders of the Notes, which may change from time to time, may not be party to such Swiss law governed "accessory" security agreements, a parallel debt structure may be used, pursuant to which security interests are created in favor of the Security Agent who will hold a claim equal to each amount payable by an obligor under the Notes (the "Parallel Debt"). The Parallel Debt is subject to English law and is established in the Intercreditor Agreement. The Parallel Debt is in the same amount and payable at the same time as the obligations of the Issuers under the Indentures (the "Principal Obligations"). Any payment in respect of the Principal Obligations shall discharge the corresponding Parallel Debt and any payment in respect of the Parallel Debt shall discharge the corresponding Principal Obligations. Although the Security Agent will have, pursuant to the Parallel Debt, a claim against the Issuer for the full principal amount of the Notes, holders of the Notes bear some risks associated with a possible insolvency or bankruptcy of the Security Agent. Moreover, the parallel debt structure has not been tested under Swiss law and there is no assurance that such a structure will be effective before a Swiss court because there is no judicial or other guidance as to its efficacy and, therefore, there is no certainty that such structure will eliminate or mitigate the risk of the pledge in favor of the Noteholders being invalid or unenforceable.

Insolvency

In the event of a Swiss Collateral Guarantor's insolvency, the respective insolvency proceedings would be governed by Swiss law as a result of the respective Swiss Collateral Guarantor's offices being registered in the competent commercial register in Switzerland. In addition, Swiss debt enforcement and insolvency laws may be applicable in case of an enforcement of security interests over assets located in Switzerland. The enforcement of claims and questions relating to insolvency and bankruptcy in general are dealt with by the Swiss Federal Act on Debt Enforcement and Bankruptcy, as amended from time to time. Under these rules, claims that are pursued against a Swiss entity can lead to the opening of bankruptcy (*Konkurs*) and, hence, a general liquidation of all assets and liabilities of the debtor. If bankruptcy has not been declared, creditors secured by a pledge must follow a special enforcement proceeding limited to the liquidation of the collateral (*Betreibung auf Pfandverwertung*) unless the parties have agreed on a private liquidation or the pledgor has waived the right that the creditor must first realize the collateral. However, if bankruptcy is declared while such a special enforcement proceeding is pending, the proceeding ceases and the creditor participates in the bankruptcy proceedings with the other creditors and a private liquidation is no longer permitted.

As a rule, the opening of bankruptcy by the competent court needs to be preceded by a prior debt enforcement procedure which involves, *inter alia*, the issuance of a payment summons by local debt enforcement authorities (*Betreibungsamt*). However, the competent court may also declare a debtor bankrupt without such prior proceedings if the following requirements are met: (i) at the request of the debtor, if the debtor's board of directors or the auditors of the company (in case of failure of the board of directors) declare that the debtor is over-indebted (*überschuldet*) within the meaning of art. 725 (2) of the Swiss Code of Obligations or if it declares to be insolvent (*zahlungsunfähig*), and (ii) at the request of a creditor, if the debtor commits certain acts to the detriment of its creditors or ceases to make payments (*Zahlungseinstellung*) or if certain events happen during composition proceedings. The bankruptcy proceedings are carried out and the bankrupt estate is managed by the receiver in bankruptcy (*Konkursverwaltung*).

All assets at the time of the declaration of bankruptcy and all assets acquired or received subsequently form the bankrupt estate, which, after deduction of costs and certain other expenses, are used to satisfy the creditors. Assets of the bankrupt estate over which a pledge was created in favor of a creditor before the declaration of bankruptcy are included in the bankrupt estate. The pledgee or the Security Agent, respectively, is under an obligation to remit the pledged assets to the bankrupt estate. The assets are liquidated by the receiver in bankruptcy in the same manner as the other assets of the bankrupt estate, but the creditor secured by the pledge retains its privilege to be satisfied from the proceeds of the liquidation of the assets pledged to it with priority over the unsecured creditors. Final distribution of non-secured claims is based on a ranking of creditors in three classes. The first and the second class, which are privileged, comprise claims under employment contracts, accident insurance, pension plans and family law. Certain privileges can also be claimed by the government and its subdivisions based on specific provisions of federal law. All other creditors are treated equally in the third class. A secured party participates in the third class to the extent its claim is not covered by its collateral.

Claims assigned for security purposes by a Swiss Collateral Guarantor that come into existence prior to the opening of bankruptcy can be enforced by the assignee outside Swiss bankruptcy proceedings. Assigned claims that come into existence after the opening of bankruptcy over a Swiss Collateral Guarantor fall within the bankrupt estate and the assignee is not be entitled to such claim proceeds.

Swiss insolvency laws also provide for reorganization procedures by composition with the debtor's creditors. Reorganization is initiated by a request to the competent court for a stay (*Nachlassstundung*) pending negotiation of the composition agreement with the creditors and confirmation of such agreement by the competent court. A distinction is made between a composition agreement providing for the assignment of assets (*Nachlassvertrag mit Vermögensabtretung*) which leads to a private liquidation and in many instances has analogous effects as a bankruptcy, and a dividend composition (*Dividenden-Vergleich*) providing for the payment of a certain percentage on the creditors' claims and the continuation of the debtor. Further, there is the possibility of a composition in the form of a mere payment term extension (*Stundungsvergleich*). During a moratorium, debt collection proceedings cannot be initiated and pending proceedings are stayed. Furthermore, the debtor's power to dispose of its assets and to manage its affairs is restricted. In case of a pledge, the secured party is not entitled to proceed with a private liquidation until the confirmation of the settlement by the competent court. A secured creditor participates in the settlement only for the amount of its claim not covered by the collateral. The moratorium does not affect the agreed due dates of debts (contrary to bankruptcy, in which case all debts become immediately due upon adjudication). The moratorium aims at facilitating the conclusion of one of the above composition agreements. Any composition agreement needs to be approved by the creditors and confirmed by the competent court. With the judicial confirmation, the composition agreement becomes binding on all creditors, whereby secured claims are only subject to the composition agreement to the extent that the collateral proves to be insufficient to cover the secured claims.

Hardening periods and fraudulent transfer

Certain arrangements or dispositions that are made during a certain period (suspect period) preceding the declaration of bankruptcy or the grant of a moratorium in connection with a composition proceeding may be challenged by the receiver in bankruptcy (*Konkursverwaltung*) and certain creditors under the applicable rules of avoidance. The avoidance may relate to (i) gifts and transactions in which the debtor accepted a consideration out of proportion to its own made in the suspect period of 12 months prior to being declared bankrupt or the grant of a moratorium, (ii) certain acts of a debtor in the suspect period of 12 months prior to being declared bankrupt or the grant of a moratorium if the debtor at that time was over-indebted, and (iii) dispositions made by the debtor within a suspect period of five years prior to being declared bankrupt or the grant of a moratorium with the intent to disadvantage its creditors or to prefer certain of its creditors to the detriment of other creditors, whereby, with respect to each case, the suspect period may be extended under certain circumstances. The transactions potentially subject to avoidance also include those contemplated by the relevant Swiss Collateral Guarantor's Guarantee or the granting of security interests. If they are challenged successfully, the rights granted under the Guarantee or in connection with security interests become unenforceable and any amounts received must be refunded to the insolvent estate.

PLAN OF DISTRIBUTION

Subject to the terms and conditions set forth in a purchase agreement (the "Purchase Agreement") dated as of July 23, 2015, the Issuers have agreed to sell to each Initial Purchaser, and each Initial Purchaser has agreed, severally and not jointly, to purchase the Notes from the Issuers.

The Purchase Agreement provides that the obligations of the Initial Purchasers to pay for and accept delivery of the Notes are subject to, among other conditions, the delivery of certain legal opinions by counsel.

The Initial Purchasers propose to offer the Notes initially at the price indicated on the cover page hereof. After the initial offering, the offering price and other selling terms of the Notes may from time to time be varied by the Initial Purchasers without notice.

The Issuers have agreed to pay the Initial Purchasers certain customary fees for their services in connection with the Offerings and to reimburse them for certain out-of-pocket expenses.

Persons who purchase Notes from the Initial Purchasers may be required to pay stamp duty, taxes and other charges in accordance with the laws and practice of the country of purchase in addition to the offering price set forth on the cover page hereof.

The Purchase Agreement provides that we will indemnify and hold harmless the Initial Purchasers against certain liabilities, including liabilities under the U.S. Securities Act, and will contribute to payments that the Initial Purchasers may be required to make in respect thereof. We have agreed, subject to certain limitations, that we will not offer, sell, contract to sell or otherwise dispose of, except as provided under the Purchase Agreement, directly or indirectly, any securities of, or guarantees by, the Issuers, the Guarantors or any of the subsidiaries of the Issuers or the Guarantors that are substantially similar to the Notes without the prior written consent of J.P. Morgan Securities PLC and Goldman Sachs International, as representatives of the Initial Purchasers, for a period of 60 days from the date of the pricing of the Offering.

The Notes and the Guarantees have not been and will not be registered under the U.S. Securities Act and may not be offered or sold within the United States except to QIBs in reliance on Rule 144A and in offshore transactions in reliance on Regulation S. Any offer or sale of Notes in the United States in reliance on Rule 144A will be made by broker-dealers who are registered as such under the U.S. Exchange Act. Terms used in this paragraph have the meanings given to them by Regulation S. Resales of the Notes are restricted as described under "*Transfer Restrictions*."

Each Initial Purchaser has represented, warranted and agreed that it:

- has only communicated or caused to be communicated and will only communicate or cause to be communicated any invitation or inducement to engage in investment activity (within the meaning of section 21 of the UK Financial Services and Markets Act 2000 (the "FSMA") received by it in connection with the issuance or sale of any Notes in circumstances in which section 21(1) of the FSMA does not apply to the Issuers or the Guarantors; and
- has complied and will comply with all applicable provisions of the FSMA with respect to anything done by it in relation to the Notes in, from or otherwise involving the United Kingdom.

No action has been taken in any jurisdiction, including the United States and the United Kingdom, by us or the Initial Purchasers that would permit a public offering of the Notes or the possession, circulation or distribution of this offering memorandum or any other material relating to us or the Notes in any jurisdiction where action for this purpose is required. Accordingly, the Notes may not be offered or sold, directly or indirectly, and neither this offering memorandum nor any other offering material or advertisements in connection with the Notes may be distributed or published, in or from any country or jurisdiction, except in compliance with any applicable rules and regulations of any such country or jurisdiction. This offering memorandum does not constitute an offer to sell or a solicitation of an offer to purchase in any jurisdiction where such offer or solicitation would be unlawful. Persons into whose possession this offering memorandum comes are advised to inform themselves about and to observe any restrictions relating to the Offering, the distribution of this offering memorandum and resale of the Notes. See "*Transfer Restrictions*."

The Senior Notes are a new issue of securities for which there currently is no market. We will apply, through our listing agent, to list the Senior Notes on the Official List of the Irish Stock Exchange and to have the Senior Notes admitted to trading on the Global Exchange Market thereof; however, we cannot assure you that the Senior Notes will be approved for listing or that such listing will be maintained.

The Initial Purchasers have advised us that they intend to make a market in the Senior Notes after completing the Offering. The Initial Purchasers are not obligated, however, to make a market in the Senior Notes, and any market-making activity may be discontinued at any time at the sole discretion of the Initial Purchasers without notice. In addition, any such market-making activity will be subject to the limits imposed by the U.S. Securities Act and the U.S. Exchange Act. Accordingly, we cannot assure you that any market for the Senior Notes will develop, that it will be liquid if it does develop, or that you will be able to sell any Senior Notes at a particular time or at a price which will be favorable to you. See "*Risk Factors—Risks Related to the Senior Secured Notes and the Senior Notes—There may not be an active trading market for the Notes, in which case your ability to sell the Notes will be limited*."

We expect that delivery of the Notes will be made against payment on the Notes on or about the date specified on the cover page of this offering memorandum, which will be the tenth business day (as such term is used for purposes of Rule 15c6-1 of the U.S. Exchange Act) following the date of pricing of the Notes (this settlement cycle is being referred to as "T+10"). Since trades in the secondary market generally settle in three business days, purchasers who wish to trade Notes on the date of pricing or the next six succeeding business days will be required, by virtue of the fact that the Notes initially will settle T+10, to specify alternative settlement arrangements to prevent a failed settlement.

In connection with the Offering, the Stabilizing Manager, or persons acting on its behalf, may engage in transactions that stabilize, maintain or otherwise affect the price of the Notes. Specifically, the Stabilizing Manager, or persons acting on its behalf, may bid for and purchase Notes in the open markets to stabilize the price of the Notes. The Stabilizing Manager, or persons acting on its behalf, may also over-allot Notes (*provided that* the aggregate principal amount of Notes allotted does not exceed 105% of the aggregate principal amount of the Notes that are the subject of the Offering), creating a syndicate short position, and may bid for and purchase Notes in the open market to cover the syndicate short position. In addition, the Stabilizing Manager, or persons acting on its behalf, may bid for and purchase Notes in market-making transactions as permitted by applicable laws and regulations and impose penalty bids. These activities may stabilize or maintain the respective market price of the Notes above market levels that may otherwise prevail. The Stabilizing Manager is not required to engage in these activities, and may end these activities at any time. Accordingly, no assurance can be given as to the liquidity of, or trading markets for, the Notes. See "*Risk Factors—Risks Related to the Senior Secured Notes and the Senior Notes—There may not be an active trading market for the Notes, in which case your ability to sell the Notes will be limited*."

The Initial Purchasers may engage in over-allotment, stabilizing transactions, covering transactions and penalty bids in accordance with Regulation M under the U.S. Exchange Act.

Over-allotment involves sales in excess of the offering size, which creates a short position for the relevant Initial Purchasers. Stabilizing transactions permit bidders to purchase the underlying security so long as the stabilizing bids do not exceed a specified maximum. Covering transactions involve purchases of the Notes in the open market after the distribution has been completed in order to cover short positions. Penalty bids permit the Initial Purchasers to reclaim a selling concession from a broker or dealer when the Notes originally sold by that broker or dealer are purchased in a stabilizing or covering transaction to cover short positions.

The Initial Purchasers or their respective affiliates from time to time (i) have provided in the past and may provide in the future investment banking, consulting and financial advisory and commercial lending and banking services to, (ii) have entered into and may, in the future enter into, other related transactions with, and (iii) have assisted or advised any party to make, and may in the future assist or advise any party to make, acquisitions and investments in or related to, the Issuers, German BidCo, French BidCo, Synlab, Labco and their respective subsidiaries and their respective affiliates, in the ordinary course of business for which they have received or may receive customary fees and commissions. Certain of the Initial Purchasers and their affiliates may currently be advising the Issuers, German BidCo, French BidCo, Synlab, Labco and their respective subsidiaries and their respective affiliates in such transactions and/or may advise them from time to time in the future.

In the ordinary course of their various business activities, the Initial Purchasers and their affiliates may make or hold a broad array of investments and actively trade debt security (or related derivative securies) and financial instruments (including bank loans) for their own accounts and for the accounts of their customers. Such investment and security activities may involve the Issuers', Synlab's and/or Labco's security and instruments. The Initial Purchasers and their respective affiliates may also make investment recommendations or publish or express independent research views in respect of such securities or instruments and may hold, or recommend to clients that they acquire, long or short positions in such securities and instruments. The Initial Purchasers or their respective affiliates that have a lending relationship with the Issuers, Synlab or Labco may hedge their credit exposure to the Issuers, Synlab or Labco, as the case may be, consistent with their customary risk management policies. In addition, certain of the Initial Purchasers or their respective affiliates are acting as lead arrangers and/or facility agent under, and all of the Initial Purchasers or their respective affiliates are lenders under, the Revolving Credit Facility. Each has received and may receive customary fees for their services in such capacities. In addition, certain of the Initial Purchasers or their respective affiliates are lenders under the Existing Synlab Credit Facility, which is expected to refinanced in whole with the proceeds from the Offering.

LEGAL MATTERS

Certain legal matters in connection with the Offerings will be passed upon for us by Clifford Chance LLP, as to matters of U.S. federal, New York and English law, by Clifford Chance Deutschland LLP, as to matters of German law, and by Clifford Chance Europe LLP, as to matters of French law. Certain legal matters in connection with the Offerings will be passed upon for the Initial Purchasers by Latham & Watkins LLP, as to matters of U.S. federal, New York, German and English law, and by Latham & Watkins AARPI, as to matters of French law.

INDEPENDENT AUDITORS

Synlab

The German language consolidated financial statements of Synlab as of and for the years ended December 31, 2013 and December 31, 2014 have been audited by Ernst & Young GmbH Wirtschaftsprüfungsgesellschaft ("E&Y"), independent auditors, in accordance with Section 317 HGB, and German generally accepted standards for the audit of financial statements promulgated by the German Institute of Public Auditors (*Institut der Wirtschaftsprüfer*), as stated in their German language auditor's reports. Free English language translations of the abovementioned German language consolidated financial statements (labeled as the "Synlab Audited Financial Statements") and the respective auditor's reports are included in this offering memorandum.

Each of the respective auditor's reports of E&Y on the consolidated financial statements of synlab Holding GmbH as of and for the years ended December 31, 2013 and December 31, 2014 refers to the respective consolidated financial statements and the respective group management report as a whole. The group management reports are not reprinted in this offering memorandum.

E&Y is a member of the Chamber of Public Accountants (*Wirtschaftsprüferkammer*), Berlin.

Labco

The IFRS consolidated financial statements of Labco as of and for the year ended December 31, 2012 have been audited by Deloitte & Associés and Pierre Henri Scacchi et Associés, as stated in their reports appearing herein. The IFRS consolidated financial statements of Labco as of and for the year ended December 31, 2013 and 2014 have been audited by Deloitte & Associés and Aplitec, as stated in their reports appearing herein. The unaudited historical interim condensed consolidated financial statements of Labco as of and for the three months ended March 31, 2015, have been reviewed by Deloitte & Associés and Aplitec, as stated in their review report appearing herein.

Labco's current auditors are Deloitte & Associés and Aplitec.

Deloitte & Associés is a member of the *Compagnie régionale des commissaires aux comptes de Versailles*. Pierre-Henri Scacchi et Associés is a member of the *Compagnie régionale des commissaires aux comptes de Paris*. Aplitec is a member of *Compagnie régionale des commissaires aux comptes de Paris*.

SERVICE OF PROCESS AND ENFORCEMENT OF CIVIL LIABILITIES

The Issuers of the Notes and the Guarantors are organized under the laws of Austria, England and Wales, France, Germany, Italy, Switzerland, Belgium and Spain. Each of the Security Documents relating to the Collateral will be governed by the laws of Austria, England and Wales, France, Germany, Italy, Switzerland, Belgium and Spain, as applicable. The Indenture (including the Guarantees) is, and the Notes will be, governed by New York law. The Intercreditor Agreement is governed by English law. All of the directors and executive officers of the Issuers and each of the Guarantors are nonresidents of the United States. Since substantially all of the assets of the Issuers and each of the Guarantors, and their directors and executive officers, are located outside the United States, any judgment obtained in the United States against either Issuer or a Guarantor or any such other person, including judgments with respect to the payment of principal, premium (if any) and interest on the Notes or any judgment of a U.S. court predicated upon civil liabilities under U.S. federal or state securities laws, may not be collectible in the United States. Furthermore, although the Issuers and each of the Guarantors will appoint an agent for service of process in the United States and will submit to the jurisdiction of New York courts, in each case, in connection with any action in relation to the Notes and the Indenture or under U.S. securities laws, it may not be possible for investors to effect service of process on us or on such other persons as mentioned above within the United States in any action, including actions predicated upon the civil liability provisions of U.S. federal securities laws.

If a judgment is obtained in a U.S. court against either Issuer or a Guarantor or a security provider, investors will need to enforce such judgment in jurisdictions where the relevant company has assets. Even though the enforceability of U.S. court judgments outside the United States is described below for the countries in which each of the Issuers and the Guarantors is located, you should consult with your own advisors in any pertinent jurisdictions as needed to enforce a judgment in those countries or elsewhere outside the United States.

Austria

Under the the Austrian Enforcement Act (*Exekutionsordnung, EO*), foreign judgments are only enforceable if the reciprocal recognition and enforcement of judgments is warranted by a bilateral or multilateral treaty between the countries involved or by an ordinance (*Verordnung*) of the Austrian government (in which the Austrian government confirms the reciprocal recognition). The Republic of Austria and the United States currently do not have a treaty that provides for the reciprocal recognition and enforcement of judgments, other than arbitration awards in civil and commercial matters. In addition, there is currently no applicable ordinance of the Austrian government in place. As a consequence, a judgment obtained in a court of the United States, be it a judgment rendered by a U.S. federal or state court, will not be recognized and enforced in Austria and, for purposes of enforcement in Austria, would have to be re-litigated in Austrian courts in accordance with applicable Austrian Civil Procedure Laws (*Zivilprozessverfahren, ZPO*). Enforcement procedures under the Austrian Enforcement Act can only be initiated once a final judgment has been obtained in an Austrian court. The Austrian rules of civil procedure materially differ from those applicable in the United States (including with respect to, but not limited to, court fees dependent on the amounts claimed and payable upon the filing of a claim, or compensation of the prevailing party's attorney's fees, no discovery procedure). Compensation for damages may not be claimed under Austrian law on the same merits or in the same amount as compared to damages claimed under U.S. law.

England

There is currently no treaty between the United States and England providing for the reciprocal recognition and enforcement of judgments in civil and commercial matters (although the United States and the United Kingdom are both parties to the New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards). Consequently, a final judgment for payment rendered by any federal or state court in the United States based on civil liability, whether or not predicated solely upon U.S. federal securities laws, would not automatically be recognized or enforceable in England. In order to enforce any such U.S. judgment in England and Wales, proceedings must first be initiated in England by way of civil law action on the judgment debt before a court of competent jurisdiction in England and Wales (an "English court"). In such an action to enforce the judgment debt, the English court would not generally reinvestigate the merits of the original matter decided by the U.S. court and it would usually be possible to obtain summary judgment on such a claim, *provided that*:

- the U.S. court was of competent jurisdiction;
- it was a final and conclusive U.S. judgment on the merits in the sense of being final and unalterable in the court which pronounced it and being for a definite sum of money;
- the U.S. judgment was not for a sum payable in respect of taxes, or other charges of a like nature or in respect of a penalty or fine or otherwise based on a U.S. law that an English court considers to relate to penal or revenue law;
- the U.S. judgment does not contravene public policy or any statute in England and Wales;
- the U.S. judgment has not been arrived at by doubling, trebling or otherwise multiplying a sum assessed as compensation for the loss or damages sustained, is otherwise specified in Section 5 of the Protection of Trading Interests Act 1980 or is based on measures designated by the Secretary of State under Section 1 of that Act;
- the U.S. judgment has not been obtained by fraud or in breach of English principles of natural or substantial justice;
- the U.S. judgment is not (i) a judgment on a matter previously determined by an English court or another court whose judgment is entitled to recognition in England; or (ii) a judgment which conflicts with an earlier judgment of such court;
- the English enforcement proceedings were commenced within the relevant limitation period; and
- the U.S. judgment was not obtained contrary to an agreement for the settlement of disputes under which the dispute in question was to be settled otherwise than by proceedings in a U.S. court (to whose jurisdiction the judgment debtor did not submit).

There is doubt as to the enforceability in England of U.S. judgments in respect of civil judgments predicated purely on U.S. securities law. Subject to the foregoing investors may be able to enforce in England judgments that have been obtained from U.S. federal or state courts. Notwithstanding this, we cannot assure you that those judgments will be recognized or enforceable in England.

Furthermore, an English court is unlikely to accept jurisdiction if the original action (an action based on U.S. securities law violations) was commenced in England, instead of the United States and, even if it did, it is unlikely to impose civil liability where there claim is predicated solely upon U.S. federal securities laws.

If an English court gives judgment for the sum payable under a U.S. judgment, the English judgment will be enforceable by methods generally available for this purpose. It may not be possible to obtain an English judgment or to enforce that judgment if the judgment debtor is subject to any insolvency or similar proceedings, or if the judgment debtor has any set-off or counterclaim against the judgment creditor.

Germany

We have been advised by our German counsel that there is doubt as to the enforceability in Germany of civil liabilities based on federal or state securities laws of the United States, either in an original action or in an action to enforce a judgment obtained in U.S. federal or state courts. The United States and the Federal Republic of Germany currently do not have a treaty providing for the reciprocal recognition and enforcement of judgments, other than arbitration awards, in civil and commercial matters. Consequently, a final judgment for payment given by any federal or state court in the United States, whether or not predicated solely upon U.S. federal or state securities laws, would not automatically be enforceable, either in whole or in part, in Germany. A conclusive judgment by a U.S. federal or state court, however, may be recognized and enforced in Germany in an action before a competent German court in accordance with the proceedings set forth by the German Code of Civil Procedure (*Zivilprozessordnung*). In such an action, a German court generally will not reinvestigate the merits of the original matter decided by a U.S. court, except as noted below. The recognition and enforcement of the U.S. judgment by a German court is conditional upon a number of factors, including the following:

- U.S. courts could take jurisdiction of the case in accordance with the principles of jurisdictional competence according to German law;

- the document commencing the proceedings was duly served and made known to the defendant in a timely manner that allowed for adequate defense, or in case of noncompliance with such requirement, (i) the defendant does not invoke such noncompliance or (ii) has nevertheless appeared in the proceedings;
- the judgment is not contrary to (i) any judgment which became *res judicata* rendered by a German court or (ii) any judgment which became *res judicata* rendered by a foreign court which is recognized in Germany and the procedure leading to the respective judgment does not contradict any such judgment under (i) and (ii) or (iii) a proceeding previously commenced in Germany;
- the effects of its recognition will not be in conflict with material principles of German law, including, without limitation, fundamental rights (*Grundrechte*) under the constitution of Germany. In this context, it should be noted that any component of a U.S. federal or state court civil judgment awarding punitive damages or any other damages which do not serve a compensatory purpose, such as treble damages, will not be enforced in Germany. They are regarded to be in conflict with material principles of German law;
- the reciprocity of recognition and enforcement of judgments is guaranteed; and
- the judgment became res judicata in accordance with the law of the place where it was pronounced.

German courts usually deny the recognition and enforcement of punitive damages, since damages, which do not serve a compensatory purpose, are regarded to be in conflict with German public policy. Moreover, a German court may reduce the amount of damages granted by a U.S. court and recognize damages only to the extent that they are necessary to compensate actual losses or damages.

Enforcement and foreclosure based on U.S. judgments may be sought against German defendants after having received an *exequatur* decision from a competent German court in accordance with the above principles. Subject to the foregoing, investors may be able to enforce conclusive judgments in Germany in civil and commercial matters obtained from U.S. federal or state courts. However, we cannot assure you that those judgments will be enforceable. Enforcement is also subject to the effect of any applicable bankruptcy, insolvency, reorganization, liquidation, moratorium as well as other similar laws affecting creditors' rights generally. In addition, it is doubtful whether a German court would accept jurisdiction and impose civil liability in an original action predicated solely upon U.S. federal securities laws. Plaintiffs who do not have their habitual residence of abode in a Member State of the European Union or a Signatory State of the Agreement of the European Economic Area shall provide security for the costs of the proceedings should the defendant so demand (subject to limited exceptions).

Furthermore, German civil procedure differs substantially from U.S. civil procedure in a number of aspects. With respect to the production of evidence, for example, U.S. federal and state law and the laws of several other jurisdictions based on common law provide for pre-trial discovery, a process by which parties to the proceedings may, prior to trial, compel the production of documents by adverse or third parties and the deposition of witnesses. Evidence obtained in this manner may be decisive in the outcome of any proceeding. No such pre-trial discovery process exists under German law.

If the party in whose favor such final judgment is rendered brings a new lawsuit in a competent court in Germany, such party may submit to the German court the final judgment rendered in the United States. Under such circumstances, a judgment by a federal or state court of the United States against such Issuer or such persons will be regarded by a German court only as evidence of the outcome of the dispute to which such judgment relates. A German court may choose to re-hear the dispute and may render a judgment not in line with the judgment rendered by a federal or state court of the United States.

France

Our French counsel has advised us that the United States and France are not party to a treaty providing for reciprocal recognition and enforcement of judgments, other than arbitral awards, rendered in civil and commercial matters. Accordingly, a judgment rendered by any U.S. federal or state court based on civil liability, whether or not predicated solely upon U.S. federal or state securities laws, enforceable in the United States, would not directly be recognized or enforceable in France. A party in whose favor such judgment was rendered could initiate enforcement proceedings (*exequatur*) in France before the relevant civil court (*Tribunal de Grande Instance*). Enforcement in France of such U.S. judgment could be obtained following proper (i.e., *non-ex parte*) proceedings if the civil court is satisfied that the following conditions have been met (which conditions, under prevailing French case law, do not include a review by the French court of the merits of the foreign judgment):

- such U.S. judgment is final and enforceable in the jurisdiction of the court which rendered it;
- such U.S. judgment was rendered by a court having jurisdiction over the matter because the dispute is clearly connected to the jurisdiction of such court, the choice of the U.S. court is not fraudulent and French courts did not have exclusive jurisdiction to hear the matter;
- such U.S. judgment does not contravene French international public policy rules, both pertaining to the merits and the procedure of the case;
- such U.S. judgment is not tainted with fraud; and
- such U.S. judgment does not conflict with a French judgment or a foreign judgment which is *res judicata* and enforceable in France and there is no risk of conflict with proceedings pending before French courts at the time enforcement of the judgment is sought.

The United States and France are both parties to the Convention on the Taking of Evidence Abroad in Civil or Commercial Matters dated 18 March 1970.

The discovery process under actions filed in the United States could be adversely affected under certain circumstances by French law No. 68-678 of 26 July 1968, as modified by French laws No. 80-538 of 16 July 1980 and No. 2000-916 of 19 September 2000 (relating to the communication of documents and information of an economic, commercial, industrial, financial or technical nature to foreign authorities or persons), which could prohibit or restrict obtaining evidence in France or from French persons in connection with a judicial or administrative U.S. action.

Similarly, French data protection rules (law No. 78-17 of 6 January 1978 on data processing, data files and individual liberties, as modified by law No. 2004-801 of 6 August 2004 and French Ordinance No. 2011-1012 of 24 August 2011) can limit under certain circumstances the possibility of obtaining information in France or from French persons in connection with a judicial or administrative U.S. action in a discovery context.

We have been advised by our French counsel that if an original action is brought in France, French courts may refuse to apply the foreign designated law if its application contravenes French international public policy and mandatory rules. In an action brought in France on the basis of U.S. federal or state securities laws, French courts may not have the requisite power to grant all the remedies sought.

Our French counsel has also advised us that according to Articles 14 and 15 of the French Civil Code, a French national (either a company or an individual) can sue a foreign defendant before French courts (Article 14) and can be sued by a foreign claimant before French courts (Article 15). For a long time, case law has interpreted these provisions as meaning that a French national could not be forced against its will to appear before a jurisdiction other than French courts. However, according to recent case law, the French courts' jurisdiction towards French nationals is no longer mandatory to the extent an action has been commenced before a court in a jurisdiction which has sufficient contacts with the litigation and the choice of jurisdiction is not fraudulent. In addition, a French national may waive its rights to benefit from the provisions of Articles 14 and 15 of the French Civil Code.

Our French counsel has advised us that based on two decisions dated 26 September 2012 and 25 March 2015 of the French supreme court (*Cour de cassation*), one-sided jurisdiction clauses may be enforceable if they set out an objective basis for the alternative jurisdictions that one party could choose. Accordingly, any provisions in any relevant document providing that the exclusive jurisdiction of the courts of England is for the sole benefit of the finance parties may not prevent a French party from bringing action against the finance parties before the French courts.

Italy

The following discussion with respect to the enforceability of certain U.S. court judgments in Italy is based upon advice provided to us by our Italian legal advisors. The United States and Italy currently do not have a bilateral treaty providing for the reciprocal recognition and enforcement of judgments (other than arbitration awards) in civil and commercial matters.

Notwithstanding the above, a final judgment for payment rendered by any federal or state court in the United States based on civil liability, whether or not predicated solely upon U.S. federal securities laws, will be recognized by an Italian court without a retrial, if the following conditions are met:

- the U.S. court which rendered the final judgment had jurisdiction according to Italian law principles of jurisdiction;
- the relevant summons and complaint were appropriately served on the defendants in accordance with U.S. law and during the proceeding the essential rights of the defendants have not been violated;
- the judgment is final and not subject to any further appeal in accordance with U.S. law;
- the parties to the proceeding appeared before the court in accordance with U.S. law or, in the event of default by the defendants, the U.S. court declared such default in accordance with U.S. law;
- the U.S. judgment is not in conflict with any final judgment previously rendered by an Italian court;
- there is no action pending in the Republic of Italy among the same parties and arising from the same facts and circumstances which commenced prior to the action in the United States; and
- the provisions of such judgment would not violate Italian public policy.

In addition, if an original action is brought before an Italian court, the Italian court may refuse to apply U.S. law provisions or to grant some of the remedies sought (e.g., punitive damages) if their application violates Italian public policy and mandatory provisions of Italian law.

In cases of non-compliance with or objection to the recognition of a U.S. judgment, or when it is necessary to proceed with forceful execution, any interested person may apply to the court of appeals of the location of implementation for a determination of the existence of the recognition prerequisites above. The U.S. judgment, jointly with the decision allowing the application referred to above, constitutes entitlement to the implementation and forceful execution. If the objection to the U.S. judgment is raised in the context of other proceedings pending in Italy, the decision on the objection is made by the Italian judge with effects limited to those proceedings only.

The enforcement and, more generally, the use in court of guarantees (*fideiussioni*), which have been executed unilaterally by the guarantor or abroad, is currently subject to Italian registration tax (governed by Presidential Decree—D.P.R. 26 April 1986, n. 131) at the rate of the 0.5% of the guaranteed amount, unless such tax has already been previously paid.

In addition to the foregoing, the enforcement in Italy of a judgment issued by a foreign court, similar to judgments rendered by Italian courts, is currently subject to Italian registration tax at the following rates:

- 3% in the case of judgments ordering the payment of an amount of money, the performance of a service or the delivery of assets (*no ad valorem* registration tax, but a fixed amount of €200 applies if any amount outstanding under the relevant guarantee is subject to VAT, even in the case where the VAT exemption regime is applicable, according to Article 5 and 40 of D.P.R. 26 April 1986, n. 131);
- 1% in the case of judgments that ascertain rights having an economical value; and
- a fixed fee of €200 in the case of judgments different from those indicated above or which declare any deed null or void, including judgments ordering the restitution of an amount of money or assets.
- stamp duties (*imposta di bollo*) will become payable at a nominal rate of currently €16 per four pages; and
- a stamp tax (*contributo unificato*) on each document submitted to the Italian courts, ranging from €30 to €3,372 in most cases, depending on the amount claimed in the proceedings and on the degree of the judgment, up to €6,000 in case of administrative proceedings, in lieu of the stamp duties (*imposta di bollo*) referred to under point above where the relevant guarantee is filed in court.

In original actions brought before Italian courts, there is doubt as to the enforceability of liabilities or remedies based solely on the U.S. federal securities laws. In addition, in original actions brought before Italian courts, Italian courts may apply not only Italian rules of civil procedure, but also certain substantive provisions of Italian law that are regarded as mandatory and may refuse to apply U.S. law provisions if the relevant application violates Italian public policy.

Belgium

In the absence of any applicable bilateral or multilateral treaty, final and enforceable judgments rendered by U.S. courts would be recognized and enforced by the courts of Belgium without review on the merits subject to the conditions specified in Articles 22 to 25 of the Belgian Code of Private International Law (*Wetboek van Internationaal Privaatrecht/Code de Droit International Privé*) (i.e., formal *exequatur* proceedings), which mainly require that the recognition or enforcement of the foreign judgment should not be a manifest violation of public policy, that the foreign courts must have respected the rights of the defense, that the foreign judgment should be final, and that the assumption of jurisdiction by the foreign court may not have breached certain principles of Belgian law.

However, recognition and enforcement can be refused in the circumstances described in Article 25 of the Belgian Code of International Private Law and notably if:

- the rights of defense have been violated;
- such recognition or enforcement would be manifestly incompatible with Belgian public policy;
- the decision is not final and may still be appealed under the applicable foreign law (however, provisional enforcement could then be granted) or does not meet the requirements of authenticity pursuant to the applicable law;
- if in relation to matters for which parties cannot freely dispose of their rights, the decision has been sought with the sole purpose of escaping from the application of the laws applicable in accordance with Belgian private international law;
- the claim was filed in the U.S. after the filing in Belgium of a claim that is still pending between the same parties with respect to the same subject matter;
- the judgment is incompatible with a decision rendered in Belgium or a prior judgment rendered in another jurisdiction that can be recognized in Belgium;
- Belgian courts had exclusive jurisdictions in respect of that matter.
- the jurisdiction of the foreign judge was exclusively based on the presence of the defendant or assets without any direct connection with the dispute in the foreign state; or
- the decision is in conflict with the rules on the recognition and enforcement of court decisions in relation to insolvency proceedings, intellectual property or corporate standing.

As a general principle, procedural rules are governed by the law of the jurisdiction of the court (*lex fori*). In Belgium the procedural rules contained in, amongst others, the Belgian Judicial Code and the Code of Private International Law will apply when recognition and enforcement of judgments rendered by U.S. courts is sought in Belgium.

In accordance with Articles 23 and 148 of the Belgian Code of Registration Duties, a registration duty at the rate of 3% of the amount of the judgment is levied in respect of a Belgian decision which authorizes enforcement of a judgment rendered by a U.S. court, payable by the debtor, if the sum of money which the debtor is ordered to pay by a Belgian court, or by a foreign court judgment that is either (i) automatically enforceable and registered in Belgium, or (ii) rendered enforceable by a Belgian court, exceeds €12,500.

Spain

The United States and Spain are not party to a treaty providing for reciprocal recognition and enforcement of judgments, other than arbitral awards rendered in civil and commercial matters. Accordingly, a judgment rendered by any U.S. federal or state court based on civil liability, enforceable in the United States, would not directly be recognized or enforceable in Spain. This judgment would be recognized and enforced in Spain pursuant to Article 523.2 and the derogation provision of the Spanish Civil Procedure Act (*Ley 1/2000, de 7 de enero de Enjuiciamiento Civil*) in accordance with and subject to articles 951 to 958 of the former Spanish Civil Procedure Act of 1881 (*Real Decreto de Promulgación de 3 de febrero de 1881 de Enjuiciamiento Civil*), which continue to be in force as interpreted by the Spanish Supreme Court.

A party in whose favor such judgment was rendered could initiate enforcement proceedings (*exequatur*) in Spain before the relevant Court of First Instance (*Tribunal de Primera Instancia*) or Commercial Court (*Juzgado de lo Mercantil*), as the case may be. According to the Spanish Civil Procedure

Act of 1881, recognition in Spain of such U.S. judgment could be obtained following proper (i.e., non-*ex parte*) proceedings *provided that* the relevant court confirms that the following conditions have been met (which conditions, under prevailing Spanish case law, do not include a review by the Spanish Court of First Instance (*Tribunal de Primera Instancia*) or Commercial Court (*Juzgado de lo Mercantil*), as the case may be, of the merits of the foreign judgment):

- evidence is not provided as to the fact that similar judgments rendered by Spanish courts are not recognized by the U.S. courts (i.e. there is no negative reciprocity);
- such judgment is rendered as a result of an action *in personam* as opposed to an action *in rem*;
- the judgment shall not be contrary to Spanish public policy or mandatory provisions;
- there shall not be a pending proceeding between the same parties and in relation to the same issues in Spain;
- there shall not be a judgment rendered between the same parties in Spain or between the same parties and for the same cause of action in another country *provided that* in this latter case the judgment has been recognized in Spain;
- there is no material contradiction or incompatibility of the judgment with a judgment rendered or judicial proceedings outstanding in Spain;
- where rendering the judgment, the courts rendering it must have not infringed an exclusive ground of jurisdiction provided for in Spanish law or have based their jurisdiction on exorbitant grounds and the choice of court is not fraudulent;
- the rights of defense of the defendant should have been protected where rendering the judgment, including but not limited to a proper service of process carried out with sufficient time for the defendant to prepare its defense;
- that the obligation to be fulfilled is legal in Spain;
- the documentation to be enforced includes: (i) all legal requirements to be considered authentic under U.S. law; and (ii) the relevant Spanish requirements to be admitted in Spain (i.e., apostille, certificate of *res judicata*, certificate of notification to the counterparty of the issuance of the judgment and sworn translation, among other specific matters); and
- the party against which enforcement is sought is not subject to insolvency proceedings.

The Spanish courts may express any such order in a currency other than euro in respect of the amount due and payable by either Issuer or a Spanish Guarantor but such order may be issued expressed in euro by reference to the official rate of exchange prevailing on the date of issuance of such order.

In addition, the discovery process under actions filed in the United States could be adversely affected under certain circumstances by Spanish law (relating to communication of documents and information of an economic, commercial, industrial, financial or technical nature to foreign authorities or persons), which could prohibit or restrict obtaining evidence in Spain or from Spanish persons in connection with a judicial or administrative U.S. action.

Any judgment obtained against either Issuer or any of the Spanish Guarantors in any country bound by the provisions of EU Regulation 1215/2012 of the European Parliament and of the Council would be recognized and enforced in accordance with the terms set forth thereby.

The enforcement of any judgments in Spain will be subject to, among others, the following formal requirements: (a) documents in a language other than Spanish must be accompanied by a translation into Spanish (translator's fees will be payable); (b) certain professional fees are required for the verification of the legal authority of a party litigating in Spain if needed; (c) the payment of certain court fees and (d) the procedural acts of a party litigating in Spain shall be directed by an attorney at law and the party shall be represented by a court agent with the exception of enforcements of judgments issued in a proceeding in which such direction and representation is not needed. In addition, please note that Spanish civil proceedings rules cannot be amended by agreement of the parties and will therefore prevail notwithstanding any provision to the contrary in the Notes.

Pursuant to Article 54 of the current Spanish Procedural Law (*Ley 1/2000, de 7 de enero, de Enjuiciamiento Civil*) the parties to an agreement are entitled to clearly agree to the submittal to one judge (*juzgado*) or court (*tribunal*) (*provided that* under the Spanish Procedural Law and the Spanish Judicial Law

(*Ley 6/1985, de 1 de Julio, Orgánica del Poder Judicial*) the relevant judge or court is competent to solve the corresponding dispute); therefore such article does not cover the validity of nonexclusive jurisdiction clauses, at least for conflicts between different Spanish courts.

Switzerland

We have been advised by our Swiss counsel that the United States and Switzerland currently do not have a treaty providing for the reciprocal recognition and enforcement of judgments, other than arbitration awards, in civil and commercial matters. Consequently, a final judgment by any U.S. federal or state court for payment, whether or not predicated solely upon U.S. federal or state securities laws, would not automatically be enforceable in Switzerland. A final judgment by a U.S. federal or state court, however, may be recognized in Switzerland in an action before a court of competent jurisdiction in accordance with the proceeding set forth by the Swiss Federal Act on International Private Law (*Bundesgesetz über das internationale Privatrecht*) and the Swiss Federal Act on Civil Procedure (*Schweizerische Zivilprozessordnung*). In such an action, a Swiss court generally would not reinvestigate the merits of the original matter decided by a U.S. court. The recognition and enforcement of a U.S. judgment by a Swiss court would be conditional upon a number of conditions including those set out in articles 25 et seqq. of the Swiss Federal Act on International Private Law (*Bundesgesetz über das international Privatrecht*), which include:

- The U.S. court having had jurisdiction over the original proceedings from a Swiss perspective;
- The judgment being final under U.S. federal or state law, and no ordinary legal remedy being available against such judgment;
- The defendant having had the chance to defend herself or himself against any unduly or untimely served complaint except for a defendant having unconditionally consented to the original proceeding before the respective court;
- The original proceeding not having been conducted under a violation of material principles of Swiss civil proceedings law, in particular the right to be heard;
- The proceeding between the same parties concerning the same case was first commenced or decided in Switzerland, or was first decided in a third country provided that such decision can be recognized in Switzerland; and
- The enforcement of the judgment by the U.S. court not being manifestly incompatible with Swiss public policy (*schweizerischer Ordre public*).

Subject to the foregoing, purchasers of the Notes may be able to enforce judgments in civil and commercial matters obtained from U.S. federal or state courts in Switzerland. We cannot, however, assure you that any attempts to enforce judgments in Switzerland will be successful; in particular, it is uncertain whether a Swiss court would recognize U.S. jurisdiction if the defendant did not enter an appearance before a U.S. court during the substantive proceedings in the sense of art. 6 of the Swiss Federal Act on International Private Law (*Bundesgesetz über das internationale Privatrecht*). Furthermore, it is probable that a Swiss court, if substantive proceedings were commenced in Switzerland, would not apply U.S. federal or state securities laws. In addition, the recognition and enforcement of punitive damages awards might be denied by Swiss courts as incompatible with Swiss public policy (*schweizerischer Ordre public*). Alternatively, a Swiss court may reduce the amount of damages granted by a U.S. court and recognize damages only to the extent that they are necessary to compensate actual losses or damages. Swiss civil procedure differs substantially from U.S. civil procedure in a number of respects. With respect to the production of evidence, for example, U.S. federal and state law and the laws of several other jurisdictions based on common law provide for pre-trial discovery, a process by which parties to the proceedings may, prior to trial, compel the production of documents by adverse or third parties and the depositions of witnesses. Evidence obtained in this manner may be decisive in the outcome of any proceeding. In Switzerland, no such pre-trial discovery process exists. Instead, a Swiss court would decide upon the claims for which evidence is required from the parties and the related burden of proof.

LISTING AND GENERAL INFORMATION

Listing Information

Application will be made for the Temporary Senior Secured Notes, the Additional Senior Secured Notes and the Senior Notes to be admitted to the Official List of the Irish Stock Exchange and to be admitted to trading on the Global Exchange Market thereof.

For the life of this offering memorandum, electronic copies of the following documents may be inspected and obtained at the registered office of the listing agent during normal business hours on any business day:

- the organizational documents of the Issuers and each of the Guarantors;
- the most recent audited historical consolidated financial statements and any interim financial statements of Synlab and Labco;
- the Indentures (which include the Guarantees and the forms of the Notes);
- the Revolving Credit Facility Agreement;
- the Intercreditor Agreement; and
- other material agreements described in this offering memorandum as to which we specify that copies thereof will be made available.

Litigation

Except as disclosed elsewhere in this offering memorandum, neither the Issuers nor any of the Guarantors is involved, or has been involved during the twelve months preceding the date of this offering memorandum, in any litigation, arbitration or administrative proceedings which would, individually or in the aggregate, have a material adverse effect on their results of operations, condition (financial or other) or general affairs and, so far as each is aware, having made all reasonable inquiries, there are no such litigation, arbitration or administrative proceedings pending or threatened.

No Material Adverse Change

Except as disclosed in this offering memorandum, there has been no material adverse change in the prospects of Labco or Synlab since December 31, 2014 (being the last day of the period in respect of which Labco or Synlab published its latest annual audited consolidated financial statements) or any significant change in the financial or trading position of Labco or Synlab since March 31, 2015 (being the last day of the period in respect of which Labco or Synlab published its latest interim consolidated financial statements).

Clearing Information

The Notes sold pursuant to Regulation S and Rule 144A have been accepted for clearance through the facilities of Clearstream, Luxembourg and Euroclear.

The Additional Senior Secured Fixed Rate Notes sold pursuant to Reg S and the Additional Senior Secured Floating Rate Notes sold pursuant to Reg S will initially have different ISIN and common codes than the Existing Senior Secured Fixed Rate Notes sold pursuant to Reg S and the Existing Senior Secured Floating Rate Notes sold pursuant to Reg S, respectively. Once the Senior Secured Fixed Rate Notes sold pursuant to Reg S and the Senior Secured Floating Rate Notes sold pursuant to Reg S have become freely tradable, they will share the same ISIN and common code, as the Existing Senior Secured Fixed Rate Notes sold pursuant to Reg S and the Existing Senior Secured Floating Rate Notes, respectively.

The temporary common codes for the Senior Secured Fixed Rate Notes sold pursuant to Reg S and the Senior Secured Floating Rate Notes sold pursuant to Reg S are 111728747 and 111728798, respectively, and the temporary ISIN for the Senior Secured Fixed Rate Notes sold pursuant to Reg S and the Senior Secured Floating Rate Notes sold pursuant to Reg S are XS1117287471 and XS1117287984, respectively. The temporary common codes for the Senior Secured Fixed Rate notes sold pursuant to Rule 144A and the Senior Secured Floating Rate Notes sold pursuant to Rule 144A are 111728771 and 111728828, respectively, and the temporary ISIN for the Senior Secured Fixed Rate Notes sold pursuant to Rule 144A and the Senior Secured Floating Notes sold pursuant to Rule 144A are XS1117287711 and XS1117288289, respectively. The permanent common codes for the Senior Secured Fixed Rate Notes sold pursuant to Rule 144A and Reg S are 111729301 and 111729298, respectively, and the permanent ISIN for the Senior Secured Fixed Rate Notes sold pursuant to Rule 144A and Reg S are XS1117293016 and XS1117292984, respectively. The permanent common codes for the Senior Secured Floating Rate Notes sold pursuant to Rule 144A and Reg S are 111729328 and 111729280, respectively and the permanent ISIN for the Senior Secured Floating Rate Notes sold pursuant to Rule 144A and Reg S are XS1117293289 and XS1117292802, respectively. The common codes for the Senior Notes sold pursuant to Rule 144A and Reg S are 126847572 and 126847149, respectively, and the ISIN for the Senior Notes sold pursuant to Rule 144A and Reg S are XS1268475727 and XS1268471494, respectively.

Legal Information

The Senior Secured Notes Issuer is a public limited company formed on March 23, 2015 as a private limited company under the laws of England and Wales with registered number 9503922. The Senior Secured Notes Issuer re-registered as a public limited company on June 8, 2015. The Senior Secured Notes Issuer's principal business address is 5th Floor, 6 St. Andrew Street, London, United Kingdom EC4A 3AE.

The Senior Secured Notes Issuer's fiscal year ends on December 31.

The Senior Notes Issuer is a public limited company formed on June 4, 2015 as a private limited company organized under the laws of England and Wales with registered number 9624069. The Senior Notes Issuer re-registered as a public limited company on July 17, 2015. The Senior Notes Issuer's principal business address is address is 5th Floor, 6 St. Andrew Street, London, United Kingdom EC4A 3AE.

The Senior Notes Issuer's fiscal year ends on December 31.

We estimate the expenses relating to admission of the Notes to trading on the Irish Stock Exchange to be approximately €10,000.

Consents

The Offering of the Notes was authorized by resolutions of the board of directors of the Senior Secured Notes Issuer and the Senior Notes Issuer dated July 19, 2015.

Statement

The Issuers accept responsibility for the information contained in this offering memorandum. The Issuers declare that, having taken all reasonable care to ensure that such is the case, the information contained in this offering memorandum is, to the best of their knowledge, in accordance with the facts and does not omit anything likely to affect the import of this offering memorandum. Information relating to each of the Guarantors was provided by the respective Guarantor.

synlab Holding GmbH, Augsburg

Notes to the condensed interim consolidated financial statements for the period ended March 31, 2015

1 Information on the Company

These unaudited condensed interim consolidated financial statements were prepared by synlab Holding GmbH (hereinafter: 'the Company' or 'SYNLAB HOLDING'), Augsburg, Germany, the parent company of the SYNLAB HOLDING Group (SYNLAB GROUP). The Company is recorded in the Commercial Register at the Local Court in Augsburg under number HRB 24668. The registered address is Gubener Strasse 39, 86156 Augsburg, Germany.

The SYNLAB GROUP is one of the largest suppliers of medical diagnostic laboratory services in Central and Eastern Europe. The Group, which is based in Germany, presently employs over 7,000 employees and is currently represented in Germany, Italy, Switzerland, Austria, Belgium, the Czech Republic, Hungary, the Slovak Republic, Slovenia, Romania, Macedonia, Croatia, Poland, the Republic of Belarus, Estonia, Lithuania, Finland, Norway, the United Kingdom, the United Arab Emirates, Cyprus, and Turkey.

2 General

2.1 Basis for preparing the financial statements

The unaudited interim consolidated financial statements for SYNLAB HOLDING and its subsidiaries were prepared in compliance with IAS 34. The condensed interim consolidated financial statements do not contain all information and disclosures required for consolidated financial statements prepared as of the end of a fiscal year and should therefore be read in conjunction with the consolidated financial statements for the year ended December 31, 2014.

The consolidated financial statements are prepared in euros. Unless otherwise indicated, all amounts are rounded up or down to the nearest thousand euros in accordance with common commercial rounding practice.

The following key exchange rates were applied:

	Closing rate		Quarterly average exchange rate	
1 euro =	**03/31/2015**	**12/31/2014**	**Q1/2015**	**Q1/2014**
Pound sterling (GBP)	0.7273	0.7789	0.7436	0.8278
Polish zloty (PLN)	4.0854	4.2732	4.1934	4.1842
Romanian leu (RON)	4.4098	4.4821	4.4516	4.5019
Swiss francs (CHF)	1.0463	1.2024	1.0722	1.2235
Czech crowns (CZK)	27.530	27.725	27.6273	27.4413
Turkish lira (TRY)	2.8075	2.8258	2.7729	3.037
Hungarian forints (HUF)	299.43	315.54	308.9433	308.0567
United Arab Emirates dirhams (AED)	3.9864	4.4660	4.1459	5.034

2.2 New and revised standards and interpretations

The recognition and measurement methods used in preparing the consolidated financial statements of SYNLAB HOLDING generally correspond to the methods used in the previous year, with the exception of those changes in IFRS accounting standards whose application is mandatory as of January 1, 2015. The recognition and measurement methods used thus comply with the IFRS applicable for 2015 as adopted by the EU.

In the interim reporting period, the Group took into account the following revised or new IFRS standards and interpretations, to the extent that these are applied.

Improvements to IFRS (2010 - 2012)

The Improvements to the IFRS published in 2010 - 2012 have been compiled as an omnibus standard and were published in December 2013. It contains amendments to various IFRS, most of which are to be applied in fiscal years beginning on or after July 1, 2014. As a result, application of the following amendments is mandatory from January 1, 2015:

- IFRS 2: Clarifies the definition of vesting conditions and in particular definitions of service and performance conditions;

2 General (Continued)

- IFRS 3: Clarifies the classification and measurement of contingent consideration in relation to business combinations. Accordingly, classification of an obligation to pay contingent consideration as a liability or as equity is solely determined based on IAS 32.11. A contingent consideration item is to be measured at fair value and the resulting changes recognized in profit or loss;
- IFRS 8: Requirements for the aggregation of operating segments and reconciliation of total segment assets with the entity's assets;
- IFRS 13: Clarifies rationale for amending IFRS 9 with regard to the measurement of short-term receivables and payables as a result of the publication of IFRS 13;
- IAS 16: Amendments to the treatment of accumulated depreciation under the revaluation method.
- IAS 24: Clarifies that external entities providing key planning, managerial and supervisory services (external key management personnel services) to a company are to be treated by the reporting company as a 'related party' in accordance with IAS 24, and includes an exemption for disclosures of compensation paid for these management services by an external management entity to its own employees.
- IAS 38: Amendments to the treatment of accumulated depreciation under the revaluation method.

Their first-time application will not have any impact on the financial position, financial performance and cash flows of the Group.

Improvements to IFRS (2011 - 2013)

The Improvements to the IFRS published in 2011 - 2013 have been compiled as an omnibus standard and were published in December 2013. It contains amendments to various IFRS whose application is mandatory for fiscal years beginning on or after July 1, 2014. Application of the following amendments is mandatory from January 1, 2015:

- IFRS 3: Clarifies the exclusion of the formation of joint arrangements from the scope of IFRS 3.
- IFRS 13: Clarifies the scope of application of the portfolio exception as per IFRS 13.48 ff.
- IAS 40: Clarifies the scope of IFRS 3 and IAS 40 regarding classification of real estate as investment property or owner-occupied property.

As expected, these changes did not have an impact on the Group's financial position, financial performance and cash flows.

IFRIC 21 Levies

The IASB published IFRIC Interpretation 21 in May 2013. This interpretation provides that a company operating in a particular market has to recognize a liability for a levy imposed by the competent authority at the time the business transaction triggering the levy occurs. The interpretation also clarifies that a levy which depends for example on reaching a defined minimum transaction volume may only be classified as a liability once the volume reaches the defined threshold. This interpretation is to be applied for the first time in fiscal years beginning on or after June 17, 2014. The application of this new standard did not have any impact on the financial position, financial performance and cash flows of the Group.

3 Changes in the scope of consolidation

The following changes in the scope of consolidation took place in the interim reporting period.

3.1 Business combinations

In the first quarter of 2015, laboratory activities were expanded by way of the following acquisitions.

Company	Country	Type	Date
Ingenieurbüro Gschwandtner	DE	asset deal	01/01/2015
ACR Labor AG	CH	share deal	01/05/2015
Medilab LTD	CY	share deal	01/13/2015
Laboratorio Di Analisi Dott. Mario Settimelli S.r.l.	IT	share deal	03/10/2015
Synlab tesdelo service GmbH	DE	share deal	01/01/2015

As of January 1, 2015 synlab tesdelo service GmbH (formerly Palmetto Clean Technologies GmbH) was acquired. It was purchased in two steps: 60% of shares effective January 1, 2015 and the remaining 40% in an unconditional forward transaction by December 31, 2017. The company is a full-service provider for the analysis of drinking water and is one of Germany's leading water testing companies. As synlab tesdelo service GmbH does not carry out any laboratory analysis work itself, but instead contracts specialist laboratories, the acquisition created vertical integration, thus enabling the provision of the full range of water testing services.

At the time the publication of the interim financial statements was approved, not all of the data required for the final presentation of these acquisitions in the interim consolidated financial statements were available. The information provided below is thus provisional.

At the date of acquisition or first-time consolidation, the fair values of the identifiable assets of the companies Ingebieurbüro Gschwandter and Medilab LTD were as follows:

	KEUR
Non-current assets	
Intangible assets	120
Property, plant and equipment	53
Current assets	
Inventories	17
Trade receivables	454
Other current assets	541
Cash	3,823
Total assets	**5,008**
Current liabilities	
Short-term interest-bearing loans and borrowings	7
Other current provisions	1
Trade payables	115
Other current financial liabilities	10
Total liabilities	**133**
Total identifiable net assets at fair value	**4,875**
Shareholdings	
Goodwill from company acquisition	10,605
Total consideration	**15,480**

3 Changes in the scope of consolidation (Continued)

The consideration breaks down as follows:

	KEUR
Purchase price 1	10,880
Purchase price adjustment resulting from contingent consideration (Earn-Out 1)	3,255
Purchase price adjustment resulting from contingent consideration (Earn-Out 2)	1,020
Other purchase price	325
Total consideration	**15,480**

The fair value of trade receivables is 454 thousand euros. The gross value of trade receivables is 454 thousand euros. Impairment losses on trade receivables were recognized in the amount of 0 thousand euros.

Goodwill in the amount of 10,605 thousand euros comprises the value of expected synergies from the company acquisition. The goodwill is allocated in full to the Rest of World CGU. Most of the goodwill recognized is expected to be non-deductible for tax purposes.

As the data relating to the company acquired on March 10, 2015, Laboratorio Di Analisi Dott. Mario Settimelli S.r.l., are still incomplete, no precise information about the revenue contribution and the contribution to consolidated profit or loss for the period before and after the acquisition can be provided for this company.

The acquired companies Medilab LTD and synlab tesdelo service GmbH have contributed 720 thousand euros to revenue and 368 thousand euros to consolidated profit or loss since their acquisition.

The acquired company ACR Labor AG was merged with synlab Suisse SA immediately after the acquisition. Due to this merger, no information can be provided about this company's contribution to revenue and consolidated profit or loss as it cannot be derived from the financial data of the acquiring entity.

The contribution of the acquisition Ingenieurbüro Gschwandtner (asset deal) cannot be derived from the financial information of the acquiring company, either.

Cash outflow due to company acquisition:

	KEUR
Analysis of cash outflow due to company acquisition	
Total consideration	(15,480)
Outstanding additional purchase price from contingent consideration (Earn-Out 1)	20
Outstanding additional purchase price from contingent consideration (Earn-Out 2)	1,020
Portion of other purchase price not yet affecting cash flows	325
Cash consideration	**(14,115)**
Net cash of acquired company	3,823
Actual cash outflow due to company acquisition	**(10,292)**

As part of the purchase agreement with the previous owners of Medilab LTD, several contingent consideration elements were agreed. The first and second earn-outs are based on the percentage of free cash held by Medilab LTD as of the reporting date December 31, 2014. We have already paid 75% of the free cash as of December 31, 2014 amounting to 3,235 thousand euros at the closing date. As of March 31, 2015, the outstanding purchase price relating to these earn-outs totals 1,000 thousand euros and is due in the second quarter of 2015. No range is stated for this amount. The third earn-out, due in Q2/2016, is based on a defined threshold value for the company's EBITDA as of December 31, 2015, multiplied by a certain factor. The range for this earn-out is 0 to 1,700 thousand euros. Based on the company's budget, this threshold is not expected to be attained. As a result, the third earn-out is estimated at 0 thousand euros. Another purchase price is dependent on the subsequent delivery of specified documentation to the SYNLAB GROUP and is due in 2016. The range for this earn-out is 0 to 325 thousand euros. As it is assumed that the documents will be delivered, this other purchase price has been recognized in the full amount.

As part of the purchase agreement with the previous owners of Ingenieurbüro Gschwandtner, contingent consideration elements were agreed. The earn-outs, due in Q1/2016 and 2017, respectively, are calculated by reference to the percentage change in average revenue for 2011 to 2013 compared with revenue in 2015 and 2016, respectively. The range is 0 euros to a maximum of 35 thousand euros. On the basis of the company's budget, the value of the earn-outs is estimated at a total of 40 thousand euros.

For the business combination of the companies ACR Labor AG, Laboratorio Di Analisi Dorr. Mario Settimeli and synlab tesdelo service GmbH amounting to 5,521 thousand euros no purchase price allocation has been prepared due to the small timeframe between the acquisition and balance sheet date and the availability of reliable financial information. The consideration for these business combinations is recorded in other non-current assets.

As part of the purchase agreement with the previous owners of ACR Labor AG, three contingent consideration elements were agreed. The first earn-out, due in Q2/2015, is the positive balance of current assets and non-current liabilities, based on the company's 2014 financial statements. The earn-out does not specify a range and comes to 166 thousand Swiss francs (138 thousand euros). The second earn-out, due in Q2/2016, is calculated on the basis of a defined portion of the annual revenue for 2015 (i.e. revenue with specified customers of ACR contributed by ACR and revenue generated with joint rheumatology customers) less the fixed purchase price. The range is 0 thousand Swiss francs to 450 thousand Swiss francs and is estimated at the maximum value of 450 thousand Swiss francs. The third earn-out, due in Q2/2017, is also calculated on the basis of a defined portion of the annual revenue for 2017 (i.e. revenue with specified customers of ACR contributed by ACR and revenue generated with joint rheumatology customers) less the sum total of the fixed purchase price and the second earn-out. The range for this earn-out is 0 to 1,000 thousand Swiss francs. On the basis of the company's budget and in light of the fact that earn-out 2 is estimated at its maximum value, the estimated value of the third earn-out is 0 thousand Swiss francs.

As part of the purchase price for Laboratorio Di Analisi Dott. Mario Settimelli S.r.l. , a purchase price adjustment was agreed based on the difference between current assets (excluding deferred taxes and intangible assets) and liabilities. If positive, this difference is payable to the seller; if negative, a receivable will become due from the seller. The calculation will be based on the company's balance sheet as of February 28, 2015. The range for this conditional purchase price adjustment is −700 thousand euros to −300 thousand euros. Management estimates this amount at −400 thousand euros. The net amount of the outstanding fixed purchase price of 900 thousand euros less the estimated adjustment of 400 thousand euros is recognized under the provisions for purchase price adjustments in the amount of 500 thousand euros.

3.2 Other changes

The following mergers took place before the interim reporting date:

Merged company	Country	Absorbing company	Merger date
Nuovo Laboratorio San Giorgio Analisi Chimicobiologiche S.r.l & C.	IT	Synlab Emilia Romagna S.r.l.	01/01/2015
Bureco AG	CH	synlab Pharma Institute AG formerly Swiss BioAnalytics AG)	01/01/2015

In addition, Ärztliche Laborgemeinschaft Bonn GbR was liquidated as of January 1, 2015.

Company	Country	Deconsolidation date	Share
Ärztliche Laborgemeinschaft Bonn GbR	DE	01/01/2015	SPE

Liquidation and deconsolidation did not have any effect on consolidated profit or loss.

4 Additional disclosures to the statement of comprehensive income

Other operating income includes passed-on consultancy expenses amounting to 473 thousand euros (prior year: 146 thousand euros) as well as income from a recharge against the seller of Laboratoire d'Analyses Médicales Dr. Jean Collard SPRL amounting to 437 thousand euros (prior year: 0 thousand euros) in connection with a legal dispute regarding the acquisition by synlab. Income from disposals of non-current assets amounted to 43 thousand euros (prior year: 13 thousand euros).

Personnel expenses include termination benefits amounting to 118 thousand euros (prior year: 22 thousand euros).

Other operating expenses include restructuring expenses of 575 thousand euros (prior year 138 thousand euros), losses from disposal of non-current assets of 41 thousand euros (prior year: 2 thousand euros), expenses for legal disputes in Belgium in connection with a company acquisition of 332 thousand euros (prior year: 0 thousand euros) as well as expenses related to company acquisitions of 1,085 thousand euros (prior year: 247 thousand euros).

5 Depreciation, amortization and impairment of property, plant and equipment, intangible assets and other assets

Goodwill developed as follows:

	KEUR
Acquisition cost and cost of conversion	
Balance as of December 31, 2013	**433,980**

as of March 31, 2015	396,577

The changes in the scope of consolidation are attributable to the acquisition of Medilab LTD as of January 13, 2015. As the SYNLAB GROUP did not have sufficient data available to properly present the acquisition as of the reporting date, the recognized goodwill is a provisional figure. See section 3.1 'Acquisitions'.

There were no events in the interim reporting period which would have led to an impairment of property, plant and equipment, intangible assets or other assets.

8 Capital reserves

As from fiscal year 2011, the Company has indirectly granted members of management and executives of SYNLAB HOLDING and its German and foreign subsidiaries shares in the ultimate parent, SYNLAB HOLDING, as a form of share-based payment. This involves cash payment of a purchase price determined by reference to the fair value of the shares on the issue date; alternatively, the purchase price can be financed by a loan granted on arm's length terms. The shares thus acquired are subject to a vesting period. After this vesting period, i.e. after a good leaver event or an exit, the beneficiary receives a payment based on his or her share in synlab Management-Beteiligungs GmbH & Co. KG. However, commitments are forfeited if the beneficiary's employment contract is terminated in a bad leaver event, i.e. before the end of the vesting period.

The fair value of the shares granted was calculated using the same parameters and estimates as used for the period ended December 31, 2014. In the first quarter of 2015 this arrangement gives rise to before-tax expenses for share-based payment, which are contained in profit, of 136 thousand euros (prior year: 136 thousand euros).

9 Accumulated other comprehensive income

Exchange differences from foreign operations

The reserve for currency translation differences serves to account for differences resulting from translation of the financial statements of foreign subsidiaries. As of March 31, 2015, accumulated other comprehensive income included currency translation differences in the amount of 31,537 thousand euros (March 31, 2014: 15,206 thousand euros).

Since the beginning of 2015, the Group has been affected by the devaluation of the euro against the Swiss franc, impacting its financial assets and liabilities and the contribution of the Swiss companies to profit and loss. For example, the lower euro-Swiss franc exchange rate resulted in unrealized exchange losses on intercompany transactions of 530 thousand euros. This amount was recognized as finance costs. These losses were offset by the effects of the translation of the other income statement items which pushed revenue up in the first quarter by 4,890 thousand euros and EBITDA up by 1,118 thousand euros. In addition, the translation of the functional currency (CHF) to the presentation currency had a positive exchange rate effect of 20,016 thousand euros on total assets.

Actuarial gains and losses recorded in equity and any related deferred taxes

Additionally, pursuant to the revised IAS 19, actuarial gains and losses and any related deferred taxes have been recorded directly in equity since 2013. For the interim reporting period, the Group recorded actuarial losses and related deferred taxes in the amount of 1,320 thousand euros (March 31, 2014: 73 thousand euros), resulting in a net negative balance of 5,805 thousand euros as of March 31, 2015 (March 31, 2014: −314 thousand euros).

10 Disbursed and proposed dividends

As in the previous year, no dividends were disbursed by the parent company during the interim reporting period.

The fair values of interest-bearing loans and borrowings are determined using the respective applicable yield curves and credit-spread curves for the respective currency. These fair values are classified to hierarchy level 2.

As of March 31, 2015 and the reporting date, the SYNLAB GROUP measured available-for-sale financial assets, derivative financial instruments and a non-controlling interest in a partnership (puts on NCI) at fair value. The fair value of derivative financial liabilities is measured using the mark-to-market method and interest rates congruent with the terms of the liabilities. These fair values are classified to hierarchy level 2.

The fair value of non-controlling interests in a partnership (puts on NCI) was measured based on the compensation formula set forth in the partnership agreement and in consideration of the Company's planning and market interest rates. The fair value thus measured is therefore classifiable to hierarchical level 3 per IFRS 13, and led to a charge against earnings in the amount of 262 thousand euros in the year under review (previous year: 796 thousand euros).

There was no change in classification in the past fiscal year.

The reduction in purchase price obligations of 7,210 thousand euros is related to the payments of the fixed purchase price made on January 7, 2015 as well as the payment of purchase price adjustment agreed in December 2014 for the acquisition of Mater Dei S.r.l., Italy, of 7,000 thousand euros and for Nuovo Laboratorio San Giorgio Analisi Chimicobiologiche S.r.l & C., Italy, of 210 thousand euros. Furthermore, purchase price liabilities increased by 700 thousand euros as a result of the acquisition of synlab tesdelo service GmbH.

11 Financial instruments (Continued)

Income from changes in contingent considerations break down as follows: 466 thousand euros (prior year: 0 thousand euros) for the acquisition of synlab Pharma Institute AG and 332 thousand euros (prior year: 0 thousand euros) for provisions for litigations, which were founded prior to the acquisition at Laboratoire d'Analyses Médicales Dr. Jean Collard SPRL and have been closed after the acquisition.

Provisions for onerous contracts in the hospital business were utilized in an amount of 665 thousand euros.

Allocations to the provisions for contingent consideration break down as follows: 325 thousand euros of non-current provisions and 1,000 thousand euros of current provisions for the acquisition of Medilab Ltd., Cyprus, 500 thousand euros for Laboratorio di Analisi Dott. Mario Settimelli S.r.l, 430 thousand euros for the acquisition of ACR Labor AG, Switzerland, and 200 thousand euros for the acquisition of synlab tesdelo service GmbH, Germany.

The increase in interest-bearing bank loans and overdraft facilities shown in the above table relates mainly to the drawdown of a further 20,000 thousand euros as of January 5, 2015 under the uncommitted acquisition facility of 80,000 thousand euros which was provided at the end of 2014. A further 60,000 thousand euros is still available for drawing under this facility. Most of the interest-bearing bank loans and overdraft facilities presented in the above table relate to a loan agreement concluded in 2012 with a volume of 395,000 thousand euros and a further 75,000 thousand euros under an uncommitted acquisition facility which SYNLAB HOLDING and various subsidiaries used to refinance existing bank loans. This senior facilities agreement comprises committed facilities with an amortizing tranche A1 of 115,000 thousand euros and another interest-only tranche A2 of 160,000 thousand euros. In addition, other committed tranches were granted to refinance mezzanine loans, as was a revolving credit facility of 25,000 thousand euros. On March 28, 2013, the drawdown of a further tranche B2 as of June 28, 2013 of 75,000 thousand euros and the re-designation of portions of tranches A2 and A3 and the committed acquisition facility to a new tranche B1 of 105,261 thousand euros were agreed in connection with this loan agreement. In a further addendum to the loan agreement of December 18, 2013, it was agreed to convert 69.17% of the amortizing tranche A1 to an interest-only tranche A5 as of January 31, 2014. In 2014, two other tranches of the revolving credit facility of 10,000 thousand euros and the uncommitted acquisition facility of 110,000 thousand euros were granted. These facilities were drawn down in amounts of 7,000 thousand euros and 30,000 thousand euros, respectively, as of December 31, 2014.

Trade receivables do not bear interest and are usually due within 30 to 120 days. Sales to and purchases from related parties are made on an arm's length basis.

There are no guarantees for receivables from or payables to related parties. Interest on other receivables from related companies is charged at normal market rates.

13 Segment reporting

For management purposes, the Group is organized into nine separately managed and monitored segments. Reconciliations include the central functions, financing and taxes, and consolidation. The Group's laboratory business is subject to various opportunity and risk profiles as well as varying government regulations in the countries where the Group operates; thus the internal reporting structure is organized according to geographic segmentation of the Group.

SYNLAB HOLDING management has the highest discretionary authority. EBITDA of the business entities is monitored separately by management in order to make decisions regarding distribution of resources and determine the profitability of the entities. EBITDA figures are used to measure segment performance and are reflected by EBITDA in the consolidated financial statements. Group financing (including finance costs and income) and income taxes are managed at Group level, however, rather than at the individual business segment level.

Accounting principles used in deriving segment information conform with the accounting rules used in the consolidated financial statements. Transfer prices between business segments are determined based on normal market conditions for transactions with third parties.

Because Group assets are of minor importance for management of the Company, Company management does not monitor these separately by business segment.

13 Segment reporting (Continued)

Description of segments subject to reporting requirements

The SYNLAB GROUP portfolio comprises activities in 22 countries, distinguishing only the following segments according to the opportunity and risk profile: Germany, Switzerland, Italy, Belgium, the Czech Republic, Austria, the Slovak Republic, Hungary, Northern Europe with Estonia, Finland, Lithuania and Norway, and Other (Rest of World) comprising Group activities in Cyprus, Slovenia, Macedonia, Croatia, Romania, Poland, the Republic of Belarus, the United Kingdom, Turkey and the United Arab Emirates which individually do not fulfill the quantitative thresholds and are thus grouped into one reportable segments. As of January 1, 2015, the activities of the new acquisition Medilab Ltd., Cyprus, have been allocated to the Rest of World segment.

Reconciliations

Reconciliations include all Group central functions such as management, legal, Group finances, internal audit and strategic procurement which cannot be attributed to individual operating segments. Furthermore, reconciliations include finance income and expenses and taxes because they are centrally managed by the Group, and therefore cannot be attributed to individual business segments, as well as the consolidation transactions to be conducted among the individual segments.

Income from transactions with other segments is eliminated for consolidation purposes.

—Viper Internet SRL						—asset deal

(*) The revenue and EBITDA contributions for 2015 reflect current corporate planning

All acquisitions were aimed at strengthening the Group's presence in a particular region or area of specialization.

Detailed information required by IFRS 3, i.e. items IFRS 3 B64e, f, h, i, j, and k, regarding business combinations taking place after the end of the reporting period, cannot be provided for the aforementioned business combinations at present because at the time the interim consolidated financial statements were released for publication the various sellers were unable to provide final financial statement figures.

Augsburg, June 11, 2015

SYNLAB HOLDING GmbH Management

Dr. med. Bartl Wimmer	Markus Stötter
Managing Director	*Managing Director*

The following auditors' report is a translation of the German-language auditors' report (Bestätigungsvermerk), which refers to the consolidated financial statements and the group management report of synlab Holding GmbH, Augsburg, prepared in accordance with IFRS (International Financial Reporting Standards) as adopted by the EU, and the additional requirements of German Commercial Law pursuant to Sec. 315a(1) HGB (German Commercial Code [Handelsgesetzbuch]) as of and for the year ended December 31, 2014 as a whole and not solely to the consolidated financial statements presented in this offering memorandum on the following pages.

Auditor's report

We have audited the consolidated financial statements prepared by synlab Holding GmbH, Augsburg, comprising the balance sheet, the statement of comprehensive income, the cash flow statement, the statement of changes in equity and the notes to the consolidated financial statements, as well as the management report for the fiscal year from January 1, to December 31, 2014. The preparation of the consolidated financial statements and the group management report in accordance with IFRS (International Financial Reporting Standards) as adopted by the EU, and the additional requirements of German commercial law pursuant to Sec. 315a (1) HGB (German Commercial Code [Handelsgesetzbuch]) is the responsibility of the Company's management. Our responsibility is to express an opinion on the consolidated financial statements and on the management report based on our audit.

We conducted our audit of the consolidated financial statements in accordance with Sec. 317 HGB and German generally accepted standards for the audit of financial statements promulgated by the Institute of Public Auditors in Germany (Institut der Wirtschaftsprüfer, IDW). Those standards require that we plan and perform the audit such that misstatements materially affecting the presentation of the net assets, financial position and results of operations in the consolidated financial statements in accordance with the applicable financial reporting framework and in the group management report are detected with reasonable assurance. When determining the audit procedures, the knowledge of the business activities and the economic and legal environment of the Group and expectations as to possible misstatements are taken into account. The effectiveness of the accounting-related internal control system and the evidence supporting the disclosures in the consolidated financial statements and the management report are examined primarily on a test basis within the framework of the audit. The audit includes assessing the annual financial statements of those entities included in consolidation, the determination of entities to be included in consolidation, the accounting and consolidation principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements and the group management report. We believe that our audit provides a reasonable basis for our opinion.

Our audit has not led to any reservations.

In our opinion, based on the findings of our audit, the consolidated financial statements comply with IFRS as adopted by the EU and the additional requirements of German commercial law pursuant to Sec. 315a (1) HGB and in accordance with these requirements give a true and fair view of the net assets, financial position and results of operations of the Group. The group management report is consistent with the consolidated financial statements and as a whole provides a suitable view of the Group's position and suitably presents the opportunities and risks of future development.

synlab Holding GmbH, Augsburg, Germany

Notes to the consolidated financial statements for the fiscal year January 1 to December 31, 2014

1 Information on the Company

These consolidated financial statements were prepared by synlab Holding GmbH (hereinafter: 'the Company' or 'SYNLAB HOLDING'), Augsburg, Germany, the parent company of the SYNLAB HOLDING Group (SYNLAB GROUP). The Company is recorded in the Commercial Register at the Local Court in Augsburg under number HRB 24668. The registered address is Gubener Strasse 39, 86156 Augsburg, Germany.

The SYNLAB GROUP is one of the largest suppliers of medical diagnostic laboratory services in Central and Eastern Europe. The Group, which is based in Germany, presently employs over 7,000 employees and is currently represented in Germany, Italy, Switzerland, Austria, Belgium, the Czech Republic, Hungary, the Slovak Republic, Slovenia, Romania, Macedonia, Croatia, Poland, the Republic of Belarus, Estonia, Lithuania, Finland, Norway, the United Kingdom, the United Arab Emirates, and Turkey.

The Company's service portfolio encompasses analyses in the areas of human medicine, microbiology and human genetics, as well as routine diagnostics, preventive medical examinations, and pathology—all performed by the Company's own laboratories. Having acquired INTERLAB GmbH central lab services—worldwide in 2014, the SYNLAB GROUP now also offers clinical trial services commissioned by the pharmaceutical and biotechnology industries. Customers include public health agencies, clinics, hospitals, doctors, and private individuals.

The consolidated financial statements prepared for SYNLAB HOLDING and its subsidiaries as of December 31, 2014 (hereinafter: 'the Corporation' or 'the Group') were released for publication by management resolution on March 27, 2015. German law requires that the consolidated financial statements be approved by shareholders.

2 Accounting policies

2.1 Basis for preparing the financial statements

The consolidated financial statements for SYNLAB HOLDING and its subsidiaries were prepared in compliance with International Financial Reporting Standards (IFRS) as applicable in the European Union for fiscal year 2014, and in compliance with Sec. 315a (1) and (3) of German Commercial Code (HGB). International Financial Reporting Standards (IFRS) encompass International Accounting Standards (IAS), the interpretations issued by the IFRS Interpretation Committee (IFRIS IC), and the interpretations of the Standing Interpretation Committee (SIC).

As a rule, the consolidated financial statements are prepared using the acquisition cost method, Exceptions to this are derivative financial instruments, financial instruments held for sale, and non-controlling interests in a partnership ("puts on NCI"), which are measured at fair value.

Current and non-current assets and liabilities are reported in the statement of financial position. The income statement for the period is prepared using the nature of expense method. Any combined line items disclosed in the consolidated statement of comprehensive income or the consolidated statement of financial position are reported as separate line items in the Notes.

The consolidated financial statements are prepared in euros. Unless otherwise indicated, all amounts are rounded up or down to the nearest thousand euros in accordance with common commercial rounding practice.

2.2 Consolidation standards

The consolidated financial statements include the annual financial statements of SYNLAB HOLDING and its subsidiaries as of December 31, 2014. The number of subsidiaries, associated companies and joint venture companies included in the consolidated financial statements for 2014 breaks down into domestic and foreign subsidiaries as follows:

	2014	**2013**
Domestic	63	65
Foreign	50	48
Total	**113**	**113**

2 Accounting policies (Continued)

Changes in the scope of consolidation were as follows:

	Full consolidation	Consolidated using the equity method
Status as of December 31, 2013	**110**	**3**
First-time consolidation	12	1
Merged	(13)	0
As of December 31, 2014	**109**	**4**

The following companies were consolidated for the first time in 2014:

Company	Country	Initial consolidation	Shareholding	Consolidation method

synlab Lietuva (formerly UAB "SORPO")	LT	07/31/2013	100.0%	Full consolidation

The company Spectromass Analitikai Laboratórium Kft., which was acquired in 2012 and had not been consolidated as of December 31, 2012, was consolidated for the first time as of January 1, 2013.

The company Freiburg Medical Laboratory Middle East LLC, which was consolidated using the equity method in 2012, has been fully consolidated as of August 1, 2013. The newly formed company KRH Labor GmbH as well as the existing shareholdings in MED Laborunion GmbH and Schubert Med.

2 Accounting policies (Continued)

prod. GmbH & Co. KG, which had not been consolidated previously for reasons of materiality, were consolidated using the equity method for the first time in 2013.

On February 5, 2013, the SYNLAB GROUP acquired a further 1.82% shareholding in BZH GmbH at a purchase price of 16 thousand euros. Thus the shareholding increased from 51.02% to 52.84%. On July 18, 2013, the SYNLAB GROUP also acquired the remaining 49% shareholding in BILACON Institut für Biotechnologie, Laboranalytik und Consulting GmbH at a purchase price of 35 thousand euros, increasing the shareholding from 51% to 100%. Both companies had been fully consolidated in 2012.

The following companies were merged or acquired in 2013

Merged company	Country	Absorbing company	Merger date

The following companies were liquidated and deconsolidated in 2013:

Company	Country	Deconsolidation date	Shareholding
Orga-Lab GmbH	DE	12/31/2013	100%

The subsidiaries' annual financial statements are prepared using the same accounting policies and as of the same reporting date as the parent's annual financial statements. All intra-group balances, transactions, unrealized profits and losses from intragroup transactions and dividends are eliminated in full. Subsidiaries are fully consolidated as of the date on which the Group gains control. Their consolidation ends as soon as the subsidiary is no longer controlled by the parent company.

The Group controls an investee only if the Group

- has power over the investee (i.e. the Group has existing rights that give it the ability to direct those activities that significantly affect the investee's returns),
- is exposed, or has rights, to variable returns from its involvement with the investee, and
- has the ability to affect the investee's returns through its power over the investee.

If the Group does not have the majority of voting rights or any equivalent rights in an investee, it will consider all facts and circumstances in establishing whether it has power over a particular investee. These include:

- A contractual agreement with other voting shareholders,
- any rights from other contractual agreements, and
- voting rights and potential voting rights of the Group.

Any assets, liabilities, income and expenditures of a subsidiary acquired or disposed of during the reporting period are reported in the consolidated statement of financial position or statement of comprehensive income as of the date the Group gains control of the subsidiary until the date control over the subsidiary ends.

2 Accounting policies (Continued)

A subsidiary's losses are attributed to non-controlling interests even though this may result in a negative balance. Any change in the shareholding in a company while control is retained is recorded as an equity transaction. When a parent company loses control over a subsidiary, the following steps are taken:

- The subsidiary's assets (including goodwill) and liabilities are derecognized.
- The carrying amount of the non-controlling interest in the subsidiary is derecognized.
- Cumulative translation differences reported in equity are derecognized.
- Fair value of consideration received is recorded.
- Fair value of remaining interest is recorded.
- Profit or loss is recorded in the consolidated statement of comprehensive income.
- Elements of other comprehensive income accruing to the parent company are reclassified to the consolidated statement of comprehensive income or to retained earnings, if so required by IFRS.

2.3 Summary of significant accounting policies

2.3.1 Business combinations and goodwill

Business combinations are recorded using the purchase method. Acquisition costs incurred for the acquisition of a company comprise the sum total of transferred consideration measured at fair value as of the date of acquisition and the non-controlling interests in the acquired company. For each business combination, the acquiring entity measures the non-controlling interests in the acquired company either at fair value or based on the relevant share of the identifiable net assets of the acquired company. Any costs thus incurred are recorded as expenses and are presented as other operating expenses.

When the Group acquires a company, it determines a suitable classification and designation of financial assets and liabilities assumed in accordance with contractual terms, the economic situation and conditions prevailing at the time of acquisition. This includes separate reporting of any derivatives embedded in host contracts.

In a subsequent business combination, the share in the equity of the acquired company previously held by the purchaser is revalued at fair value as of the acquisition date, and the resulting profit or loss is recognized in profit or loss. When the subsequent business combination results in changed ownership while maintaining control, the acquisition is accounted for as a transaction between owners. Any changes in value between majority and minority shareholders are recorded in equity.

The agreed contingent consideration is measured at fair value as of the acquisition date. Any subsequent adjustments to the fair value of the contingent consideration in the form of an asset or a liability are reported either in the consolidated statement of comprehensive income or in other comprehensive income, in accordance with IAS 39. Contingent consideration classified as equity is not revalued; subsequent compensation is recorded as equity.

Goodwill is initially measured at acquisition cost, which is calculated as the excess of transferred consideration and the amount of the non-controlling interest over the acquired identifiable assets and liabilities of the Group. If this consideration amount is exceeded by the fair value of the net assets of the acquired subsidiary, the difference is recorded in the consolidated statement of comprehensive income. Goodwill is subsequently measured at cost less accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in the course of a business combination is attributed to the cash-generating units (CGUs) in the Group which are expected to benefit from the business combination. This applies regardless of whether other assets or liabilities of the acquired company are attributed to these CGUs.

If goodwill was attributed to a cash-generating unit (CGU) and a business unit of this CGU is sold, the goodwill attributable to the business unit sold is included in profit/loss from the sale of that business unit as part of the carrying amount of the business unit. The value of the portion of goodwill sold is determined based on the ratio of values of the business unit sold to the remaining part of the CGU.

2 Accounting policies (Continued)

2.3.2 Associated companies and joint operations

Companies over which the Group has a significant influence are accounted for using the equity method as associated companies. In contrast to control over a company, a significant influence only means the power to participate in financial operating policy decisions.

A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangement. Joint control is the contractually agreed sharing of control of an arrangement. It exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control. Joint operations are also accounted for using the equity method.

In accordance with the equity method, shares in associated companies and joint ventures are initially recognized at their acquisition cost. Subsequently the carrying amount changes in accordance with the change in net assets of the associated company or joint operation since the acquisition date less accumulated impairment losses.

The Group's share in the associated company's profits is reported as a separate line item in profit or loss for the period. The Group records its share of any changes directly recorded in the associated company's consolidated equity in the Group's statement of changes in equity as applicable. Goodwill resulting from the acquisition of an associated company is included in the carrying amounts of the investments in associated companies or joint ventures and is neither subject to amortization nor to separate impairment testing.

Following application of the equity method, the Group decides whether to record an additional impairment on shareholdings in associated companies. At every reporting date, the Group assesses whether there are any objective indications of impairment of its shareholdings in an associated company. If this is the case, the difference between the fair value and the carrying amount of the shareholding is recognized as an impairment in profit or loss.

Upon the loss of significant influence over an associated company or joint venture, the existing shareholdings in the company are measured at fair value. The difference between carrying amount and fair value or net sale proceeds as applicable is recognized as a gain/loss in the consolidated statement of comprehensive income.

Thus the comprehensive income attributable to the equity holders of the parent includes the share in the profit or loss for the period of the associated company or joint venture as well as any impairment and effects from any loss of significant influence in a company.

2.3.3 Foreign currency translation

The consolidated financial statements are prepared in euros, the parent company's functional currency. Each company within the Group determines its own functional currency, which, as a rule, is the respective local currency. The line items in the subsidiaries' financial statements are recorded in the respective functional currency.

Foreign currency transactions and balances

The Group companies initially translate foreign currency transactions into the respective functional currencies at the mean rate of exchange on the day of the business transaction. Monetary assets and liabilities recorded in a foreign currency are translated into the functional currency at each reporting date at the mean rate of exchange. All translation differences are recognized in profit or loss. Non-monetary items valued at historical purchase cost or cost of conversion in a foreign currency are translated on the day of the business transaction.

Group companies

Assets and liabilities of foreign business operations are translated into euros at the reporting date rate (mean rate of exchange). Annual average exchange rates are used for translating income and expense amounts. The resulting translation differences are recorded in other comprehensive income. The values thus recorded for foreign business operations are reclassified into the consolidated statement of comprehensive income upon sale of the respective foreign business operations.

The following key exchange rates were applied:

	Closing rate		Annual average exchange rate	
1 euro =	12/31/2014	12/31/2013	2014	2013
Pound sterling (GBP)	0.7789	0.8337	0.8042	0.8502
Polish zloty (PLN)	4.2732	4.1543	4.1874	4.1940
Romanian leu (RON)	4.4821	4.4847	4.4472	4.4177
Swiss francs (CHF)	1.2024	1.2276	1.2131	1.2305
Czech crowns (CZK)	27.725	27.425	27.553	25.980
Turkish lira (TRY)	2.8258	2.9344	2.9034	2.5351
Hungarian forints (HUF)	315.54	297.04	309.23	297.34
United Arab Emirates dirhams (AED)	4.4660	5.0576	4.8394	4.8819

2.3.4 Recognition of income

Income is recognized as and when it is probable that the economic benefit will accrue to the Group and the amounts can be reliably determined, regardless of the payment date. Income is measured at the fair value of the consideration received or the consideration to be received in accordance with contractual payment terms; taxes or other duties are not considered. Recognition of income requires the fulfillment of the following criteria:

Provision of services

Income from laboratory services is recognized to the extent that the profit or loss of the business can be reliably estimated and it is sufficiently probable that the economic benefit will accrue to the company. In case of analyses not yet completed, work in progress is recorded in the amount of reimbursable expenses incurred.

Sale of goods

Income is recognized when the significant risks and rewards associated with ownership of the goods and products sold have been transferred to the buyer. This usually takes place upon delivery of the goods and products.

Dividends

Income is recognized when a legal claim to payment arises.

Interest income

For all financial instruments measured at amortized cost and interest-bearing financial assets classified as available-for-sale, interest income or expense is recognized using the effective interest rate, which is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument, or a shorter period as applicable, to the net carrying amount of the financial asset or liability. Interest income is presented in the profit and loss statement as part of finance income.

2.3.5 Taxes

Current income taxes

Current tax receivables and tax payables for the current period are measured at the amount equaling the expected refund from or payment to the tax authorities. Calculation of these values is based on tax rates and tax laws effective in the country in which the Group operates and generates taxable income at the reporting date. Current taxes that are related to items recorded directly in equity are not recorded in the consolidated statement of comprehensive income but rather in equity. Management regularly reviews individual tax situations with respect to whether there is room for interpretation taking into consideration applicable tax provisions. Provisions for tax liabilities are accrued if necessary.

2 Accounting policies (Continued)

Deferred taxes

Provisions for deferred taxes are accrued using the liability method with respect to temporary differences in the value of an asset or liability in the statement of financial position and its value in the tax accounts at the reporting date.

Deferred tax liabilities are recorded for all temporary taxable differences, with the exception of:

- deferred tax liabilities resulting from the initial recognition of goodwill, an asset or liability from a transaction which is not a business combination and at the transaction date neither influences the accounting profit or loss nor the taxable profit or loss for the period,
- deferred tax liabilities from temporary taxable differences connected with investments in subsidiaries, affiliated companies, or shares in joint ventures, if the temporal course of the reversal of temporary differences can be controlled and it is probable that the temporary differences will not be reversed in the foreseeable future.

Deferred tax assets are recorded for all deductible temporary differences, unused tax loss carryforwards (including interest carryforwards) and unused tax credits to the extent that it is probable that the taxable income will be available against which the deductible temporary differences and unused tax loss carryforwards or interest carryforwards and unused tax credits can be offset, with the exception of:

- deferred tax assets from deductible temporary differences arising from the initial recognition of an asset or liability from a transaction that is not a business combination and which, at the transaction date, neither influences the accounting consolidated profit or loss nor the taxable profit or loss for the period,
- deferred tax assets from deductible temporary differences in connection with investments in subsidiaries if it is probable that the temporary differences will not be reversed in the foreseeable future or that no taxable income will be available against which temporary differences can be offset.

The carrying amount of the deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that there is sufficient taxable income against which the deferred tax assets can at least be partially offset. Deferred tax assets that are not recognized are reviewed on each reporting date and then recognized in the amount that it has become probable that future taxable income will make possible the realization of the deferred tax assets. Deferred tax assets and liabilities are measured based on those tax rates that will probably become effective in the period in which an asset is realized or a liability paid. The tax rates (and tax laws) effective at the reporting date are used as a basis. Deferred taxes that are directly related to items that do not affect profit or loss are also recorded without any effect on profit or loss. Deferred tax assets and liabilities may be offset if and when the Group has an enforceable claim to offset the current tax assets against actual tax liabilities which are attributable to income taxes of the same taxable unit and are imposed by the same tax authority.

If a business combination gives rise to deferred tax benefits that do not fulfill the criteria for separate recognition as of the date of acquisition, such benefits are recognized in the following periods as long as this is in line with new information regarding facts and circumstances existing at the time of acquisition. The adjustment made is either an impairment of goodwill, if such takes places during the valuation period (and as long as it does not exceed goodwill), or recorded in consolidated profit or loss.

Value-added tax

Revenues, expenses and assets subject to VAT are recognized net of VAT. The following cases are exceptions to this rule:

- If VAT incurred upon the acquisition of assets or the utilization of services cannot be reclaimed from the tax authority, the VAT is recognized as part of the cost of conversion of the asset or as part of the expenses.
- Receivables and liabilities are recognized with the respective VAT amounts included.
- In the case of Group companies for which only partial reimbursement of VAT is possible, the non-reimbursable portion of VAT is not deducted.

2 Accounting policies (Continued)

- In the case of Group companies for which no reimbursement of VAT is possible, no VAT is deducted.

The VAT amount to be refunded by or paid to the tax authority is recognized in the statement of financial position under "Other current assets" or under "Other financial liabilities".

2.3.6 Intangible assets and property, plant and equipment

Intangible assets are recognized for the first time at acquisition cost or at cost of conversion. The cost of intangible assets acquired in the scope of a business combination is calculated as the fair value at date of acquisition. In subsequent periods, the intangible assets are recorded at cost or at cost of conversion less accumulated amortization and any accumulated impairment losses, if applicable. Research expenditures are recorded in the period in which they are incurred. Development costs, with the exception of the portion to be capitalized, are not capitalized, but rather recorded in profit or loss in the period in which they are incurred.

Property, plant and equipment is recorded at acquisition cost or cost of conversion less accumulated scheduled depreciation and/or accumulated impairment losses. Acquisition cost or cost of conversion includes costs for replacement parts for property, plant and equipment and borrowing costs for long-term construction projects, if the recognition criteria have been fulfilled. If material parts of property, plant and equipment must be replaced at regular intervals, the Group capitalizes such parts as separate assets with specific useful lives or depreciation periods. Costs incurred for a major inspection are correspondingly capitalized at carrying amount as replacement cost of the asset if the criteria for recognition have been fulfilled. Any other maintenance and repair costs are recorded in profit or loss. The net present value of expected costs for disposal of an asset after its use is included in the cost or cost of conversion of the respective asset if the criteria for recognition have been fulfilled.

Intangible assets and property, plant and equipment are always depreciated over their economic lives and inspected for any possible impairment loss whenever there is any indication that the intangible asset might be impaired. Duration and method of depreciation are reviewed at least at the end of each reporting period. Any necessary changes to duration or depreciation method due to changes in the expected useful life or the expected deterioration of the future economic benefits of the asset are treated as changes in estimates. Amortization of intangible assets and depreciation of property, plant and equipment are recorded in the statement of comprehensive income under "Depreciation and amortization". Profit or loss from the disposal of intangible assets and property, plant and equipment is measured as the difference between the net disposal proceeds and the carrying amount of the asset and recorded in the period during which the asset is disposed.

Straight-line amortization and depreciation is charged over the following useful lives of the assets:

Asset	Useful life	Remaining useful life
Intangible assets		
—Customer lists	3 to 20 years	1 to 20 years
—Trademarks	1 to 7 years	1 to 6 years
—Concessions, industrial property rights, and similar rights	3 to 6 years	1 to 6 years
Investments in non-Group buildings	remaining term of the contract, 10 years maximum	
Technical machines and equipment	4 to 10 years	
Vehicle fleet	3 to 5 years	
Other equipment, fixtures and fittings, and office equipment	4 to 10 years	
Buildings	20 to 50 years	

Intangible assets or property, plant and equipment are derecognized either upon disposal or when no economic benefits are expected to flow from further use or from the disposal of the recognized asset. Profit or loss arising from the derecognition of the asset are recorded in consolidated statement of comprehensive income as the difference between the net disposal proceeds and the carrying amount of the asset in the period in which the asset is derecognized. Remaining value, useful life and depreciation/amortization methods of the assets are reviewed at the end of each fiscal year and prospectively adjusted as necessary.

2.3.7 Lease agreements

The decision whether an agreement is classified as a lease is made based on the economic substance of the agreement at the time of the conclusion of the agreement, and requires an estimate as to whether the fulfillment of the agreement depends on the use of a specific asset or assets and whether the agreement grants the right to use this asset, even if this right is not expressly stipulated in the agreement. The Group companies using analysis equipment generally do not have civil-law title to this equipment. Invoicing for this equipment is predominantly "per reported result", whereby it can be assumed that the fee contains not only analysis materials and maintenance costs, but also a fee for provision of the equipment. Pursuant to IFRIC 4 (Determining Whether an Arrangement Contains a Lease), this type of agreement represents a lease agreement if the fulfillment of the agreement is dependent upon the use of a certain asset and the agreement grants a right to use the asset. According to these criteria, it can be assumed that the agreements on the use of analysis equipment contain lease agreements. Based on the content of the agreements, these are predominantly operating leases. The portion of lease components in these agreements is estimated based on the available documents because the parties to the contract have not provided any information.

Payments for operating leases are recorded on a straight-line basis in the consolidated statement of comprehensive income as expenses for rental and lease agreements over the term of the lease agreement.

Finance leases in which essentially all risks and rewards related to the title of the leased asset are transferred to the Group as the lessee result in capitalization of the leased asset at the beginning of the term of the lease. The leased asset is recognized at the lower of its fair value or the present value of the minimum lease payments. Lease payments are divided into finance costs and repayments of the principal in such manner that during the life of the lease a constant interest rate applies to the remaining lease obligation. Finance costs are recorded in profit or loss. Leased assets are depreciated over their useful lives. If transfer of the title to the asset to the Group at the end of the lease is not sufficiently likely, the lease is fully amortized over the shorter of the estimated useful life of the asset and the term of the lease.

2.3.8 Borrowing costs

Borrowing costs that can be directly attributed to the acquisition, construction or production of an asset are capitalized as part of the cost or cost of conversion of the respective asset if a significant period of time is required to prepare the asset for its intended use or sale. All other borrowing costs are recognized as an expense in the period in which they are incurred. Borrowing costs are interest and other costs incurred by an enterprise in connection with the borrowing of funds.

2.3.9 Financial instruments

Financial assets and liabilities

Financial assets within the meaning of IAS 39 are either categorized as financial assets that are measured at fair value through profit or loss, as loans and receivables, as financial investments held to maturity, as financial assets available for sale or as derivatives designated as hedging instruments.

Financial liabilities within the meaning of IAS 39 are either classified as financial liabilities measured at fair value through profit or loss, or as "Other financial liabilities".

The Group determines the classification of its financial assets when they are recognized for the first time. Any necessary and permissible reclassifications are made at the end of the fiscal year. No reclassifications took place in either of the reporting years.

When financial assets and liabilities are first recognized, they are measured at their fair value, and as a rule are recorded as of the conclusion date of the contract. Transaction costs connected with an acquisition are also recognized for all financial assets and liabilities not subsequently measured at fair value through profit or loss.

2 Accounting policies (Continued)

Financial assets and liabilities are only netted in the Group statement of financial position if there is a legal claim at that time to offset the recorded amounts against each other and it is intended to do this on a net basis or to simultaneously repay the corresponding liability when the corresponding asset is realized.

With the exception of derivative instruments as well as non-controlling interests in a partnership ("puts on NCI"), no financial investments were measured at the reporting date either as financial assets that are measured at fair value through profit or loss or as financial investments held to maturity, nor were any financial liabilities classified as financial liabilities measured at fair value through profit or loss.

Primary financial instruments

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial recognition, loans and receivables are measured at amortized cost using the effective interest rate method less any impairment. Gains or losses are recognized in consolidated profit or loss for the period if loans or receivables are derecognized or impaired. Loans and receivables include Group trade receivables, certain current assets and cash and cash equivalents.

Available-for-sale financial investments are defined as non-derivative financial assets that are classified as available-for-sale and are not categorized otherwise. After initial measurement, financial investments that are available-for-sale are measured at fair value; profit or loss is recorded under "Accumulated other comprehensive income" less any income tax effects. At the date on which the financial investment is derecognized or on which a related impairment is determined, the previously recognized accumulated other comprehensive income is recognized through profit or loss. The fair value of financial investments traded on organized markets is determined using the market bid price quoted at the reporting date. The fair value of financial investments for which no active market exists is assessed using valuation methods. If there is no market and the fair value cannot be reasonably assessed, the asset is recognized at amortized cost.

Financial liabilities and interest-bearing loans are measured at amortized cost using the effective interest rate method. Amortization and derecognition of liabilities are reported through profit or loss.

Derivative financial instruments

The Group uses interest rate swaps, caps and collars as derivative financial instruments for hedging future interest payments. The hedge accounting provided for under IAS 39 was not utilized for the Group financial statements.

Thus derivative financial instruments must be classified as held for trading, and are recorded at fair value through profit or loss as of the conclusion date of the respective contract and thereafter.

The fair value of interest rate swap and collar contracts is determined using the net present value of future contracted payment flows, based on current market data.

Impairment of financial assets

The Group determines at each reporting date whether there is any indication of impairment of a financial asset or a group of financial assets that are not recorded at fair value through profit or loss.

Objective evidence for the occurrence of impairment could include, for example, the repudiation of a draft invoice in a demand for payment, significantly overdue payment or other indications of non-collectability.

With respect to financial investments available for sale, an objective indication of impairment is present if the fair value falls below the carrying amount either for an extended period or by a significant amount. To the extent such an asset is impaired, the cumulative loss previously recognized directly in equity is booked to profit or loss. A reversal of an impairment loss on an equity instrument classified as available for sale at a later point in time is not recorded in profit or loss, but rather reversed in equity.

Derecognition of financial assets and liabilities

A financial asset is derecognized when the Group loses control over the contractual rights on which the financial asset is based. A financial liability is derecognized when the underlying obligation is fulfilled, terminated or has expired.

2.3.10 Inventories

Inventories are measured at the lower of cost or net realizable value. Net realizable value is the expected sales price achievable in the course of ordinary business operations less estimated costs of completion and necessary sales and marketing expenses.

Any costs incurred to transport inventories to their present location and to render them in their current condition are capitalized as follows:

Raw materials, consumables and supplies:

- First-in-first-out method (Fifo)

Finished and unfinished products or services:

- Directly attributable materials and production costs as well as reasonable portions of overhead production costs based on the facility's normal production capacity without taking borrowing costs into account

2.3.11 Impairment of non-financial assets

At each reporting date, the Group determines whether situations exist that would necessitate an impairment of non-financial assets. If there is any such indication or if an annual impairment test is necessary for an asset, the Group estimates the recoverable amount of the respective asset. The recoverable amount of an asset is the greater of the fair value of an asset or a CGU less cost of sale and the value-in-use. The recoverable amount must be determined for each individual asset unless a particular asset does not generate any cash flows that are largely independent of other assets or other groups of assets. If the carrying amount of an asset or CGU exceeds its respective recoverable amount, the asset is impaired and is depreciated to recoverable amount.

Value-in-use is the net present value of future expected cash flows using a discount rate before tax that reflects market expectations with respect to the interest rate effect and the specific risk of the asset. Recent market transactions, if applicable, are taken into consideration when determining the fair value less any cost of sale. If there are no such identifiable transactions, a suitable valuation model is used. This is based on valuation multiples or other available indicators of fair value.

The Group bases its impairment decisions on detailed budget and projection calculations that are prepared separately for each Group CGU to which individual assets are allocated. As a rule, these budget and projection calculations cover a span of five years. A long-term growth rate is determined for longer periods of time and used to project future cash flows beyond the fifth year. Impairment costs of continuing business operations, including impairment of inventories, are recorded through profit or loss in the categories relating to the function of the impaired asset within the Company. This does not apply to assets previously revalued to the extent that the increases in value from the revaluation were recorded in other comprehensive income. In such case the impairment is also recorded in other comprehensive income up to the amount of a previous revaluation.

Assets other than goodwill are evaluated at every reporting date as to whether there are indications that a previously recorded impairment loss no longer exists or has been reduced. If such indications are present, the Group assesses the recoverable value of the asset or the CGU. Any previously recorded impairment losses are only reversed if a change in the assumptions that formed the basis for the determination of the recoverable amount has taken place since recording the last impairment loss. The impairment reversal is limited by the fact that the carrying amount of an asset may neither exceed its recoverable amount nor the carrying value that would have remained after scheduled depreciation if in previous years no impairment losses for the asset had been recorded.

2 Accounting policies (Continued)

Goodwill is valued once a year on December 31, and whenever indications suggest a possible impairment. This value is also reviewed if circumstances indicate that impairment may have occurred. The impairment is calculated by determining the recoverable amount of the CGU (or the CGU groups) to which the goodwill is allocated. If the recoverable amount from the CGU is less than the carrying amount of this unit, an impairment loss is recorded. Once impairment losses are recorded on goodwill, such impairment losses are not to be reversed in future periods.

2.3.12 Cash and cash equivalents

The statement of financial position item "Cash and cash equivalents" comprises cash on hand, bank deposits and short-term deposits with a term of less than 3 months. For the purposes of the cash flow statement, cash and cash equivalents comprises cash as defined above and short-term deposits.

2.3.13 Provisions

Principles

A provision is recognized if the Group has a present (legal or constructive) obligation arising from a past event, expenditure of resources with economic benefit to fulfill the obligation is likely, and a reliable assessment of the amount of the obligation is possible. If an accrued liability is expected to be reimbursed at least in part (e.g. liabilities covered under an insurance policy), the reimbursement is classified as a separate asset, provided there is a high probability of it occurring. The expense for such a provision is reported in the consolidated statement of comprehensive income less any reimbursement. If the interest rate effect from a discounting event is substantial, provisions are discounted using a discount rate before tax that reflects the specific risks for the obligation involved. In case of discounting, the increase in the provision resulting from passage of time is recorded as finance costs.

Provisions for restructuring

A provision for restructuring is only recognized if the general requirements for realization of provisions are fulfilled. Furthermore, the Group must follow a formalized restructuring plan setting out detailed requirements regarding the business unit or part of the business unit concerned, the site and the number of employees concerned, as well as a detailed estimate of associated cost and a reasonable time schedule. The employees concerned must justifiably expect that the restructuring will take place, or it must have already begun.

2.3.14 Pensions and other post-employment benefits

Non-current pension provisions comprise defined benefit plans for pensions and other post-employment benefits as well as provisions for German phased retirement programs and long-service awards. Defined-benefit pensions and other post-employment benefit obligations are measured pursuant to IAS 19 (Employee Benefits) using the projected unit credit method. The net present value of the obligation is determined based on the duration of the employee's service, expected salary increases and projected retirement age.

Actuarial gains or losses resulting from changes to actuarial assumptions or differences between former actuarial assumptions and actual developments are recognized directly in equity in the period in which they were incurred, taking into account any deferred taxes. After deduction of plan assets, all obligations are thus fully reflected in the consolidated statement of financial position, eliminating in particular any expense variations from potential changes in calculation parameters. All actuarial gains and losses and any attributable deferred taxes incurred in the respective reporting period are thus part of accumulated other comprehensive income. The Company's obligations from German phased retirement programs result from individual employee contracts. Employees may choose between two variants of the German phased retirement program: The so-called block model requiring the employee to continue working full-time at first, usually followed by an equally long release period; or a 50% part-time employment for the whole period until retirement commences. Actuarial gains and losses from German phased retirement program provisions are recorded in full through profit or loss.

Provisions for long-service awards are accrued for claims based on collective agreements or long-term claims based on other employee agreements depending on the durations of service at the Company in accordance with the regulations of IAS 19. For long-service awards, gains or losses from changes in the calculation parameters are directly recorded in full as profit or loss in the same fiscal year.

In Switzerland, the Group maintains a defined-benefit pension agreement. Swiss companies do not accrue pension provisions as a rule since pensions are paid by pension funds which are legal entities under Swiss law and which provide for appropriate cover while Swiss companies are obligated to pay monthly contributions to these pension fund entities. The accumulated funds are released for retirement payments only. The pension plan assets comprise the savings balance of active insured individuals and the credit balance in the various accounts of the collective foundations as well as the amount of coverage if accrued pension benefits are not guaranteed. Swiss pension funds are responsible for maintaining sufficient liquidity to honor their financial obligations. The governing body is the respective foundation board.

The pooled plan is furthermore a defined benefit plan within the meaning of IAS 19. Because of the current extremely low discount rate assumptions, calculating pension payment obligations in accordance with IFRS/IAS 19 as compared to the applicable rates under Swiss law, generally yields extremely low funding levels, especially for active plan contributors but also, to a lesser extent, for pensioners. In these calculations the company is assumed to be the debtor and the expected funding gap is recognized accordingly in the statement of financial position.

The Group has pension obligations for senior management personnel. These benefits are not re-insured through an external fund.

2.3.15 Non-controlling interests in partnerships/put options

Pursuant to the rules set forth in IAS 32 on the delimitation of equity and liabilities, non-controlling interests in partnerships for which minority partners have a right of termination are recorded as a liability. In the same manner, shares for which the minority shareholder has been granted a put option by the majority partner are to be recognized at the fair value of the purchase price as an obligation. If this is done for a business combination, the business combination is accounted for as if the non-controlling interests had already been acquired. As a result, goodwill is recognized in full. Such shares are shown on the Group statement of financial position as a liability under "Other financial liabilities". Income from these shares which can be withdrawn by the minority partner is shown in the consolidated statement of comprehensive income under "Revaluation of non-controlling interests in partnerships".

2.3.16 Share-based payment

Members of management and other senior managers of the Group receive as remuneration for their work share-based payments in the form of equity instruments (equity-settled share-based payment transactions).

If equity instruments are issued and some or all of the services the company received in return are not clearly identifiable, the services received or to be received that cannot be identified are measured at the difference between the fair value of the share-based payment and the fair value of the identifiable services already received by the date the equity instruments were granted. This difference is then recorded as an expense.

Expenses for equity-settled share-based payment transactions are measured at fair value as of the date the equity is granted. Fair value is determined using a suitable option pricing model. Expenses arising from the granting of equity instruments and the corresponding increase in capital reserves are recognized over the period of time in which the conditions for performance and services are to be fulfilled ('vesting period'). This period ends at the first possibility to exercise the option, that is, when the employee concerned is irrevocably entitled to exercise the option. The cumulative expenses recorded for equity-settled share-based payment transactions thereby reflect at any reporting date up to the date of first possibility of exercising the option the vesting period already expired as well as the number of equity instruments which, based on the best estimate of management, will eventually vest. However, the amount by which the Group's income is reduced or increased reflects the change in cumulative expenses reported at the beginning versus the end of the reporting period.

Forfeited equity instruments granted for remuneration are not recorded as expense. An exception are those equity instruments granted for which non-forfeitability is based on certain market or non-vesting conditions. These equity instruments granted are deemed to be exercisable regardless of whether the market or non-vesting conditions are fulfilled, as long as all performance and service conditions have been fulfilled.

If the underlying conditions of an equity-settled share-based payment transaction are changed, expenses are recorded in the minimum amount of costs that would have been incurred if contractual conditions had not been changed, provided that the original conditions of the remuneration agreement are fulfilled. The company also records the effect of changes that increase the fair value of the share-based payment or are related to any other benefit for the employee, valued at the date of the change.

If an equity-settled share-based payment agreement is canceled, this is treated as if the option had been exercised on the day of cancelation. Expenditure not yet recognized is recorded immediately. This applies to all remuneration agreements for which non-vesting conditions on which either the company or the employee have an influence have not been fulfilled. However, if the canceled remuneration agreement is replaced by another remuneration agreement declared on the day it is granted as replacement for the canceled remuneration agreement, the canceled agreement and the new remuneration agreement are recorded in the statement of financial position as a change to the original remuneration agreement. All cancellations of remuneration agreements based on equity-settled share-based payment transactions are treated equally.

2.3.17 Fair value measurement

The Group measures the fair value of its financial instruments, such as derivatives, as of each reporting date. The fair values of financial instruments measured at amortized cost are listed in Note 7.

The fair value represents the price received for an asset sold or the money paid for a liability transferred in an ordinary business transaction between market players at the measurement date. When measuring the fair value it is assumed that the asset is sold or the liability transferred in a business transaction either on the primary market for such asset sale or liability transfer or the best market for such transactions if no primary market exists.

The Group must have access to either the primary or the best markets.

The fair value of an asset or liability is measured using the market players' assumptions applied in setting the price of the asset or liability. It is also assumed that market participants act in their best economic interest.

The fair value measurement of a non-financial asset takes into account the market participant's ability to achieve an economic benefit through the highest and best use of the asset or its sale to another market participant who will put the asset to the highest and best use.

The Group uses measurement methods which it considers appropriate under the given circumstances and for which sufficient data is available to perform fair value measurement. It is important however to mainly use appropriate and observable input factors and keep non-observable input factors to a minimum.

Financial instruments recorded on the statement of financial position as measured at fair value are to be organized within a three-level hierarchy, as are all line items for which fair value is to be stated in the Notes. The levels reflect the market-relevance of the respective data used in the fair value measurement. The levels of the fair value hierarchy are as follows:

Level 1: Quoted prices for similar assets or liabilities on active markets

Level 2: Directly (prices, for example) or indirectly (derived from prices) observable market inputs other than Level 1

Level 3: Inputs for assets and liabilities not based on observable market data.

For assets or liabilities repeatedly reported in the financial statements the Group determines any hierarchy level re-classification by re-evaluating the existing classification at the end of each reporting period. Such revaluation is based on the lowest-level input parameters which are essential for fair value measurement.

2 Accounting policies (Continued)

In order to meet the requirements for fair value disclosures, the Group has established certain groups of assets and liabilities based on type, characteristics and risks as well as the fair value hierarchy levels mentioned above.

2.4 Significant judgments, estimates and assumptions

When compiling the consolidated financial statements, management makes judgments, estimates and assumptions that affect the amounts of income, expenses, assets, liabilities and contingent liabilities reported as of year-end. However, these estimates and assumptions are uncertain and thus can lead to results which may later require material adjustment of the carrying amount of the assets or liabilities.

In applying Group accounting policies, management made the following judgments which substantially influence amounts in the consolidated financial statements:

Future-related assumptions

The most significant future-related assumptions and any other sources of forecasting uncertainty which pose significant risk involve a possibility that the carrying amount of assets and liabilities must be materially adjusted in the next fiscal year as outlined below. Group assumptions and estimates are based on parameters prevailing at the date the consolidated financial statements were prepared. These circumstances and assumptions regarding future developments may change however depending on market activity and conditions beyond the Group's control, and are only factored into assumptions after their occurrence.

a) Impairment of goodwill and intangible assets with indefinite useful lives

The Group conducts a review of goodwill and intangible assets at least once annually and whenever there are indications that an impairment of goodwill or intangible assets with indefinite useful lives may have occurred. Impairment tests conducted by the Group as of December 31, 2014 are based on calculations of recoverable amount using the discounted cash flow method. Cash flows are projected based on financial planning for the next five years. Cash flows beyond the planning period are projected using individual growth rates. Recoverable amount depends largely on the discount rate used in the discounted cash flow method, on expected cash inflows and outflows, and on the growth rate used for extrapolation.

The assumptions are based on premises derived from the currently available information. In particular, projected results are based on prevailing circumstances as well as realistic prognoses for future results both globally and for the industry. Major planning assumptions are based on planning discussions with important Group customers. Even though management feels that the assumptions it has used in calculating the recoverable amount are reasonable, unforeseeable changes in these assumptions could lead to impairment expenses that could have a negative impact on the financial position, financial performance and cash flows. The basic assumptions made to calculate the recoverable amount of goodwill for the individual CGUs, and of the intangible assets with indefinite useful lives as well as for sensitivity analysis are explained in detail in Note 6.2 and 6.3 of the Notes. As of December 31, 2014, the carrying amount of goodwill was 373,255 thousand euros (previous year: 350,850 thousand euros);the carrying amount of intangible assets with indefinite useful lives was 1,233 thousand euros (previous year: 1,233 thousand euros).

b) Measuring property, plant and equipment and intangible assets

Measuring property, plant and equipment and intangible assets requires the use of estimates for determining fair value at the time of acquisition, in particular regarding assets acquired in the scope of a business combination. Furthermore, the expected useful life of these assets must be determined. Management uses judgment in determining the fair value of the assets and their useful lives as well as deciding whether an indication of impairment of value requires impairment testing.

In fiscal year 2010, customer lists of the CGU Germany were written down due to the CGU's weak earnings situation. The positive effects resulting from recent years' restructuring measures and the much improved earnings situation of the CGU Germany led to impairment reversals in the amount of 21,000 thousand euros in fiscal year 2014.

As of December 31, 2014, the carrying amount of property, plant and equipment was 66,986 thousand euros (previous year: 67,355 thousand euros) and the carrying amount of intangible assets with a definite useful life was 304,113 thousand euros (previous year: 304,776 thousand euros). More details are provided in Note 6.3 and 6.4 of the Notes.

c) Taxes

There is uncertainty regarding the interpretation of complex tax provisions, changes in the tax code as well as the amount and date of future taxable events. Given the large scope of international business transactions and the long-term nature and complexity of existing contractual agreements, it is possible that differences between the actual results and assumptions made or future changes in such assumptions could lead to adjustments in taxable income or tax expense already recorded. The Group accrues provisions based on realistic estimates of the potential impact of tax audits in those countries in which it conducts transactions. The amount of such provisions is based on various factors, including for example experience gained from previous tax audits and differing interpretations of tax provisions by the taxable company and the tax authorities. Such diverging interpretations occur when a large number of different tax issues are present, dependent upon the conditions prevailing in the country of domicile of the respective Group company. Because the Group views the probability of legal dispute and corresponding tax liabilities as being low, no contingent liabilities were recorded.

At each reporting date, the Group evaluates whether future tax benefits are sufficiently likely to justify the recognition of deferred tax assets. This requires management to assess the tax advantages resulting from available tax strategies and future taxable income in addition to other positive and negative factors. Expected taxable income as projected in company forecasts is used in these assessments. The amount of deferred tax assets stated could be reduced if projected taxable income and the tax benefits to be gained from available tax strategies are lower, or if changes in current tax provisions limit the time frame or the scope of realization of future tax benefits.

Deferred tax assets are recorded for all unused tax loss carryforwards (including interest carryforwards) in the amount in which it is likely that taxable income will be available against which the tax loss and interest carryforwards can actually be used. When determining the amount of the deferred tax asset, management must exercise a substantial amount of discretion in estimating the amount and timing of future taxable income as well as future tax planning strategies.

The German tax groups have unrecognized corporate income tax loss carryforwards of 51,974 thousand euros (previous year: 71,562 thousand euros), trade tax loss carryforwards of 37,873 thousand euros (previous year: 57,273 thousand euros) and unrecognized interest carryforwards of 21,267 thousand euros (previous year: 23,467 thousand euros). The other Group entities have unrecognized income tax loss carryforwards of 6,106 thousand euros (previous year: 3,998 thousand euros. These amounts have been incurred by Group companies with a history of losses. The loss and interest carryforwards do not expire and cannot be offset against taxable income from other Group companies. The Group companies do not have any taxable temporary differences or tax structuring options that could lead to partial recognition of deferred tax assets. If the Group were able to capitalize all non-recognized deferred tax assets, the consolidated profit for the year would increase by 21,440 thousand euros (previous year: 27,204 thousand euros). In the current fiscal year, deferred tax assets in the amount of 2,444 thousand euros (previous year: 636 thousand euros) were recorded as interest carryforwards from the previous year on the basis of a reassessment of potential future taxable income or taxable temporary differences. Further details on taxes are provided in Note 5.10 of the Notes.

d) Pension benefits

The expenditure on post-employment defined-benefit plans and the present value of pension obligations are determined based on actuarial calculations. The actuarial calculation is based on various assumptions which may differ from actual future developments. This includes the determination of discount rates, future wage and salary increases, the mortality rate and future increases in pension benefits. Due to the complexity of calculations, the assumptions used and its long-term nature, a defined-benefit plan obligation is very sensitive to changes in these assumptions.

In determining the suitable discount rate, management is guided by interest rates of corporate bonds in the respective currency with at least an AA rating; these are adjusted by extrapolating them to the expected duration of the defined benefit plan obligation. Furthermore, management reviews the quality of the underlying bonds, and those exhibiting excessively large credit spreads are eliminated from the portfolio used to determine the discount rate, as these bonds are not considered high-grade. The mortality rate is based on mortality tables available to the public in the respective country. Future wage, salary, and pension increases are based on projected future inflation rates for the respective country.

All assumptions are reviewed at the reporting date of each year.

These estimates are very uncertain due to the long-term nature of such pension plans. As of December 31, 2014, the carrying amount of pensions and similar obligations was 19,662 thousand euros (previous year: 11,437 thousand euros). Further details are provided in Note 6.14 of the Notes.

e) Measurement of contingent consideration at fair value

Contingent consideration arising in the scope of business combinations is recorded as part of the business combination at fair value as of the date of acquisition. If the contingent consideration satisfies the definition of a derivative, and thus of a financial liability, it will be re-measured at fair value in subsequent periods as of each reporting date. Fair value is determined using discounted cash flows. Basic assumptions take into consideration the likelihood of fulfillment of every performance target as well as the discount rate.

On July 31, 2013 the SYNLAB GROUP acquired the Estonian company Medicap Holding AS and its subsidiaries Quattromed HTI Laborid OÜ in Estonia, Synlab Finland OY in Finland and synlab Lietuva (formerly UAB "SORPO") in Lithuania, thus successfully entering a new market in North Europe. Two contingent consideration elements were agreed as part of the acquisition price agreement with the former owners of Medicap Holding AS. Accordingly, a payment to the sellers of a maximum 2,700 thousand euros fell due in 2014 upon reaching a defined revenue threshold in Finland in fiscal year 2013. A further payment of a maximum 11,830 thousand euros was linked to revenue recorded in Finland in 2014 and will be due for disbursement in 2015. The Group estimated the expected contingent consideration at the time of acquisition and confirmed it at the end of fiscal year 2013. At both points in time, it was assumed that it was highly probable that the revenue targets for 2013 would be reached in view of the then prevailing business trends in Finland and thus payment of the purchase price would fall due in 2014. Based on the expected revenue trends, it was also assumed that the last tranche was very likely to be paid in 2015. Accordingly, the maximum contingent consideration was recognized in 2013, stating no range. Earn Out 1 was thus disbursed in full (2,700 thousand euros) to the former owners as the 2013 revenue targets for Finland were achieved. Developments in fiscal year 2014 differed from expectations however, with revenue in Finland failing to reach the anticipated levels. As the 2014 revenue targets for Finland were not met, a portion of the remaining provisions for contingent consideration (Earn Out 2) in the amount of 8,715 thousand euros was reversed though "Other operating income". Accordingly, as of December 31, 2014, only 3,115 thousand euros remained in the provisions for contingent consideration.

As of December 31, 2014, the fair value of consideration recorded under "Other provisions" was 8,127 thousand euros (previous year: 15,533 thousand euros).

f) Fair value of financial instruments

If the fair value of financial assets and liabilities recorded in the statement of financial position cannot be determined using data from an active market, it is determined using valuation techniques such as the discounted cash flow method. The inputs used in the model are based on observable market data whenever possible. If this is not possible, the determination of fair values is to a certain extent a matter of discretion. Discretionary decisions involve inputs such as liquidity risk, default risk and volatility. Changes in the assumptions with respect to these factors could have an impact on the recorded fair value of the financial instruments. As of December 31, 2014 obligations from financial liabilities recognized at fair value through profit or loss amounted to 546 thousand euros (previous year: 2,340 thousand euros); the value of financial assets recognized at fair value through profit or loss was 3 thousand euros.

2 Accounting policies (Continued)

g) Consolidation of medical collaborative laboratories and structured entities

Because of German fee regulations, local physicians outsource a wide range of laboratory procedures to medical collaborative laboratories ("CLs"), which may also be responsible for billing. The sole shareholders of such collaborative laboratories are local physicians co-operating to provide the required services in an economically viable way. The SYNLAB GROUP as a laboratory services provider thus sometimes has to cooperate with these CLs to render services.

Such cooperation is based on a contractual agreement between the SYNLAB GROUP and the CLs whereby either the SYNLAB GROUP or one of its medical care centers ("MCCs") leases laboratory space and equipment to the CLs while the CLs provide the personnel for the diagnostic services and are responsible for billing mail-in customers (i.e. the CL shareholders). Also, a SYNLAB GROUP employee generally serves as the CL's medical director and/or managing director. The collaborative laboratory functions as the MCC's billing entity.

Because collaborative laboratories may only cover their costs and may not generate any profit or loss, *de facto* the MCC receives the collaborative laboratory's net income for its services to the CL. This implies that all earnings or losses from CL operations are attributable to the MCCs, whose profitability thus varies. The MCCs are therefore subject to risks resulting from the CLs' business operations.

The partnership between MCC and CL is exclusive, i.e. the CL may only cooperate with the one MCC to which it is contractually bound, performing only such tasks as commissioned by the respective MCC. The CL's business operations are thus conducted for the benefit of the MCC, thus the MCC/SYNLAB GROUP has a material influence on the CL's operating profit.

In accordance with the usage agreement, the MCC generally provides the CL with laboratory space, equipment and other material resources, without which the CL cannot provide its services.

In addition, the CL's management usually consists of an MCC employee. Most of the benefits from the CL's business operations accrue to the MCC.

The SYNLAB GROUP thus sees itself as having control over the CLs even though it does not legally own a shareholding.

In Turkey, the SYNLAB GROUP owns 100% of the company Synlab ILK Referans saglik hizmetleri sanayi ve ticaret anonim sirketi (Synlab ILK). Synlab ILK is an operating laboratory company, but not entitled under Turkish law to bill third parties. The company Referans M-B saglik laboratuar hizmetleri sanayi ticaret ltd sirketi (Referans MB) thus serves as its billing entity. Referans MB is not an operating company, being only responsible for billing third parties for services rendered by synlab ILK.

The sole shareholder of Referans MB is a Group-external third party who, however, has pledged all shares to synlab ILK and thus does not have control over the shareholding. This shareholder is also a member of Synlab ILK's executive management. The SYNLAB GROUP thus has control over synlab ILK and also over that company's manager and his pledged shareholding. In addition, synlab ILK determines Referans MB profitability by setting sales prices vis-a-vis Referans MB.

This constellation has led the Group to declare that it has control over the company Referans MB.

3 Changes in accounting policies

3.1 New and revised standards and interpretations

The recognition and measurement methods used in preparing the consolidated financial statements of SYNLAB HOLDING generally correspond to the methods used in the previous year, with the exception of those changes in IFRS accounting standards whose application is mandatory as of January 1, 2014. The recognition and measurement methods used thus comply with the IFRS applicable for 2014 as adopted by the EU.

In fiscal year 2014, the Group took into account the following revised or new IFRS standards and interpretations, to the extent that these are applied.

3 Changes in accounting policies (Continued)

IAS 27 Consolidated and Separate Financial Statements According to IFRS (revised in 2011)

The revised IAS 27 was published in May 2011. This revised standard is to be adopted for the first time in reporting periods beginning on or after January 1, 2014. Following the publication of IFRS 10 and IFRS 12, the scope of application of IAS 27 was limited to accounting for investments in subsidiaries, jointly controlled entities and associated entities in a company's separate financial statements.

IAS 28 Investments in Associates (revised in 2011)

The revised IAS 28 was published in May 2011. This revised standard is to be adopted for the first time in reporting periods beginning on or after January 1, 2014. After the adoption of IFRS 11 and IFRS 12, the regulatory scope of IAS 28 was extended to require application of the equity method not only for associated companies, but for joint ventures as well.

IAS 32 Offsetting Financial Assets and Financial Liabilities (revised)

This amendment is to be applied for the first time in reporting periods beginning on or after January 1, 2014, and clarifies the phrase "currently has a legally enforceable right to set off the recognized amounts". It further clarifies application of netting criteria in IAS 32 with regard to settlement systems (e.g. central clearing houses) using gross settlement for business transactions performed at different points in time. As expected, these changes did not have an impact on the Group's financial position, financial performance and cash flows.

IFRS 10 Consolidated Financial Statements

IFRS 10 replaces the requirements for consolidated financial statements set out in IAS 27, Consolidated and Separate Financial Statements (revised 2008), and SIC-12, Consolidation—Special Purpose Entities. This revised standard is applicable in the European Union for the first time in reporting periods beginning on or after January 1, 2014. Based on currently applicable principles, IFRS 10 regulates which entities are to be included in the consolidated financial statements, based on a comprehensive definition of control. The pronouncement provides additional guidelines on interpretation of the concept of control in unclear instances. An investor has control over the investee when it has existing rights that give it exposure to the variable returns and the ability to direct the relevant activities that significantly affect the investee's returns. Significant changes to the previous requirements could arise in situations where an investor holds less than half of the voting rights in an entity, but has the ability to direct the relevant activities of the investee by other means.

IFRS 11 Joint Arrangements

This standard replaces IAS 31, Interests in Joint Ventures (amended 2008), and the interpretation SIC-13, Jointly Controlled Entities—Non-monetary Contributions by Venturers. IFRS 11 regulates the accounting for joint arrangements, the emphasis being on the type of rights and obligations arising from the arrangements rather than on their legal form. IFRS 11 classifies joint arrangements into two groups: joint operations and joint ventures. IFRS 11 eliminates the option of proportionate consolidation for joint venture companies. These companies are now included in the consolidated financial statements using the equity method only.

IFRS 12 Disclosure of Interests in Other Entities

IFRS 12 is a new and comprehensive pronouncement regulating disclosure requirements for all types of interests in other entities including joint arrangements, associated companies, structured entities, and off-balance sheet entities. This revised standard is to be applied for the first time in reporting periods beginning on or after January 1, 2014. This standard requires disclosure of information that enables users of financial statements to evaluate the nature of and risks associated with interests in other entities and the effects of those interests on a company's financial position, financial performance and cash flows.

The Group has applied IFRS 10, 11, 12 and the subsequent amendments to IAS 27 and IAS 28 for the first time on January 1, 2014. Based on corporate governance and potential supplementary agreements, companies are analyzed as to their relevant activities and variable returns, and the link between the variable returns and the extent to which their relevant activities could be influenced. Adoption of the new standards has not resulted in changes in the scope of consolidation. Only the notes to the Group's financial statements have been affected.

IFRS 10, IFRS 12 and IAS 27 Investment Entities

This amendment to IFRS 10, IFRS 12 and IAS 27 published in October 2012 is to be applied for the first time in fiscal years beginning on or after January 1, 2014. This amendment provides that 'investment entities' are exempt from the consolidation rules as per IFRS 10, and that all subsidiaries controlled by them are to be measured at fair value through profit or loss. An exception applies to investments in subsidiaries which provide services to the investment entity which are still to be consolidated as per IFRS 10. Parent companies of investment entities which are not themselves classified as investment entities thus have to include in their consolidated financial statements all companies which are controlled by an investment entity. An investment entity is defined as an entity which obtains funds from investors and provides investment management services to investors, thereby generating returns from capital appreciation, investment income, or both.

This amendment not applicable to the Group and therefore has no impact on the Group's financial position, financial performance or cash flows.

Amendment to IAS 36—Recoverable Amount Disclosures for Non-Financial Assets

The amendment to IAS 36 published in May 2013 is to be applied for the first time in fiscal years beginning on or after January 1, 2014. This amendment is intended to eliminate undesirable effects on disclosure requirements resulting from adoption of IFRS 13. It also requires disclosures on recoverable amounts for assets and cash-generating units (CGUs) for which an impairment loss was recognized or reversed during the reporting period. The amendment applies retrospectively. Early application is permissible.

This amendment only requires additional or modified disclosures and has no impact on the Group's financial position, financial performance or cash flows.

Amendment to IAS 39—Novation of Derivatives and Continuation of Hedge Accounting

The amendment to IAS 39 and IFRS 9 was published in June 2013 and is to be applied for the first time in fiscal years beginning on or after January 1, 2014. Under certain circumstances, this amendment provides for the continuation of hedge accounting in instances where derivatives designated as hedges are transferred to a central clearing house (novation) due to statutory or regulatory requirements. As the Company has no need of a clearing house, first-time application of this provision does not have an impact on its financial position, financial performance or cash flows.

3.2 Published standards whose application is not yet mandatory

The standards that have been published by the date of publication of the consolidated financial statements, but are not yet obligatory are listed below. This list refers to the published standards and interpretations that the Group assumes using sound business judgment that they will be applicable in the future. The Group intends to apply these standards as soon as they enter into force.

IFRS 9 Financial Instruments

On July 24, 2014 the IASB published the final version of the standard IFRS 9 Financial Instruments (IFRS 9 [2014]) encompassing all phases of the IFRS 9 project and replacing IAS 39 Financial Instruments: Recognition and Measurement as well as all earlier versions of IFRS 9—Financial Instruments. IFRS 9 is to be applied for the first time in fiscal years beginning on or after January 1, 2018. Early application of the final version of this standard (IFRS 9 [2014]) is permissible. This standard applies retrospectively. In addition, companies may only apply early the provisions concerning disclosure of value adjustments related to their own credit risk without having to apply all other provisions of IFRS 9 (2014) at the same time. This standard introduces new provisions regarding classification and measurement, impairment and hedge accounting. The provisions on classification and measurement as well as the changes regarding impairment are not expected to have an material impact on the Group's financial position, financial performance or cash flows. The provisions on hedge accounting will considerably simplify designation of hedging instruments and proof of effectiveness.

Amendment to IFRS 10 and IAS 28—Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

This amendment was published in September 2014 and is to be applied for the first time in fiscal years beginning on or after January 1, 2016. It clarifies that in a transaction involving an associate or joint venture the extent of gain or loss recognition depends on whether the assets sold or contributed constitute a business. This change only reduces existing conceptual differences between IFRS 10 and IAS 28 and has no material impact on the Group's the financial position, financial performance and cash flows. The Group is currently examining the future impact of the new standard on the financial position, financial performance and cash flows of the Group.

Amendment to IFRS 11—Acquisition of an Interest in a Joint Operation

The revised IFRS 11 was published in May 2014 and is to be applied for the first time in fiscal years beginning on or after January 1, 2016. Early application is permissible, subject to endorsement by the EU. This amendment stipulates that a joint operator accounting for an acquisition of shares in a joint operation, provided this is a business entity according to the provisions of IFRS 3 Business Combinations, must apply the accounting principles relating to business combinations according to IFRS 3 and other standards, and disclose all information prescribed by these standards. It further clarifies that existing shares in a joint operation shall not be subject to revaluation if further shares are acquired in the same joint operation and joint control remains unchanged. Furthermore, an exemption to the scope of application has been included, specifying that the change does not apply if the parties (including the reporting entity) sharing joint control are under common control by another party. This change applies both to the initial acquisition of shares in a joint operation and to any further acquisitions of shares in the same joint operation. The change applies prospectively.

These changes are not expected to have an impact on the representation of the Group's financial position, financial performance and cash flows.

IFRS 15—Revenue from Contracts with Customers

IFRS 15 was published in May 2014 and is to be applied for the first time in fiscal years beginning on or after January 1, 2017. Early application is permissible, subject to endorsement by the EU. This standard supersedes IAS 18 Revenue, IAS 11 Construction Contracts and various revenue-related interpretations. It introduces a new five-step model for revenue recognition to be applied to all contracts with customers. The key element of this standard is that an entity shall report revenue at the time of transfer of goods or services to the customer in the amount of the consideration it may expect to receive as compensation for the transfer of these goods or services. The IFRS 15 principles offer a structured approach to measurement and recognition of revenue applicable to all types of industries and companies. Compared with the current standards regulating revenue recognition, application of this new standard requires more estimates and judgments. Variable consideration may pose particular challenges. The Group is currently investigating the possible impact of an adoption of IFRS 15 on its consolidated financial statements.

Amendment to IAS 1—Presentation of Financial Statements

The IASB published some initial changes to IAS 1 in December 2014 as part of the overall disclosure initiative to appraise and improve presentation and disclosure requirements. The changes are to be applied for the first time in fiscal years beginning on or after January 1, 2016. They are intended to provide a focused use of judgment in the disclosure and presentation of information, clarifying for instance that materiality is applicable to the entire financial statements and that disclosure of immaterial information may render financial information less useful. The potential impact of the amendment to IAS 1 is currently being reviewed.

3 Changes in accounting policies (Continued)

Amendment to IAS 16 and IAS 38—Acceptable Methods of Depreciation and Amortization

The amendment to IAS 16 and IFRS 38 was published in May 2014 and is to be applied for the first time on a prospective basis in fiscal years beginning on or after January 1, 2016. Early application is permissible, subject to endorsement by the EU. These changes define the principle included in IAS 16 and IAS 38 that revenue represents the economic benefits generated by a business operation to whom the respective asset belongs, rather than representing the consumption of economic benefits resulting from utilizing the asset. Therefore, the ratio of realized revenue to projected future total revenue is not to be applied for depreciation of property, plant and equipment but rather only for the amortization of intangible assets, and only under very specific circumstances. The Group does not expect any impact from this amendment.

Amendment to IAS 19—Employee Contributions

The amendment to IAS 19 was published in November 2013 and is to be applied for the first time in fiscal years beginning on or after February 1, 2015. This amendment regulates the recording of contributions by employees or third parties to defined benefit plans as reducing service costs for services performed in the reporting period in question. The change applies retrospectively. Early application is permissible. The first-time application of this amendment is not expected to have any impact on the Group's financial position, financial performance or cash flows.

Improvements to IFRS (2010 - 2012)

The Improvements to the IFRS published in 2010 - 2011 have been compiled as an omnibus standard and were published in December 2013. It contains amendments to various IFRS, most of which are to be applied in fiscal years beginning on or after July 1, 2014. The Group has not yet applied the following amendments:

- IFRS 2: Clarifies the definition of vesting conditions and in particular definitions of service and performance conditions;
- IFRS 3: Clarifies the classification and measurement of contingent consideration in relation to business combinations. Accordingly, classification of an obligation to pay contingent consideration as a liability or as equity is solely determined based on IAS 32.11. A contingent consideration item is to be measured at fair value and the resulting changes recognized in profit or loss;
- IFRS 8: Requirements for the aggregation of operating segments and reconciliation of total segment assets with the entity's assets;
- IFRS 13: Clarifies rationale for amending IFRS 9 with regard to the measurement of short-term receivables and payables as a result of the publication of IFRS 13;
- IAS 16: Amendments to the treatment of accumulated depreciation under the revaluation method.
- IAS 24: Clarifies that external entities providing key planning, managerial and supervisory services (external key management personnel services) to a company are to be treated by the reporting company as a 'related party' in accordance with IAS 24, and includes an exemption for disclosures of compensation paid for these management services by an external management entity to its own employees.
- IAS 38: Amendments to the treatment of accumulated depreciation under the revaluation method.

The first-time application of this amendment is not expected to have any impact on the financial position, financial performance and cash flows of the Group.

Improvements to IFRS (2011 - 2013)

The Improvements to the IFRS published in 2011 - 2013 have been compiled as an omnibus standard and were published in December 2013. It contains amendments to various IFRS whose application is mandatory for fiscal years beginning on or after July 1, 2014. The Group has not yet applied the following amendments:

- IFRS 3: Clarifies the exclusion of the formation of joint arrangements from the scope of IFRS 3.

3 Changes in accounting policies (Continued)

- IFRS 13: Clarifies the scope of application of the portfolio exception as per IFRS 13.48 ff.
- IAS 40: Clarifies the scope of IFRS 3 and IAS 40 regarding classification of real estate as investment property or owner-occupied property.

The first-time application of this amendment is not expected to have any impact on the financial position, financial performance and cash flows of the Group.

IFRIC 21 Levies

The IASB published IFRIC Interpretation 21 in May 2013. This interpretation provides that a company operating in a particular market has to recognize a liability for a levy imposed by the competent authority at the time the business transaction triggering the levy occurs. The interpretation also clarifies that a levy which depends for example on reaching a defined minimum transaction volume may only be classified as a liability once the volume reaches the defined threshold. This interpretation is to be applied for the first time in fiscal years beginning on or after June 17, 2014. Early application is permissible. The first-time application of this amendment is not expected to have any impact on the financial position, financial performance and cash flows of the Group.

4 Business combinations and step acquisitions of minority interests

4.1 Business combinations in 2014

Acquisitions in 2014—Germany

As of February 1, 2014 the SYNLAB GROUP acquired 100% of shares in INTERLAB GmbH central lab services—worldwide (hereinafter “INTERLAB”). INTERLAB’s key competencies are the designing, implementing, supervising and conducting of clinical trials commissioned by the pharmaceutical and biotechnology industries; the firm also specializes in professional supervision of and consulting on drug approval procedures. As INTERLAB does not perform laboratory analyses itself but rather outsources these services to specialist medical laboratories, this acquisition was an important step in the vertical integration of the clinical trial business.

The following asset deals in the laboratory industry are part of the strategic expansion of laboratory activities in Germany:

Company	Country	Type	Date
GUT, Ges. f. Umweltf. u. Analytik mbH	DE	asset deal	04/01/2014
Laboratory HUI, Freiburg	DE	asset deal	05/01/2014
Laboratory Dr. Nae	DE	asset deal	01/01/2014

4 Business combinations and step acquisitions of minority interests (Continued)

At the date of acquisition or first-time inclusion in the scope of consolidation, the fair values of identifiable assets and liabilities were as follows:

	KEUR
Non-current assets	
Intangible assets	3,382
Property, plant and equipment	159
Current assets	
Inventories	26
Trade receivables	738
Other current assets	110
Cash and cash equivalents	2,597
Total assets	**7,012**
Non-current liabilities	
Non-current interest-bearing loans and borrowings	17
Provisions for deferred taxes	903
Current liabilities	
Short-term interest-bearing loans and borrowings	11
Other current provisions	25
Income tax liabilities	117
Trade payables	352
Other current financial liabilities	142
Other current liabilities	2,459
Total liabilities	**4,026**
Total identifiable net assets at fair value	**2,986**
Goodwill from company acquisition	11,540
Total consideration	**14,526**

The consideration breaks down as follows:

	KEUR
Purchase price 1	12,212
Purchase price 2	43
Purchase price adjustment resulting from contingent consideration (Earn Out 1)	261
Additional acquisition price from contingent consideration (Earn Out 2)	10
Additional acquisition price from contingent consideration (Earn Out 3)	2,000
Total consideration	**14,526**

The fair value of trade receivables is 738 thousand euros. The gross value of trade receivables is 747 thousand euros. Impairment losses on trade receivables were recognized in the amount of 9 thousand euros.

Goodwill in the amount of 11,540 thousand euros comprises the value of expected synergies from company acquisitions. Goodwill is attributed in full to the CGU Germany. It is assumed that only 401 thousand euros of total recognized goodwill will be tax deductible.

As from the acquisition date, the acquired company INTERLAB and the asset deals GUT and HUI have contributed 9,482 thousand euros in revenue and 228 thousand euros to the consolidated profit/loss for the year from continuing operations. The contribution by the laboratory Dr. Nae acquisition cannot be derived from the financial information of the acquiring company.

If the business combination for the share deal and all asset deals had taken place at the beginning of the year, revenue from continuing operations would have increased by 695 thousand euros and consolidated profit/loss for the year would have increased by 68 thousand euros.

4 Business combinations and step acquisitions of minority interests (Continued)

Cash outflow due to company acquisition:

	KEUR
Analysis of cash outflow due to company acquisition	
Total consideration	(14,526)
Outstanding additional acquisition price from contingent consideration (Earn Out 2)	10
Outstanding additional acquisition price from contingent consideration (Earn Out 3)	2,000
Cash consideration	**(12,516)**
Net cash of acquired company	2,597
Transaction costs of the acquisition	38
Transaction costs of acquisition not yet affecting cash flows	(38)
Actual cash outflow due to company acquisition	**(9,919)**

A contingent consideration element was part of the acquisition price agreement with the former owners of INTERLAB, which will fall due in 2015 on exceeding defined EBITDA thresholds in the financial statements as of December 31, 2014. The underlying asset deal with the former owners of the acquired laboratory HUI, Freiburg, also contains a contingent consideration element falling due in 2015. The earn-out was calculated on the basis of the respective laboratories' expected revenues in 2014. As it is assumed highly probable that all acquired companies will achieve the set targets, the Company recorded the respective contingent consideration elements at the maximum amounts, stating no range.

Acquisitions in 2014—Italy

Laboratory activities in Italy in 2014 increased considerably through the following acquisitions:

Company	Country	Type	Date
Centro Diagnostico Riminese S.r.l.	IT	share deal	04/02/2014
Poliambulatorio Dante—Società a responsabilità limitata	IT	share deal	04/02/2014
Laboratorio Analisi per la Diagnostica Medica—IV Miglio S.r.l.	IT	share deal	07/01/2014
Analisi Mediche Minerva S.r.l.	IT	share deal	10/01/2014
Nuovo Laboratorio San Giorgio Analisi Chimicobiologiche S.r.l & C.	IT	share deal	10/01/2014
Analisi Cliniche Alfa S.r.l.	IT	share deal	11/02/2014
Mater Dei S.r.l.	IT	share deal	11/02/2014

4 Business combinations and step acquisitions of minority interests (Continued)

At the date of acquisition or first-time inclusion in the scope of consolidation, the fair values of identifiable assets and liabilities were as follows:

	KEUR
Non-current assets	
Intangible assets	7,608
Property, plant and equipment	858
Deferred tax assets	40
Current assets	
Inventories	289
Trade receivables	1,331
Income tax receivables	6
Other current assets	504
Cash and cash equivalents	2,247
Total assets	**12,883**
Non-current liabilities	
Pensions and similar obligations	608
Other non-current provisions	140
Provisions for deferred taxes	2,382
Current liabilities	
Short-term interest-bearing loans and borrowings	225
Income tax liabilities	569
Trade payables	839
Other current financial liabilities	402
Other current liabilities	126
Total liabilities	**5,291**
Total identifiable net assets at fair value	**7,592**
Goodwill from company acquisition	7,702
Total consideration	**15,294**

The consideration breaks down as follows:

	KEUR
Purchase price 1	9,327
Purchase price 2	3,492
Purchase price 3	20
Purchase price adjustment resulting from contingent consideration (Earn Out 1)	2,285
Additional acquisition price from contingent consideration (Earn Out 2)	170
Total consideration	**15,294**

The fair value of trade receivables is 1,331 thousand euros. The gross value of trade receivables is 2,007 thousand euros. Impairment losses on trade receivables were recognized in the amount of 676 thousand euros.

Goodwill in the amount of 7,702 thousand euros comprises the value of expected synergies from company acquisitions. Goodwill is attributed in full to the CGU Italy. It is assumed that most of the goodwill recorded will not be tax deductible.

Since the time of acquisition, the acquired companies Laboratorio Analisi per la Diagnostica Medica—IV Miglio S.r.l., Nuovo Laboratorio San Giorgio Analisi Chimicobiologiche S.r.l & C., Mater Dei S.r.l. and Analisi Cliniche Alfa S.r.l. have contributed 939 thousand euros to revenue and reduced consolidated profit/loss for the year by 114 thousand euros.

The acquisitions Poliambulatorio Dante—Società a responsabilità limitata and Centro Diagnostico Riminese S.r.l. were merged with Synlab Emilia Romagna S.r.l. immediately upon their acquisition. The company Analisi Mediche Minerva S.r.l. was also merged with Synlab Italia S.r.l. immediately upon acquisition. Due to these mergers, no information is available on these three companies' contributions to revenue and consolidated profit/loss for the year, as the relevant information cannot be derived from the absorbing company's financial information.

If all new business combinations had taken place at the beginning of the year, revenues from continuing operations would have been higher by 5,703 thousand euros and consolidated profit/loss for the year from continuing operations would have been lower by 76 thousand euros.

Cash outflow due to company acquisition:

	KEUR
Analysis of cash outflow due to company acquisition	
Total consideration	(15,294)
Portion of fixed purchase price not yet affecting cash flows 1	7,000
Portion of fixed purchase price not yet affecting cash flows 2	3,210
Outstanding purchase price adjustment resulting from contingent consideration (Earn Out 1)	2,285
Outstanding additional acquisition price from contingent consideration (Earn Out 2)	170
Cash consideration	**(2,629)**
Net cash of acquired company	2,247
Transaction costs of the acquisition	159
Transaction costs of acquisition not yet affecting cash flows	(159)
Actual cash outflow due to company acquisition	**(382)**

A purchase price adjustment was agreed as part of the acquisition price of the company Mater Dei S.r.l. and its subsidiary Analisi Cliniche Alfa S.r.l., which was based on the difference between the value of current assets (without deferred tax liabilities and intangible assets) and liabilities. If the difference is positive, it is payable to the seller; if negative, a claim against the seller accrues. The company's statement of financial position as of October 31, 2014 serves as calculation basis. The range for this contingent purchase price adjustment is 2,171 thousand to 2,399 thousand euros; management estimated this amount at 2,285 thousand euros. In addition, a variable purchase price component was agreed, to be calculated on the basis of 2014 revenue less revenue from new customers from the date of acquisition relative to the 2013 revenue. The seller only receives payment if the difference is positive, capped at 1,000 thousand euros. The range for this contingent consideration amount is 153 thousand to 187 thousand euros. Management has valued the amount at 170 thousand euros. Both outstanding purchase price elements will probably be disbursed in April 2015.

Acquisitions in 2014—Others

The Group acquired a 100% shareholding in another Swiss environmental analytics company, Swiss BioAnalytics AG, as of July 31, 2014. Laboratory activities were also extended in Belgium with the purchase of a 100% shareholding in Laboratoire Leblois, Investigations Biologiques et Medicales SPRL as of April 28, 2014.

As of December 31, 2014 the SYNLAB GROUP purchased 51% of shares in the Norwegian company Lab1 AS, thus entering the Norwegian laboratory market. Lab1 AS will be fully consolidated as of December 31, 2014 as the purchase agreement contains a put option allowing the seller to sell his remaining 49% shareholding to the SYNLAB GROUP at any time.

4 Business combinations and step acquisitions of minority interests (Continued)

At the date of acquisition or first-time inclusion in the scope of consolidation, the fair values of identifiable assets and liabilities were as follows:

	KEUR
Non-current assets	
Intangible assets	347
Property, plant and equipment	1,429
Deferred tax assets	83
Current assets	
Inventories	165
Trade receivables	859
Other current assets	89
Cash and cash equivalents	1,987
Total assets	**4,959**
Non-current liabilities	
Non-current interest-bearing loans and borrowings	1,069
Pensions and similar obligations	413
Other non-current provisions	14
Provisions for deferred taxes	92
Current liabilities	
Other current provisions	139
Income tax liabilities	84
Trade payables	336
Other current financial liabilities	133
Other current liabilities	320
Total liabilities	**2,600**
Total identifiable net assets at fair value	**2,359**
Goodwill from company acquisition	2,217
Total consideration	**4,576**

The consideration breaks down as follows:

	KEUR
Purchase price 1	3,000
Purchase price 2	677
Additional acquisition price from contingent consideration (Earn Out 1)	411
Other purchase price components (put option)	488
Total consideration	**4,576**

The fair value of trade receivables is 858 thousand euros. The gross value of trade receivables is 910 thousand euros. Impairment losses on trade receivables were recognized in the amount of 51 thousand euros.

Goodwill in the amount of 2,217 thousand euros comprises the value of expected synergies from company acquisitions. Goodwill in the amount of 168 thousand euros is allotted to the CGU Switzerland, 1,298 thousand euros are allotted to the CGU Belgium and 749 thousand euros are allotted to the CGU North Europe. It is assumed that most of the goodwill recorded will not be tax deductible.

As from the acquisition date, the acquired companies have contributed 2,327 thousand euros to revenue and 16 thousand euros to consolidated profit/loss for the year from continuing operations.

If all new business combinations had taken place at the beginning of the year, revenues from continuing operations would have been higher by 4,767 thousand euros and consolidated profit/loss for the year from continuing operations would have been lower by 236 thousand euros.

* Increased by 5 thousand euros as of December 31, 2014 due to currency effects.

Three contingent consideration elements were agreed as part of the purchase price agreement with the former owners of Swiss BioAnalytics AG. Accordingly, additional payments to the former owners were contractually agreed on the condition that defined EBITDA targets are reached or exceeded in the financial statements for 2014, 2015 and 2016. Earn Out 1 will become due on June 30, 2015, Earn Out 2 on June 30, 2016 and Earn Out 3 on June 30, 2017; the respective ranges for these payments are between zero and: 700 thousand Swiss francs for Earn Out 1, 600 thousand Swiss francs for Earn Out 2 and 200 thousand Swiss francs for Earn Out 3. Based on company projections, it is not expected that payments for the earn-outs will reach maximum levels; they will very likely total 500 thousand Swiss francs (416 thousand euros) instead. Purchase price components from the acquisition of the Swiss company amounting to 166 thousand euros were transferred to external security deposit accounts. The money serves as collateral for outstanding purchase price payments until final agreement regarding the actual purchase price has been reached between the purchasing and selling parties. The collateral was recognized in "Other non-current assets" in the amount of 166 thousand euros. The corresponding liabilities to the sellers were recorded in "Other provisions" in the amount of 166 thousand euros. The external security deposit account will be closed on August 2, 2016 when the money is disbursed.

The collateral for the second purchase price instalment in the amount of 677 thousand euros relating to the acquisition of Laboratoire Leblois, Investigations Biologiques et Medicales SPRL has been paid into an external security deposit account which will be closed on May 31, 2015 when the money is disbursed to the seller. Collateral in the amount of 170 thousand euros guaranteeing the seller's contractual agreement obligations was transferred to an external security deposit account which will be closed on April 28, 2017. These security deposit accounts are accounted for as "Other non-current assets" and as purchase price liabilities in "Other current financial liabilities" or "Other non-current financial liabilities".

The financial liability from the put option in the Lab1 AS acquisition deal is included in outstanding purchase price liabilities. The put option does not have a price range. The value of the put option is calculated annually on the basis of EBITDA less net debt multiplied by a defined factor.

4.2 Step acquisitions of minority interests in 2014

In fiscal year 2014 the SYNLAB GROUP acquired further shares in Synlab ILK Referans saglik hizmetleri sanayi ve ticaret anonim sirketi and ANECLAB GmbH as follows:

Company	Country	Date of acquisition	Step acquisitions	Shareholding as of 12/31/2014
Synlab ILK Referans saglik hizmetleri sanayi ve ticaret anonim sirketi	TU	02/19/2014	49.00%	100.00%
Referans M-B saglik laboratuar hizmetleri sanayi ticaret ltd sirketi	TU	02/19/2014	0.00%	SPE—fully consolidated
ANECLAB GmbH	AT	09/15/2014	40.00%	100.00%

4 Business combinations and step acquisitions of minority interests (Continued)

The Group holds no shares in the company Referans M-B saglik laboratuar hizmetleri sanayi ticaret ltd sirketi (TRSYRM). This company serves as billing entity for Synlab ILK Referans saglik hizmetleri sanayi ve ticaret anonim sirketi (TRSYIL). As outlined under section 2.4. g), 'Consolidation of medical collaborative laboratories and structured entities', the structured entity TRSYRM is fully consolidated. Following the increase in the TRSYIL shareholding to 100%, the minority shareholdings in TRSYRM are also to be attributed to the SYNLAB GROUP. As there is no change in control of the company, this transaction is recorded in equity.

This step acquisition resulted in a reduction of capital reserves in the amount of 566 thousand euros.

	KEUR
Total consideration	1,297

4.3 Business combinations in 2013

Acquisitions in 2013—North Europe

On July 31, 2013 SYNLAB GROUP acquired the Estonian company Medicap Holding AS and its subsidiaries Quattromed HTI Laborid OÜ in Estonia, Synlab Finland OY in Finland and synlab Lietuva (formerly UAB "SORPO") in Lithuania, thereby opening up new markets in North Europe.

At the date of acquisition or first-time inclusion in the scope of consolidation, the fair value of identifiable assets and liabilities was as follows:

	KEUR
Non-current assets	
Intangible assets	20,413
Property, plant and equipment	1,802
Investment property	41
Current assets	
Inventories	349
Trade receivables	1,549
Other current assets	165
Cash and cash equivalents	246
Total assets	**24,565**
Non-current liabilities	
Non-current interest-bearing loans and borrowings	1,690
Provisions for deferred taxes	4,258
Current liabilities	
Short-term interest-bearing loans and borrowings	2,256
Trade payables	767
Other current financial liabilities	430
Other current liabilities	212
Total liabilities	**9,613**
Total identifiable net assets at fair value	**14,952**
Goodwill from company acquisition	20,957
Total consideration	**35,909**

4 Business combinations and step acquisitions of minority interests (Continued)

The consideration breaks down as follows:

	KEUR
Purchase price 1	20,576
Purchase price 2	1,470
Additional purchase price from contingent consideration (Earn Out 1)	2,635
Additional purchase price from contingent consideration (Earn Out 2)	11,228
Total consideration	**35,909**

The fair value of trade receivables is 1,549 thousand euros. The gross value of trade receivables is 1,549 thousand euros. There was no impairment of trade receivables.

Goodwill in the amount of 20,957 thousand euros represents the value of expected synergies from company acquisitions. Goodwill was allotted in full to the CGU North Europe. It is assumed that most of the goodwill recorded will not be tax deductible.

As from the acquisition date and up to December 31, 2013, the acquired companies have contributed 6,893 thousand euros to revenue and 409 thousand euros to consolidated profit/loss for the year from continuing operations.

If the business combination had taken place at the beginning of the year, revenue from continuing operations would have risen by 7,680 thousand euros and consolidated profit/loss from continuing operations would have increased by 237 thousand euros.

Cash outflow due to company acquisition:

	KEUR
Analysis of cash outflow due to company acquisition

Outstanding additional purchase price from contingent consideration (Earn Out 1)	2,635
Outstanding additional purchase price from contingent consideration (Earn Out 2)	11,228
Cash consideration	**(22,046)**
Net cash of acquired company	246
Transaction costs of acquisition	(1,634)
Transaction costs of acquisition not yet affecting cash flows	642
Actual cash outflow due to company acquisition	**(22,792)**

Two contingent consideration elements were agreed as part of the purchase price agreement with the former owners of Medicap Holding AS. Accordingly, payment to the sellers of a maximum amount of 2,700 thousand euros fell due in 2014 on reaching a defined revenue threshold in Finland in fiscal year 2013. A further payment of a maximum amount of 11,830 thousand euros was linked to revenue trends in Finland in 2014 and will be disbursed in 2015.

The Group estimated the expected contingent consideration at the time of acquisition and confirmed it at the end of fiscal year 2013. At both points in time it was assumed to be highly probable that the revenue targets would be reached in 2013 and thus that payment of the purchase price would fall due in 2014. Because of the expected revenue trends, it was also assumed that the last tranche, due in 2015, was very likely to be paid. Accordingly, the maximum contingent consideration was recognized in 2013, stating no range.

Earn Out 1 was thus disbursed in the full amount of 2,700 thousand euros to the former owners in 2014, as the 2013 revenue targets for Finland were achieved. Developments in fiscal year 2014 differed from expectations, however, with revenue in Finland failing to reach the anticipated levels. As the 2014 revenue targets for Finland were not met, a portion of the remaining provisions for contingent consideration (Earn Out 2) in the amount of 8,715 thousand euros was reversed though “Other operating income”. Accordingly, as of December 31, 2014, only 3,115 thousand euros remained in the provisions for contingent consideration.

4 Business combinations and step acquisitions of minority interests (Continued)

Acquisitions in 2013—Switzerland

Additional companies were acquired in Switzerland as of January 1, 2013 with the intention to strategically strengthen our operations in that market. Acquiring Bureco AG has enhanced our Environmental Analytics business segment. To complement the group's activities in the laboratory sector the MLO AG group of companies and their wholly-owned subsidiary Ärztelabor Westbahnhof AG as well as the 30% shareholding in Bakteriologisches Institut Olten BIO AG have been acquired. As the SYNLAB GROUP does not have control over Bakteriologisches Institut Olten BIO AG, the shareholding was recorded at (amortized) cost in "Other non-current assets".

At the date of acquisition or first-time inclusion in the scope of consolidation, the fair value of identifiable assets and liabilities was as follows:

	KEUR
Non-current assets	
Intangible assets	3,159
Property, plant and equipment	322
Other non-current assets	47
Deferred tax assets	108
Current assets	
Inventories	160
Trade receivables	815
Income tax receivables	1
Other current assets	291
Cash and cash equivalents	393
Total assets	**5,296**
Non-current liabilities	
Non-current interest-bearing loans and borrowings	167
Pensions and similar obligations	625
Provisions for deferred taxes	555
Current liabilities	
Other current provisions	138
Trade payables	278
Other current financial liabilities	233
Other current liabilities	34
Total liabilities	**2,030**
Total identifiable net assets at fair value	**3,266**
Goodwill from company acquisition	3,085
Total consideration	**6,351**

The consideration breaks down as follows:

	KEUR
Purchase price 1	4,390
Purchase price 2	742
Additional purchase price from contingent consideration (Earn Out 1)	1,022
Additional purchase price from contingent consideration (Earn Out 2)	197
Total consideration	**6,351**

The fair value of trade receivables is 815 thousand euros. The gross value of trade receivables is 815 thousand euros. There was no impairment of trade receivables.

Goodwill in the amount of 3,085 thousand euros represents the value of expected synergies from company acquisitions. Goodwill was allotted in full to the CGU Switzerland. It is assumed that most of the goodwill recorded will not be tax deductible.

4 Business combinations and step acquisitions of minority interests (Continued)

As from the acquisition date and until December 31, 2013 the acquired company Bureco AG has contributed 1,616 thousand euros to revenue and reduced the consolidated profit/loss for the year by 48 thousand euros. The acquired companies MLO AG and Ärztelabor Westbahnhof AG were merged with synlab Suisse SA as of January 1, 2013. Due to this merger, no details are available for these two companies because the relevant information cannot be derived from the absorbing company's financial data.

Cash outflow due to company acquisition:

	KEUR
Analysis of cash outflow due to company acquisition	
Total consideration	(6,351)
Portion of fixed purchase price not yet affecting cash flows 1	564
Outstanding additional purchase price from contingent consideration (Earn Out 1)	818
Cash consideration	**(4,969)**
Net cash of acquired company	393
Transaction costs of acquisition	(319)
Actual cash outflow due to company acquisition	**(4,895)**

For each company, contingent consideration was agreed as part of the purchase price agreement with the former shareholders of Bureco AG and MLO AG. With respect to Bureco AG, in addition to the purchase price disbursements in 2013, another payment of up to 150 thousand Swiss francs may become due on reaching defined EBITDA thresholds in fiscal year 2013. Conversely, another payment to the previous owners of MLO AG will become due if revenue for fiscal year 2013, after adjustment for defined special factors, exceeds a defined revenue threshold. As it is considered highly likely that the respective targets will be achieved, the Company recorded the respective contingent considerations in the maximum amounts, stating no range. In 2014 all outstanding purchase price provisions were reversed.

Acquisitions in 2013—Germany

In Germany the Group's presence has been increased in the laboratory services market for human medicine analytics in 2013 through share and asset deals. Acquisition of the laboratories Hürth-Knapsack and Wiesbaden, Hürth and Wiesbaden, has added capacity in our environmental analytics sector.

The acquisition of the hospital Steinlach-Klinik, Mössingen, had a strategic background: Pursuant to changes in German legislation in 2012, and in particular according to Sec. 95 (1) Social Security Code V (SGB V), only accredited hospitals and hospital operators, accredited medical practitioners, providers of non-medical dialysis services and non-profit entities accredited or authorized to provide medical care may establish new medical care units (Medizinische Versorgungszentren, MVZ). The SYNLAB GROUP aims at becoming accredited as founders of new medical care units, pushing for regional expansion in Germany through the foundation and subsequent combination or merger of existing and newly acquired medical care units. This was the main, if not the only, reason for acquiring Steinlach-Klinik which, at the time of acquisition, was an accredited hospital within the meaning of the above by virtue of an existing medical care contract with the German Association of Statutory Health Insurance Physicians (Kassenärztliche Vereinigung, KV), the purpose of which was achieving the status of an accredited operator of medical care units.

Company	Country	Type	DATE

Cytology practice Dr. Kuznik, Aalen	DE	asset deal	10/01/2013

4 Business combinations and step acquisitions of minority interests (Continued)

The purchase agreement for Institut für Pathologie Mannheim GbR, Mannheim, was concluded on January 1, 2013, but only became effective on fulfilment of a condition precedent on June 30, 2013. Therefore it was only included in the scope of consolidation as of June 30, 2013.

At the date of acquisition or first-time inclusion in the scope of consolidation, the fair value of identifiable assets and liabilities was as follows:

	KEUR
Non-current assets	
Intangible assets	18,825
Property, plant and equipment	1,955
Other non-current assets	19
Current assets	
Inventories	416
Trade receivables	1
Income tax receivables	10
Other current assets	634
Cash and cash equivalents	341
Total assets	**22,201**
Non-current liabilities	
Pensions and similar obligations	164
Other non-current provisions	20
Current liabilities	
Other current provisions	17
Trade payables	32
Other current financial liabilities	913
Other current liabilities	784
Total liabilities	**1,930**
Total identifiable net assets at fair value	**20,271**
Goodwill from company acquisition	17,532
Total consideration	**37,803**

The consideration breaks down as follows:

	KEUR
Purchase price 1	33,040
Purchase price 2	2,025
Shares in SYNLAB HOLDING issued, measured at fair value	2,484
Reduction in purchase price pursuant to the share transfer agreement	(374)
Reduction in purchase price pursuant to the share transfer agreement	(72)
Additional purchase price from contingent consideration (Earn Out 1)	350
Additional purchase price from contingent consideration (Earn Out 2)	350
Total consideration	**37,803**

The fair value of trade receivables is 1 thousand euros. The gross value of trade receivables is 1 thousand euros. There was no impairment of trade receivables.

Goodwill in the amount of 17,532 thousand euros represents the value of expected synergies from company acquisitions. Goodwill was allotted in full to the CGU Germany. It is assumed that most of the the recognized goodwill is tax deductible.

As from the acquisition date and up to December 31, 2013 Labomed GmbH/practice Dr. Arlt, Stuttgart, Institut für Pathologie Mannheim GbR, Mannheim, and practice Dres. Cremer, Kläs, Jung, Schulze, Mannheim, have contributed 6,248 thousand euros to revenue and increased consolidated profit/ loss for the year by 907 thousand euros. For all other asset deal acquisitions no details are available because the relevant information cannot be derived from the absorbing company's financial data.

4 Business combinations and step acquisitions of minority interests (Continued)

If the business combination for all share and asset deal acquisitions had taken place at the beginning of the year, revenue from continuing operations would have increased by 10,130 thousand euros and consolidated profit/loss from continuing operations would have increased by 1,962 thousand euros.

Cash outflow due to company acquisition:

	KEUR
Analysis of cash outflow due to company acquisition	
Total consideration	(37,803)
Portion of fixed purchase price not yet affecting cash flows 1	708
Shares in SYNLAB HOLDING issued, measured at fair value	2,484
Outstanding additional purchase price from contingent consideration (Earn Out 1)	48
Outstanding additional purchase price from contingent consideration (Earn Out 2)	350
Cash consideration	**(34,213)**
Net cash of acquired company	341
Transaction costs of acquisition	(105)
Transaction costs of acquisition not yet affecting cash flows	27
Actual cash outflow due to company acquisition	**(33,950)**

For the acquired companies practice Dres. Cremer, Kläs, Jung, Schulze, Mannheim, practice Dr. Arlt, Stuttgart and Labomed GmbH, Stuttgart, further purchase price portions amounting to 2,975 thousand euros were transferred to external security deposit accounts, in addition to the purchase price payments directly disbursed to the sellers. The money served as collateral for outstanding purchase price payments until final agreement between the purchasing and selling parties with regard to the actual purchase price has been reached. The collateral was recognized in “Other current assets” in the amount of 2,975 thousand euros. The corresponding liabilities to the sellers were recorded in “Other current financial liabilities” in the amount of 2,832 thousand euros, minus the purchase price reduction of 143 thousand euros. Beyond that there was an purchase price agreement with the former owner of laboratory Dr. Joachim stipulating a contingent consideration payment of up to 350 thousand euros on achieving defined revenue thresholds in fiscal years 2013 and 2014. In 2013 it was highly probable that all targets would be fully reached. Accordingly, a contingent consideration of up to 120 thousand euros was recognized, stating no range.

In 2014, provisions for outstanding contingent consideration purchase price elements were reversed through income in the amount of 195 thousand euros. The remaining outstanding purchase price portions from contingent consideration were disbursed. The respective security deposit accounts were closed.

Acquisitions in 2013—Others

With the intention to strategically strengthen our laboratory services in the Czech Republic, Italy and the United Arab Emirates, the SYNLAB GROUP acquired additional companies serving these markets:

Company	Country	Type	Date
Freiburg Medical Laboratory Middle East LLC, United Arab Emirates	AE	26.0% additional interest—share deal	08/01/2013
ANECLAB GmbH	AT	60.0%—share deal	01/01/2013
Aneclab s.r.o.	CZ	100.0%—share deal	01/01/2013
BH Vimperk services s.r.o.	CZ	100.0%—share deal	06/13/2013
RMA lab s.r.o.	CZ	100.0%—share deal	01/01/2013
Synlab Emilia Romagna S.r.l.	IT	100.0%—share deal	04/02/2013
Practice Dr. Panarella, Italy	IT	asset deal	04/02/2013
Spectromass Analitikai Labortórium Kft.	HU	100.0%—share deal	07/10/2012

The company acquisition in the United Arab Emirates involved a step-by-step increase in the shareholding from 44.0% to 70.0%. After revaluation of the shareholding, income of 294 thousand euros was recorded in the financial result.

4 Business combinations and step acquisitions of minority interests (Continued)

Together with the acquisition of the Czech company Aneclab s.r.o., its Austrian subsidiary, ANECLAB GmbH was also acquired.

Although the company Spectromass Analitikai Labortórium Kft. was acquired in 2012, it was only consolidated for the first time as of January 1, 2013.

At the date of acquisition or first-time inclusion in the scope of consolidation, the fair value of identifiable assets and liabilities was as follows:

	KEUR
Non-current assets	
Intangible assets	5,512
Property, plant and equipment	625
Other non-current assets	48
Deferred tax assets	55
Current assets	
Inventories	394

Other current assets	601
Cash and cash equivalents	1,344
Total assets	**11,197**
Non-current liabilities	
Pensions and similar obligations	528
Other non-current provisions	114
Other non-current financial liabilities	1,793
Provisions for deferred taxes	795
Current liabilities	
Short-term interest-bearing loans and borrowings	387
Other current provisions	129
Income tax liabilities	153
Trade payables	1,588
Other current financial liabilities	322
Other current liabilities	574
Total liabilities	**6,383**
Total identifiable net assets at fair value	**4,814**
Non-controlling interests	825
Goodwill from company acquisition	4,157
Total consideration	**8,146**

The consideration breaks down as follows:

	KEUR
Purchase price 1	4,076
Purchase price 2	1,301
Purchase price 3	451
Fair value of shareholding before acquiring control	1,696
Reduction in purchase price pursuant to the share transfer agreement	(815)
Additional purchase price from contingent consideration (Earn Out 1)	1,063
Additional purchase price from contingent consideration (Earn Out 2)	226
Additional purchase price from contingent consideration (Earn Out 3)	126
Other purchase price elements	22
Total consideration	**8,146**

4 Business combinations and step acquisitions of minority interests (Continued)

The fair value of trade receivables is 2,618 thousand euros. The gross value of trade receivables is 2,778 thousand euros. Impairment of trade receivables in the amount of 160 thousand euros was recognized.

Goodwill in the amount of 4,157 thousand euros represents the value of expected synergies from the acquisition of the company. Goodwill was allotted to the cash-generating units Czech Republic in the amount of 2,145 thousand euros, ROW in the amount of 1,714 thousand euros, and Hungary in the amount of 298 thousand euros. It is assumed that most of the goodwill recorded will not be tax deductible.

As from the acquisition date and up to December 31, 2013, the acquired companies have contributed 5,288 thousand euros to revenue from continuing operations and 385 thousand euros to the consolidated profit/loss from continuing operations. For all asset deal acquisitions no details are available because the relevant information cannot be derived from the absorbing company's financial data.

Had the business combinations taken place at the beginning of the year, revenue from continuing operations would have increased by 3,150 thousand euros, and consolidated profit/loss from continuing operations would have increased by 225 thousand euros.

Cash outflow due to company acquisitions:

	KEUR
Analysis of cash outflow due to company acquisitions	
Total consideration	(8,146)
Fair value of shareholding before acquiring control	1,696
Outstanding additional purchase price from contingent consideration (Earn Out 1)	54
Outstanding additional purchase price from contingent consideration (Earn Out 2)	127
Outstanding additional purchase price from contingent consideration (Earn Out 3)	27
Portion of other purchase price not yet affecting cash flows	21
Cash consideration	**(6,221)**
Net cash of acquired companies	1,344
Transaction costs for company acquisitions	(278)
Transaction costs for company acquisitions not yet affecting cash flows	166
Actual cash outflow due to company acquisitions	**(4,989)**

The Group agreed contingent consideration as part of the purchase price agreements with the former owners of the two Czech companies RMA lab s.r.o and BH Vimperk services s.r.o., and the former owners of the Italian company Synlab Emilia Romagna S.r.l. Payment of contingent consideration for the acquisitions in the Czech Republic (up to a maximum of 5,000 thousand Czech crowns and 1,400 thousand Czech crowns, respectively) depended on the achievement and payment for defined analysis volumes. Conversely, the purchase price agreement for the Italian acquisition provided for a contingent consideration in the amount of 100 thousand euros upon achievement of defined EBITDA thresholds. As it was assumed highly probable in 2013 that all acquired companies would achieve the set targets, the Company recorded the respective contingent consideration in the maximum amounts, stating no range.

In 2014 provisions for outstanding contingent consideration with respect to the acquisition of the Italian company were reversed in the amount of 100 thousand euros. As of December 31, 2014, 115 thousand euros were recognized as short-term provisions, and 25 thousand euros as long-term provisions for outstanding purchase price elements from contingent consideration relating to company acquisitions in the Czech Republic.

5 Notes on the consolidated statement of comprehensive income

5.1 Revenue

Revenue breaks down into the following items:

	2014 KEUR	2013 KEUR
Health insurance companies	250,265	239,370
Privately insured patients	215,479	203,038
Clinics	104,365	97,385
Physicians	40,723	26,323
Laboratories	33,566	31,683
Other revenue from human medicine	1,574	2,507
Revenue from human medicine	**645,972**	600,306
Revenue from environmental analysis	34,663	25,891
Revenue from other examinations	17,546	18,095
Revenue from veterinary medicine	11,844	10,538
Revenue from studies and expert opinions	8,102	3,611
Revenue from trading goods	7,257	10,394
Other revenue	3,978	2,330
	729,362	**671,165**

Revenue breaks down by region as follows:

	2014 KEUR	2013 KEUR
Germany	406,122	381,564
Switzerland	88,109	77,502
Italy	67,123	62,139
Czech Republic	46,119	45,177
Belgium	24,830	23,541
Hungary	24,747	25,246
Austria	20,314	20,165
North Europe	18,220	6,893
Slovakia	11,449	12,259
Other (ROW)	22,329	16,679
	729,362	**671,165**

5.2 Material expenses

Significant items included in material expenses are as follows:

	2014 KEUR	2013 KEUR
Reagents and expenses “per reported result”	(120,312)	(108,947)
Consumables	(41,891)	(50,529)
Cost of other purchased services/external analysis services	(16,452)	(15,684)
Merchandise	(3,201)	(3,227)
Other	719	1,007
	(181,137)	**(177,380)**

Consumables and reagents are the key materials in the laboratory analysis business. Master agreements in place with laboratory equipment manufacturers also provide for payments to suppliers based on the analyses performed on a “per reported result” billing basis. The lower consumables figures are attributable to a change in the reporting of non-production-related consumables, which are reported as “Other operating expenses” as of fiscal year 2014.

Material expenses break down by region as follows:

	2014	2013
	KEUR	KEUR
Germany	(110,997)	(113,315)

5.3 Personnel expenses

	2014	2013
	KEUR	KEUR
Salaries	(204,217)	(193,400)
Variable compensation	(3,770)	(2,234)
Other personnel expenses	(3,641)	(4,902)
Overtime compensation	(2,560)	(1,263)
Pension expenses	(1,556)	(1,531)
Expenses resulting from share-based payment	(543)	(148)
Social security	(40,815)	(37,202)
	(257,102)	**(240,680)**

During the fiscal year, pension insurance premiums were paid in the amount of 14,020 thousand euros (previous year: 13,466 thousand euros). In 2014 pension payments netted with vested pension benefit inflows in Switzerland yielded a total inflow of 3,696 thousand euros (previous year: net outflow of 1,517 thousand euros). The basis for the inflows of vested pension benefits in Switzerland is the prevailing Swiss federal act ruling that an employee may transfer vested pension benefits upon changing jobs. In addition, post-employment benefits (severance pay) were paid in the amount of 1,675 thousand euros (previous year: 2,053 thousand euros).

5.4. Expenses on rental and lease agreements

	2014	2013
	KEUR	KEUR
Buildings	(22,417)	(20,978)
Other fixtures and fittings, and office equipment	(5,387)	(3,042)
Lease payments for analysis equipment	(3,720)	(4,247)
	(31,524)	**(28,267)**

5.5 Transport expenses

Transport expenses in the amount of 22,215 thousand euros (previous year: 20,873 thousand euros) relate to external logistics providers, and in the amount of 5,463 thousand euros (previous year: 5,963 thousand euros) to expenses incurred for the Company's vehicle fleet.

5.6 Other operating income

	2014	2013
	KEUR	KEUR
Changes in value of contingent consideration	8,908	0
Income from reversal of provisions and liabilities	4,119	0
Passed-on consultancy expenses	3,287	0
Income from reversal of valuation allowances	2,832	3,385
Other out-of-period income	1,188	3,257
Dunning fees	737	492
Income from disposal of non-current assets	662	715
Income from foreign currency translation	498	156
Rental income	335	387
Reimbursements of travel expenses	322	265
Recoveries on derecognized receivables	17	72
Other	4,450	3,896
	27,355	**12,625**

Income from changes in value of contingent consideration is mainly attributable to the reversal of earn-outs in the acquisition of Synlab Finland OY in the amount of 8,715 thousand euros. Income from the reversal of provisions and liabilities mainly relates to provisions for legal disputes reversed as they were no longer required.

5.7 Other operating expenses

	2014	2013
	KEUR	KEUR
Temporary employees	(19,684)	(18,568)
IT and communication expenses	(15,751)	(15,119)
Administrative costs	(15,335)	(14,619)
Legal and consulting fees	(14,038)	(10,632)
Advertising and marketing expenses	(14,035)	(11,644)
Additions to allowances for doubtful accounts	(7,610)	(7,585)
Derecognition of receivables	(1,854)	0
Cost of premises	(9,062)	(8,150)
Repair and maintenance expenses	(8,414)	(6,959)
Personnel-related expenses	(8,011)	(7,795)
Energy expenses	(4,758)	(4,906)
Other taxes, duties and fees	(2,843)	(2,805)
Costs for preparation of the financial statements	(2,241)	(2,462)
Banking fees	(1,022)	(1,019)
Losses from foreign currency translation	(344)	(543)
Loss on disposal of non-current assets	(154)	(461)
Miscellaneous other operating expenses	(12,890)	(12,257)
	(138,046)	**(125,524)**

In addition to regular expenses for tax advice and accounting, legal and consulting fees in fiscal year 2014 include expenses related to company acquisitions (4,066 thousand euros; previous year: 2,535 thousand euros), legal disputes (2,469 thousand euros; previous year: 1,922 thousand euros), and restructuring (2,901 thousand euros; previous year: 1,669 thousand euros).

5.8 Depreciation, amortization, impairment and reversals of impairment

Depreciation, amortization and impairment relate to the following items:

	2014	2013
	KEUR	KEUR
Intangible assets	(44,915)	(43,013)
Property, plant and equipment	(20,487)	(19,506)
Other current assets (inventories, work in progress)	(362)	0
	(65,764)	**(62,519)**

Amortization of intangible assets consists mainly of amortization of customer lists from company acquisitions in the amount of 34,255 thousand euros.

Also, the following impairment reversals were recorded in fiscal year 2014:

	2014	2013
	KEUR	KEUR
Intangible assets	21,000	0
	21,000	**0**

These impairment reversals resulted from impairment testing on the CGU Germany as of December 31, 2014, adjusting respective customer list impairments recorded in 2010 for synlab Services GmbH.

5.9 Financial result

	2014	2013
	KEUR	KEUR
Exchange gains	951	933

Pensions and similar obligations	8,976	5,750	1,326	220
Other non-current provisions	1,038	532	517	(846)
Other non-current financial liabilities	1,669	1,438	230	(546)
Tax loss carryforwards (incl. interest carryforwards)	9,298	11,261	(2,140)	(360)
Other	710	728	(3)	(19)
Deferred income tax assets	**25,216**	**22,508**	**649**	**(1,726)**
Intangible assets	64,042	61,856	1,270	6,506
Property, plant and equipment	1,431	1,393	(40)	(375)
Other non-current assets	2,359	2,181	(140)	265
Inventories	57	0	(57)	0
Non-current interest-bearing loans and borrowings	3,139	3,588	450	(1,110)
Pensions and similar obligations	6,249	4,511	(1,249)	(213)
Other non-current provisions	2	2	0	(2)
Other non-current financial liabilities	2	0	(1)	0
Other	288	183	0	(2)
Deferred income tax liabilities	**77,569**	**73,714**	**233**	**5,069**

At the reporting date, those deferred tax assets and liabilities in the amount of 23,805 thousand euros (previous year: 21,222 thousand euros) were netted which fulfilled the prerequisites for offsetting. As a result, deferred tax assets in the amount of 1,411 thousand euros (previous year: 1,286 thousand euros) as well as deferred tax liabilities in the amount of 53,764 thousand euros (previous year: 52,492 thousand euros) were reported in the statement of financial position.

The deferred income tax liabilities included in line item “Pensions and similar obligations” are largely attributable to deferred tax liabilities on plan assets of the Swiss companies. The deferred tax portion attributable to actuarial gains and losses recorded in 2014 in other comprehensive income amounts to 1,249 thousand euros (previous year: 13 thousand euros).

The German tax groups have corporate income tax loss carryforwards of 73,874 thousand euros (previous year: 109,222 thousand euros), trade tax loss carryforwards of 59,773 thousand euros (previous year: 94,897 thousand euros) and interest carryforwards of 29,567 thousand euros (previous year: 23,467 thousand euros). The other Group entities have income tax loss carryforwards of 7,263 thousand euros (previous year: 5,100 thousand euros. The loss carryforwards and interest carryforwards can be used without restriction in various Group companies and be set off against future taxable income of the respective company or of another Group company. Due to insufficient levels of taxable income or opportunities for offsetting, no deferred tax assets were recorded for the German tax group for corporate tax loss carryforwards amounting to 51,974 thousand euros (previous year: 71,562 thousand euros), nor for trade tax loss carryforwards amounting to 37,873 thousand euros (previous year: 57,273 thousand euros), nor interest carryforwards amounting to 21,267 thousand euros (previous year: 23,467 thousand euros). Neither were any deferred taxes recorded on income tax carryforwards amounting to 6,106 thousand euros (previous year: 3,998 thousand euros) in any other Group companies due to insufficient taxable income.

Tax loss carryforwards or interest carryforwards may be carried forward in the same amount as the previous year without limitation.

5 Notes on the consolidated statement of comprehensive income (Continued)

As in the previous year, there were no deferred tax liabilities for unpaid taxes on profits of the Group's subsidiaries or associated companies as of December 31, 2014, as most of these profits may be absorbed by the receiving company without being taxed further. Temporary differences related to shares in subsidiaries and associated companies for which no deferred tax liabilities were recorded amount to a total of 9,139 thousand euros (previous year: 6,090 thousand euros).

17) Other acquisitions—2014	2,217	0
	373,255	**350,850**

Goodwill amounts are reported in the respective functional currency. Goodwill amounts outside the euro zone are as follows: Czech Republic: 1,511,544 thousand Czech crowns (previous year: 1,511,544 thousand Czech crowns); Switzerland: 94,884 thousand Swiss francs (previous year: 94,644 thousand Swiss francs); Hungary: 1,777,704 thousand Hungarian forint (previous year: 1,777,704 thousand Hungarian forint); United Arab Emirates: 8,352 thousand Emirati dirham; Norway: 6,773 thousand Norwegian kroner. Goodwill of the company synlab Lietuva (989 thousand Lithuanian litas), one of the 2013 acquisitions in North Europe, does not require any currency-related adjustments as the currency is pegged to the euro.

6.2 Goodwill impairment testing

For purposes of impairment testing of goodwill from business combinations, goodwill was allotted to the respective CGUs North Europe, Belgium, Germany, Italy, Austria, Switzerland, Slovak Republic, Czech Republic, Hungary and Rest of the World (ROW).

The balances at the respective reporting date are as follows:

	2014	2013
	KEUR	KEUR
Germany	84,881	73,341
Switzerland	78,912	77,125
Czech Republic	54,521	55,117
Italy	51,909	44,207
Belgium	43,204	41,907
Austria	21,957	21,957
North Europe	21,702	20,953
Slovak Republic	8,665	8,665
Hungary	5,634	5,927
ROW	1,870	1,651
Total	**373,255**	**350,850**

The Group conducted its annual impairment testing as of December 31, 2014. The CGU recoverable amount is determined by calculating a value-in-use using cash flow projections based on five-year financial plans approved by management. The following discount rates were used:

	WACC after tax	WACC before tax
North Europe	6.81%	8.38%
Belgium	6.31%	9.57%
Germany	5.66%	8.06%
Italy	7.95%	11.59%
Austria	5.74%	7.65%
Switzerland	5.86%	7.14%
Slovak Republic	6.85%	8.78%
Czech Republic	6.72%	8.30%
Hungary	9.21%	10.23%
ROW	10.10%	13.31%

CGU cash flows occurring after the five-year period are projected using a country-specific growth rate of 0% to 1.0%. As in the previous year, there was no need to recognize any impairment losses in the current fiscal year. The following assumptions used in calculating the CGU value-inuse are subject to estimation uncertainty:

- Gross profit margins,
- discount rates,
- price trends for materials and external services used, and
- growth rates used in cash flow projections outside the budget period.

Gross margins—Gross margins are determined using historical average values. Expected effects from changes due to collective wage reforms were taken into consideration in the scope of cash flow projections.

Revenue/EBITDA margin—Forecast revenue and CGU results are based on generally available economic data as well as industry information, and take into account not only basic market forecasts but also current trends and past experience.

Discount rates—Discount rates represent the current market expectations with respect to risks attributable to the respective CGUs, including risks related to interest rate effects and specific risks connected with assets for which estimated future cash flows have not been adjusted. The calculation of the discount rate takes into account the specific circumstances of the Group and its business segments, and is based on its weighted average cost of capital (WACC). The weighted average costs of capital take both borrowed capital and equity into account. Costs of equity are derived from the return on capital that equity investors of the Group expect to receive. Costs of borrowed capital are based on the interest-bearing debt for which the Group bears responsibility for making debt service payments. Due to the fact that business activities of the CGUs are very similar, business risk was included by using a company-specific beta factor. This beta factor is determined annually based on market data available to the public.

Pricing trends for materials and external services—The estimates are based on published price indices for countries supplying the materials, as well as data relating to specific materials. Forecast data are only used if available to the public (primarily in the European Union and Switzerland). Otherwise historical price trends are used as an indicator for future price trends.

Estimated growth rates—The growth rates are based on published sector-specific market research.

Assumption sensitivity

A discount rate increase of 1 percentage point would lead to the following goodwill impairment: CGU Czech Republic: 2,245 thousand euros, and CGU Slovak Republic: 1,308 thousand euros. A 0.5 percentage point reduction in the respective growth rate would cause a goodwill impairment in the CGU Slovak Republic in the amount of 329 thousand euros. A simultaneous 1 percentage point discount rate increase and a reduction in the respective growth rate by 0.5 percentage points would cause the following goodwill impairments: CGU Czech Republic: 7,222 thousand euros, CGU Belgium: 3,231 thousand euros, CGU Slovak Republic: 1,831 thousand euros, CGU North Europe: 313 thousand euros.

There would be no impairment of other goodwill not listed above if these assumptions were to change.

The customer lists primarily represent customer relationships with doctors and hospitals. These customer lists consist of customer relationships acquired in the scope of corporate transactions and so-called signing fees under supply agreements with hospitals. The additions of customer lists and trademarks in fiscal year 2014 are largely attributable to company acquisitions in Italy.

	2014	2013
	KEUR	KEUR
Customer relationships with doctors	226,445	228,377
Customer relationships with hospitals	15,043	17,009
Customer relationships with third-party laboratories	13,967	15,360
Customer relationships in the area of environmental analysis	10,246	13,827
Signing fees	10,034	4,827
Customer relationships with veterinarians	5,419	5,961
Order backlog INTERLAB	562	0
	281,716	**285,361**

The category 'signing fees' includes the agreements between synlab Suisse SA and the Genolier Swiss Medical Network hospital, and between synlab Czech s.r.o. and the hospital Mělnická zdravotní, a.s. The carrying amount of customer relationships has remained unchanged year-on-year, which is largely due to write-ups of customer lists in the amount of 21,000 thousand euros. In fiscal year 2010 customer lists of the CGU Germany were written off due to the CGU's weak earnings situation. The positive effects resulting from recent years' restructuring measures and the much improved earnings situation of the CGU Germany led to impairment reversals in the amount of 21,000 thousand euros in fiscal year 2014.

Customer relationships break down into the following currency areas:

	2014	2013
	KEUR	KEUR
Euro	200,295	199,225
Swiss franc	45,518	49,267
Czech crown	31,546	31,541
Hungarian forint	3,171	3,869
Emirati dirham	1,100	1,360
Lithuanian litas	86	99
	281,716	**285,361**

Amounts recorded under "Concessions, industrial property rights and similar rights" mainly comprise acquisition costs for laboratory information systems.

In addition, 1,233 thousand euros were recorded as the value of one subsidiary's right to the status of an accredited operator of medical care units under "Industrial property rights". This right remains valid as long as the company operates as an accredited hospital, the legal framework does not change, and the company meets the medical care contract conditions, thus it is currently presumed that the company will benefit from this right for an indefinite period. The Group conducted annual impairment testing on December 31, 2014. The recoverable amount is determined by calculating value-in-use applying cash flow projections based on five-year financial plans approved by management. CGU cash flows occurring after the five-year period are projected using a growth rate of 0.5%. A discount rate of 5.66% after tax/8.06% before tax was applied. There was no need to recognize an impairment loss in the fiscal year under review. Company management is of the opinion that, based on sound business judgment, no change in any of the basic parameters used to determine value-in-use would cause the carrying amount of the right to accredited operator status to significantly exceed its recoverable amount.

as of December 31, 2012	12,542	31,724	1,295	17,011	1,922	64,494

Investments in non-Group buildings primarily concern leasehold improvements in rented space required for performing laboratory services. The technical equipment and machines consist mainly of analysis equipment.

The carrying amount of technical equipment, fixtures and fittings, and office equipment as well as software and license agreements held under financial lease arrangements as of December 31, 2014 was 22,074 thousand euros (previous year: 25,784 thousand euros). Of the additions during the fiscal year, 5,354 thousand euros (previous year: 5,785 thousand euros) were attributable to technical equipment, fixtures and fittings, and office equipment held under financial leases and lease-purchase agreements.

6 Information on the consolidated statement of financial position (Continued)

6.5 Investments in companies accounted for using the equity method

The changes in shareholdings held in associated companies were as follows:

	2014	2013
	KEUR	KEUR
Shares in associated companies as of January 1	2,325	1,166
Additions to the scope of consolidation (using the equity method)	0	2,016
Changes in shareholdings recorded in equity	881	0
Dividends paid	(120)	0
Eliminations from the scope of consolidation (using the equity method)	0	(1,432)
Share in net income	(470)	575
	2,616	**2,325**

The changes in shareholdings recorded in equity are largely attributable to the resolved increase in capital at KRH Labor GmbH as of December 19, 2014 increasing the shareholding in associated companies by 784 thousand euros. Dividend payments in the amount of 120 thousand euros resulted in a shareholding decrease in MED Laborunion.

The shareholding in the company MED Laborunion GmbH was consolidated using the equity method for the first time in fiscal year 2013.

The joint venture shareholdings were as follows:

	2014	2013
	KEUR	KEUR
Shares in associated companies as of January 1	1,166	762
Additions to the scope of consolidation (using the equity method)	713	0
Share in net income	(207)	0
	506	**0**

As of June 1, 2014 the Group, in association with another partner company, formed a new joint venture company, The Christie Pathology Partnership LLP, United Kingdom, with the SYNLAB GROUP owning more than 50.0% of voting rights. A 50.0% share in profit and a 50.1% share in losses were contractually agreed.

The company is accounted for using the equity method.

6.6 Other non-current assets

"Other assets" include the following:

	2014	2013
	KEUR	KEUR
Security deposits (notary public escrow account)	336	0
Security deposits	267	509
Loans to Schubert Medizinprodukte GmbH & Co. KG, Germany	83	113
Loan to Sannax SA, Switzerland	42	41
Loan to Permanence Basel AG, Switzerland	59	152
Loan to Praxis Permanence Winterthur AG, Switzerland	49	48
Loan to medical practice Delpretti, Switzerland	30	0
Other loans	52	0
Advance payment for the acquisition of laboratory practice Dr. Nae, Germany	0	462
Other financial assets	424	220
	1,342	**1,545**

The purchase price portions for acquisitions in Belgium and Switzerland not yet due were transferred to a notary public escrow account.

6 Information on the consolidated statement of financial position (Continued)

6.7 Inventories

	2014	2013
	KEUR	KEUR
Raw materials, consumables and supplies	15,192	15,151
Work in progress	76	1,194
Prepayments rendered	1,838	2,867
	17,106	**19,212**

Raw materials, consumables and supplies principally include consumable materials used in performing analyses, as well as small equipment provided to doctors for pre-analysis. Work in progress primarily involves semi-processed samples.

The Group recorded impairments in the amount of 80 thousand euros (previous year: 74 thousand euros) for small preanalysis equipment reported under "Inventories". Inventories were valued exclusively at cost. Write-downs refer to inventory that can no longer be used or sold.

6.8 Trade receivables

	2014			2013		
	Gross	Impairment	Net	Gross	Impairment	Net
	KEUR	KEUR	KEUR	KEUR	KEUR	KEUR
Receivables from						
Health insurance companies	42,028	(3,957)	38,071	37,816	(3,126)	34,690
Privately insured patients	28,294	(3,904)	24,390	32,381	(7,123)	25,258
Hospitals	21,468	(3,780)	17,688	25,719	(1,560)	24,159
Laboratories	16,823	(2,043)	14,780	17,210	(2,078)	15,132
Doctors	9,064	(740)	8,324	7,716	(1,389)	6,327
Others	20,680	(4,241)	16,439	14,560	(1,679)	12,881
	138,357	**(18,665)**	**119,692**	**135,402**	**(16,955)**	**118,447**

Trade receivables from third parties do not bear interest, fall due in between 30 and 120 days and break down as follows:

	Carrying amount	Gross receivables	Thereof impaired	Thereof not impaired			
				not due	past due		
					< 3 months	3 < 5 months	> 5 months
December 31, 2014	119,692	138,357	41,202	73,685	16,301	1,948	5,221
December 31, 2013	118,447	135,402	58,175	58,200	16,262	1,420	1,345

Information regarding the terms for receivables from related parties in the amount of 1,136 thousand euros (previous year: 1,773 thousand euros) can be found in section 9.

Changes in the impairment loss account were as follows:

	KEUR
Balance as of December 31, 2012	**13,036**
Utilization	(288)
Additions recognized in profit or loss	7,585
Foreign currency translation	7
Reversals	(3,385)
Balance as of December 31, 2013	**16,955**
Utilization	(3,074)
Additions recognized in profit or loss	7,610
Foreign currency translation	6
Reversals	(2,832)
Balance as of December 31, 2014	**18,665**

6.9 Other current assets

The other current assets break down as follows:

	2014 KEUR	2013 KEUR
Prepaid expenses	3,330	3,280
Receivables from majority shareholder	2,385	0
Prepayments to and overpayments by suppliers	2,321	1,515
Receivables from associated companies	2,046	474
Claims for reimbursement of municipal tax	904	729
Receivables from majority shareholder	902	0
Advance payments for ancillary costs and deposits	760	709
Security deposits (notary public escrow account)	677	2,975
Claims for reimbursement of sales tax	198	1,637
Receivables from employees	197	205
Receivables from related companies	39	0
Purchase price receivables	0	354
Other	1,970	4,985
	15,729	**16,863**

Receivables from majority and minority shareholders amounting to 2,385 thousand euros and 902 thousand euros, respectively, are attributable to passed-on expenses of SYNLAB HOLDING in 2014. These were passed on to all SYNLAB HOLDING shareholders pursuant to the resolution passed at the shareholders meeting on December 19, 2014.

Receivables from associated companies include receivables from KRH Labor GmbH in the amount of 1,673 thousand euros.

The fixed portion of the acquisition price of Laboratoire Leblois, Investigations Biologiques et Medicales SPRL in the amount of 677 thousand euros was deposited in the notary public escrow account. This amount was first paid to the trustee's escrow account. The trustee guarantees appropriate disbursement of the purchase price to the seller once the acquisition has been completed. In the previous year, the line item included escrow deposits for future disbursements relating to the following acquisitions: Purchase price for the company Dr. Arlt at MVZ Stuttgart: 2,000 thousand euros; purchase price for the company practice Cremer, Kläs, Jung, Schulze at Humangenetik Mannheim: 940 thousand euros; purchase price for the company Labomed Stuttgart at Steinlach-Klinik: 25 thousand euros.

For further information please refer to section 7 'Financial instruments and financial risk management'.

6 Information on the consolidated statement of financial position (Continued)

6.10 Cash and cash equivalents

	2014	2013
	KEUR	KEUR
Bank deposits denominated in		
Euro	64,443	52,721
Swiss franc	14,816	4,414
Hungarian forint	2,497	3,041
Czech crown	2,383	1,976
Other currencies	2,673	1,708
	86,812	63,860
Cash on hand and checks	428	719
	87,240	**64,579**

As of the reporting date, cash and cash equivalents included a liquidity reserve in the amount of 19.6 million euros for acquisitions (previous year: 17.4 million euros). As of December 31, 2014, the Group held unused credit facilities in the amount of 90,745 thousand euros (previous year: 2,961 thousand euros).

6.11 Subscribed capital and reserves

6.11.1 Subscribed capital

	2014	2013
	KEUR	KEUR
Registered capital	2,771	2,762
Contributions for an approved capital increase	0	9
	2,771	**2,771**

Registered capital is made up of shares with a nominal value of EUR 1.00 and equal voting rights per share. The distribution of shares is as outlined in the list of shareholders.

As per a resolution passed at the shareholders meeting on June 29, 2012, management was authorized, subject to advisory board approval, to increase the Company's registered capital until July 12, 2017, once or several times, by up to a total amount of 1,350,000 euros by issuing additional shares for cash or in-kind contributions.

The purchase of treasury shares in fiscal year 2011 resulted in a reduction of subscribed capital by 4 thousand euros.

In connection with the acquisition of Laboratoire d'analyses medicales Dr. Jean Collard SPRL and Laboratoire Biosemois SPRL in 2012 it was resolved to increase subscribed capital by 66 thousand euros, utilizing authorized capital. The authorized capital in the amount of 1,350 thousand euros was thus reduced and the change recorded on January 17, 2013. The amount exceeding subscribed capital (15,935 thousand euros) was recorded in "Capital reserves".

Registered capital further increased by 9 thousand euros in fiscal year 2013 as a result of the acquisition of the company Institut für Pathologie Mannheim GbR. Authorized capital thus decreased by that amount to 1,275 thousand euros. The amount exceeding the subscribed capital in the amount of 2,475 thousand euros was recorded in "Capital reserves".

There were no further changes to registered capital in fiscal year 2014.

6.11.2 Capital reserves

	2014	2013
	KEUR	KEUR
Capital reserves	**199,661**	**199,684**

6 Information on the consolidated statement of financial position (Continued)

Capital reserves increased through share-based payments in the amount of 543 thousand euros; for further information please refer to section 8 'Share-based payment'. Decreases in reserves resulted mainly from increasing the majority shareholding in Synlab ILK Referans saglik hizmetleri sanayi ve ticaret anonim sirketi (Synlab ILK) up to 100% ownership. On February 19, 2014 the SYNLAB GROUP acquired the remaining 49% shareholding in Synlab ILK for a purchase price of 1,277 thousand euros. The SYNLAB GROUP also acquired the remaining 60% of shares in ANECLAB GmbH for a purchase price of 20 thousand euros. The respective differences between the purchase price and carrying amount of the transferred non-controlling interests was recorded under "Capital reserves" as transactions with owners in accordance with IFRS 10.23. The total effect of these transactions amounts to 566 thousand euros.

6.11.3 Accumulated other comprehensive income

Exchange differences from foreign operations

The reserve for currency translation differences serves to account for differences resulting from translation of the financial statements of foreign subsidiaries. As of December 31, 2014, accumulated other comprehensive income included currency translation differences in the amount of 14,546 thousand euros (previous year: 12,888 thousand euros).

Actuarial gains and losses recorded in equity and any related deferred taxes

Additionally, pursuant to the revised IAS 19, actuarial gains and losses and any related deferred taxes have been recorded directly in equity since 2013. For fiscal year 2014, the Group recorded actuarial losses and related deferred taxes in the amount of 5,492 thousand euros (previous year: gain of 42 thousand euros), resulting in a net negative balance of 5,805 thousand euros as of December 31, 2014 (previous year: −313 thousand euros).

6.12 Disbursed and proposed dividends

As in the previous year, no dividends were disbursed by the parent company during the year under review. A dividend distribution will not be recommended at the shareholders meeting.

6.13 Interest-bearing loans and borrowings

	Non-current		Current		Total	
	12/31/2014	12/31/2013	12/31/2014	12/31/2013	12/31/2014	12/31/2013

Total	**488,290**	**466,406**	**30,633**	**41,844**	**518,923**	**508,250**

As of January 24, 2012, SYNLAB HOLDING and various subsidiaries refinanced outstanding bank loans, concluding a new loan agreement with a volume of 395,000 thousand euros and an uncommitted acquisition facility agreement for 75,000 thousand euros. This senior facilities agreement comprises committed facilities consisting of an amortizing tranche A1 in the amount of 115,000 thousand euros, and another tranche A2 due at final maturity in the amount of 160,000 thousand euros. In addition, further committed tranches for refinancing mezzanine loans and a revolving credit facility of 25,000 thousand euros were granted. On March 28, 2013 the Company agreed on the drawdown under this credit agreement of another tranche B2 on June 28, 2013 in the amount of 75,000 thousand euros, and re-designation of certain portions of tranches A2 and A3 and of the acquisition committed facility to a new tranche B1 in the amount of 105,261 thousand euros. On December 18, 2013, it was further agreed to change the credit agreement to allow for converting 69.17% of the amortizing tranche A1 to tranche A5 due at final maturity as of January 31, 2014. In 2014, two additional tranches of the revolving credit facility in the amount of 10,000 thousand euros and of the previously uncommitted acquisition facility in the amount of 110,000 thousand euros were transferred to other credit lines already open, which, as of the balance sheet date, had been drawn upon in the nominal amounts of 7,000 thousand and 30,000 thousand euros, respectively.

The credit facility agreement was concluded for euro amounts, but amounts may also be drawn in tranches in Swiss francs or Czech crowns, or by request in another freely convertible currency approved by the agent. The exchange rate is fixed at the time of disbursement. Interest rates are based on the one-month Euribor, the three-month Libor, or the three-month Pribor rate. The current margin for tranche A1 and the revolving credit facility is 4.25%, while all other tranches have a margin of 4.75%. Margin changes depend on changes in certain financial covenants.

All facilities have a maturity date of January 24, 2017; facility A1 tranches are repayable in semi-annual installments ranging between 9.0% and 10.5% of the nominal amount.

Between 50% and 100% of interest accruing for the facilities A1 to A4 is to be secured through a supplementary hedging contract.

Expenses incurred in 2012 through refinancing in the amount of 13,028 thousand euros were capitalized as financing cost pursuant to IAS 39, and will be amortized over the term of the loan agreement. In 2013, further transaction costs in the amount of 7,503 thousand euros were incurred due to the facility agreement changes and pledging. This amount was partly allocated to the new tranches and partly to the original tranches as subsequent acquisition expenses. In 2014, further transaction costs in the amount of 1,045 thousand euros were capitalized.

The Group assumed a mezzanine financing agreement through the acquisition of synlab Services Group in the amount of 10,000 thousand euros. Profit participation rights of the type 'equiNotes-Instrument Type A*' (profit participation rights capital II) were made available to FORCE 2005-1 LIMITED PARTNERSHIP on November 30, 2006, and contributed to the company as of January 1, 2010. The profit participation rights capital II is recorded in the amount of 10,000 thousand euros under "Interest-bearing loans and borrowings". The company was obligated to pay the profit participation rights holder a return of 6.5% p.a. on the nominal amount of the profit participation rights capital until the agreed maturity on December 30, 2013, plus variable interest of 0.25% p.a., contingent on profitable ordinary operations. The capital to be repaid for the profit participation rights corresponds to the nominal amount on the start date. Participation in losses was not contractually agreed. Ordinary termination rights for the parties were not provided for. Claims to payment based on the profit participation rights were subordinate to current and future claims of all creditors of the company not fulfilling the criteria for equity according to the accounting principles of German Commercial Code, and equal in priority to current and future claims that fulfill these criteria. The subordination did not apply to claims from profit participation rights which arise or become due in the absence of insolvency or liquidation of the company. Servicing of the profit participation rights was not restricted to future revenues or profits. The agreed repayment date was December 31, 2013. However, the bank only debited the repayment on January 2, 2014.

6 Information on the consolidated statement of financial position (Continued)

The following table shows the calculation of total liquidity as the sum of the freely accessible credit facilities, measured at the rate on the initial borrowing date, plus cash and cash equivalents.

	December 31, 2014

Under the Senior Facilities Agreement, the Group pledged all shares held in the following companies, thus making these companies jointly and severally liable: synlab Holding GmbH, synlab Services GmbH, synlab Verwaltungs und Beteiligungs GmbH, synlab Holding Austria GmbH, synlab Suisse SA, synlab Slovakia s.r.o., Steinlach-Klinik GmbH, AMS analyses médicales services SA, Laboratoire d'Analyses Médicales Dr. Jean Collard SPRL, Synlab Hungary Kft., Institut für medizinische und chemische Labordiagnostik mbH, synlab czech s.r.o., synlab genetics s.r.o.; synlab Holding Italy S.r.l; Synlab Italia S.r.l., synlab Holding Finland Oy, synlab Finland Oy, synlab Medizinisches Versorgungszentrum Leverkusen GmbH, synlab Medizinisches Versorgungszentrum Weiden GmbH, synlab Medizinisches Versorgungszentrum Leinfelden-Echterdingen GmbH, synlab Medizinisches Versorgungszentrum Augsburg GmbH, synlab Medizinisches Versorgungszentrum Heidelberg GmbH, synlab Medizinisches Versorgungszentrum Kassel GmbH, synlab Medizinisches Versorgungszentrum Trier GmbH, synlab Medizinisches Versorgungszentrum Berlin GmbH, synlab.vet GmbH and synlab Umweltinstitut GmbH, synlab Labor München Zentrum GbR, synlab Medizinisches Versorgungszentrum Humangenetik Mannheim GmbH, synlab Medizinisches Versorgungszentrum Stuttgart GmbH.

6.14 Pensions and similar obligations

The provisions for pensions, and other post-employment benefits as described below and reported in the IFRS consolidated statement of financial position as of December 31, 2014 were calculated by an actuary and substantiated in an actuarial expert opinion, unless otherwise indicated.

6.14.1 Obligations in Switzerland

Pension obligations

Swiss statutes require the Group to provide occupational pension schemes for employees and pay contributions into pension funds. The Group fulfills this obligation by way of a defined benefit plan. Due to regional legal differences it may be necessary to make supplementary payments for some employees when they retire. Pension obligations and current service cost were calculated using the projected unit credit method, applying a discount rate of 1.19% (previous year: 2.25%) and a salary increase rate of 2.00% (previous year: 2.00%). The staff turnover discount as per the Swiss Federal Law on Occupation Retirement (BVG 2010) was between 1.29% and 24.16% (previous year: 1.29% and 24.16%). Mortality, invalidity and withdrawal probabilities were calculated in accordance with BVG 2010.

Long-service awards

Long-services award commitments in Switzerland are based on collective or other agreements granting employees long-term claims depending on their remuneration levels and duration of service. Provisions for long-service awards were calculated applying a discount rate of 1.19% (previous year: 2.25%), a salary increase rate of 2.00% (previous year: 2.00%), and a staff turnover rate per BVG 2010 of between 1.29% and 24.16% (previous year: between 1.29% and 24.16%).

6.14.2 Obligations in Germany

Pension obligations

The Group assumed pension obligations from a defined benefit plan for ten executive staff in the course of the acquisition of MVZ Leverkusen Group. The obligations include comprehensive old-age pensions, early retirement, survivors' and invalidity pensions. Pension claims accrue based on years of service and annual salary levels.

As part of the asset deal concluded by synlab Umweltinstitut GmbH for another two laboratories in Germany (Hürth-Knapsack and Wiesbaden, Hürth and Wiesbaden), the Group assumed obligations for old-age pensions, early retirement, survivors' and invalidity pensions. The defined benefit plan includes basic pensions and complementary schemes. For basic pensions, salary-related contributions are deducted from the employee's salary and transferred to external pension plan providers (pension funds). Under certain circumstances the company may alternatively assume direct responsibility for part of the basic pension. The complementary scheme is a defined benefit plan in which benefits accrue based on years of service and salary levels.

The calculation is based on a discount rate of 2.50% (previous year: 3.80%) and a pension increase trend of 1.50% (previous year: 1.50%). Salary increases were assumed at a rate of 2.00% (previous year: 2.00%) and the assessment limit increase at 2.00% (previous year: 2.00%). The biometric probability of events such as death, invalidity and marriage and the collective age differences between spouses were applied in accordance with the reference guidelines published by Dr. Klaus Heubeck from 2005 ("Richttafeln 2005 G"). The age at expiry of financing was the earliest possible pensionable age pursuant to German pension statutes, i.e. according to the Pension Insurance—Retirement Age Adjustment Act (RV-Altersgrenzenanpassungsgesetz). For MVZ Synlab Leverkusen GmbH staff turnover rates of 1.00% to 8.00% (previous year: 1.00% to 8.00%) were factored in, and for synlab Umweltinstitut GmbH staff turnover rates of 0.05% to 12.50% (previous year: 0.05% to 12.50%) were applied.

Death grants and year-end payments

As outlined above, synlab Umweltinstitut GmbH assumed pension obligations as part of an asset deal for another two laboratories in Germany (Knapsack). The Group thus assumed additional obligations to continue salary payments in case of death and year-end payments. Basic pensions form the basis for calculating the company's salary-related defined benefit plan obligations for continued salary payments in case of death and the year-end payment at retirement. Calculation parameters are the same as for calculating pension obligations.

Phased retirement program obligations

Under phased retirement agreements pursuant to the Phased Retirement Act (AltTZG) the Group is required to pay compensation and 'top-up' amounts plus other ancillary payments to those employees covered by agreement. The calculations were made based on a discount rate of 0.60% (previous year: 1.25%) and a salary increase rate of 2.00% (previous year: 2.00%). The biometric probability of events such as death and invalidity was taken from the reference guidelines published by Dr. Klaus Heubeck from 2005 ("Richttafeln 2005 G").

Long-service awards

Provisions for long-service award obligations were based on the biometric probability of events such as death and invalidity taken from the reference guidelines published by Dr. Klaus Heubeck from 2005 ("Richttafeln 2005 G"). The calculations were made based on a discount rate of 2.50% (previous year: 3.80%) and salary increases of 2.00% (previous year: 2.00%). Staff turnover rates of 7.00% (previous year: 7.00%) were applied.

6.14.3 Obligations in Italy

Severance pay obligations

Pursuant to the 1982 statutory regulations (Trattamento di Fine Rapporto, TFR), employees in Italy are entitled to a onetime severance payment when they leave the company. The amount depends on the employee's term of service and salary level. The company has recorded provisions for these entitlements accordingly. At the beginning of 2007, the statutory regulations were revised to the effect that a company is obligated to record provisions for severance payment obligations for up to 50 employees. If a company has more than 50 employees, it is obligated to contribute to a provision fund for those employees entitled to severance payments, these funds being disbursable to the employee upon leaving the company. Company obligations arising before 2007 are exempt and remain in the company. When calculating provisions thus relating to the defined benefit portion of the plan, neither the 17% (previous year: 11%) tax deduction on index-related adjustments of the TFR nor the 0.50% social security payments to the INPS insolvency fund are included. Calculations are made applying an assumed inflation rate of 2.00% (previous year: 2.00%), a discount rate of 2.00% (previous year: 3.10%), and a staff turnover rate of 5.00% (previous year: 5.00%). The mortality rate was calculated based on RG48, the invalidity rate on the basis of INPS. The average retirement age was assumed to be 66 years. For the two new Italian acquisitions (Laboratorio Analisi per la Diagnostica Medica—IV Miglio S.r.l., and Nuovo Laboratorio San Giorgio Analisi Chimicobiologiche S.r.l & C.), a provision in the amount of 115 thousand euros was calculated applying methods of mathematical finance.

6.14.4 Obligations in Austria

Severance pay obligations

Statutory regulations require the Group to pay one-time severance payments in the case of retirement, and in some cases upon early ending of employment as well. These payments depend on term of service and the salary received by the employee. These statutory regulations govern all employment agreements commencing prior to January 1, 2003. They are calculated using a discount rate of 1.80% (previous year: 3.1%) and a salary increase rate of 2.00% to 2.70% (previous year: 2.70%). The staff turnover discount remained at the previous year's levels, i.e. between 0.00% and 6.50%. The AVÖ 2008-P "mixed" Pagler & Pagler calculation basis for pension insurance was used as a biometric basis. The computational retirement age was the earliest possible payment date for pension distribution pursuant to the 2004 pension reform, taking the transitional arrangements into consideration. For female members with accrued credits the computational retirement age corresponding to the Federal Constitutional Law on Different Retirement Ages of Men and Women under Social Security (Bundesverfassungsgesetz über die unterschiedliche Altersgrenzen von männlichen und weiblichen Sozialversicherten) was increased step-by-step. If retirement age has already been reached by the valuation date, retirement is assumed to start 6 months after the calculation date. Accrued entitlements to payments to survivors were determined according to the collective method.

Long-service awards

Provisions for long-service awards are accrued for claims based on collective agreements or long-term claims based on other employee agreements depending on the duration of service with the company in accordance with IAS 19. Provisions for long-service awards factored in payroll taxes of 7.90% (previous year: 7.90%). Furthermore, the same calculation parameters as for calculating severance pay obligations were applied.

6.14.5 Other obligations

Severance pay obligations

In the Slovak Republic, the Group is legally obligated to make a one-time salary-based severance payment to a retiring employee. Provisions for this defined benefit plan have been recorded in the amount of 61 thousand euros (previous year: 53 thousand euros). The calculations were made based on a discount rate of 2.00% (previous year: 3.10%) and a salary increase rate of 1.80% (previous year: 2.00%). Staff turnover rates of 2.50% to 4.00% (previous year: 2.50% to 4.00%) were factored in. The retirement age was assumed to be 62 to 64 years.

Pursuant to statutory regulations, employees in the United Arab Emirates are entitled to a one-time severance payment when they leave the Company. The amount depends on the employee's term of service and salary level. As of December 31, 2014 the corresponding provisions amounted to 427 thousand euros (previous year: 273 thousand euros). The calculation was based on a discount rate of 3.80% and a salary increase rate of 5.00%. A staff turnover rate of 5.00% was factored in.

Top-up payments at early retirement

In Belgium, employees may take early retirement from the age of 60 if certain requirements are met. If the conditions are met, the Group is legally obligated to pay salary-related top-ups until these employees reach the statutory retirement age of 65. As of December 31, 2014 the corresponding provisions amounted to 67 thousand euros (previous year: 87 thousand euros). The mortality rate was calculated on the basis of the Belgian mortality tables MR/FR 5. The calculation was based on a discount rate of 1.20% and a salary increase rate of 1.50%.

6 Information on the consolidated statement of financial position (Continued)

6.14.6 Overview of pensions and similar obligations

The change in pensions and similar obligations was as follows.

6 Information on the consolidated statement of financial position (Continued)

The fair value of plan assets breaks down by asset classes as follows; all fair values are quoted on active markets.

	2014	2013
	KEUR	KEUR
Cash and cash equivalents	1,106	3,050
Equity instruments	15,551	6,853
Debt instruments	13,129	6,470
Real estate	4,151	5,877
Other	545	2,745
	34,482	**24,995**

Plan assets do not contain the Company's own financial instruments, real estate held for the Company's own use, or any other assets used by the Company.

The Group expects to pay contributions to defined benefit plans for fiscal year 2014 in the amount of 1,375 thousand euros (previous year: 1,053 thousand euros).

The following sensitivity analysis shows the impact on net present value of the defined benefit obligations if the most important actuarial assumptions were to change.

	Changed by	Impact on DBO amount
		KEUR
Salary reductions	−0.50%	53,698
Salary increases	0.50%	54,450

	Changed by	Impact on DBO amount
		KEUR
Discount rate	−0.50%	58,945
Discount rate	0.50%	50,038

The following defined benefit plan payments are expected to be disbursed in the next years:

	KEUR
Within the next 12 months	802
In 2 years	864
In 3 years	1,012
In 4 years	1,268
In 5 years	1,329
In the 5 years thereafter	9,291

The average duration of all post-employment benefit payments in the countries listed below is as follows:

(in years)	Switzerland	Italy	Germany	Austria	Other
as of 12/31/2013	13	10	19	10	5
as of 12/31/2014	17	11	20	10	9

Additions to provisions for contingent consideration are attributable to the Italian acquisition Mater Dei S.r.l. in the amount of 2,455 thousand euros, and to the acquisition of INTERLAB in the amount of 2,000 thousand euros. Utilization of these provisions is expected during fiscal year 2015. Contingent consideration in the amount of 441 thousand euros attributable to acquisitions in Switzerland and the Czech Republic will probably be disbursed in the first quarter of 2016.

The major part of the contingent consideration disbursement is for the reduced revenue-based earn-out in the acquisition of synlab Finland OY in 2013. The related provision reversal totals 8,557 thousand euros. Provisions allocated in 2013 for contingent consideration in the acquisition of synlab Finland OY totaled 14,434 thousand euros. In the previous year, utilization of provisions for the acquisition of synlab Finland OY was estimated at roughly 2,700 thousand euros in June 2014 and roughly 11,830 thousand euros in June 2015. The remaining amount is expected to be disbursed by June 2015.

Also, provisions for contingent consideration in the 2013 acquisition of Med. Labor Olten MLO AG were reversed in the amount of 342 thousand euros. These were recognized in the previous year in the amount of 815 thousand euros.

Contingent consideration in the amount of 2,671 thousand euros was disbursed to the sellers of synlab Finland OY and in the amount of 473 thousand euros to the sellers of Med. Labor Olten MLO AG, utilizing the respective provisions accordingly.

Provisions for onerous contracts from previous year were fully utilized in 2014. New provisions in the amount of 2,600 thousand euros were allocated for onerous contracts from the hospital business, which will be utilized during fiscal year 2015 in the amount of 1,595 thousand euros. The remaining amount totaling 1,005 thousand euros will probably be disbursed by mid-2017.

As in the previous year, allocations to and utilization of "miscellaneous" other provisions concern various business issues across all companies. Provisions for restructuring expenses accrued in the previous year were mainly utilized. Most reversals of provisions (1,981 thousand euros) were for legal expenses in a dispute with a supplier.

Total	**4,581**	**3,018**	**35,795**	**27,769**	**40,376**	**30,787**

Purchase price obligations include outstanding payments from acquisitions in Belgium, Switzerland, the Czech Republic, Italy and Hungary as well as from acquisitions of various laboratories in Germany. Please also refer to the information in section 4. In addition, current liabilities include obligations from cooperation agreements in Switzerland and the Czech Republic.

Non-controlling interests in partnerships include the partnership exit claims of non-controlling shares in Medizinisches Versorgungszentrum Labor München Zentrum GbR.

6.17 Other liabilities

Other liabilities break down as follows:

	12/31/2014	12/31/2013
	KEUR	KEUR
Liabilities to employees	6,481	5,887
Liabilities to related parties	3,840	6,365
Liabilities to customers	2,493	611
Deferred income	728	762
Other	1,383	2,566
Total	**14,925**	**16,191**

The increase in customer overpayments derives from the acquisition of INTERLAB and the respective customer loans for pre-financing commissioned clinical trials.

Liabilities to employees principally concern accrued overtime pay and vacation pay.

Cash and cash equivalents, trade receivables, and other current assets usually have residual maturity terms of less than one year. Their carrying amounts at the reporting date thus approximate their respective fair values. Any trade receivables for which allowances have been made are exclusively attributable to default and credit risk level 3, as the input factors for assessing the creditworthiness of these trade receivables are materially based on company-internal estimates. In part these have to do with classifications for trade receivables aging, the country of the debtor ("country-specific risks"), or a combination of the two, and are derived from historical data. Specific factors such as information regarding a customer's insolvency also play a role in such estimates. The value adjustment rate varies between 0.5% and 100%.

The fair value of other non-current receivables equals the present value of the asset-related payments, taking into account the respective current interest rate parameters which reflect the market and partner-related changes in expectations and terms and conditions.

Trade accounts payable and other liabilities usually have residual maturity terms of less than one year. Their carrying amounts thus approximate their respective fair values.

7 Financial instruments and financial risk management (Continued)

The fair values of interest-bearing loans and borrowings are determined as the present value of the liability-related payments, using the respective applicable yield curves and credit-spread curves for the respective currency. The fair value of derivative financial liabilities is measured using the mark-to-market method and interest rates congruent with the terms of the liabilities. These fair values are classified to hierarchy level 2.

The fair value of non-controlling interests in a partnership (puts on NCI) was measured based on the compensation formula set forth in the partnership agreement and in consideration of the Company's planning and market interest rates. The fair value thus measured is therefore classifiable to hierarchical level 3 per IFRS 13, and led to a charge against earnings in the amount of 796 thousand euros in the year under review (previous year: 1,006 thousand euros).

There was no change in classification in the past fiscal year.

	2014					
			From measurement subsequent to acquisition			
	From interest	From sale	At fair value	Exchange rate differences	Impairment	Net result
	KEUR	KEUR	KEUR	KEUR	KEUR	KEUR
Loans and receivables	621	0	0	(1,375)	(7,610)	**(8,364)**
Financial liabilities valued at amortized cost	(31,245)	0	0	306	0	**(30,939)**

Total	**(30,624)**	**22**	**1,478**	**(1,069)**	**(7,615)**	**(37,808)**

	2013					
			From measurement subsequent to acquisition			
	From interest	From charges	At fair value	Exchange rate differences	Impairment	Net result
	KEUR	KEUR	KEUR	KEUR	KEUR	KEUR
Loans and receivables	292	0	0	(678)	(7,585)	**(7,971)**
Financial liabilities valued at amortized cost	(31,249)	0	0	0	0	**(31,249)**
Financial instruments held for trading	0	(27)	1,985	0	0	**1,958**
Total	**(30,957)**	**(27)**	**1,985**	**(678)**	**(7,585)**	**(37,262)**

The components of the net result are recorded in finance income or finance costs, with the exception of impairments on trade receivables, which are recorded under "Other operating expenses".

The interest result from financial liabilities of the valuation category "Financial liabilities valued at amortized cost" principally include interest expenses arising from interest-bearing, secured loans.

Financial risks

As an international corporation, the SYNLAB GROUP is exposed to entrepreneurial and industry-specific risks. Managing risks and rewards is an integral part of Company and management decision-making.

In order to be properly prepared for competitive and market environment changes and efficiently manage the company's added value, the parent company has implemented a risk management system which is monitored by the Group management.

The risk management handbook and supplementary Group guidelines define the risk management processes, the limits to be observed and the use of financial instruments for risk management. The goal behind operating the risk management system is being able to recognize and evaluate any emerging risks. These identified risks are immediately communicated, managed, and monitored.

7 Financial instruments and financial risk management (Continued)

The chief risks to which the Group is exposed are liquidity, credit, interest rate and currency risks. Group risk management is aimed at containing risks arising as a result of business and financing activities. This is accomplished mainly by using derivative and non-derivative hedging instruments.

Liquidity risk

The liquidity risk of the Group has to do with the potential inability to fulfill current or future financial obligations due to lack of sufficient cash. Minimizing and managing liquidity risks are among the primary tasks of company management. The Group monitors its liquidity daily. In order to manage future liquidity needs, the Company uses an eight-week forecast prepared weekly, and a twelve-month rolling liquidity plan prepared on a monthly basis. Beyond that, management continually analyzes compliance with the covenants specified in the long-term loan agreement.

In addition to EBIT and EBITDA, monitoring the change in net working capital and cash flow is important in managing and optimizing the existing finance structure. The Group's goal is to maintain a balance between continuity of funding and ensuring flexibility by utilizing overdraft facilities, bank loans, finance leases, and lease-purchase agreements. To ensure the Group's liquidity, uncommitted overdraft facilities in the amount of 10,745 thousand euros (previous year: 2,960 thousand euros) were available as of December 31, 2014.

As a result of regular evaluations of risk concentration with respect to debt refinancing, the Group has come to the conclusion that this risk can be seen as low. In particular, the newly agreed Group-wide financing showed that financing sources are sufficiently available. Debt with a term of up to 12 months can be either paid off or extended with existing lenders on the basis of the current liquidity and capital flow planning.

The maturity structure of Group financial obligations is as follows:

	December 31, 2014			
	Residual maturity			
	up to 1 year	more than 1 and up to 5 years	more than 5 years	Total
	KEUR	KEUR	KEUR	KEUR

(1) Redemption on January 24, 2017.

(2) Including "Other interest-bearing loans and borrowings".

(3) Including "Other interest-bearing loans and borrowings".

All instruments still held at the reporting date and for which payments were contractually agreed were included. Target figures are not taken into consideration with regard to future new liabilities. The cash flows from lease liabilities comprise the minimum lease payments and estimated variable lease payments (contingent rent). Amounts denominated in foreign currencies were translated at the respective spot price as of the reporting date. Variable interest payments from financial instruments were calculated using the interest rates last determined prior to the reporting date. Financial liabilities repayable at any time are always allotted to the earliest time slot. The amounts for derivative financial instruments presented correspond to the net undiscounted cash flows.

Credit risk

Financial instruments pose a default risk for the Group in that a business partner might not meet obligations in connection with a financial instrument or customer master agreement, potentially leading to financial losses. These include credit risks (in particular risks arising from trade receivables), as well as risks related to financing activities, including deposits at banks and financial institutions, currency transactions and other financial instruments.

Trade receivables

The risk of default on customer receivables is managed by the corresponding business unit, observing group guidelines, procedures and controls for customer default risk management. This means that all outstanding receivables from customers are regularly monitored and collected when overdue using a multi-step collections procedure. In doing so however, the Group business and related customer structure should be taken into account: On the one hand, the Group is unable to proactively minimize risk prior to transactions because it must fulfill its public service obligation. However, the Group receives well over a third of its revenues (34.26%, previous year: 30.25%) from business with health insurance providers which only pose a minor risk of default due to their structure as statutory health insurance companies or regional authorities.

Whenever any default risks are discernible with respect to financial assets, an impairment is recorded. The need for impairment is analyzed individually for major customers on each reporting date. In addition, a large number of small receivables are grouped and assessed collectively for impairment. The calculation is based on actual historical data. The maximum default risk as of the reporting date corresponds to the carrying amount of all financial asset classes reported in this section.

There is no evident default risk concentration from business relationships with individual customers, as customers reside in various countries and belong to very disparate customer groups, of which the greater part carries only a minimal default risk.

Financial instruments and deposits

The default risk for deposits with banks and financial institutes is managed in accordance with Group Treasury guidelines. The Company only invests surplus funds in approved business partners, and allocates such funds to the respective parties only within the scope of available credit lines. The credit limits for business partners are reviewed annually by management, and may be adjusted during the year if the situation so requires. Credit limits are set in order to minimize risk concentration, consequently keeping financial losses resulting from the potential default of a business partner as low as possible. The Group's maximum default risk for the statement of financial position items as of December 31, 2014 and 2013 is equal to the carrying amount of all classes of financial assets reported in this section.

The default risk related to derivative financial instruments is minimized by the fact that such transactions are conducted only with contractual partners with top credit ratings. For this reason, the general default risk in connection with derivative financial instruments used by the Group is deemed to be insubstantial.

Interest rate risk

The Group is exposed to interest rate risk due to its financing activities. In particular, market-induced interest rate fluctuations may impact the interest debt in connection with variable interest-bearing loans. Interest rate fluctuations affect the interest-related cash flow. The Group holds interest rate swaps, collars and caps to minimize the risk from variable cash flows or to convert these variable cash flows into fixed cash flows, and to hedge against interest rate fluctuations. As the Group capitalizes financial liabilities at amortized cost instead of at market value, there is no economic risk from changes of the carrying amount of the financial liabilities due to interest rate changes.

The Group bears interest rate risk mainly in the euro zone, in the Czech Republic, Hungary and in Switzerland.

In accordance with the Group's risk strategy and the approach taken in the previous year, no hedging relationships were recorded for variable interest loans and interest hedging instruments. Accordingly, these hedging relationships are recorded at fair value through profit or loss.

Pursuant to IFRS 7, the Group is required to use sensitivity analyses to present any relevant interest rate risks. These analyses show the effects of changes in market interest rates on interest payments, interest income and expense.

The following table illustrates the contractually agreed maturities of the swaps held for trading as of December 31, 2014:

Hedge instrument	Commences	Ends	Nominal volume	Local currency	Reference rate
			(KEUR)		
Swap	04/01/2012	03/31/2015	33,285	922,828 KCZK	2.70%
Swap	04/01/2012	06/30/2015	15,000		2.64%

The following table illustrates the contractually agreed maturities of the collars that are held for trading.

Hedge instrument	Commences	Ends	Nominal volume	Reference rate floor	Reference rate cap
			(KEUR)		
Collar	04/01/2012	03/31/2015	75,000	0.40%	2.00%
Collar	04/01/2012	03/31/2015	75,000	0.40%	2.00%

7 Financial instruments and financial risk management (Continued)

Interest rate sensitivity

The following table demonstrates the sensitivity of this portion of the loans to a change in interest rates which appears fundamentally possible based on sound business judgment, after the effect of hedging transactions. Assuming all other variables remain constant, the consolidated profit or loss for the year before taxes is affected as follows, due to the impact on variable-interest loans. There is only an immaterial effect on Group equity.

	Increase/decrease in basis points	Effect on profit/loss
		KEUR
2014	+100	(3,085)
	—(4)	—
2013	+100	(4,055)
	—(5)	—

(4) In view of currently low interest levels, a sensitivity analysis of even lower base rates was deemed unnecessary.

(5) In view of currently low interest levels, a sensitivity analysis of even lower base rates was deemed unnecessary.

The assumed basis point development in a sensitivity analysis of interest rates is based on the currently prevailing market environment.

Foreign currency risk

Foreign currency risk is the risk to which the fair value or future cash flows of a financial instrument are exposed due to exchange rate fluctuations. The Group is particularly exposed to foreign currency risks arising from its business activities and Company-internal financing in foreign currencies because revenues and/or expenses are, to a certain extent, denominated in currencies other than the Group's functional currency.

In order to manage foreign currency risks, the Group has arranged loans for net investments in foreign operations in those currencies in which the expected cash flows from these net investments will be generated.

Exchange rate fluctuation sensitivity

The following table demonstrates the sensitivity of the consolidated profit/loss for the year before taxes (due to changes in the fair value of the monetary assets and liabilities, including non-designated foreign currency derivatives) to fluctuations in the Czech crown, the Hungarian forint and the Swiss franc which appear fundamentally possible on the basis of sound business judgment. All other variables remain constant. The Group risk regarding exchange rate fluctuations in all other currencies is immaterial.

Based on past experience, the following scenarios have been developed for assessing sensitivity to exchange rate fluctuations:

2014

	Positive exchange rate trend Rate	Negative exchange rate trend Rate
Swiss franc	1.2000	0.8000
Czech crown	28.0000	25.0000
Hungarian forint	350.0000	270.0000

7 Financial instruments and financial risk management (Continued)

The effect on profit or loss before taxes is as follows:

	Changes due to positive exchange rate trend	Changes due to negative exchange rate trend

8 Share-based payment

In 2010, the SYNLAB HOLDING shareholders resolved to allow certain members of the extended management of the SYNLAB GROUP to participate in the Group's success by granting them an indirect interest in SYNLAB HOLDING equity as part of their compensation package. This management participation program provides the individuals mentioned above the possibility as limited partners (*Kommanditisten*) to purchase a certain amount of shares in synlab Management-Beteiligungs GmbH & Co. KG, a company outside the scope of consolidation of SYNLAB HOLDING, which holds a maximum 3% of the registered capital in synlab Holding GmbH. Conditions for participation were determined at the shareholders meeting.

Starting in fiscal year 2011, the Company indirectly granted shares in SYNLAB HOLDING, the parent company of the Group, to directors and senior staff of SYNLAB HOLDING and its domestic and foreign subsidiaries as part of their share-based remuneration packages. This entails either paying in cash a purchase price based on the fair value of the shares at the time of issue or financing the purchase price with loans agreed under normal market conditions.

The shares acquired in this manner are subject to a vesting period as long as the individual beneficiary remains in a management position with the Group until the occurrence of either a good-leaver event or exit of the major shareholder of SYNLAB HOLDING. Company management estimated the average vesting period for this program, introduced in 2011, to be four years for a good-leaver event and five years for an exit event. For shares newly granted in 2012, an average vesting period of one and a half years was assumed for a good leaver event, and three years for exit. Average vesting period assumptions for shares newly granted in 2013 were one year for either a bad or good-leaver event and two years for exit. For shares newly granted in 2014, an average vesting period of one and a half years was assumed for both exit and good leaver events. After expiry of the vesting period, i.e. after a good-leaver event or an exit, the recipient will receive a payment based on his/her shares in synlab Management-Beteiligungs GmbH & Co. KG. Entitlement lapses, however, if the recipient's employment is terminated by way of a bad-leaver event, i.e. prior to expiry of the vesting period.

8 Share-based payment (Continued)

In fiscal year 2011, Company executives participated in the amount of 0.72% of SYNLAB HOLDING registered capital or 20 thousand euros, and 0.11% or 3 thousand euros in fiscal year 2012. An additional 0.07% or 2 thousand euros followed in 2013. In fiscal year 2014, Company executives were granted shares amounting to a further 0.36% in SYNLAB HOLDING registered capital or 10 thousand euros. Of the shares granted to Company managers in 2011, 65.2% of the executive shares granted went to company directors (0.46%). In 2012, 2013 and 2014, none of the shares granted were allotted to company directors.

These share-based commitments are structured as equity-settled instruments. Pre-tax expenses for share-based payments in fiscal year 2014 amounted to 543 thousand euros (previous year: 148 thousand euros) and comprised exclusively awards made in the scope of the aforementioned programs and settled with equity instruments.

The fair value of the shares granted was calculated as the difference between the present value of expected payments to members of management based on the payout structure and vesting period and the purchase price paid by members of management on the date the shares were granted. The fair value of all commitments granted in fiscal years 2011 to 2014 totaled 1,567 thousand euros (previous year: 760 thousand euros).

9 Related party disclosures

The consolidated financial statements include SYNLAB HOLDING and the subsidiaries designated in the list of shareholdings.

The Management Board of SYNLAB HOLDING in the fiscal year ended was composed as follows:

- Dr. med. Bartl Wimmer, Laboratory Medicine Specialist (Facharzt für Laboratoriumsmedizin), CEO / Managing Director, Berchtesgaden, Germany
- Markus Stötter, Diplom-Kaufmann (German business administration degree), CFO / Managing Director, Aystetten, Germany

In the reporting period, Management Board members received total remuneration of 372 thousand euros (previous year: 616 thousand euros). This includes a share-based payment in the amount of 53 thousand euros (previous year: 103 thousand euros). At the time of issue, share-based payments granted to management had a fair value of 420 thousand euros (previous year: 420 thousand euros).

For further information please refer to section 13.4.

The advisory board of the Company is composed as follows:

- Dr. Ewald Walgenbach (Chairman), Managing Director of BC Partners
- Michael Wunderlich (Vice-Chairman), Partner of BC Partners
- Maximilian Kastka, Principal of BC Partners
- Christian Mogge, Principal of BC Partners
- Dr. med. Fred Buchwald, Laboratory Medicine Specialist (*Facharzt für Laboratoriumsmedizin*)
- Miroslav Herden, Kaufmann (German business management degree)
- Rolf Norbert Schöngen, Laboratory Medicine Specialist (*Facharzt für Laboratoriumsmedizin*)

Advisory board members received no compensation in the year under review.

SYNLAB HOLDING, Augsburg, Germany, is the top-level controlling parent company. This company prepares the consolidated financial statements for the smallest and largest consolidated groups. Furthermore, SL Lux SCA, Luxembourg, holds a 72.0345% share in the SYNLAB HOLDING registered capital, and thus controls the company. All shares of SL Lux SCA, Luxembourg (100.00%) are held by funds managed by BC Partners.

Trade receivables do not bear interest and are usually due within between 30 to 120 days. Sales to and purchases from related parties are made on an arm's length basis.

There are no guarantees for receivables from or payables to related parties. Interest on other receivables from related companies is charged at normal market rates.

10 Contingent liabilities and other financial obligations

10.1 Obligations relating to operating leases where the Group is the lessee

The Group has concluded rental and lease agreements as lessee primarily for company buildings, fixtures, fittings, and office equipment, data processing equipment and vehicles. The lease agreements have an average term of between three and five years.

At the reporting date, there were the following future minimum lease payment obligations arising from contractual operating leases:

	December 31, 2014				
	Fixtures, fittings, and office equipment	Analysis equipment	Leases on buildings	Other	Total

Operating lease payments during the fiscal year	5,547	12,435	21,465	2,376	**41,823**

The Group has concluded lease agreements for technical machines and equipment. The average term of these lease agreements is between three and five years. The lease agreements do not include an extension option beyond the maximum duration of five years. The lease agreements place no restrictions on the Group as lessee. Lease payments for analysis equipment are mostly invoiced according to the variable use of the leased objects.

10.2 Obligations arising from financial leases

The Group has concluded financial leases for various technical equipment and fixtures, fittings, and office equipment. These leases provide for lease extensions at the then prevailing market conditions. Options for extension may only be exercised by the corresponding contracting company. Future minimum lease payments from financial leases may be restated at present value as follows:

	December 31, 2014		December 31, 2013	
	Minimum lease payments	Present value of minimum lease payments	Minimum lease payments	Present value of minimum lease payments

Lease payments for the year		8,641		9,693

10 Contingent liabilities and other financial obligations (Continued)

10.3 Contingent liabilities

Contingent liabilities totaled 5,647 thousand euros as of December 31, 2014 (previous year: 140 thousand euros) These mainly comprise lease guarantees for buildings and equipment in the amount of 5,237 thousand euros, and a contract performance guarantee in the amount of 300 thousand euros. As in the previous year, a contract performance guarantee granted by UniCredit to Synlab Polska is also reported in the amount of 99 thousand euros (previous year: 45 thousand euros). Previous year's contingencies also included asset retirement obligations and planning expenses at Steinlach-Klinik GmbH in the amount of 35 thousand euros.

11 Capital management

The overriding goal of Group capital management is to ensure that the Group is and will be able to pay its debts and remains financially healthy. In addition to EBIT and EBITDA, monitoring changes in net working capital and cash flow are important in monitoring, managing and optimizing the existing finance structure. Net debt includes interest-bearing loans and borrowings less cash and cash equivalents.

	2014 KEUR	2013 KEUR
Interest-bearing loans and borrowings	518,923	508,250
Cash and cash equivalents	(87,240)	(64,579)
Net debt	**431,683**	**443,671**
Equity attributable to equity holders of the parent	**242,786**	**215,030**
Equity and net debt	**674,469**	**658,701**

Under the financing agreement of January 24, 2012, the Company is obligated to observe certain financial covenants. Non-compliance with these requirements could have the consequence that the lender terminates financing and demands immediate repayment of the respective value of the loan. The covenants contained in the loan agreement involve maintaining a certain net debt-to-EBITDA ratio, EBITDA-to-interest ratio, and cash flow-to-interest-and-principal ratio. These ratios allow calculation of the relative burden on the Company posed by debt/interest payments. The existing financing agreement was amended in March and December 2013, and the restrictions and covenants originally agreed were expanded substantially.

12 Segment reporting

For management purposes, the Group is organized into nine separately managed and monitored segments. Reconciliations include the central functions, financing and taxes, and consolidation. The Group's laboratory business is subject to various opportunity and risk profiles as well as varying government regulations in the countries where the Group operates; thus the internal reporting structure is organized according to geographic segmentation of the Group.

SYNLAB HOLDING management has the highest discretionary authority. EBITDA of the business entities is monitored separately by management in order to make decisions regarding distribution of resources and determine the profitability of the entities. EBITDA figures are used to measure segment performance and is reflected in the consolidated financial statements. Group financing (including finance costs and income) and income taxes are managed at Group level, however, rather than at the individual business segment level.

Accounting principles used in deriving segment information conform with the accounting rules used in the consolidated financial statements. Transfer prices between business segments are determined based on normal market conditions for transactions with third parties.

Because Group assets are of minor importance for management of the Company, Company management does not monitor these separately by business segment.

12 Segment reporting (Continued)

Description of segments subject to reporting requirements

The SYNLAB GROUP portfolio comprises activities in 21 countries, distinguishing only the following segments according to the opportunity and risk profile:

Germany

In Germany the SYNLAB GROUP's activities are concentrated mainly in southern and western Germany. The SYNLAB GROUP operates four large central laboratories in these areas, as well as numerous small local laboratories in order to ensure regional accessibility to its referring physicians. In addition, the SYNLAB GROUP also operates a small hospital as well as hospital laboratories that were taken over under outsourcing contracts.

Switzerland

Similar to operations in Germany, the SYNLAB GROUP provides laboratory services in Switzerland primarily for samples sent in by private physicians and for hospital laboratories as part of outsourcing projects. The SYNLAB GROUP is among the big six providers in the Swiss market which together comprise over 50% of the accessible market.

Italy

In Italy, the SYNLAB GROUP is mainly represented in the industrial north. Due to government regulation, only about a third of the Italian laboratory market is accessible to private laboratory service providers. In addition, the market is strongly influenced by regional authorities which determine the maximum number of tests private providers may conduct.

Belgium

The SYNLAB GROUP concentrates particularly on the human medicine sector in Belgium, but also offers laboratory services for the veterinary sector.

Czech Republic

Activities of the SYNLAB GROUP in the Czech Republic are basically the same as in the markets or segments described above. Any significant differences are attributable to the way the public health sector is organized, to market concentration, and the dominant market position of the Group's activities in the Czech market. The Group is one of the three largest market participants in the Czech Republic.

Austria

Due to government regulations, only a small part of the market in Austria is accessible to laboratory service providers which are corporations. The SYNLAB GROUP is the leading participant in this limited market, particularly in Vienna and the surrounding metropolitan area. The activities here are the same is in the segments discussed above.

Slovak Republic

Activities of the SYNLAB GROUP in Slovakia are similar to those in the above-mentioned markets or segments. Substantial differences arise from the particular organization of the public healthcare system. In Slovakia the Group is among the three leading market participants.

Hungary

In addition to laboratory services for privately insured patients, the SYNLAB GROUP also offers environmental and forensic analytical services in Hungary, and is the only service provider in the forensic sector.

12 Segment reporting (Continued)

North Europe

This segment comprises the SYNLAB GROUP laboratories in Estonia, Finland, Lithuania and Norway. In Estonia and Finland, laboratory services for private physicians are the main business, whereas in Lithuania most business is with privately insured patients. In Estonia, the SYNLAB GROUP is the market leader. The SYNLAB GROUP acquired a human medicine laboratory in Norway, thus gaining a foothold in the Norwegian laboratory market.

Rest of World

The segment ROW comprises Group activities in Slovenia, Macedonia, Croatia, Romania, Poland, the Republic of Belarus, the United Kingdom, Turkey and the United Arab Emirates which do not fulfill the quantitative thresholds for reportable segments, and thus are summarized in a separate category.

Reconciliations

Reconciliations include all Group central functions such as management, legal, Group finances, internal audit and strategic procurement which cannot be attributed to individual operating segments. Furthermore, reconciliations include finance income and expenses and taxes because they are centrally managed by the Group, and therefore cannot be attributed to individual business segments, as well as the consolidation transactions to be conducted among the individual segments.

Income from transactions with other segments is eliminated for consolidation purposes.

13 Supplementary information pursuant to the German Commercial Code (HGB)

13.1 Company management

In the year under review the Company management members were:

Dr. med. Bartl Wimmer, Specialist Doctor for Laboratory Medicine (Facharzt für Laboratoriumsmedizin), CEO/ Managing Director, Berchtesgaden, Germany

Markus Stötter, Diplom-Kaufmann (German business administration degree), CFO/Managing Director), Aystetten, Germany

13.2 Shareholdings and exemptions

The information regarding shareholdings required pursuant to sec. 313 (2) of German Commercial Code is presented in the list of shareholdings.

Companies for which exemptions were claimed pursuant to sec. 264 (3) of the German Commercial Code (HGB), sec. 291 of the German Commercial Code, sec. 245 (1) of the Austrian Commercial Code (UGB), sec. 62 (2) of vyhláška č. 500/2002 Sb.(Slovenian regulation), art. 27, § 3, § 4, of the Decreto legislativo 9 aprile 1991 n. 127 (Italian regulation), art. 663f OR (Swiss code), and Accounting Act Sec. 29 (1), 2)., RT I 2002, 102, 600, passed 11/20/2002 were marked correspondingly in the list of shareholdings.

13.3 Employees

On average, the number of employees in the Group was as follows:

	2014 Employees	2013 Employees
Administration	2,419	2,246
Operations	5,395	5,299
	7,814	**7,545**
Domestic	4,205	4,218
Foreign	3,609	3,327
	7,814	**7,545**

The increased number of employees is largely attributable to company acquisitions in Italy.

13.4 Information on management compensation

In the reporting period, Management Board members received total remuneration of 372 thousand euros (previous year: 616 thousand euros). This figure contains share-based payment in the amount of 53 thousand euros (previous year: 103 euros). At the time of issue, share-based payments granted to management had a fair value of 420 thousand euros (previous year: 420 thousand euros).

13 Supplementary information pursuant to the German Commercial Code (HGB) (Continued)

13.5 Audit fees

The following fees were paid for the services of Ernst & Young GmbH Wirtschaftsprüfungsgesellschaft, Eschborn, Germany:

	2014	2013
	KEUR	KEUR
Audit	801	799
Other auditing services	42	42
Tax advice	265	128
Other services	0	883
Total	**1,108**	**1,852**

14 Events after the reporting period

14.1 Acquisitions and newly formed companies in 2015

The following significant acquisitions and new company formations took place after the reporting date and before release of these financial statements:

Name of acquired company	Country	Date of acquisition (effective date)	Revenue contribution* 2015	EBITDA contribution* 2015	Purchase price	Share-holding
			(KEUR)	(KEUR)	(KEUR)	
Palmetto Clean Technologies GmbH (Umfirmierung auf synlab tesdelo service GmbH nach Erwerb)	DE	01/01/2015	1,720	340	Fixed: 1,050, Estimated variable: 200	60%
ACR Labor AG	CH	01/05/2015	695	168	Fixed: 458, Estimated variable: 302	100%
Medilab LTD	CY	01/13/2015	3,600	2,170	Fixed: 10,800, Estimated variable: 3,235	100%
Laboratorio Di Analisi Dott. Mario Settimelli SRL	IT	03/10/2015	2,264	417	Fixed: 2,100, Estimated variable: 500	100%

* The revenue and EBITDA contributions for 2015 reflect current corporate planning.

All acquisitions were aimed at strengthening the Group's presence in a particular region or area of specialization.

Detailed information required by IFRS 3, i.e. items IFRS 3 B64e, f, h, i, j, and k, regarding business combinations taking place after the end of the reporting period, cannot be provided for the aforementioned business combinations at present because at the time the financial statements were released for publication the various sellers were unable to provide final financial statement figures.

The following auditors' report is a translation of the German-language auditors' report (Bestätigungsvermerk), which refers to the consolidated financial statements and the group management report of synlab Holding GmbH, Augsburg, prepared in accordance with IFRS (International Financial Reporting Standards) as adopted by the EU, and the additional requirements of German Commercial Law pursuant to Sec. 315a(1) HGB (German Commercial Code [Handelsgesetzbuch]) as of and for the year ended December 31, 2013 as a whole and not solely to the consolidated financial statements presented in this offering memorandum on the following pages.

Auditor's report

We have audited the consolidated financial statements prepared by synlab Holding GmbH, Augsburg, comprising the balance sheet, the statement of comprehensive income, the cash flow statement, the statement of changes in equity and the notes to the consolidated financial statements, as well as the management report for the fiscal year from January 1, to December 31, 2013. The preparation of the consolidated financial statements and the group management report in accordance with IFRS (International Financial Reporting Standards) as adopted by the EU, and the additional requirements of German commercial law pursuant to Sec. 315a (1) HGB (German Commercial Code [Handelsgesetzbuch]) is the responsibility of the Company's management. Our responsibility is to express an opinion on the consolidated financial statements and on the management report based on our audit.

We conducted our audit of the consolidated financial statements in accordance with Sec. 317 HGB and German generally accepted standards for the audit of financial statements promulgated by the Institute of Public Auditors in Germany (Institut der Wirtschaftsprüfer, IDW). Those standards require that we plan and perform the audit such that misstatements materially affecting the presentation of the net assets, financial position and results of operations in the consolidated financial statements in accordance with the applicable financial reporting framework and in the group management report are detected with reasonable assurance. When determining the audit procedures, the knowledge of the business activities and the economic and legal environment of the Group and expectations as to possible misstatements are taken into account. The effectiveness of the accounting-related internal control system and the evidence supporting the disclosures in the consolidated financial statements and the management report are examined primarily on a test basis within the framework of the audit. The audit includes assessing the annual financial statements of those entities included in consolidation, the determination of entities to be included in consolidation, the accounting and consolidation principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements and the group management report. We believe that our audit provides a reasonable basis for our opinion.

Our audit has not led to any reservations.

In our opinion, based on the findings of our audit, the consolidated financial statements comply with IFRS as adopted by the EU and the additional requirements of German commercial law pursuant to Sec. 315a (1) HGB and in accordance with these requirements give a true and fair view of the net assets, financial position and results of operations of the Group. The group management report is consistent with the consolidated financial statements and as a whole provides a suitable view of the Group's position and suitably presents the opportunities and risks of future development.

synlab Holding GmbH, Augsburg, Germany

Notes to the consolidated financial statements for the fiscal year January 1 to December 31, 2013

1 Information on the Company

These consolidated financial statements were prepared by synlab Holding GmbH (hereinafter: 'the Company' or 'SYNLAB HOLDING'), Augsburg, Germany, the parent company of the SYNLAB HOLDING Group (SYNLAB GROUP). The Company is recorded in the Commercial Register at the Local Court in Augsburg under number HRB 24668. The registered address is Gubener Strasse 39, 86156 Augsburg, Germany.

SYNLAB HOLDING is one of the largest suppliers of medical diagnostic laboratory services in Central and Eastern Europe. The Group, which is based in Germany, presently employs over 7,500 employees and is currently represented in Germany, Italy, Switzerland, Austria, Belgium, the Czech Republic, Hungary, the Slovak Republic, Slovenia, Romania, Macedonia, Croatia, Poland, the Republic of Belarus, Estonia, Lithuania, Finland, the United Kingdom, the United Arab Emirates, Ukraine, and Turkey.

The Company's service portfolio encompasses analyses in the areas of human medicine, microbiology and human genetics, as well as routine diagnostics, preventive medical examinations, and pathology—all performed by the Company's own laboratories. Customers include public health agencies, clinics, hospitals, doctors, and private individuals.

The consolidated financial statements prepared for SYNLAB HOLDING and its subsidiaries as of December 31, 2013 (hereinafter: 'the Corporation' or 'the Group') were released for publication by management resolution on April 14, 2014. German law requires that the consolidated financial statements be approved by shareholders.

2 Accounting policies

2.1 Basis for preparing the financial statements

The consolidated financial statements for SYNLAB HOLDING and its subsidiaries were prepared in compliance with International Financial Reporting Standards (IFRS) as applicable in the European Union for fiscal year 2013, and in compliance with Sec. 315a (1) and (3) of the German Commercial Code (HGB). International Financial Reporting Standards (IFRS) encompass International Accounting Standards (IAS), the interpretations issued by the IFRS Interpretation Committee (IFRIS IC), and the interpretations of the Standing Interpretation Committee (SIC).

As a rule, the consolidated financial statements are prepared using the acquisition cost method. Exceptions to this are derivative financial instruments, financial instruments held for sale, and non-controlling interests in a partnership ("puts on NCI"), which are measured at fair value.

Current and non-current assets and liabilities are reported in the statement of financial position. The income statement for the period is prepared using the nature of expense method. Any combined line items disclosed in the statement of comprehensive income or the statement of financial position are reported as separate line items in the Notes.

The consolidated financial statements are prepared in euros. Unless otherwise indicated, all amounts are rounded up or down to the nearest thousand euros in accordance with common commercial rounding practice.

2.2 Consolidation standards

The consolidated financial statements include the annual financial statements of SYNLAB HOLDING and its subsidiaries as of December 31, 2013. The number of subsidiaries and associated companies included in the consolidated financial statements for 2013 breaks down into domestic and foreign subsidiaries as follows:

	2013	**2012**
Domestic	**65**	60
Foreign	**48**	40
Total	**113**	**100**

2 Accounting policies (Continued)

Changes in the scope of consolidation were as follows:

	Full consolidation	Consolidated using the equity method
Status as of December 31, 2012	**99**	**1**
First-time consolidation	22	3
Change in the method of consolidation	1	(1)
Merged	(11)	0
Liquidated	(1)	0
As of December 31, 2013	**110**	**3**

In 2013, the following companies were consolidated for the first time or were subject to a change in the consolidation method:

Company	Country	Initial consolidation	Share-holding	Consolidation method

Synlab Lazio S.r.l.	IT	03/25/2013	100%	Full consolidation
UAB "SORPO"	LT	07/31/2013	100%	Full consolidation

The company Spectromass Analitikai Laboratórium Kft., which was acquired in 2012 and had not been consolidated as of December 31, 2012, was consolidated for the first time as of January 1, 2013.

2 Accounting policies (Continued)

The company Freiburg Medical Laboratory Middle East LLC, which was consolidated using the equity method in 2012, has been fully consolidated as of August 1, 2013. The newly formed company KRH Labor GmbH as well as the existing shareholdings in MED Laborunion GmbH and Schubert Med. prod. GmbH & Co. KG, which had not been consolidated previously for reasons of materiality, were consolidated using the equity method for the first time in 2013.

On February 5, 2013, the SYNLAB GROUP acquired a further 1.82% shareholding in BZH GmbH at a purchase price of 16 thousand euros. Thus the shareholding increased from 51.02% to 52.84%. On July 18, 2013, the SYNLAB GROUP also acquired the remaining 49% shareholding in BILACON Institut für Biotechnologie, Laboranalytik und Consulting GmbH at a purchase price of 35 thousand euros, increasing the shareholding from 51% to 100%. Both companies had been fully consolidated in 2012.

The following companies were merged or acquired in 2013:

Merged company	Country	Absorbing company	Merger date
Laboratoire Biosemois SPRL	BE	Laboratoire d'Analyses Médicales Dr. Jean Collard SPRL	07/01/2013

Eurolab S.r.l.	IT	10/01/2012	100%
Malá Praha spol s.r.o.	SK	08/23/2012	100%
Synlab Referans M-B Saglik Laboratuar Hizmetleri Sanayi Ticaret Limited	TR	01/01/2012	SPE
Synlab UK Limited	UK	02/27/2012	100%

As of February 27, 2012, Synlab UK Limited was founded in the United Kingdom, and Citylab S.r.l. was founded in Italy as of April 12, 2012.

The Company's management re-evaluated the laboratory companies not consolidated in 2011 for reasons of materiality and included them subsequently in the scope of consolidation as of fiscal year 2012. These were: Ärztliche Laborgemeinschaft Bonn, Ärztliche Laborgemeinschaft Köln-Kalk, Ärztliche Laborgemeinschaft Region Eschweiler, Ärztliche Laborgemeinschaft Mittelhessen, Ärztliche Laborgemeinschaft Hamburg-Nordwest, Ärztliche Laborgemeinschaft Hochsauerland, Ärztliche Laborgemeinschaft Nordeifel, Ärztliche Laborgemeinschaft Troisdorf and Privatärztliche Laborgemeinschaft Dinslaken.

In addition to the aforementioned companies, Spectromass Analitikai Laboratórium Kft, Hungary, was acquired as of July 10, 2012, and Aneclab s.r.o, Czech Republic and ANECLAB GmbH, Austria were acquired as of October 16, 2012. Due to these companies' insignificant effect on the Group's financial position, financial performance and cash flows they were not included in the scope of consolidation as of December 31, 2012. Shareholdings in these companies were recorded at cost under 'Other non-current financial assets' as of December 31, 2012.

2 Accounting policies (Continued)

The following companies were merged or acquired in 2012:

Merged company	Country	Absorbing company	Merger date
synlab SUISSE S.A. (formerly: Labor Dr. Güntert AG)	CH	synlab Suisse SA (formerly: FUTURELAB Swiss S.A.)	01/01/2012
Laboratorium für spektralanal. u. biol. Untersuchungen Dr. Bayer GmbH	DE	synlab Medizinisches Versorgungszentrum Leinfelden-Echterdingen GmbH	01/01/2012

Synlab Arztbedarf GmbH	DE	synlab Services GmbH	01/01/2012
Synlab Clinical Trial GmbH	DE	synlab Umweltinstitut GmbH	01/01/2012
Eurolab S.r.l.	IT	Synlab Italia s.r.l.	01/01/2012
SYNLAB S.r.l.	RO	SYNLAB WEST S.R.L.	01/01/2012
AVILAB s.r.o.	SK	synlab slovakia s.r.o.	01/01/2012
Lab Tech s.r.o.	SK	synlab slovakia s.r.o.	01/01/2012
Laboratoria Aliatros s.r.o.	SK	synlab slovakia s.r.o.	01/01/2012

The following companies were liquidated and deconsolidated in 2012:

Company	Country	Deconsolidation date	Shareholding
SYNLAB-CRAIOVA S.r.l.	RO	01/01/2012	50%

Deconsolidation losses from liquidation and subsequent deconsolidation in the amount of 26 thousand euros were recorded as "Profit/ loss from deconsolidation of subsidiaries'"

The following companies were deconsolidated in 2012:

Company	Country	Deconsolidation date	Shareholding
Laborgemeinschaft Pforzheim GbR	DE	01/01/2012	SPE
Futurelab Romania S.R.L.	RO	01/01/2012	100%
SC Lasimed S.r.l.	RO	01/01/2012	51%

Laborgemeinschaft Pforzheim GbR is no longer active and was deconsolidated in 2012. Shareholdings in the companies SC Lasimed S.r.l. and Futurelab Romania S.r.l. were reported at (amortized) cost.

Subsidiaries are fully consolidated as of the date on which the Group gains control. Their consolidation ends as soon as the subsidiary is no longer controlled by the parent company. The subsidiaries' annual financial statements are prepared using the same accounting policies and as of the same reporting date as the parent's annual financial statements. All intra-group balances, transactions, unrealized profits and losses from intragroup transactions and dividends are eliminated in full.

A subsidiary's losses are attributed to non-controlling interests even though this may result in a negative balance. Any change in the shareholding in a company while control is retained is recorded as an equity transaction. When a parent company loses control over a subsidiary, the following steps are taken:

- The subsidiary's assets (including goodwill) and liabilities are derecognized.
- The carrying amount of the non-controlling interest in the subsidiary is derecognized.
- Cumulative translation differences reported in equity are derecognized.
- Fair value of consideration received is recorded.
- Fair value of remaining interest is recorded.
- Profit or loss is recorded in the consolidated statement of comprehensive income.
- Elements of other comprehensive income accruing to the parent company are reclassified to the consolidated statement of comprehensive income or to retained earnings, if so required by IFRS.

2 Accounting policies (Continued)

2.3 Summary of significant accounting policies

2.3.1 Business combinations and goodwill

Business combinations are recorded using the purchase method. Acquisition costs incurred for the acquisition of a company comprise the sum total of transferred consideration measured at fair value as of the date of acquisition and the non-controlling interests in the acquired company. For each business combination, the acquiring entity measures the non-controlling interests in the acquired company based on the relevant share of the identifiable net assets of the acquired company. Any costs thus incurred are recorded as expenses and are presented as other operating expenses.

When the Group acquires a company, it determines a suitable classification and designation of financial assets and liabilities assumed in accordance with contractual terms, the economic situation and conditions prevailing at the time of acquisition. This includes separate reporting of any derivatives embedded in host contracts.

In a subsequent business combination, the share in the equity of the acquired company previously held by the purchaser is revalued at fair value as of the acquisition date, and the resulting profit or loss is recognized in profit or loss. When the subsequent business combination results in changed ownership while maintaining control, the acquisition is accounted for as a transaction between owners. Any changes in value between majority and minority shareholders are recorded in equity.

The agreed contingent consideration is measured at fair value as of the acquisition date. Any subsequent adjustments to the fair value of the contingent consideration in the form of an asset or a liability are reported either in the consolidated statement of comprehensive income or in other comprehensive income, in accordance with IAS 39. Contingent consideration classified as equity is not revalued; subsequent compensation is recorded as equity.

Goodwill is initially measured at acquisition cost, which is calculated as the excess of transferred consideration and the amount of the non-controlling interest over the acquired identifiable assets and liabilities of the Group. If this consideration amount is exceeded by the fair value of the net assets of the acquired subsidiary, the difference is recorded in the consolidated statement of comprehensive income. Goodwill is subsequently measured at cost less accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in the course of a business combination is attributed to the cash-generating units (CGUs) in the Group which are expected to benefit from the business combination. This applies regardless of whether other assets or liabilities of the acquired company are attributed to these CGUs.

If goodwill was attributed to a cash-generating unit (CGU) and a business unit of this CGU is sold, the goodwill attributable to the business unit sold is included in profit/loss from the sale of that business unit as part of the carrying amount of the business unit. The value of the portion of goodwill sold is determined based on the ratio of values of the business unit sold to the remaining part of the CGU.

2.3.2 Foreign currency translation

The consolidated financial statements are prepared in euros, the parent company's functional currency. Each company within the Group determines its own functional currency, which, as a rule, is the respective local currency. The line items in the subsidiaries' financial statements are recorded in the respective functional currency.

Foreign currency transactions and balances

The Group companies initially translate foreign currency transactions into the respective functional currencies at the mean rate of exchange on the day of the business transaction. Monetary assets and liabilities recorded in a foreign currency are translated into the functional currency at each reporting date at the mean rate of exchange. All translation differences are recognized in profit or loss, except any monetary items that represent an effective hedge of a net investment in a foreign business operation. These are recorded in other comprehensive income until the net investment is sold, and recorded in consolidated statement of comprehensive income only upon disposal. Any tax liabilities resulting from translation differences from these monetary items are also recorded in other comprehensive income. Non-monetary items valued at historical purchase cost or cost of conversion in a foreign currency are translated on the day of the business transaction.

2 Accounting policies (Continued)

Group companies

Assets and liabilities of foreign business operations are translated into euros at the reporting date rate (mean rate of exchange). Annual average exchange rates are used for translating income and expense amounts. The resulting translation differences are recorded in other comprehensive income. The values thus recorded for foreign business operations are reclassified into the consolidated statement of comprehensive income upon sale of the respective foreign business operations.

The following key exchange rates were applied:

	Closing rate		Annual average exchange rate	
1 euro =	12/31/2013	12/31/2012	2013	2012
Pound sterling (GBP)	0.8337	0.8161	0.8502	0.8111
Polish zloty (PLN)	4.1543	4.0740	4.1940	4.1843
Romanian leu (RON)	4.4847	4.4287	4.4177	4.4581
Swiss francs (CHF)	1.2276	1.2072	1.2305	1.2053
Czech crowns (CZK)	27.425	25.140	25.980	25.146
Turkish lira (TRY)	2.9344	2.3517	2.5351	2.3145
Hungarian forints (HUF)	297.04	292.30	297.34	289.32
United Arab Emirates dirhams (AED)	5.0576	4.8550	4.8819	4.7239

2.3.3 Recognition of income

Income is recognized as and when it is probable that the economic benefit will accrue to the Group and the amounts can be reliably determined, regardless of the payment date. Income is measured at the fair value of the consideration received or the consideration to be received in accordance with contractual payment terms; taxes or other duties are not considered. Recognition of income requires the fulfillment of the following criteria:

Provision of services

Income from laboratory services is recognized to the extent that the profit or loss of the business can be reliably estimated and it is sufficiently probable that the economic benefit will accrue to the company. In case of analyses not yet completed, work in progress is recorded in the amount of reimbursable expenses incurred.

Sale of goods

Income is recognized when the significant risks and rewards associated with ownership of the goods and products sold have been transferred to the buyer. This usually takes place upon delivery of the goods and products.

Dividends

Income is recognized when a legal claim to payment arises.

Interest income

For all financial instruments measured at amortized cost and interest-bearing financial assets classified as available-for-sale, interest income or expense is recognized using the effective interest rate, which is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument, or a shorter period as applicable, to the net carrying amount of the financial asset or liability. Interest income is presented in the profit and loss statement as part of finance income.

2 Accounting policies (Continued)

2.3.4 Taxes

Current income taxes

Current tax receivables and tax payables for the current period are measured at the amount equaling the expected refund from or payment to the tax authorities. Calculation of these values is based on tax rates and tax laws effective in the country in which the Group operates and generates taxable income at the reporting date. Current taxes that are related to items recorded directly in equity are not recorded in the consolidated statement of comprehensive income but rather in equity. Management regularly reviews individual tax situations with respect to whether there is room for interpretation taking into consideration applicable tax provisions. Provisions for tax liabilities are accrued if necessary.

Deferred taxes

Provisions for deferred taxes are accrued using the liability method with respect to temporary differences in the value of an asset or liability in the statement of financial position and its value in the tax accounts at the reporting date.

Deferred tax liabilities are recorded for all temporary taxable differences, with the exception of:

- deferred tax liabilities resulting from the initial recognition of goodwill, an asset or liability from a transaction which is not a business combination and at the transaction date neither influences the accounting profit or loss nor the taxable profit or loss for the period,
- deferred tax liabilities from temporary taxable differences connected with investments in subsidiaries, affiliated companies, or shares in joint ventures, if the temporal course of the reversal of temporary differences can be controlled and it is probable that the temporary differences will not be reversed in the foreseeable future.

Deferred tax assets are recorded for all deductible temporary differences, unused tax loss carryforwards and unused tax credits to the extent that it is probable that the taxable income will be available against which the deductible temporary differences and unused tax loss carryforwards and unused tax credits can be offset, with the exception of:

- deferred tax assets from deductible temporary differences arising from the initial recognition of an asset or liability from a transaction that is not a business combination and which, at the transaction date, neither influences the accounting profit or loss nor the taxable profit or loss for the period,
- deferred tax assets from deductible temporary differences in connection with investments in subsidiaries if it is probable that the temporary differences will not be reversed in the foreseeable future or that no taxable income will be available against which temporary differences can be offset.

The carrying amount of the deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that there is sufficient taxable income against which the deferred tax assets can at least be partially offset. Deferred tax assets that are not recognized are reviewed on each reporting date and then recognized in the amount that it has become probable that future taxable income will make possible the realization of the deferred tax assets. Deferred tax assets and liabilities are measured based on those tax rates that will probably become effective in the period in which an asset is realized or a liability paid. The tax rates (and tax laws) effective at the reporting date are used as a basis. Deferred taxes that are directly related to items that do not affect profit or loss are also recorded without any effect on profit or loss. Such deferred taxes are recorded either in other comprehensive income or directly in equity, depending on the transaction on which they are based. Deferred tax assets and liabilities may be offset if and when the Group has an enforceable claim to offset the current tax assets against actual tax liabilities which are attributable to income taxes of the same taxable unit and are imposed by the same tax authority.

If a business combination gives rise to deferred tax benefits that do not fulfill the criteria for separate recognition as of the date of acquisition, such benefits are recognized in the following periods as long as this is in line with new information regarding facts and circumstances existing at the time of acquisition. The adjustment made is either an impairment of goodwill, if such takes places during the valuation period (and as long as it does not exceed goodwill), or recorded in profit or loss.

2 Accounting policies (Continued)

Value-added tax

Revenues, expenses and assets subject to VAT are recognized net of VAT. The following cases are exceptions to this rule:

- If VAT incurred upon the acquisition of assets or the utilization of services cannot be reclaimed from the tax authority, the VAT is recognized as part of the cost of conversion of the asset or as part of the expenses.
- Receivables and liabilities are recognized with the respective VAT amounts included.
- In the case of Group companies for which only partial reimbursement of VAT is possible, the non-reimbursable portion of VAT is not deducted.
- In the case of Group companies for which no reimbursement of VAT is possible, no VAT is deducted.

The VAT amount to be refunded by or paid to the tax authority is recognized in the statement of financial position under "Other current assets" or under "Other financial liabilities".

2.3.5 Intangible assets and property, plant and equipment

Intangible assets are recognized for the first time at acquisition cost or at cost of conversion. The cost of intangible assets acquired in the scope of a business combination is calculated as the fair value at date of acquisition. In subsequent periods, the intangible assets are recorded at cost or at cost of conversion less accumulated amortization and any accumulated impairment losses, if applicable. Research expenditures are recorded in the period in which they are incurred. Development costs, with the exception of the portion to be capitalized, are not capitalized, but rather recorded in profit or loss in the period in which they are incurred.

Property, plant and equipment is recorded at acquisition cost or cost of conversion less accumulated scheduled depreciation and/or accumulated impairment losses. Acquisition cost or cost of conversion includes costs for replacement parts for property, plant and equipment and borrowing costs for long-term construction projects, if the recognition criteria have been fulfilled. If material parts of property, plant and equipment must be replaced at regular intervals, the Group capitalizes such parts as separate assets with specific useful lives or depreciation periods. Costs incurred for a major inspection are correspondingly capitalized at carrying amount as replacement cost of the asset if the criteria for recognition have been fulfilled. Any other maintenance and repair costs are recorded in profit or loss. The net present value of expected costs for disposal of an asset after its use is included in the cost or cost of conversion of the respective asset if the criteria for recognition have been fulfilled.

Intangible assets and property, plant and equipment are always depreciated over their economic lives and inspected for any possible impairment loss whenever there is any indication that the intangible asset might be impaired. Duration and method of depreciation are reviewed at least at the end of each reporting period. Any necessary changes to duration or depreciation method due to changes in the expected useful life or the expected deterioration of the future economic benefits of the asset are treated as changes in estimates. Amortization of intangible assets and depreciation of property, plant and equipment are recorded in the statement of comprehensive income under "Depreciation and amortization". Profit or loss from the disposal of intangible assets and property, plant and equipment is measured as the difference between the net disposal proceeds and the carrying amount of the asset and recorded in the period during which the asset is disposed.

2 Accounting policies (Continued)

Straight-line amortization and depreciation is charged over the following useful lives of the assets:

Asset	Useful life	Remaining useful life
Intangible assets		
• Customer lists	3 to 20 years	1 to 20 years
• Trademarks	1 to 6 years	1 to 3 years
• Concessions, industrial property rights, and similar rights	3 to 6 years	1 to 6 years
Investments in non-Group buildings	remaining term of the contract, 10 years maximum	
Technical machines and equipment	4 to 10 years	
Vehicle fleet	3 to 5 years	
Other equipment, fixtures and fittings, and office equipment	4 to 10 years	
Buildings	20 to 50 years	

Intangible assets or property, plant and equipment are derecognized either upon disposal or when no economic benefits are expected to flow from further use or from the disposal of the recognized asset. Profit or loss arising from the derecognition of the asset are recorded in consolidated statement of comprehensive income as the difference between the net disposal proceeds and the carrying amount of the asset in the period in which the asset is derecognized. Remaining value, useful life and depreciation/amortization methods of the assets are reviewed at the end of each fiscal year and prospectively adjusted as necessary.

2.3.6 Lease agreements

The decision whether an agreement is classified as a lease is made based on the economic substance of the agreement at the time of the conclusion of the agreement, and requires an estimate as to whether the fulfillment of the agreement depends on the use of a specific asset or assets and whether the agreement grants the right to use this asset, even if this right is not expressly stipulated in the agreement. The Group companies using analysis equipment generally do not have civil-law title to this equipment. Invoicing for this equipment is "per reported result", whereby it can be assumed that the fee contains not only analysis materials and maintenance costs, but also a fee for provision of the equipment. Pursuant to IFRIC 4 (Determining Whether an Arrangement Contains a Lease), this type of agreement represents a lease agreement if the fulfillment of the agreement is dependent upon the use of a certain asset and the agreement grants a right to use the asset. According to these criteria, it can be assumed that the agreements on the use of analysis equipment contain lease agreements. Based on the content of the agreements, these are operating leases. The portion of lease components in these agreements is estimated based on the available documents because the parties to the contract have not provided any information.

The Group as lessee

Finance leases in which essentially all risks and rewards related to the title of the leased asset are transferred to the Group as the lessee result in capitalization of the leased asset at the beginning of the term of the lease. The leased asset is recognized at the lower of its fair value or the present value of the minimum lease payments. Lease payments are divided into finance costs and repayments of the principal in such manner that during the life of the lease a constant interest rate applies to the remaining lease obligation. Finance costs are recorded in profit or loss. Leased assets are depreciated over their useful lives. If transfer of the title to the asset to the Group at the end of the lease is not sufficiently likely, the lease is fully amortized over the shorter of the estimated useful life of the asset and the term of the lease.

Payments for operating leases are recorded on a straight-line basis in the consolidated statement of comprehensive income as expenses for rental and lease agreements over the term of the lease agreement.

Agreements on the use of analysis equipment are formulated such that they contain embedded lease components. Based on the content of the agreement, these are operating leases. The amount of the lease components in these agreements is estimated based on the available documents because the parties to the contract have not provided any information.

2 Accounting policies (Continued)

2.3.7 Borrowing costs

Borrowing costs that can be directly attributed to the acquisition, construction or production of an asset are capitalized as part of the cost or cost of conversion of the respective asset if a significant period of time is required to prepare the asset for its intended use or sale. All other borrowing costs are recognized as an expense in the period in which they are incurred. Borrowing costs are interest and other costs incurred by an enterprise in connection with the borrowing of funds.

2.3.8 Financial instruments

Financial assets and liabilities

Financial assets within the meaning of IAS 39 are either categorized as financial assets that are measured at fair value through profit or loss, as loans and receivables, as financial investments held to maturity, as financial assets available for sale or as derivatives designated as hedging instruments.

Financial liabilities within the meaning of IAS 39 are either classified as financial liabilities measured at fair value through profit or loss, or as "Other financial liabilities".

The Group determines the classification of its financial assets when they are recognized for the first time. Any necessary and permissible reclassifications are made at the end of the fiscal year. No reclassifications took place in either of the reporting years.

When financial assets and liabilities are first recognized, they are measured at their fair value, and as a rule are recorded as of the conclusion date of the contract. Transaction costs connected with an acquisition are also recognized for all financial assets and liabilities not subsequently measured at fair value through profit or loss.

Financial assets and liabilities are only netted in the Group statement of financial position if there is a legal claim at that time to offset the recorded amounts against each other and it is intended to do this on a net basis or to simultaneously repay the corresponding liability when the corresponding asset is realized.

With the exception of derivative instruments as well as non-controlling interests in a partnership ("puts on NCI"), no financial investments were measured at the reporting date either as financial assets that are measured at fair value through profit or loss or as financial investments held to maturity, nor were any financial liabilities classified as financial liabilities measured at fair value through profit or loss.

Primary financial instruments

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial recognition, loans and receivables are measured at amortized cost using the effective interest rate method less any impairment. Gains or losses are recognized in profit or loss for the period if loans or receivables are derecognized or impaired. Loans and receivables include Group trade receivables, certain current assets and cash and cash equivalents.

Available-for-sale financial investments are defined as non-derivative financial assets that are classified as available-for-sale and are not categorized otherwise. After initial measurement, financial investments that are available-for-sale are measured at fair value; profit or loss is recorded under "Accumulated other comprehensive income" less any income tax effects. At the date on which the financial investment is derecognized or on which a related impairment is determined, the previously recognized accumulated other comprehensive income is recognized through profit or loss. The fair value of financial investments traded on organized markets is determined using the market bid price quoted at the reporting date. The fair value of financial investments for which no active market exists is assessed using valuation methods. If there is no market and the fair value cannot be reasonably assessed, the asset is recognized at amortized cost.

Financial liabilities and interest-bearing loans are measured at amortized cost using the effective interest rate method. Amortization and derecognition of liabilities are reported through profit or loss.

2 Accounting policies (Continued)

Derivative financial instruments

The Group uses interest rate swaps, caps and collars as derivative financial instruments for hedging future interest payments. The hedge accounting provided for under IAS 39 was not utilized for the Group financial statements.

Thus derivative financial instruments must be classified as held for trading, and are recorded at fair value through profit or loss as of the conclusion date of the respective contract and thereafter.

The fair value of interest rate swap and collar contracts is determined using the net present value of future contracted payment flows, based on current market data.

Impairment of financial assets

The Group determines at each reporting date whether there is any indication of impairment of a financial asset or a group of financial assets that are not recorded at fair value through profit or loss.

Objective evidence for the occurrence of impairment could include, for example, the repudiation of a draft invoice in a demand for payment, significantly overdue payment or other indications of non-collectability.

With respect to financial investments available for sale, an objective indication of impairment is present if the fair value falls below the carrying amount either for an extended period or by a significant amount. To the extent such an asset is impaired, the cumulative loss previously recognized directly in equity is booked to profit or loss. A reversal of an impairment loss on an equity instrument classified as available for sale at a later point in time is not recorded in profit or loss, but rather reversed in equity.

Derecognition of financial assets and liabilities

A financial asset is derecognized when the Group loses control over the contractual rights on which the financial asset is based. A financial liability is derecognized when the underlying obligation is fulfilled, terminated or has expired.

2.3.9 Inventories

Inventories are measured at the lower of cost or net realizable value. Net realizable value is the expected sales price achievable in the course of ordinary business operations less estimated costs of completion and necessary sales and marketing expenses.

Any costs incurred to transport inventories to their present location and to render them in their current condition are capitalized as follows:

Raw materials, consumables and supplies:

- First-in-first-out method (Fifo)

Finished and unfinished products or services:

- Directly attributable materials and production costs as well as reasonable portions of overhead production costs based on the facility's normal production capacity without taking borrowing costs into account

2.3.10 Impairment of non-financial assets

At each reporting date, the Group determines whether situations exist that would necessitate an impairment of non-financial assets. If there is any such indication or if an annual impairment test is necessary for an asset, the Group estimates the recoverable amount of the respective asset. The recoverable amount of an asset is the greater of the fair value of an asset or a CGU less cost of sale and the value-in-use. The recoverable amount must be determined for each individual asset unless a particular asset does not generate any cash flows that are largely independent of other assets or other groups of assets. If the carrying amount of an asset or CGU exceeds its respective recoverable amount, the asset is impaired and is depreciated to recoverable amount.

Value-in-use is the net present value of future expected cash flows using a discount rate before tax that reflects market expectations with respect to the interest rate effect and the specific risk of the asset. Recent market transactions, if applicable, are taken into consideration when determining the fair value less any cost of sale. If there are no such identifiable transactions, a suitable valuation model is used. This is based on valuation multiples or other available indicators of fair value.

The Group bases its impairment decisions on detailed budget and projection calculations that are prepared separately for each Group CGU to which individual assets are allocated. As a rule, these budget and projection calculations cover a span of five years. A long-term growth rate is determined for longer periods of time and used to project future cash flows beyond the fifth year. Impairment costs of continuing business operations, including impairment of inventories, are recorded through profit or loss in the categories relating to the function of the impaired asset within the Company. This does not apply to assets previously revalued to the extent that the increases in value from the revaluation were recorded in other comprehensive income. In such case the impairment is also recorded in other comprehensive income up to the amount of a previous revaluation.

Assets other than goodwill are evaluated at every reporting date as to whether there are indications that a previously recorded impairment loss no longer exists or has been reduced. If such indications are present, the Group assesses the recoverable value of the asset or the CGU. Any previously recorded impairment losses are only reversed if a change in the assumptions that formed the basis for the determination of the recoverable amount has taken place since recording the last impairment loss. The impairment reversal is limited by the fact that the carrying amount of an asset may neither exceed its recoverable amount nor the carrying value that would have remained after scheduled depreciation if in previous years no impairment losses for the asset had been recorded.

Goodwill is valued once a year on December 31, and whenever indications suggest a possible impairment. This value is also reviewed if circumstances indicate that impairment may have occurred. The impairment is calculated by determining the recoverable amount of the CGU (or the CGU groups) to which the goodwill is allocated. If the recoverable amount from the CGU is less than the carrying amount of this unit, an impairment loss is recorded. Once impairment losses are recorded on goodwill, such impairment losses are not to be reversed in future periods.

2.3.11 Cash and cash equivalents

The statement of financial position item “Cash and cash equivalents” comprises cash on hand, bank deposits and short-term deposits with a term of less than 3 months. For the purposes of the cash flow statement, cash and cash equivalents comprises cash as defined above and short-term deposits.

2.3.12 Provisions

Principles

A provision is recognized if the Group has a present (legal or constructive) obligation arising from a past event, expenditure of resources with economic benefit to fulfill the obligation is likely, and a reliable assessment of the amount of the obligation is possible. If an accrued liability is expected to be reimbursed at least in part (e.g. liabilities covered under an insurance policy), the reimbursement is classified as a separate asset, provided there is a high probability of it occurring. The expense for such a provision is reported in the consolidated statement of comprehensive income less any reimbursement. If the interest rate effect from a discounting event is substantial, provisions are discounted using a discount rate before tax that reflects the specific risks for the obligation involved. In case of discounting, the increase in the provision resulting from passage of time is recorded as finance costs.

Provisions for restructuring

A provision for restructuring is only recognized if the general requirements for realization of provisions are fulfilled. Furthermore, the Group must follow a formalized restructuring plan setting out detailed requirements regarding the business unit or part of the business unit concerned, the site and the number of employees concerned, as well as a detailed estimate of associated cost and a reasonable time schedule. The employees concerned must justifiably expect that the restructuring will take place, or it must have already begun.

2.3.13 Pensions and other post-employment benefits

Non-current pension provisions comprise defined benefit plans for pensions and other post-employment benefits as well as provisions for German phased retirement programs and long-service awards. Defined-benefit pensions and other post-employment benefit obligations are measured pursuant to IAS 19 (Employee Benefits) using the projected unit credit method. The net present value of the obligation is determined based on the duration of the employee's service, expected salary increases and projected retirement age.

Actuarial gains or losses resulting from changes to actuarial assumptions or differences between former actuarial assumptions and actual developments are recognized directly in equity in the period in which they were incurred, taking into account any deferred taxes. After deduction of plan assets, all obligations are thus fully reflected in the statement of financial position, eliminating in particular any expense variations from potential changes in calculation parameters. All actuarial gains and losses and any attributable deferred taxes incurred in the respective reporting period are thus part of accumulated other comprehensive income. The Company's obligations from German phased retirement programs result from individual employee contracts. Employees may choose between two variants of the German phased retirement program: The so-called block model requiring the employee to continue working full-time at first, usually followed by an equally long release period; or a 50% part-time employment for the whole period until retirement commences. Actuarial gains and losses from German phased retirement program provisions are recorded in full through profit or loss.

Provisions for long-service awards are accrued for claims based on collective agreements or long-term claims based on other employee agreements depending on the durations of service at the Company in accordance with the regulations of IAS 19. For long-service awards, gains or losses from changes in the calculation parameters are directly recorded in full as profit or loss in the same fiscal year.

In Switzerland, the Group maintains a defined-benefit pension agreement. Swiss companies do not accrue pension provisions as a rule since pensions are paid by pension funds which are legal entities under Swiss law and which provide for appropriate cover while Swiss companies are obligated to pay monthly contributions to these pension fund entities. The accumulated funds are released for retirement payments only. The pension plan assets comprise the savings balance of active insured individuals and the credit balance in the various accounts of the collective foundations as well as the amount of coverage if accrued pension benefits are not guaranteed. Swiss pension funds are responsible for maintaining sufficient liquidity to honor their financial obligations. The governing body is the respective foundation board.

The pooled plan is furthermore a defined benefit plan within the meaning of IAS 19. Because of the current extremely low discount rate assumptions, calculating pension payment obligations in accordance with IFRS/IAS 19 as compared to the applicable rates under Swiss law, generally yields extremely low funding levels, especially for active plan contributors but also, to a lesser extent, for pensioners. In these calculations the company is assumed to be the debtor and the expected funding gap is recognized accordingly in the statement of financial position.

The Group has pension obligations for senior management personnel. These benefits are not re-insured through an external fund.

2.3.14 Non-controlling interests in partnerships/put options

Pursuant to the rules set forth in IAS 32 on the delimitation of equity and liabilities, non-controlling interests in partnerships for which minority partners have a right of termination are recorded as a liability. In the same manner, shares for which the minority shareholder has been granted a put option by the majority partner are to be recognized at the fair value of the purchase price as an obligation. If this is done for a business combination, the business combination is accounted for as if the non-controlling interests had already been acquired. As a result, goodwill is recognized in full. Such shares are shown on the Group statement of financial position as a liability under "Other financial liabilities". Income from these shares which can be withdrawn by the minority partner is shown in the consolidated statement of comprehensive income under "Revaluation of non-controlling interests in partnerships".

2 Accounting policies (Continued)

2.3.15 Share-based payment

Members of management and other senior managers of the Group receive as remuneration for their work share-based payments in the form of equity instruments (equity-settled share-based payment transactions).

If equity instruments are issued and some or all of the services the company received in return are not clearly identifiable, the services received or to be received that cannot be identified are measured at the difference between the fair value of the share-based payment and the fair value of the identifiable services already received by the date the equity instruments were granted. This difference is then recorded as an expense.

Expenses for equity-settled share-based payment transactions are measured at fair value as of the date the equity is granted. Fair value is determined using a suitable option pricing model. Expenses arising from the granting of equity instruments and the corresponding increase in capital reserves are recognized over the period of time in which the conditions for performance and services are to be fulfilled ('vesting period'). This period ends at the first possibility to exercise the option, that is, when the employee concerned is irrevocably entitled to exercise the option. The cumulative expenses recorded for equity-settled share-based payment transactions thereby reflect at any reporting date up to the date of first possibility of exercising the option the vesting period already expired as well as the number of equity instruments which, based on the best estimate of management, will eventually vest. However, the amount by which income is reduced or increased reflects the change in cumulative expenses reported at the beginning versus the end of the reporting period.

Forfeited equity instruments granted for remuneration are not recorded as expense. An exception are those equity instruments granted for which non-forfeitability is based on certain market or non-vesting conditions. These equity instruments granted are deemed to be exercisable regardless of whether the market or non-vesting conditions are fulfilled, as long as all performance and service conditions have been fulfilled.

If the underlying conditions of an equity-settled share-based payment transaction are changed, expenses are recorded in the minimum amount of costs that would have been incurred if contractual conditions had not been changed, provided that the original conditions of the remuneration agreement are fulfilled. The company also records the effect of changes that increase the fair value of the share-based payment or are related to any other benefit for the employee, valued at the date of the change.

If an equity-settled share-based payment agreement is canceled, this is treated as if the option had been exercised on the day of cancelation. Expenditure not yet recognized is recorded immediately. This applies to all remuneration agreements for which non-vesting conditions on which either the company or the employee have an influence have not been fulfilled. However, if the canceled remuneration agreement is replaced by another remuneration agreement declared on the day it is granted as replacement for the canceled remuneration agreement, the canceled agreement and the new remuneration agreement are recorded in the statement of financial position as a change to the original remuneration agreement. All cancellations of remuneration agreements based on equity-settled share-based payment transactions are treated equally.

2.3.16 Fair value measurement

The Group measures the fair value of its financial instruments, such as derivatives, as of each reporting date. The fair values of financial instruments measured at amortized cost are listed in section 7.

The fair value represents the price received for an asset sold or the money paid for a liability transferred in an ordinary business transaction between market players at the measurement date. When measuring the fair value it is assumed that the asset is sold or the liability transferred in a business transaction either on the primary market for such asset sale or liability transfer or the best market for such transactions if no primary market exists.

The Group must have access to either the primary or the best markets.

2 Accounting policies (Continued)

The fair value of an asset or liability is measured using the market players' assumptions applied in setting the price of the asset or liability. It is also assumed that market participants act in their best economic interest.

The fair value measurement of a non-financial asset takes into account the market participant's ability to achieve an economic benefit through the highest and best use of the asset or its sale to another market participant who will put the asset to the highest and best use.

The Group uses measurement methods which it considers appropriate under the given circumstances and for which sufficient data is available to perform fair value measurement. It is important however to mainly use appropriate and observable input factors and keep non-observable input factors to a minimum.

Financial instruments recorded on the statement of financial position as measured at fair value are to be organized within a three-level hierarchy, as are all line items for which fair value is to be stated in the Notes. The levels reflect the market-relevance of the respective data used in the fair value measurement. The levels of the fair value hierarchy are as follows:

Level 1: Quoted prices for similar assets or liabilities on active markets

Level 2: Directly (prices, for example) or indirectly (derived from prices) observable market inputs other than Level 1

Level 3: Inputs for assets and liabilities not based on observable market data.

For assets or liabilities repeatedly reported in the financial statements the Group determines any hierarchy level re-classification by re-evaluating the existing classification at the end of each reporting period. Such revaluation is based on the lowest-level input parameters which are essential for fair value measurement.

In order to meet the requirements for fair value disclosures, the Group has established certain groups of assets and liabilities based on type, characteristics and risks as well as the fair value hierarchy levels mentioned above.

2.4 Significant judgments, estimates and assumptions

When compiling the consolidated financial statements, management makes judgments, estimates and assumptions that affect the amounts of income, expenses, assets, liabilities and contingent liabilities reported as of year-end. However, these estimates and assumptions are uncertain and thus can lead to results which may later require material adjustment of the carrying amount of the assets or liabilities.

In applying Group accounting policies, management made the following judgments which substantially influence amounts in the consolidated financial statements:

Consolidation of special purpose entities

The Group has associate relationships with collaborative laboratories owned by doctors. The Group therefore does not hold a direct stake in these collaborative laboratories, but benefits arising from the business activities of these entities accrue primarily to the Group. In reviewing the particulars and circumstances in these relationships, management reached the conclusion that these entities are controlled by the Group within the meaning of SIC-12. They were therefore included in the Group's financial statements accordingly.

Effects of refinancing initiated in January 2012

SYNLAB HOLDING and various subsidiaries refinanced existing interest-bearing loans and borrowings effective as of January 24, 2012, and entered into a new loan agreement for 395 million euros. The refinancing process commenced in mid-November 2011. In a review Company management decided that this refinancing qualified as new financing within the meaning of IAS 39.39. This led to a revaluation of the expected cash flows from the previous financing in line with IAS 39 AG8, the reversal of accrued transaction costs from previous financing and their recognition through profit or loss. Company management did not take into consideration effects arising from refinancing with regard to the recognition of transaction costs in profit or loss and the presentation of cash flows from financial liabilities until fiscal year 2012, maintaining that the refinancing was not sufficiently substantiated at the reporting date. Also, the financing banks' credit committees' only approved the transaction in January 2012.

2 Accounting policies (Continued)

Effects of refinancing in March and December 2013

Pursuant to an agreement concluded on March 28, 2013, SYNLAB HOLDING and several subsidiaries substantially expanded the existing financing agreement for the SYNLAB GROUP with respect to credit facilities, the restrictions originally agreed for the SYNLAB GROUP and the covenants to be observed. This expansion provided the SYNLAB GROUP with additional financing in the amount of 85 million euros in addition to the credit facilities existing as of December 31, 2012, comprising 10 million euros in increased short-term credit facilities, 75 million euros for additional capital investments and prospects for additional credit facilities of 175 million euros for capital investments. A further contract change concluded on December 18, 2013 provides for the reclassification of amortizing credit lines in the amount of 54 million euros as credit lines with a bullet structure. Other agreements involve changes to the covenants, potential equity injections and other changes regarding future acquisitions governed by the credit agreement. The changes to the existing financing agreement do not involve the exchange of debt instruments with substantially different contractual terms, but rather only represent a modification of the existing terms. These contractual changes thus do not have an impact on accrued transaction costs. Transaction costs resulting from these contractual changes were capitalized as of the conclusion date of the changed contract, and will be amortized over the term of the financing agreement.

Future-related assumptions

The most significant future-related assumptions and any other sources of forecasting uncertainty which pose significant risk involve a possibility that the carrying amount of assets and liabilities must be materially adjusted in the next fiscal year as outlined below. Group assumptions and estimates are based on parameters prevailing at the date the consolidated financial statements were prepared. These circumstances and assumptions regarding future developments may change however depending on market activity and conditions beyond the Group's control, and are only factored into assumptions after their occurrence.

a) Impairment of goodwill and intangible assets with indefinite useful lives

The Group conducts a review of goodwill and intangible assets at least once annually and whenever there are indications that an impairment of goodwill or intangible assets with indefinite useful lives may have occurred. Impairment tests conducted by the Group as of December 31, 2013 are based on calculations of recoverable amount using the discounted cash flow method. Cash flows are projected based on financial planning for the next five years. Cash flows beyond the planning period are projected using individual growth rates. Recoverable amount depends largely on the discount rate used in the discounted cash flow method, on expected cash inflows and outflows, and on the growth rate used for extrapolation.

The assumptions are based on premises derived from the currently available information. In particular, projected results are based on prevailing circumstances as well as realistic prognoses for future results both globally and for the industry. Major planning assumptions are based on planning discussions with important Group customers. Even though management feels that the assumptions it has used in calculating the recoverable amount are reasonable, unforeseeable changes in these assumptions could lead to impairment expenses that could have a negative impact on the financial position, financial performance and cash flows. The basic assumptions made to calculate the recoverable amount of goodwill for the individual CGUs, and of the intangible assets with indefinite useful lives as well as for sensitivity analysis are explained in detail in sections 6.2 and 6.3 of the Notes. As of December 31, 2013, the carrying amount of goodwill was 350,850 thousand euros (previous year: 311,940 thousand euros) and the carrying amount of intangible assets with indefinite useful lives was 1,233 thousand euros (previous year: 0 thousand euros).

b) Measuring property, plant and equipment and intangible assets

Measuring property, plant and equipment and intangible assets requires the use of estimates for determining fair value at the time of acquisition, in particular regarding assets acquired in the scope of a business combination. Furthermore, the expected useful life of these assets must be determined. Management uses judgment in determining the fair value of the assets and their useful lives as well as deciding whether an indication of impairment of value requires impairment testing. As of December 31, 2013, the carrying amount of property, plant and equipment was 67,355 thousand euros (previous year:

64,494 thousand euros); the carrying amount of intangible assets was 306,009 thousand euros (previous year: 299,222 thousand euros). More details are provided in sections 6.3 and 6.4 of the Notes.

c) Taxes

There is uncertainty regarding the interpretation of complex tax provisions, changes in the tax code as well as the amount and date of future taxable events. Given the large scope of international business transactions and the long-term nature and complexity of existing contractual agreements, it is possible that differences between the actual results and assumptions made or future changes in such assumptions could lead to adjustments in taxable income or tax expense already recorded. The Group accrues provisions based on realistic estimates of the potential impact of tax audits in those countries in which it conducts transactions. The amount of such provisions is based on various factors, including for example experience gained from previous tax audits and differing interpretations of tax provisions by the taxable company and the tax authorities. Such diverging interpretations occur when a large number of different tax issues are present, dependent upon the conditions prevailing in the country of domicile of the respective Group company. Because the Group views the probability of legal dispute and corresponding tax liabilities as being low, no contingent liabilities were recorded.

At each reporting date, the Group evaluates whether future tax benefits are sufficiently likely to justify the recognition of deferred tax assets. This requires management to assess the tax advantages resulting from available tax strategies and future taxable income in addition to other positive and negative factors. Expected taxable income as projected in company forecasts is used in these assessments. The amount of deferred tax assets stated could be reduced if projected taxable income and the tax benefits to be gained from available tax strategies are lower, or if changes in current tax provisions limit the time frame or the scope of realization of future tax benefits.

Deferred tax assets are recorded for all unused tax loss carryforwards in the amount in which it is likely that taxable income will be available against which the tax loss can actually be used. When determining the amount of the deferred tax asset, management must exercise a substantial amount of discretion in estimating the amount and timing of future taxable income as well as future tax planning strategies.

The Group has unrecognized tax loss carryforwards of 80,390 thousand euros (previous year: 50,734 thousand euros). These amounts have been incurred by Group companies with a history of losses. The loss carryforwards do not expire and cannot be offset against taxable income from other Group companies. The Group companies do not have any taxable temporary differences or tax structuring options that could lead to partial recognition of deferred tax assets. If the Group were able to capitalize all non-recognized deferred tax assets, the consolidated profit for the year would increase by 23,667 thousand euros (previous year: 14,936 thousand euros). In the current fiscal year, deferred tax assets in the amount of 636 thousand euros (previous year: 128 thousand euros) were recorded on tax loss carryforwards from the previous year on the basis of a reassessment of potential future taxable income or taxable temporary differences. Further details on taxes are provided in section 5.10 of the Notes.

d) Pension benefits

The expenditure on post-employment defined-benefit plans and the present value of pension obligations are determined based on actuarial calculations. The actuarial calculation is based on various assumptions which may differ from actual future developments. This includes the determination of discount rates, future wage and salary increases, the mortality rate and future increases in pension benefits. Due to the complexity of calculations, the assumptions used and its long-term nature, a defined-benefit plan obligation is very sensitive to changes in these assumptions. All estimates are reviewed at the reporting date of each year.

In determining the suitable discount rate, management is guided by interest rates of corporate bonds in the respective currency with at least an AA rating; these are adjusted by extrapolating them to the expected duration of the defined benefit plan obligation. Furthermore, management reviews the quality of the underlying bonds, and those exhibiting excessively large credit spreads are eliminated from the portfolio used to determine the discount rate, as these bonds are not considered high-grade. The mortality rate is based on mortality tables available to the public in the respective country. Future wage, salary, and pension increases are based on projected future inflation rates for the respective country.

All assumptions are reviewed at the reporting date of each year.

These estimates are very uncertain due to the long-term nature of such pension plans. As of December 31, 2013, the carrying amount of pensions and similar obligations was 11,437 thousand euros (previous year: 10,133 thousand euros). Further details are provided in section 6.14 of the Notes.

e) Measurement of contingent consideration at fair value

Contingent consideration arising in the scope of business combinations is recorded as part of the business combination at fair value as of the date of acquisition. If the contingent consideration satisfies the definition of a derivative, and thus of a financial liability, it will be re-measured at fair value in subsequent periods as of each reporting date. Fair value is determined using discounted cash flows. Basic assumptions take into consideration the likelihood of fulfillment of every performance target as well as the discount rate. As of December 31, 2013, the fair value of the consideration was 15,533 thousand euros (previous year: 15,691 thousand euros).

f) Fair value of financial instruments

If the fair value of financial assets and liabilities recorded in the statement of financial position cannot be determined using data from an active market, it is determined using valuation techniques such as the discounted cash flow method. The inputs used in the model are based on observable market data whenever possible. If this is not possible, the determination of fair values is to a certain extent a matter of discretion. Discretionary decisions involve inputs such as liquidity risk, default risk and volatility. Changes in the assumptions with respect to these factors could have an impact on the recorded fair value of the financial instruments. As of December 31, 2013, the negative fair value of the financial instruments was 2,340 thousand euros (previous year: 4,908 thousand euros).

3 Changes in accounting policies

3.1 New and revised standards and interpretations

The recognition and measurement methods used in preparing the consolidated financial statements of SYNLAB HOLDING generally correspond to the methods used in the previous year, with the exception of those changes in IFRS accounting standards whose application is mandatory as of January 1, 2013. The recognition and measurement methods used thus comply with the IFRS applicable for 2013 as adopted by the EU.

In fiscal year 2013, the Group took into account the following revised or new IFRS standards and interpretations, to the extent that these are applied.

IAS 1 Presentation of Financial Statements

The amendment to IAS 1 published in June 2011 is to be applied for the first time in fiscal years beginning on or after July 1, 2012. The amendment of IAS 1 concerns the presentation of items of other comprehensive income. Items to be reclassified through profit or loss in future ('recycled') are to be recorded separately from items remaining in equity. These changes affect only the presentation in the financial statements, and therefore have no effect on the Group's financial position, financial performance and cash flows.

IAS 12 Deferred Tax—Recovery of Underlying Assets

The amendment to IAS 12 published in December 2010 is to be applied for the first time in fiscal years beginning on or after January 1, 2013. The amendment to IAS 12 introduces a simplification rule. Accordingly, an assumption is made (which may be refuted) that the carrying amount realized through sale always applies for measuring deferred taxes on real estate measured at fair value. The disposal of property, plant and equipment that is not subject to depreciation and is measured using the revaluation method is always assumed. As expected, the application of this amendment did not have any impact on the Group's financial position, financial performance and cash flows under the German legal system.

3 Changes in accounting policies (Continued)

IAS 19 Employee Benefits

This revised standard is to be adopted for the first time in fiscal years beginning on or after January 1, 2013. The revised IAS 19 eliminates the 'corridor method' and mandates the recognition of actuarial gains and losses in other comprehensive income. In addition, expected income from plan assets and interest cost for the pension obligation have been replaced with a uniform net interest component. Going forward, past service cost is to be recognized in full in the period in which the corresponding change in benefit plans takes place. The revised IAS 19 also changes the rules applying to post-employment benefits and expands disclosure and explanation requirements.

A detailed analysis of the effects on financial position, financial performance and cash flows is provided in section 3.3.

IFRS 13 Fair Value Measurement

In May 2011, the IASB published IFRS 13, Fair Value Measurement. The new rules do not regulate the extent to which certain assets and liabilities are to be measured at fair value, but rather only define the term 'fair value' and harmonize disclosure requirements for fair value measurement. The new rules are to apply to fiscal years beginning on or after January 1, 2013. Application of IFRS 13 did not have any significant impact on measurement of fair value within the Group. Any mandatory disclosures regarding individual assets and liabilities subject to fair value measurement are contained in the corresponding sections of the Notes.

Improvements to IFRS (2009 - 2011)

The improvements to IFRS published in 2009 - 2011 have been compiled as an omnibus standard and were published in May 2012, containing amendments to various IFRS to be applied for fiscal years beginning on or after January 1, 2013. The Group has not yet applied the following amendments:

- IAS 1: Clarifies the difference between voluntary additional comparative information and mandatory comparative information which usually encompasses the previous reporting period;
- IAS 16: Clarifies that essential spare parts and servicing equipment classified as property, plant and equipment are not to be treated as inventory.
- IAS 32: Clarifies that income tax on distributions to holders of equity instruments are treated as per IAS 12 Income Taxes;

3.2 Published standards whose application is not yet mandatory

The standards that have been published by the date of publication of the consolidated financial statements but are not yet mandatory are listed below. This list refers to the published standards and interpretations which the Group assumes, based on sound business judgment, will be applicable in the future. The Group intends to apply these standards as soon as they become effective.

IAS 27 Consolidated and Separate Financial Statements According to IFRS (revised in 2011)

The revised IAS 27 was published in May 2011. This revised standard is to be adopted for the first time in reporting periods beginning on or after January 1, 2014. Following the publication of IFRS 10 and IFRS 12, the scope of application of IAS 27 was limited to accounting for investments in subsidiaries, jointly controlled entities and associated entities in a company's separate financial statements.

IAS 28 Investments in Associates (revised in 2011)

The revised IAS 28 was published in May 2011. This revised standard is to be adopted for the first time in reporting periods beginning on or after January 1, 2014. After the adoption of IFRS 11 and IFRS 12, the regulatory scope of IAS 28 was extended to require application of the equity method not only for associated companies, but for joint ventures as well.

3 Changes in accounting policies (Continued)

IAS 32 Offsetting Financial Assets and Financial Liabilities (revised)

This amendment is to be applied for the first time in reporting periods beginning on or after January 1, 2014, and clarifies the phrase "currently has a legally enforceable right to set off the recognized amounts". It further clarifies application of netting criteria in IAS 32 with regard to settlement systems (e.g. central clearing houses) using gross settlement for business transactions performed at different points in time. These changes are not expected to have an impact on the presentation of the Group's financial position, financial performance and cash flows.

IFRS 10 Consolidated Financial Statements

IFRS 10 replaces the requirements for consolidated financial statements set out in IAS 27, Consolidated and Separate Financial Statements (revised 2008), and SIC-12, Consolidation—Special Purpose Entities. This revised standard is applicable in the European Union for the first time in reporting periods beginning on or after January 1, 2014. Based on currently applicable principles, IFRS 10 regulates which entities are to be included in the consolidated financial statements, based on a comprehensive definition of control. The pronouncement provides additional guidelines on interpretation of the concept of control in unclear instances. An investor has control over the investee when it has existing rights that give it exposure to the variable returns and the ability to direct the relevant activities that significantly affect the investee's returns. Significant changes to the current requirements could arise in situations where an investor holds less than half of the voting rights in an entity, but has the ability to direct the relevant activities of the investee by other means.

IFRS 11 Joint Arrangements

This standard replaces IAS 31, Interests in Joint Ventures (amended 2008), and the interpretation SIC-13, Jointly Controlled Entities—Non-monetary Contributions by Venturers. IFRS 11 regulates the accounting for joint arrangements, the emphasis being on the type of rights and obligations arising from the arrangements rather than on their legal form. IFRS 11 classifies joint arrangements into two groups: joint operations and joint ventures. IFRS 11 eliminates the option of proportionate consolidation for joint venture companies. Going forward, these companies are to be included in the consolidated financial statements using the equity method only.

IFRS 12 Disclosure of Interests in Other Entities

IFRS 12 is a new and comprehensive pronouncement regulating disclosure requirements for all types of interests in other entities including joint arrangements, associated companies, structured entities, and off-balance sheet entities. This revised standard is to be applied for the first time in reporting periods beginning on or after January 1, 2014. This standard requires disclosure of information that enables users of financial statements to evaluate the nature of and risks associated with interests in other entities and the effects of those interests on a company's financial position, financial performance and cash flows.

IFRS 10, 11, 12, and the subsequent amendments to IAS 27 and IAS 28 enter into force in the European Union for fiscal years beginning on or after January 1, 2014. The new or amended pronouncements may be applied early, in which case, all of the aforementioned new standards must be applied as of the same date. The only exception is IFRS 12, whose disclosure requirements may be applied on an early basis and independently of other pronouncements. The pronouncements apply retrospectively. The Company currently does not expect the changes to have an effect on the scope of consolidation.

IFRS 10, IFRS 12 and IAS 27 Investment Entities

This amendment to IFRS 10, IFRS 12 and IAS 27 published in October 2012 is to be applied for the first time in fiscal years beginning on or after January 1, 2014. This amendment provides that 'investment entities' are exempt from the consolidation rules as per IFRS 10, and that all subsidiaries controlled by them are to be measured at fair value through profit or loss. An exception applies to investments in subsidiaries which provide services to the investment entity which are still to be consolidated as per IFRS 10. Parent companies of investment entities which are not themselves classified as investment entities thus have to include in their consolidated financial statements all companies which are controlled by an investment entity. An investment entity is defined as an entity which obtains funds from investors and provides investment management services to investors, thereby generating returns from capital appreciation, investment income, or both.

This amendment is not applicable to the Group and will therefore have no impact on the Group's financial position, financial performance or cash flows.

Amendment to IAS 36—Recoverable Amount Disclosures for Non-Financial Assets

The amendment to IAS 36 published in May 2013 is to be applied for the first time in fiscal years beginning on or after January 1, 2014. This amendment is intended to eliminate undesirable effects on disclosure requirements resulting from adoption of IFRS 13. It also requires disclosures on recoverable amounts for assets and cash-generating units for which an impairment loss was recognized or reversed during the reporting period. The amendment applies retrospectively. Early application is permissible.

This amendment only requires additional or modified disclosures and has no impact on the Group's financial position, financial performance or cash flows.

Amendment to IAS 39—Novation of Derivatives and Continuation of Hedge Accounting

The amendment to IAS 39 and IFRS 9 was published in June 2013 and is to be applied for the first time in fiscal years beginning on or after January 1, 2014. Under certain circumstances, this amendment provides for the continuation of hedge accounting in instances where derivatives designated as hedges are transferred to a central clearing house (novation) due to statutory or regulatory requirements. The amendment applies retrospectively. Early application is permissible. As the Company does not anticipate using a clearing house the first-time application of this provision is not expected to have an impact.

IFRS 9 Financial Instruments: Classification and Measurement

The first part of Phase I in preparation of IFRS 9 Financial Instruments was published in November 2009. The standard includes revised provisions regarding the classification and measurement of financial assets. Accordingly, debt instruments are to be carried either at amortized cost or at fair value through profit or loss, regardless of their respective characteristics, and taking into account the business model. Equity instruments must always be carried at fair value. Fluctuations in the value of equity instruments however may be recorded in other comprehensive income due to the instrument-related elective option which may be exercised when the financial instrument is acquired. In such case only certain dividend income from equity instruments would be recorded in profit or loss. Exempt are financial assets held for trading which must be measured at fair value through profit or loss. The IASB completed the second part of Phase I of the project in October 2010. The standard was thus supplemented with rules on financial liabilities, prescribing that existing classification and measurement standards for financial liabilities are to be retained with the following exceptions: Effects resulting from changes in a company's own credit risk from financial liabilities classified as measured at fair value through profit or loss are to be recorded in equity, and derivative liabilities on unlisted equity instruments may no longer be recorded at cost. IFRS 9 is to be applied for the first time in fiscal years beginning on or after January 1, 2015. Mandatory application will probably be postponed due to delayed conclusion of Phases II and III. A probable date is January 1, 2018.

Application of the first part of Phase I will affect the classification and measurement of the Group's financial assets. The second part of this project phase is not expected to have a major impact on the Group's financial position, financial performance and cash flows. The third phase of the project completed in November 2013 concerns hedge accounting. In order to present a comprehensive view of the potential effects, the Group will not quantify these effects until the other phases have been completed and their results published.

IFRS 9 Financial Instruments: Hedge Accounting

The publication of hedge accounting regulations in November 2013 marked another step in the IASB's project work to further develop the new IFRS 9 Financial Instruments. This standard includes supplementary rules and changes to the existing published version of IFRS 9, and formulates new requirements which concern in particular the designation of instruments and risks, effectiveness requirements, hedge adjustments and derecognition and, to a certain extent, hedge accounting. This standard replaces the interpretation IFRIC 9 Reassessment of Embedded Derivatives, and provides for changes to a number of existing standards such as IFRS 7 regulating the disclosure requirements for financial instruments as well as the requirements of the IFRS 9 versions published in 2009 and 2010. This standard formulates extensive transition rules, and has been available for application from the publishing date, but IFRS 9 must be applied in its entirety to do so.

Amendment to IAS 19—Employee Contributions

The amendment to IAS 19 was published in December 2013 and is to be applied for the first time in fiscal years beginning on or after July 1, 2014. This amendment regulates the recording of contributions by employees or third parties to defined benefit plans as reducing service costs for services performed in the reporting period in question. The change applies retrospectively. Early application is permissible.

The Group is currently examining the future impact of the new standard on the financial position, financial performance and cash flows of the Group.

Improvements to IFRS (2010 - 2012)

The Improvements to the IFRS published in 2010 - 2012 have been compiled as an omnibus standard and were published in December 2013. It contains amendments to various IFRS, most of which are to be applied in fiscal years beginning on or after July 1, 2014. The Group has not yet applied the following amendments:

- IFRS 2: Clarifies the definition of vesting conditions and in particular definitions of service and performance conditions;
- IFRS 3: Clarifies the classification and measurement of contingent consideration in relation to business combinations. Accordingly, classification of an obligation to pay contingent consideration as a liability or as equity is solely determined based on IAS 32.11. A contingent consideration item is to be measured at fair value and the resulting changes recognized in profit or loss;
- IFRS 8: Requirements for the aggregation of operating segments and reconciliation of total segment assets with the entity's assets;
- IFRS 13: Clarifies rationale for amending IFRS 9 with regard to the measurement of short-term receivables and payables as a result of the publication of IFRS 13;
- IAS 16: Amendments to the treatment of accumulated depreciation under the revaluation method.
- IAS 24: Clarifies that external entities providing key planning, managerial and supervisory services (external key management personnel services) to a company are to be treated by the reporting company as a 'related party' in accordance with IAS 24, and includes an exemption for disclosures of compensation paid for these management services by an external management entity to its own employees.
- IAS 38: Amendments to the treatment of accumulated depreciation under the revaluation method.

The Group is currently examining the future impact of the new standard on the financial position, financial performance and cash flows of the Group.

Improvements to IFRS (2011 - 2013)

The Improvements to the IFRS published in 2011 - 2013 have been compiled as an omnibus standard and were published in December 2013. It contains amendments to various IFRS whose application is mandatory for fiscal years beginning on or after July 1, 2014. The Group has not yet applied the following amendments:

- IFRS 1: Clarifies which versions of the standards and interpretations are mandatory and which versions are optional for first-time IFRS adopters.
- IFRS 3: Clarifies the exclusion of the formation of joint arrangements from the scope of IFRS 3.
- IFRS 13: Clarifies the scope of application of the portfolio exception as per IFRS 13.48 ff.

3 Changes in accounting policies (Continued)

- IAS 40: Clarifies the scope of IFRS 3 and IAS 40 regarding classification of real estate as investment property or owner-occupied property.

IFRIC 21 Levies

The IASB published IFRIC Interpretation 21 in May 2013. This interpretation provides that a company operating in a particular market has to recognize a liability for a levy imposed by the competent authority at the time the business transaction triggering the levy occurs. The interpretation also clarifies that a levy which depends for example on reaching a defined minimum transaction volume may only be classified as a liability once the volume reaches the defined threshold. This interpretation is to be applied for the first time in fiscal years beginning on or after January 1, 2014. Early application is permissible.

3.3 Adjustments according to IAS 8

Initial application of revised IAS 19—Employee Benefits

As outlined in section 3.1, 'New and revised standards and interpretations', the revised IAS 19 is to be applied for the first time in fiscal years beginning on or after January 1, 2013. The new standard applies retrospectively. Previous-year figures were thus adjusted, reflecting the impact of the revised IAS 19 application, which affected the Group statement of financial position, income statement, cash flow statement and statement of changes in equity. After factoring in deferred taxes, accumulated other comprehensive income was reduced by 356 thousand euros, pensions and similar obligations increased by 486 thousand euros, net profit decreased by 64 thousand euros, and deferred tax assets rose by 66 thousand euros. The Group's statement of comprehensive income was affected in the line items personnel expenses (minus 2 thousand euros), finance costs (plus 72 thousand euros), income tax expenses (minus 6 thousand euros), and actuarial gains and losses recorded in other comprehensive income (minus 828 thousand euros). The Group's consolidated profit for the period was thus reduced by 64 thousand euros, and total comprehensive income was reduced by 892 thousand euros.

The impact of the first-time application of the revised standard was lower than originally expected, as the risk sharing between employer and employee applicable to Swiss pension plans effectively reduced pensions and similar obligations. Because the Group deemed the impact of the adjustments on the previous year's figures to be immaterial, no third statement of financial position was prepared.

Adjustment of goodwill and purchase price liability—acquisition of Laboratoire d'analyses medicales Dr. Jean Collard SPRL, Liège

As outlined under section "4.2 Business combinations 2012", as of December 21, 2012, the Group acquired a 100% shareholding in the two Belgian companies: Laboratoire d'analyses medicales Dr. Jean Collard SPRL, Liège, and Laboratoire Biosemois SPRL, Liège.

Two contingent consideration elements were agreed as part of the purchase price agreement with the former owner of the two aforementioned companies. Accordingly, additional payments are due to the former owner if certain conditions are met. The receipt of defined payments is the prerequisite for payment of Earn Out 1, expected with certainty and paid in the fourth quarter of fiscal year 2013. Payment of Earn Out 2 of up to 5,000 thousand euros required achievement of defined EBITDA goals in fiscal year 2013. Based on past experience with other acquisitions and after a preliminary assessment, the Group initially assumed that both earn-out payments would have to be paid in full and provisions for the payments were recognized accordingly. Because the acquisition was only completed at the end of December, a more detailed analysis could not be carried out before the consolidated financial statements were prepared.

Such detailed assessment was only prepared during fiscal year 2013. It then emerged that various facts had not been considered in the preliminary assessment prepared for the 2012 consolidated financial statements. Had these facts been taken into consideration at the time, it would have become obvious that Earn Out 2 would not have to be paid. Thus the figures in previous year's statement of financial position were adjusted accordingly, and the line items goodwill and other provisions were reduced by 5,000 thousand euros.

4 Business combinations

4.1 Business combinations in 2013

Acquisitions in 2013—Baltic States

On July 31, 2013 the SYNLAB GROUP acquired the Estonian company Medicap Holding AS and its subsidiaries Quattromed HTI Laborid OÜ in Estonia, Quattromed Finland OY in Finland and UAB "SORPO" in Lithuania, thereby opening up new markets in the Baltic States.

At the date of acquisition or first-time inclusion in the scope of consolidation, the fair value of identifiable assets and liabilities was as follows:

	KEUR
Non-current assets	
Intangible assets	20,413
Property, plant and equipment	1,802
Investment property	41
Current assets	
Inventories	349
Trade receivables	1,549
Other current assets	165
Cash and cash equivalents	246
Total assets	**24,565**
Non-current liabilities	
Non-current interest-bearing loans and borrowings	1,690
Provisions for deferred taxes	4,258
Current liabilities	
Short-term interest-bearing loans and borrowings	2,256
Trade payables	767
Other current financial liabilities	430
Other current liabilities	212
Total liabilities	**9,613**
Total identifiable net assets at fair value	**14,952**
Goodwill from company acquisition	20,957
Total consideration	**35,909**

The consideration breaks down as follows:

	KEUR
Purchase price 1	20,576
Purchase price 2	1,470
Additional purchase price from contingent consideration (Earn Out 1)	2,635
Additional purchase price from contingent consideration (Earn Out 2)	11,228
Total consideration	**35,909**

The fair value of trade receivables is 1,549 thousand euros. The gross value of trade receivables is 1,549 thousand euros. There was no impairment of trade receivables.

Goodwill in the amount of 20,957 thousand euros represents the value of expected synergies from company acquisitions. Goodwill was allotted in full to the CGU Baltic States. It is assumed that most of the goodwill recorded will not be tax deductible.

As from the acquisition date, the acquired companies have contributed 6,893 thousand euros to revenue and 409 thousand euros to consolidated profit/loss for the year from continuing operations.

4 Business combinations (Continued)

If the business combination had taken place at the beginning of the year, revenue from continuing operations would have risen by 7,680 thousand euros and consolidated profit/loss from continuing operations would have increased by 237 thousand euros.

Cash outflow due to company acquisition:

	KEUR
Analysis of cash outflow due to company acquisition	
Total consideration	(35,909)
Outstanding additional purchase price from contingent consideration (Earn Out 1)	2,635
Outstanding additional purchase price from contingent consideration (Earn Out 2)	11,228
Cash consideration	**(22,046)**
Net cash of acquired company	246
Transaction costs of acquisition	(1,634)
Transaction costs of acquisition not yet affecting cash flows	642
Actual cash outflow due to company acquisition	**(22,792)**

Two contingent consideration elements were agreed as part of the purchase price agreement with the former owners of Medicap Holding AS. Accordingly, payment to the sellers of a maximum amount of 2,700 thousand euros falls due in 2014 on reaching a defined revenue threshold in Finland. A further payment of a maximum amount of 11,830 thousand euros depends on revenue trends in Finland in 2014 and will be disbursed in 2015. It was assumed to be highly probable that the revenue targets would be reached in 2013 and thus that payment of the purchase price would fall due in 2014. Because of the expected revenue trends, it was also assumed that the last tranche, due in 2015, is very likely to be paid. Accordingly, the maximum contingent consideration was recognized stating no range.

Acquisitions in 2013—Switzerland

Additional companies were acquired in Switzerland as of January 1, 2013 with the intention to strategically strengthen our operations in that market. Acquiring Bureco AG has enhanced our Environmental Analytics business segment. To complement the group's activities in the laboratory sector the MLO AG group of companies and their wholly-owned subsidiary Ärztelabor Westbahnhof AG as well as the 30% shareholding in Bakteriologisches Institut Olten BIO AG have been acquired. As the SYNLAB GROUP does not have control over Bakteriologisches Institut Olten BIO AG, the shareholding was recorded at (amortized) cost in "Other non-current assets".

4 Business combinations (Continued)

At the date of acquisition or first-time inclusion in the scope of consolidation, the fair value of identifiable assets and liabilities was as follows:

	KEUR
Non-current assets	
Intangible assets	3,159
Property, plant and equipment	322
Other non-current assets	47
Deferred tax assets	108
Current assets	
Inventories	160
Trade receivables	815
Income tax receivables	1
Other current assets	291
Cash and cash equivalents	393
Total assets	**5,296**
Non-current liabilities	
Non-current interest-bearing loans and borrowings	167
Pensions and similar obligations	625
Provisions for deferred taxes	555
Current liabilities	
Other current provisions	138
Trade payables	278
Other current financial liabilities	233
Other current liabilities	34
Total liabilities	**2,030**
Total identifiable net assets at fair value	**3,266**
Goodwill from company acquisition	3,085
Total consideration	**6,351**

The consideration breaks down as follows:

	KEUR
Purchase price 1	4,390
Purchase price 2	742
Additional purchase price from contingent consideration (Earn Out 1)	1,022
Additional purchase price from contingent consideration (Earn Out 2)	197
Total consideration	**6,351**

The fair value of trade receivables is 815 thousand euros. The gross value of trade receivables is 815 thousand euros. There was no impairment of trade receivables.

Goodwill in the amount of 3,085 thousand euros represents the value of expected synergies from company acquisitions. Goodwill was allotted in full to the CGU Switzerland. It is assumed that most of the goodwill recorded will not be tax deductible.

As from the acquisition date, the acquired company Bureco AG has contributed 1,616 thousand euros to revenue and reduced the consolidated profit/loss for the year by 48 thousand euros. The acquired companies MLO AG and Ärztelabor Westbahnhof AG were merged with synlab Suisse SA as of January 1, 2013. Due to this merger, no details are available for these two companies because the relevant information cannot be derived from the absorbing company's financial data.

4 Business combinations (Continued)

Cash outflow due to company acquisition:

	KEUR
Analysis of cash outflow due to company acquisition	
Total consideration	(6,351)
Portion of fixed purchase price not yet affecting cash flows 1	564
Outstanding additional purchase price from contingent consideration (Earn Out 1)	818
Cash consideration	**(4,969)**
Net cash of acquired company	393
Transaction costs of acquisition	(319)
Actual cash outflow due to company acquisition	**(4,895)**

For each company, contingent consideration was agreed as part of the purchase price agreement with the former shareholders of Bureco AG and MLO AG. With respect to Bureco, in addition to the purchase price disbursements in 2013, another payment of up to 150 thousand Swiss francs may become due on reaching defined EBITDA thresholds in fiscal year 2013. Conversely, another payment to the previous owners of MLO AG will become due if revenue for fiscal year 2013, after adjustment for defined special factors, exceeds a defined revenue threshold. As it is considered highly likely that the respective targets will be achieved, the Company recorded the respective contingent considerations in the maximum amounts stating no range.

Acquisitions in 2013—Germany

In Germany the Group's presence has been increased in the laboratory services market for human medicine analytics in 2013 through share and asset deals. Acquisition of the laboratories Hürth-Knapsack and Wiesbaden, Hürth and Wiesbaden, has added capacity in our environmental analytics sector.

The acquisition of the hospital Steinlach-Klinik, Mössingen, had a strategic background: Pursuant to changes in German legislation in 2012, and in particular according to Sec. 95 (1) Social Security Code V (SGB V), only accredited hospitals and hospital operators, accredited medical practitioners, providers of non-medical dialysis services and non-profit entities accredited or authorized to provide medical care may establish new medical care units (Medizinische Versorgungszentren, MVZ). The SYNLAB GROUP aims at becoming accredited as founders of new medical care units, pushing for regional expansion in Germany through the foundation and subsequent combination or merger of existing and newly acquired medical care units. This was the main, if not the only, reason for acquiring Steinlach-Klinik which, at the time of acquisition, was an accredited hospital within the meaning of the above by virtue of an existing medical care contract with the German Association of Statutory Health Insurance Physicians (Kassenärztliche Vereinigung, KV), the purpose of which was achieving the status of an accredited operator of medical care units.

Company	Country	Type	DATE
Laboratory practice Dres. Joachim and Leeser, Essen	DE	asset deal	01/01/2013
Steinlach-Klinik, Mössingen	DE	asset deal	04/15/2013
Practice Dres. Cremer, Kläs, Jung, Schulze, Mannheim	DE	asset deal	06/30/2013
Labomed GmbH, Stuttgart	DE	100%—share deal	05/01/2013
Institut für Pathologie Mannheim GbR, Mannheim	DE	asset deal	06/30/2013
Practice Dr. Arlt, Stuttgart	DE	asset deal	08/01/2013
Hürth-Knapsack and Wiesbaden laboratories, Hürth and Wiesbaden	DE	asset deal	08/01/2013
Cytology practice Dr. Kuznik, Aalen	DE	asset deal	10/01/2013

The purchase agreement for Institut für Pathologie Mannheim GbR, Mannheim, was concluded on January 1, 2013, but only became effective on fulfilment of a condition precedent on June 30, 2013. Therefore it was only included in the scope of consolidation as of June 30, 2013.

4 Business combinations (Continued)

At the date of acquisition or first-time inclusion in the scope of consolidation, the fair value of identifiable assets and liabilities was as follows:

	KEUR
Non-current assets	
Intangible assets	18,825
Property, plant and equipment	1,955
Other non-current assets	19
Current assets	
Inventories	416
Trade receivables	1
Income tax receivables	10
Other current assets	634
Cash and cash equivalents	341
Total assets	**22,201**
Non-current liabilities	
Pensions and similar obligations	164
Other non-current provisions	20
Current liabilities	
Other current provisions	17
Trade payables	32
Other current financial liabilities	913
Other current liabilities	784
Total liabilities	**1,930**
Total identifiable net assets at fair value	**20,271**
Goodwill from company acquisition	17,532
Total consideration	**37,803**

The consideration breaks down as follows:

	KEUR
Purchase price 1	33,040
Purchase price 2	2,025
Shares in SYNLAB HOLDING issued, measured at fair value	2,484
Reduction in purchase price pursuant to the share transfer agreement	(374)
Reduction in purchase price pursuant to the share transfer agreement	(72)
Additional purchase price from contingent consideration (Earn Out 1)	350
Additional purchase price from contingent consideration (Earn Out 2)	350
Total consideration	**37,803**

The fair value of trade receivables is 1 thousand euros. The gross value of trade receivables is 1 thousand euros. There was no impairment of trade receivables.

Goodwill in the amount of 17,532 thousand euros represents the value of expected synergies from company acquisitions. Goodwill was allotted in full to the CGU Germany. It is assumed that most of the recognized goodwill will not be tax deductible.

As from the acquisition date, Labomed GmbH / practice Dr. Arlt, Stuttgart, Institut für Pathologie Mannheim GbR, Mannheim, and practice Dres. Cremer, Kläs, Jung, Schulze, Mannheim, have contributed 6,248 thousand euros to revenue and increased consolidated profit/loss for the year by 907 thousand euros. For all other asset deal acquisitions no details are available because the relevant information cannot be derived from the absorbing company's financial data.

4 Business combinations (Continued)

If the business combination for all share and asset deal acquisitions had taken place at the beginning of the year, revenue from continuing operations would have increased by 10,130 thousand euros and consolidated profit/loss from continuing operations would have increased by 1,962 thousand euros.

Cash outflow due to company acquisition:

	KEUR
Analysis of cash outflow due to company acquisition	
Total consideration	(37,803)
Portion of fixed purchase price not yet affecting cash flows 1	708
Shares in SYNLAB HOLDING issued, measured at fair value	2,484
Outstanding additional purchase price from contingent consideration (Earn Out 1)	48
Outstanding additional purchase price from contingent consideration (Earn Out 2)	350
Cash consideration	**(34,213)**
Net cash of acquired company	341
Transaction costs of acquisition	(105)
Transaction costs of acquisition not yet affecting cash flows	27
Actual cash outflow due to company acquisition	**(33,950)**

For the acquired companies practice Dres. Cremer, Kläs, Jung, Schulze, Mannheim , practice Dr. Arlt, Stuttgart and Labomed GmbH, Stuttgart, further purchase price portions amounting to 2,975 thousand euros were transferred to external security deposit accounts, in addition to the purchase price payments directly disbursed to the sellers. The money served as collateral for outstanding purchase price payments until final agreement between the purchasing and selling parties with regard to the actual purchase price has been reached. The collateral was recognized in "Other current assets" in the amount of 2,975 thousand euros. The corresponding liabilities to the sellers were recorded in "Other current financial liabilities" in the amount of 2,832 thousand euros, minus the purchase price reduction of 143 thousand euros. The external security deposit accounts will be closed in the first quarter of 2014 when the money is disbursed. Beyond that there is a purchase price agreement with the former owner of laboratory Dr. Joachim stipulating a contingent consideration payment of up to 350 thousand euros on achieving defined revenue thresholds in fiscal years 2013 and 2014. It is highly probable that all targets will be fully reached. Accordingly, a contingent consideration of up to 120 thousand euros was recognized, stating no range.

Acquisitions in 2013—Others

With the intention to strategically strengthen our laboratory services in the Czech Republic, Italy and the United Arab Emirates, the SYNLAB GROUP acquired additional companies serving these markets:

Company	Country	Type	Date
Freiburg Medical Laboratory Middle East LLC, United Arab Emirates	AE	26.0% additional interest—share deal	08/01/2013
ANECLAB GmbH	AT	60.0%—share deal	01/01/2013
Aneclab s.r.o.	CZ	100.0%—share deal	01/01/2013
BH Vimperk services s.r.o.	CZ	100.0%—share deal	06/13/2013
RMA lab s.r.o.	CZ	100.0%—share deal	01/01/2013
Synlab Emilia Romagna S.r.l.	IT	100.0%—share deal	04/02/2013
Practice Dr. Panarella, Italy	IT	asset deal	04/02/2013
Spectromass Analitikai Labortórium Kft.	HU	100.0%—share deal	07/10/2012

The company acquisition in the United Arab Emirates involved a step-by-step increase in the shareholding from 44.0% to 70.0%. After revaluation of the shareholding, income of 294 thousand euros was recorded in the financial result.

Together with the acquisition of the Czech company Aneclab s.r.o., its Austrian subsidiary, ANECLAB GmbH was also acquired.

4 Business combinations (Continued)

Although the company Spectromass Analitikai Labortórium Kft. was acquired in 2012, it was only consolidated for the first time as of January 1, 2013.

At the date of acquisition or first-time inclusion in the scope of consolidation, the fair value of identifiable assets and liabilities was as follows:

	KEUR
Non-current assets	
Intangible assets	5,512
Property, plant and equipment	625
Other non-current assets	48
Deferred tax assets	55
Current assets	
Inventories	394
Trade receivables	2,618
Other current assets	601
Cash and cash equivalents	1,344
Total assets	**11,197**
Non-current liabilities	
Pensions and similar obligations	528
Other non-current provisions	114
Other non-current financial liabilities	1,793
Provisions for deferred taxes	795
Current liabilities	
Short-term interest-bearing loans and borrowings	387
Other current provisions	129
Income tax liabilities	153
Trade payables	1,588
Other current financial liabilities	322
Other current liabilities	574
Total liabilities	**6,383**
Total identifiable net assets at fair value	**4,814**
Non-controlling interests	825
Goodwill from company acquisition	4,157
Total consideration	**8,146**

The consideration breaks down as follows:

	KEUR
Purchase price 1	4,076
Purchase price 2	1,301
Purchase price 3	451
Fair value of shareholding before acquiring control	1,696
Reduction in purchase price pursuant to the share transfer agreement	(815)
Additional purchase price from contingent consideration (Earn Out 1)	1,063
Additional purchase price from contingent consideration (Earn Out 2)	226
Additional purchase price from contingent consideration (Earn Out 3)	126
Other purchase price elements	22
Total consideration	**8,146**

The fair value of trade receivables is 2,618 thousand euros. The gross value of trade receivables is 2,778 thousand euros. Impairment of trade receivables in the amount of 160 thousand euros was recognized.

4 Business combinations (Continued)

Goodwill in the amount of 4,157 thousand euros represents the value of expected synergies from the acquisition of the company. Goodwill was allotted to the cash-generating units Czech Republic in the amount of 2,145 thousand euros, ROW in the amount of 1,714 thousand euros, and Hungary in the amount of 298 thousand euros. It is assumed that most of the goodwill recorded will not be tax deductible.

As from the acquisition date, the acquired companies have contributed 5,288 thousand euros to revenue from continuing operations and 385 thousand euros to the consolidated profit/loss from continuing operations. For all asset deal acquisitions no details are available because the relevant information cannot be derived from the absorbing company's financial data.

Had the business combinations taken place at the beginning of the year, revenue from continuing operations would have increased by 3,150 thousand euros, and consolidated profit/loss from continuing operations would have increased by 225 thousand euros.

Cash outflow due to company acquisitions:

	KEUR
Analysis of cash outflow due to company acquisitions	
Total consideration	(8,146)
Fair value of shareholding before acquiring control	1,696
Outstanding additional purchase price from contingent consideration (Earn Out 1)	54
Outstanding additional purchase price from contingent consideration (Earn Out 2)	127
Outstanding additional purchase price from contingent consideration (Earn Out 3)	27
Portion of other purchase price not yet affecting cash flows	21
Cash consideration	**(6,221)**
Net cash of acquired companies	1,344
Transaction costs for company acquisitions	(278)
Transaction costs for company acquisitions not yet affecting cash flows	166
Actual cash outflow due to company acquisitions	**(4,989)**

The Group agreed contingent consideration as part of the purchase price agreements with the former owners of the two Czech companies RMA lab s.r.o and BH Vimperk services s.r.o., and the former owners of the Italian company Synlab Emilia Romagna S.r.l. Payment of contingent consideration for the acquisitions in the Czech Republic (up to a maximum of 5,000 thousand Czech crowns and 1,400 thousand Czech crowns, respectively) depends on the achievement and payment for defined analysis volumes. Conversely, the contingent consideration (100 thousand euros) for the Italian company acquired in 2014 will only become due on exceeding defined EBITDA thresholds. As it was assumed highly probable that all acquired companies would achieve the set targets, the Company recorded the respective contingent consideration in the maximum amounts, stating no range.

4.2 Business combinations in 2012

Acquisitions in 2012—Hungary

As part of the strategy to expand laboratory activities in Hungary, the Company acquired 75% of shares in Laboratórium Kft., GENOID Kft. and Spectromass Analitikai Labortórium Kft. on July 10, 2012. The remaining 25% shareholding was acquired in early January 2013. As outlined in section 2.2, Spectromass Analitikai Labortórium Kft. was not included in the scope of consolidation as of December 31, 2012.

4 Business combinations (Continued)

At the time of acquisition, the fair value of identifiable assets and liabilities of Laboratórium Korlátolt Felelösségü Társaság and GENOID Kft. was as follows:

	KEUR
Non-current assets	
Intangible assets	9,339
Property, plant and equipment	1,480
Other non-current assets	914
Deferred tax assets	33
Current assets	
Inventories	639
Trade receivables	2,957
Income tax receivables	88
Other current assets	9,040
Cash and cash equivalents	214
Total assets	**24,704**
Non-current liabilities	
Interest-bearing loans and borrowings	4,232
Other financial liabilities	685
Provisions for deferred taxes	897
Current liabilities

Other current provisions	141
Income tax liabilities	26
Trade payables	2,024
Other financial liabilities	4,050
Other liabilities	1,551
Total liabilities	**13,914**
Total identifiable net assets at fair value	**10,790**
Goodwill from company acquisition	4,117
Total consideration	**14,907**

The consideration breaks down as follows:

	KEUR
Purchase price 1	11,351
Purchase price 2	2,709
Additional purchase price from contingent consideration (Earn Out)	847
Total consideration	**14,907**

The fair value of trade receivables is 2,957 thousand euros. The gross value of trade receivables is 3,178 thousand euros. Impairment of trade receivables in the amount of 221 thousand euros was recognized.

Goodwill in the amount of 4,117 thousand euros represents the value of expected synergies from company acquisitions. Goodwill was allotted in full to the CGU Hungary. It is assumed that most of the goodwill recorded will not be tax deductible.

If the business combination had taken place at the beginning of the year, revenue from continuing operations would have been increased by 7,617 thousand euros and the consolidated profit/loss from continuing operations would have been reduced by 267 thousand euros.

4 Business combinations (Continued)

Cash outflow due to company acquisition:

	KEUR
Analysis of cash outflow due to company acquisition	
Total consideration	(14,907)
Portion of fixed purchase price not yet affecting cash flows	2,667

Cash consideration	**(11,407)**
Net cash of acquired company	214
Transaction costs of acquisition	(167)
Transaction costs of acquisition not yet affecting cash flows	14
Actual cash outflow due to company acquisition	**(11,346)**

Two contingent consideration elements were agreed as part of the purchase price agreement with the former owners of the aforementioned companies. According to the original agreement, additional payments to the former owners were possible if the defined EBITDA, net debt and working capital goals were reached for the fiscal years 2012 (Earn Out 1) and 2013 (Earn Out 2). Under the agreement of November 30, 2012, however, the parties agreed that these claims and the acquisition of the remaining 25% of shares would be satisfied by payment of an amount of 800 million Hungarian forints. This agreement became effective on January 4, 2013.

Acquisitions in 2012—Italy

Two smaller companies were acquired in Italy in order to strengthen the Group's presence in the northern Italian market. Effective May 3, 2012, the Company acquired 100% of Centro A. Fleming S.r.l., Verona, and effective October 1, 2012, 100% of Eurolab Srl, Collebeato.

4 Business combinations (Continued)

At the time of acquisition, the fair values of the identifiable assets and liabilities of the Italian business combinations were as follows:

	KEUR
Non-current assets	
Intangible assets	2,377
Property, plant and equipment	265
Current assets	
Inventories	24
Trade receivables	398
Other current assets	87
Cash and cash equivalents	13
Total assets	**3,164**
Non-current liabilities	
Pensions and similar obligations	193
Other provisions	37
Provisions for deferred taxes	737
Current liabilities	
Interest-bearing loans and borrowings	297
Income tax liabilities	1
Trade payables	380
Other financial liabilities	95
Other liabilities	68
Total liabilities	**1,808**
Total identifiable net assets at fair value	**1,356**
Goodwill from company acquisition	0
Total consideration	**1,356**

The consideration breaks down as follows:

	KEUR
Purchase price 1	1,707
Reduction in purchase price pursuant to the share transfer agreement	(351)
Total consideration	**1,356**

The fair value of trade receivables is 398 thousand euros. The gross value of trade receivables is 480 thousand euros. Impairment of trade receivables in the amount of 82 thousand euros was recognized.

If the business combination had taken place at the beginning of the year, revenue from continuing operations would have been increased by 437 thousand euros and the consolidated profit/loss from continuing operations would have been reduced by 319 thousand euros.

Cash outflow due to company acquisition:

	KEUR
Analysis of cash outflow due to company acquisition	
Total consideration	(1,356)
Reduction in purchase price pursuant to the share transfer agreement	351
Portion of fixed purchase price not yet affecting cash flows	120
Cash consideration	**(885)**
Net cash of acquired company	13
Transaction costs of acquisition	(77)
Transaction costs of acquisition not yet affecting cash flows	48
Actual cash outflow due to company acquisition	**(901)**

A contingent consideration was agreed as part of the purchase price agreement with the former owners of Eurolab S.r.l. Accordingly, an additional payment to the former owners may become due upon achieving a defined working capital threshold for fiscal year 2012. It is highly probable that all targets will be fully reached. Accordingly, the contingent consideration in the maximum amount of 120 thousand euros was recognized stating no range.

Acquisitions in 2012—Germany

In Germany, too, activities were further expanded in 2012 by acquisition of six companies in the form of share or asset deals.

Company	Type	DATE
Practice Dr. Gaul	asset deal	01/01/2012
Practice Dr. Bremen & Bergmann Cytology Wuppertal	asset deal	01/01/2012
Practice Dr. Püttmann	asset deal	01/01/2012
Laboratorium für spektralanalytische und biologische Untersuchungen Dr. Bayer GmbH	100%—share deal	02/28/2012
Practice Dr. Mayer-Weber/Bäuerle	asset deal	07/01/2012
Practice Dr. Roskos	asset deal	07/01/2012

4 Business combinations (Continued)

At the time of acquisition, the fair value of identifiable assets and liabilities was as follows:

	KEUR
Non-current assets	
Intangible assets	6,839
Property, plant and equipment	605
Current assets	
Inventories	50
Trade receivables	342
Income tax receivables	13
Other current assets	119

Other financial liabilities	417
Total liabilities	**2,230**
Total identifiable net assets at fair value	**6,288**
Goodwill from company acquisition	7,652
Total consideration	**13,940**

The consideration breaks down as follows:

	KEUR
Purchase price 1	10,883
Additional purchase price	40
Additional purchase price from contingent consideration (Earn Out 1)	1,080
Additional purchase price from contingent consideration (Earn Out 2)	1,974
Additional purchase price from contingent consideration (Earn Out 3)	(37)
Total consideration	**13,940**

The fair value of trade receivables is 342 thousand euros. The gross value of trade receivables is 427 thousand euros. Impairment of trade receivables in the amount of 85 thousand euros was recognized.

Goodwill in the amount of 7,652 thousand euros represents the value of expected synergies from company acquisitions. Goodwill was allotted in full to the CGU Germany. It is assumed that most of the goodwill recorded will not be tax deductible.

If the business combination had taken place at the beginning of the year, revenue from continuing operations would have increased by 583 thousand euros and consolidated profit/loss from continuing operations would have risen by 140 thousand euros.

Contingent consideration was agreed as part of the purchase price with the prior owner of Laboratorium für spektralanalytische und biologische Untersuchungen Dr. Bayer GmbH. Accordingly, additional payments to the former owner were contractually agreed on the condition that defined gross revenue targets were reached in fiscal years 2011 (Earn Out 1) and 2012 (Earn Out 2), and that a defined amount of working capital level was recorded in the financial statements as of December 31, 2011. Earn Out 1 was paid in full; Earn Out 3 was deducted. Earn Out 2 became due in full in April 2013.

Total identifiable net assets at fair value	**54,174**
Goodwill from company acquisition	41,907(*)
Total consideration	**96,081**(*)

(*) Restated as per IAS 8. See Note 3.3.

4 Business combinations (Continued)

The consideration breaks down as follows:

	KEUR
Purchase price 1	64,566
Shares in SYNLAB HOLDING issued, measured at fair value	16,000
Additional purchase price	315
Additional purchase price from contingent consideration (Earn Out 1)	15,200
Additional purchase price from contingent consideration (Earn Out 2)	0(*)
Total consideration	**96,081**(*)

(*) Previous year's figure restated as per IAS 8.

The fair value of trade receivables is 3,703 thousand euros. The gross value of trade receivables is 4,300 thousand euros. Impairment of trade receivables in the amount of 597 thousand euros was recognized.

Goodwill in the amount of 41,907 thousand euros represents the value of expected synergies from company acquisitions. Goodwill was allotted in full to the CGU Belgium. It is assumed that most of the goodwill recorded will not be tax deductible.

If the business combination had taken place at the beginning of the year, revenue from continuing operations would have increased by 23,522 thousand euros and the consolidated profit/loss from continuing operations, adjusted for special effects, would have risen by 6,591 thousand euros. Including these special effects, consolidated profit/loss for the year would have gone up by 19,240 thousand euros.

Cash outflow due to company acquisition:

	KEUR
Analysis of cash outflow due to company acquisition	
Total consideration	(96,081)(*)
Shares in SYNLAB HOLDING issued, measured at fair value	16,000
Outstanding purchase price from contingent consideration (Earn Out 1)	15,200
Outstanding purchase price from contingent consideration (Earn Out 2)	0(*)

Net cash of acquired company	25,050
Transaction costs of acquisition	(793)
Transaction costs of acquisition not yet affecting cash flows	793
Actual cash outflow due to company acquisition	**(39,831)**

(*) Previous year's figure restated as per IAS 8.

Two contingent consideration elements were agreed as part of the purchase price agreement with the former owner of the two aforementioned companies. Accordingly, additional payments are due to the former owner if certain conditions are met. The receipt of defined payments was the prerequisite for payment of Earn Out 1, expected with certainty and paid in the fourth quarter of fiscal year 2013. Payment of Earn Out 2 of up to 5,000 thousand euros required achievement of defined EBITDA goals in fiscal year 2013. Based on past experience with other acquisitions, and after a preliminary assessment, the Group initially assumed that Earn Out 2 would also have to be paid in full. Full details are given in section 3.3 of the Notes. Accordingly, the contingent consideration in the maximum amount of 5,000 thousand euros was recognized as of December 31, 2012, and no range was stated.

Because the acquisition was only completed end of December, a more detailed analysis could not be carried out before the consolidated financial statements were prepared. Such detailed assessment was only carried out during fiscal year 2013. It then emerged that various facts had not been considered in the preliminary assessment prepared for the consolidated financial statements 2012. Had these facts been taken into consideration at the time, it would have become obvious that Earn Out 2 would not have to be paid.

4 Business combinations (Continued)

Acquisitions in 2012—Other

As part of the strategy to further expand laboratory activities in the Slovak Republic, 100% of shares in Malá Praha Spol S.r.o., Kosice were acquired on August 23, 2012.

In addition, the following SPEs were brought into the scope of consolidation:

Company	Country	Date of first consolidation	Shareholding
Ärztliche Laborgemeinschaft Bonn GbR	DE	01/01/2012	SPE
Ärztliche Laborgemeinschaft Köln-Kalk GbR	DE	01/01/2012	SPE
Ärztliche Laborgemeinschaft Region Eschweiler GbR	DE	01/01/2012	SPE
Laborgemeinschaft Mittelhessen GbR	DE	01/01/2012	SPE
Laborgemeinschaft Hamburg-Nordwest GbR	DE	01/01/2012	SPE
Laborgemeinschaft Hochsauerland GbR	DE	01/01/2012	SPE
Laborgemeinschaft Nordeifel GbR	DE	01/01/2012	SPE
Laborgemeinschaft Troisdorf GbR	DE	01/01/2012	SPE
Privatärztliche LG Dinslaken GbR	DE	01/01/2012	SPE
Laborgemeinschaft Bayern-Nord GbR	DE	05/01/2012	SPE
Laborgemeinschaft Bayern-Süd GbR	DE	05/01/2012	SPE
Synlab Referans M-B Saglik Laboratuar Hizmetleri Sanayi Ticaret Limited	TR	01/01/2012	SPE

At the date of acquisition or first-time inclusion in the scope of consolidation, the fair value of identifiable assets and liabilities was as follows:

	KEUR
Non-current assets	
Intangible assets	318
Property, plant and equipment	10
Current assets	
Inventories	25
Trade receivables	974
Income tax receivables	6
Other current assets	165
Cash and cash equivalents	170
Total assets	**1,668**
Non-current liabilities	
Other financial liabilities	13
Provisions for deferred taxes	62
Current liabilities	
Interest-bearing loans and borrowings	51
Income tax liabilities	25
Trade payables	892
Other financial liabilities	8
Other liabilities	112
Total liabilities	**1,163**
Total identifiable net assets at fair value	**505**
Goodwill from company acquisition	0
Adjustment for minority interests	(185)
Total consideration	**320**

4 Business combinations (Continued)

The consideration breaks down as follows:

	KEUR
Purchase price 1	320
Total consideration	**320**

The fair value of trade receivables is 974 thousand euros. The gross value of trade receivables is 984 thousand euros. Impairment of trade receivables in the amount of 10 thousand euros was recognized.

If the business combination had taken place at the beginning of the year, revenue from continuing business operations would have increased by 636 thousand euros and consolidated profit/loss from continuing operations would have risen by 18 thousand euros.

Cash outflow due to company acquisition:

	KEUR
Analysis of cash outflow due to company acquisition	
Total consideration	(320)
Cash consideration	**(320)**
Net cash of acquired company	170
Transaction costs of acquisition	(9)
Actual cash outflow due to company acquisition	**(159)**

5 Information on the consolidated statement of comprehensive income

5.1 Revenue

Revenue breaks down into the following items:

	2013	2012
	KEUR	KEUR
Revenue from human medicine		
Health insurance companies	239,370	208,572
Privately insured patients	203,038	184,383
Clinics	97,385	99,399
Laboratories	31,683	29,387
Doctors	26,323	18,498
Other revenue from human medicine	2,507	2,331
	600,306	**542,570**
Revenue from environmental analysis	25,891	17,655
Revenue from other examinations	18,095	15,070
Revenue from veterinary medicine	10,538	8,901
Revenue from trading goods	10,394	10,049
Revenue from studies and expert opinions	3,611	3,981
Other revenue	2,330	2,643
	671,165	**600,869**

5 Information on the consolidated statement of comprehensive income (Continued)

Revenue breaks down by region as follows:

	2013 KEUR	2012 KEUR
Germany	381,564	369,908
Switzerland	77,502	64,905
Italy	62,139	56,850
Czech Republic	45,177	47,946
Hungary	25,246	17,769
Belgium	23,541	0
Austria	20,165	19,372
Slovakia	12,259	11,488
Baltic States	6,893	0
Other	16,679	12,631
	671,165	**600,869**

5.2 Material expenses

Significant items included in material expenses are as follows:

	2013 KEUR	2012 KEUR
Reagents and expenses "per reported result"	(108,947)	(101,826)
Consumables	(50,529)	(42,206)
Cost of other purchased services	(15,684)	(13,636)
Merchandise	(3,227)	(5,190)
Other and change in inventory	1,007	(697)
	(177,380)	**(163,555)**

Consumables and reagents are products used in the analyses. Based on master agreements with laboratory equipment manufacturers, agreements are also concluded regarding invoicing on a "per reported result" basis. These agreements stipulate payments to the supplier whenever analyses lead to results that may be invoiced.

Material expenses break down by region as follows:

	2013 KEUR	2012 KEUR
Germany	(113,315)	(114,282)
Switzerland	(13,586)	(11,579)
Italy	(12,130)	(10,998)
Czech Republic	(11,656)	(11,278)
Hungary	(7,948)	(5,584)
Belgium	(4,230)	0
Austria	(3,620)	(2,942)
Slovak Republic	(3,545)	(3,487)
Baltic States	(2,447)	0
Other	(4,903)	(3,405)
	(177,380)	**(163,555)**

5 Information on the consolidated statement of comprehensive income (Continued)

5.3 Personnel expenses

	2013	2012
	KEUR	KEUR
Annual salaries	(193,400)	(179,841)
Variable compensation	(2,234)	(4,193)
Overtime compensation	(1,263)	(2,408)
Other personnel expenses	(4,902)	(1,794)
Pension expenses	(1,531)	(1,206)(*)
Expenses resulting from share-based payment	(148)	(253)
Social security	(37,202)	(34,297)
	(240,680)	**(223,992)**

(*) Restated as per IAS 8. See Note 3.3.

During the fiscal year, pension insurance premiums were paid in the amount of 13,466 thousand euros (previous year: 13,041 thousand euros) and payments were made for pensions in the amount of 1,517 thousand euros (previous year: 1,673 thousand euros). In addition, post-employment benefits (severance pay) were paid in the amount of 2,053 thousand euros (previous year: 3,338 thousand euros).

5.4. Expenses on rental and lease agreements

	2013	2012
	KEUR	KEUR
Building expenses	(20,978)	(17,995)
Lease expenses for analysis equipment	(4,247)	(3,640)
Other fixtures and fittings, and office equipment	(3,042)	(2,379)
	(28,267)	**(24,014)**

5.5 Transport expenses

Transport expenses in the amount of 20,873 thousand euros (previous year: 20,867 thousand euros) relate to external logistics providers, and in the amount of 5,963 thousand euros (previous year: 5,215 thousand euros) to expenses incurred for the Company's vehicle fleet.

5.6 Other operating income

	2013	2012
	KEUR	KEUR
Income from reversal of valuation allowances	3,385	2,230
Other out-of-period income	3,257	2,231
Income from disposal of non-current assets	715	378
Rental income	387	320
Income from currency effects	156	527
Recoveries on derecognized receivables	72	102
Income from reversal of provisions	0	4,624
Other	4,653	731
	12,625	**11,143**

The line item "Other" also contains income in the amount of 951 thousand euros from a license agreement between practice Dr. Arlt and Labomed Stuttgart. This income was earned in the period between the Labomed GmbH acquisition as of May 1, 2013 and the acquisition of practice Dr. Arlt as of August 1, 2013.

The other out-of-period income items not related to this reporting period are mainly income from receivables due from health insurance companies.

5 Information on the consolidated statement of comprehensive income (Continued)

Income from the reversal of provisions is a result of the purchase price adjustment relating to the acquisition of MVZ Leverkusen Group.

5.7 Other operating expenses

	2013	2012
Temporary employees	(18,568)	(16,538)
IT and communication expenses	(15,119)	(14,063)
Administrative costs	(14,619)	(11,192)
Advertising and marketing expenses	(11,644)	(9,264)
Legal and consulting fees	(10,632)	(12,759)
Cost of premises	(8,150)	(7,082)
Personnel-related expenses	(7,795)	(7,718)
Additions to allowances for doubtful accounts	(7,585)	(8,845)
Repair and maintenance expenses	(6,959)	(5,680)
Energy expenses	(4,906)	(4,156)
Fees and dues	(2,805)	(1,803)
Costs for preparation of the financial statements	(2,462)	(2,032)
Loss on disposal of non-current assets	(461)	(155)
Exchange rate losses	(543)	(534)
Miscellaneous other operating expenses	(13,276)	(9,083)
	(125,524)	**(110,904)**

In addition to regular expenses for tax advice and accounting, legal and consulting fees in fiscal year 2013 primarily relate to company acquisitions (2,535 thousand euros; previous year: 3,965 thousand euros), legal disputes (1,922 thousand euros; previous year: 1,951 thousand euros), as well as restructuring (1,669 thousand euros; previous year: 852 thousand euros).

Miscellaneous other operating expenses contain out-of-period expenses totaling 4,334 thousand euros.

5.8 Depreciation, amortization and impairment

Depreciation, amortization and impairment relate to the following items:

	2013	2012
	KEUR	KEUR
Intangible assets	(43,013)	(37,427)
Property, plant and equipment	(19,506)	(16,766)
Other assets	0	(238)
	(62,519)	**(54,431)**

5.10 Income tax

The major components of income tax are:

	2013	2012
	KEUR	KEUR
Current income taxes	(10,821)	(7,379)
Deferred income taxes	3,343	4,743(*)
Income tax reported in profit or loss for the period	**(7,478)**	**(2,636)**

(*) Previous year's figure restated as per IAS 8.

The effective tax rate for the Group for the fiscal year ending on December 31, 2013, is minus 97.43% (previous year: minus 10.77%). The following table presents the reconciliation between the reported and the expected income tax for the Group using the Group tax rate of 29.44% (previous year: 29.44%). For the Italian companies, calculations were based, as in the previous year, on a company tax rate of 31.40%, comprising Italian corporate income tax (imposta sul reddito delle società, IRES) of 27.5%, and Italian regional taxes (imposta regionale sulle attività, IRAP) of 3.9%. For the Czech companies, a company tax rate of 19.00% was used (previous year: 19.00%). For the Swiss companies, a company tax rate of between 14.84% (previous year: 14.84%) and 23.76% (previous year: 23.76%) was applied. For German companies, the rate used for calculations was the same as in the previous year, with a company tax rate of 29.44%, comprising corporate income tax of 15.83% (including solidarity surcharge) and trade tax of 13.62%. For the Austrian companies, a company tax rate of 25.00% was used, as in the previous year. For the Hungarian and Macedonian companies, a company tax rate of 10.00% was used, as in the previous year. For the Slovak company, a company tax rate of 23.00% was used (previous year: 19.00%). For the Polish company, a company tax rate of 19.00% was used, as in the previous year. For the Turkish and Croatian companies, a company tax rate of 20.00% was used, as in the previous year. For the Slovenian company, a company tax rate of 17.00% (previous year: 20%) was used. For the Romanian companies, a company tax rate of 16.00% was used, as in the previous year. For the Belorussian company, a company tax rate of 18.00% was used (previous year: 18.00%), as in the previous year. For the British companies, a company tax rate of 20.00% was used (previous year: 20.00%). For the Belgian company, a company tax rate of

33.99% was used (previous year: 33.99%). For the Estonian companies, a company tax rate of 20.10% was used.

For the Finnish companies, a company tax rate of 24.50% was used. For the Lithuanian company, a company tax rate of 15% was used.

	2013	2012

Property, plant and equipment	1,393	983	(375)	(119)
Other non-current assets	2,181	2,718	265	(516)
Non-current interest-bearing loans and borrowings	3,588	2,484	(1,110)	(2,374)
Pensions and similar obligations	4,511	3,856(*)	(213)	189(*)
Other non-current provisions	2	0	(2)	0
Other	183	200	(2)	37
Deferred income tax liabilities	**73,714**	**73,768**	**5,069**	**2,461**

(*) Previous year's figure restated as per IAS 8.

At the reporting date, those deferred tax assets and liabilities in the amount of 21,222 thousand euros (previous year: 20,121 thousand euros) were netted which fulfilled the prerequisites for offsetting. As a result, deferred tax assets in the amount of 1,286 thousand euros (previous year: 3,750 thousand euros) as well as deferred tax liabilities in the amount of 52,492 thousand euros (previous year: 53,647 thousand euros) were reported in the statement of financial position.

5 Information on the consolidated statement of comprehensive income (Continued)

The deferred income tax liabilities included in line item "Pensions and similar obligations" are largely attributable to deferred tax liabilities on plan assets of the Swiss companies. The deferred tax portion attributable to actuarial gains and losses recorded in 2013 in other comprehensive income amounts to 13 thousand euros (previous year: 218 thousand euros).

The Group has tax loss carryforwards in the amount of 119,152 thousand euros (previous year: 90,278 thousand euros) that can be used without restriction in various Group companies to be set off against future taxable income of the respective company or of another Group company. Due to insufficient levels of taxable income or opportunities for setting-off in the individual companies or other Group companies, no deferred tax assets were recorded for tax loss carryforwards in the amount of 80,390 thousand euros (previous year: 50,734 thousand euros).

Tax loss carryforwards may be carried forward in the same amount as the previous year without limitation.

As in the previous year, there were no deferred tax liabilities for unpaid taxes on profits of the Group's subsidiaries or associated companies as of December 31, 2013, as most of these profits may be absorbed by the receiving company without being taxed further. Temporary differences related to shares in subsidiaries and associated companies for which no deferred tax liabilities were recorded amount to a total of 6,090 thousand euros (previous year: 3,395 thousand euros).

h) Acquisition of Hungarian companies—2012	3,935	4,053
i) Acquisition of German companies—2012	7,352	7,652
j) Acquisition of Belgian companies—2012	41,907	41,907(*)
k) Acquisitions in the Baltic States—2013	20,953	0
l) Acquisitions in Germany—2013	17,532	0
l) Acquisitions in Switzerland—2013	3,031	0
l) Other acquisitions—2013	3,921	0
	350,850	**311,940**

(*) Previous year's figure restated as per IAS 8.

The changes under c) above are due to liquidation of Orga-Lab GmbH; the changes under i) above are due to the reversal of the 2012 acquisition of practice Dr. Gaul in fiscal year 2013. These are part of the changes in the scope of consolidation in 2013.

Goodwill amounts are reported in the respective functional currency. Goodwill amounts outside the euro zone are as follows: Czech Republic: 1,511,544 thousand Czech crowns (previous year: 1,457,233 thousand Czech crowns); Switzerland: 94,644 thousand Swiss francs (previous year: 90,958 thousand Swiss francs); Hungary: 1,777,704 thousand Hungarian forint (previous year: 1,690,658 thousand Hungarian forint); United Arab Emirates: 8,352 thousand Emirati dirham; Lithuania: 245 thousand Lithuanian litas.

6.2 Goodwill impairment testing

For purposes of impairment testing of goodwill from business combinations, goodwill was allotted to the respective CGUs The Baltic States, Belgium, Germany, Italy, Austria, Switzerland, Slovak Republic, Czech Republic, Hungary and Rest of the World (ROW).

The balances at the respective reporting date are as follows:

	2013	2012

6 Information on the consolidated statement of financial position (Continued)

The Group conducted its annual impairment testing as of December 31, 2013. The CGU recoverable amount is determined by calculating a value-in-use using cash flow projections based on five-year financial plans approved by management. The following discount rates were used:

	WACC after tax	WACC before tax
Baltic States	7.67%	9.25%
Belgium	7.34%	9.34%
Germany	6.53%	8.44%
Italy	8.70%	10.71%
Austria	6.60%	8.17%
Switzerland	6.69%	7.86%
Slovak Republic	7.97%	8.98%
Czech Republic	7.59%	8.35%
Hungary	9.77%	11.26%
ROW	10.89%	14.28%

CGU cash flows occurring after the five-year period are projected using a growth rate of 0.5%.

As in the previous year, there was no need to recognize any impairment losses in the current fiscal year. The following assumptions used in calculating the CGU value-in-use are subject to estimation uncertainty:

- Gross profit margins,
- discount rates,
- price trends for materials and external services used, and
- growth rates used in cash flow projections outside the budget period.

Gross margins—Gross margins are determined using historical average values. Expected effects from changes due to collective wage reforms were taken into consideration in the scope of cash flow projections.

Revenue/EBITDA margin—Forecast revenue and CGU results are based on generally available economic data as well as industry information, and take into account not only basic market forecasts but also current trends and past experience.

Discount rates—Discount rates represent the current market expectations with respect to risks attributable to the respective CGUs, including risks related to interest rate effects and specific risks connected with assets for which estimated future cash flows have not been adjusted. The calculation of the discount rate takes into account the specific circumstances of the Group and its business segments, and is based on its weighted average cost of capital (WACC). The weighted average costs of capital take both borrowed capital and equity into account. Costs of equity are derived from the return on capital that equity investors of the Group expect to receive. Costs of borrowed capital are based on the interest-bearing debt for which the Group bears responsibility for making debt service payments. Due to the fact that business activities of the CGUs are very similar, business risk was included by using a company-specific beta factor. This beta factor is determined annually based on market data available to the public.

Pricing trends for materials and external services—The estimates are based on published price indices for countries supplying the materials, as well as data relating to specific materials. Forecast data are only used if available to the public (primarily in the European Union and Switzerland). Otherwise historical price trends are used as an indicator for future price trends.

Estimated growth rates—The growth rates are based on published sector-specific market research.

Assumption sensitivity

A discount rate increase of 1.0 percentage point would lead to the following goodwill impairment: CGU Germany: by 7,353 thousand euros; CGU Czech Republic: by 5,364 thousand euros, and CGU Slovak Republic: by 1,167 thousand euros. Any realistic change in the underlying assumptions would not result in any impairment of other goodwill not listed above.

The customer lists primarily represent customer relationships with doctors and hospitals. These customer lists consist of customer relationships acquired in the scope of corporate transactions and so-called signing fees under supply agreements with hospitals. The rise in the customer lists pertaining to relationships with doctors may be attributed to company acquisitions in the Baltic States. The category 'signing fees' now includes the agreement between synlab Suisse SA and the Genolier hospital.

	2013	2012
	KEUR	KEUR
Customer relationships with doctors	228,377	222,153
Customer relationships with hospitals	17,009	16,273

Signing fees	4,827	518
	285,361	**276,562**

6 Information on the consolidated statement of financial position (Continued)

Customer relationships break down into the following currency areas:

	2013	2012
	KEUR	KEUR
Euro	199,225	183,441
Swiss franc	49,267	51,874
Czech crown	31,541	36,808
Hungarian forint	3,869	4,439
Emirati dirham	1,360	0
Lithuanian litas	99	0
	285,361	**276,562**

Amounts recorded under "Concessions, industrial property rights and similar rights" mainly comprise acquisition costs for laboratory information systems.

In addition, 1,233 thousand euros were recorded as the value of one subsidiary's right to the status of an accredited operator of medical care units under "Industrial property rights". This right remains valid as long as the company operates as an accredited hospital, the legal framework does not change, and the company meets the medical care contract conditions, thus it is currently presumed that the company will benefit from this right for an indefinite period. The Group conducted annual impairment testing on December 31, 2013. The recoverable amount is determined by calculating value-in-use applying cash flow projections based on five-year financial plans approved by management. CGU cash flows occurring after the five-year period are projected using a growth rate of 0.5%. A discount rate of 6.53% (after tax)/9.30% (before tax) was applied. There was no need to recognize an impairment loss in the fiscal year under review. Company management is of the opinion that, based on sound business judgment, no change in any of the basic parameters used to determine value-in-use would cause the carrying amount of the right to accredited operator status to significantly exceed its recoverable amount.

as of December 31, 2011	12,856	18,440	1,074	14,288	1,601	48,259

Investments in non-Group buildings primarily concern leasehold improvements in rented space required for performing laboratory services. The technical equipment and machines consist mainly of analysis equipment.

The carrying amount of technical equipment, fixtures and fittings, and office equipment as well as software and license agreements held under financial lease arrangements as of December 31, 2013 was 25,784 thousand euros (previous year: 25,747 thousand euros). Of the additions during the fiscal year, 5,785 thousand euros (previous year: 18,209 thousand euros) were attributable to technical equipment, fixtures and fittings, and office equipment held under financial leases and lease-purchase agreements.

6 Information on the consolidated statement of financial position (Continued)

6.5 Investments in companies accounted for using the equity method

The changes in shareholdings held in associated companies were as follows:

	2013	2012
	KEUR	KEUR
Shares in associated companies as of January 1	1,166	762
Additions to the scope of consolidation (using the equity method)	2,016	0
Eliminations from the scope of consolidation (using the equity method)	(1,432)	0
Share in net income	575	404
	2,325	**1,166**

The shareholding in the company MED Laborunion GmbH was consolidated using the equity method for the first time in fiscal year 2013. The shareholding in the company Freiburg Medical Laboratory Middle East LLC, Dubai, which had been accounted for using the equity method in the previous year was fully consolidated in 2013 following the purchase of further shares.

For further information please refer to Note 4 'Business combinations' and Note 7 'Financial Instruments and financial risk management'.

6.6 Other non-current assets

"Other assets" include the following:

	2013	2012
	KEUR	KEUR
Security deposits	509	217
Advance payment for the acquisition of laboratory practice Dr. Nae, Germany	462	0
Loan to Permanence Basel AG, Switzerland	152	107
Loans to Schubert Medizinprodukte GmbH & Co. KG, Germany	113	152
Loan to Praxis Permanence Winterthur AG, Switzerland	48	62
Loan to Sannax SA, Switzerland	41	0
Loan to Klinik Hirslanden AG, Switzerland	0	195
Other financial assets	220	2,936
	1,545	**3,669**

Last year the loans to Permanence Basel AG, Praxis Permanence Wintherthur AG, and to Sannax SA were combined under line item "Other financial assets".

For further disclosures regarding the advance payment for the acquisition of the laboratory practice Dr. Nae please refer to Note 14.1 'Acquisitions after the reporting period'.

6.7 Inventories

	2013	2012
	KEUR	KEUR
Raw materials, consumables and supplies	15,151	14,310
Work in progress	1,194	1,118
Prepayments rendered	2,867	1,792
	19,212	**17,220**

Raw materials, consumables and supplies principally include consumable materials used in performing analyses, as well as small equipment provided to doctors for pre-analysis. Work in progress primarily involves semi-processed samples.

The Group recorded impairments in the amount of 74 thousand euros (previous year: 118 thousand euros) for small preanalysis equipment reported under "Inventories". Inventories were valued exclusively at cost. Write-downs refer to inventory that can no longer be used or sold.

Collateral provided includes escrow deposits for future disbursements relating to the following acquisitions: Purchase prices for the company Dr. Arlt at MVZ Stuttgart: 2,000 thousand euros; practice

6 Information on the consolidated statement of financial position (Continued)

Cremer, Kläs, Jung, Schulze at Humangenetik Mannheim: 950 thousand euros; the company Labomed Stuttgart at Steinlach-Klinik: 25 thousand euros. Receivables from associated companies include receivables from the company Schubert Med.prod. GmbH & Co. KG. The purchase price receivables include reimbursement claims against the parties selling MVZ Leverkusen Group.

For further information please refer to Note 7 'Financial instruments and financial risk management'.

6.10 Cash and cash equivalents

	2013	2012
	KEUR	KEUR
Bank deposits denominated in		
Euro	52,721	33,984
Swiss franc	4,414	3,747
Hungarian forint	3,041	1,888
Czech crown	1,976	2,071
Other currencies	1,708	1,773
	63,860	**43,463**
Cash on hand and checks	719	324
	64,579	**43,787**

As of the reporting date, cash and cash equivalents included a liquidity reserve in the amount of 17.4 million euros for acquisitions. As of December 31, 2013, the Group held unused credit facilities in the amount of 2,961 thousand euros (previous year: 40,336 thousand euros).

6.11 Subscribed capital and reserves

6.11.1 Subscribed capital

	2013	2012
	KEUR	KEUR
Registered capital	2,762	2,696
Contributions for an approved capital increase	9	66
	2,771	**2,762**

Registered capital is made up of shares with a nominal value of EUR 1.00 and equal voting rights per share. The distribution of shares is as outlined in the list of shareholders.

As per a resolution passed at the shareholders meeting on June 29, 2012, management was authorized, subject to advisory board approval, to increase the Company's registered capital until July 12, 2017, once or several times, by up to a total amount of 1,350,000 euros by issuing additional shares for cash or in-kind contributions.

The purchase of treasury shares in fiscal year 2011 resulted in a reduction of subscribed capital by 4 thousand euros.

In connection with the acquisition of Laboratoire d'analyses medicales Dr. Jean Collard SPRL and Laboratoire Biosemois SPRL in 2012 it was resolved to increase subscribed capital by 66 thousand euros, utilizing authorized capital. The authorized capital in the amount of 1,350 thousand euros was thus reduced and the change recorded on January 17, 2013. The amount exceeding subscribed capital (15,935 thousand euros) was recorded in "Capital reserves".

Registered capital further increased by 9 thousand euros in fiscal year 2013 as a result of the acquisition of the company Institut für Pathologie Mannheim GbR. Authorized capital thus decreased by that amount to 1,275 thousand euros. The amount exceeding the subscribed capital in the amount of 2,475 thousand euros was recorded in "Capital reserves".

6.11.2 Capital reserves

	2013	2012
	KEUR	KEUR
Capital reserves	**199,684**	**212,287**

As outlined in section 6.11.1, capital reserves increased by 2,475 thousand euros as a direct result of the acquisition of the company Institut für Pathologie Mannheim GbR. Capital reserves further increased through share-based payments in the amount of 148 thousand euros; for additional information please refer to section 8 'Share-based payment'. Pursuant to a management resolution, 15,131 thousand euros of capital reserves were withdrawn effective December 31, 2013 to completely set off the existing accumulated loss.

SYNLAB HOLDING also acquired another 1.82% shareholding in BZH GmbH as of May 2, 2013. The purchase price for this shareholding was 16 thousand euros, increasing the total shareholding from 51.02% to 52.84%. Effective 18 July, 2013, the Company furthermore purchased the outstanding 49% shareholding in BILACON Institut für Biotechnologie, Laboranalytik und Consulting GmbH for 35 thousand euros, increasing its shareholding from 51% to 100%. Both companies had been fully consolidated in the previous fiscal year. The difference between the purchase price and the carrying amount of the transferred non-controlling interests was recorded under "Capital reserves" as a transaction between shareholders in accordance with IAS 27. Capital reserves decreased by 95 thousand euros due to the decrease in non-controlling interest by way of share acquisitions.

6.11.3 Accumulated other comprehensive income

Exchange differences from foreign operations

The reserve for currency translation differences serves to account for differences resulting from translation of the financial statements of foreign subsidiaries. As of December 31, 2013, accumulated other comprehensive income includes currency translation differences in the amount of 12,888 thousand euros (previous year: 19,745 thousand euros).

Actuarial gains and losses recorded in equity

Additionally, pursuant to the revised IAS 19, actuarial gains and losses must be recorded directly in equity. The resulting effects recorded in accordance with IAS 8 had an impact on previous-year accumulated other comprehensive income: Thus the opening statement of financial position as of January 1, 2012 was retrospectively adjusted for actuarial gains in the amount of 473 thousand euros, and the respective losses amounting to 828 thousand euros were recorded directly in equity for fiscal year 2012. In fiscal year 2013, the Company recorded actuarial gains in the amount of 42 thousand euros, closing this line item as of December 31, 2013 with a loss of 313 thousand euros (previous year: a loss of 355 thousand euros).

6.12 Disbursed and proposed dividends

As in the previous year, no dividends were disbursed by the parent company during the year under review. A dividend distribution will not be recommended at the shareholders meeting.

6.13 Interest-bearing loans and borrowings

	Non-current		Current		Total	
	12/31/2013	12/31/2012	12/31/2013	12/31/2012	12/31/2013	12/31/2012

Total	**466,406**	**357,339**	**41,844**	**54,136**	**508,250**	**411,475**

As of January 24, 2012, SYNLAB HOLDING and various subsidiaries refinanced outstanding bank loans, concluding a new loan agreement with a volume of 395,000 thousand euros and an uncommitted acquisition facility agreement for 75,000 thousand euros. This senior facilities agreement comprises committed facilities consisting of an amortizing tranche A1 in the amount of 115,000 thousand euros, and another tranche A2 due at final maturity in the amount of 160,000 thousand euros. In addition, further committed tranches for refinancing mezzanine loans and a revolving credit facility of 25,000 thousand euros were granted. On March 28, 2013 the Company agreed on the drawdown under this credit agreement of another tranche B2 on June 28, 2013 in the amount of 75,000 thousand euros, and re-designation of certain portions of tranches A2 and A3 and of the acquisition committed facility to a new tranche B1 in the amount of 105,261 thousand euros. On December 18, 2013, it was further agreed to change the credit agreement to allow for converting 69.17% of the amortizing tranche A1 to tranche A5 due at final maturity as of January 31, 2014. The credit facility agreement was concluded for euro amounts, but amounts may also be drawn in tranches in Swiss francs or Czech crowns, or by request in another freely convertible currency approved by the agent. The exchange rate is fixed at the time of disbursement. Interest rates are based on the one-month Euribor, the three-month Libor, or the three-month Pribor rate. The current margin for tranche A1 and the revolving credit facility is 4.25%, while all other tranches have a margin of 4.75%. Margin changes depend on changes in certain financial covenants.

All facilities have a maturity date of January 24, 2017; facility A1 tranches are repayable in semi-annual installments ranging between 9.0% and 10.5% of the nominal amount.

Between 50% and 100% of interest accruing for the facilities A1 to A4 is to be secured through a supplementary hedging contract.

As part of the refinancing conducted in January 2012, all remaining transaction costs from prior financing in the amount of 8,725 thousand euros were recorded through profit or loss as interest expense. Expenses incurred in 2012 through refinancing in the amount of 13,028 thousand euros were capitalized as financing cost pursuant to IAS 39, and will be amortized over the term of the loan agreement. In 2013, further transaction costs in the amount of 7,503 thousand euros were incurred due to the facility agreement changes and pledging. This amount was partly allocated to the new tranches and partly capitalized as subsequent costs to the original tranches retroactively.

The Group assumed a mezzanine financing agreement through the acquisition of synlab Services Group in the amount of 10,000 thousand euros. Profit participation rights of the type 'equiNotes-Instrument Type A*' (profit participation rights capital II) were made available to FORCE 2005-1 LIMITED PARTNERSHIP on November 30, 2006, and contributed to the company as of January 1, 2010. The profit participation rights capital II is recorded in the amount of 10,000 thousand euros under "Interest-bearing loans and borrowings". The company was obligated to pay the profit participation rights holder a return of 6.5% p.a. on the nominal amount of the profit participation rights capital until the agreed maturity on December 30, 2013, plus variable interest of 0.25% p.a., contingent on profitable ordinary operations. The capital to be repaid for the profit participation rights corresponds to the nominal amount on the start date. Participation in losses was not contractually agreed. Ordinary termination rights for the parties were not provided for. Claims to payment based on the profit participation rights were subordinate to current and future claims of all creditors of the company not fulfilling the criteria for equity according to the accounting principles of German Commercial Code, and equal in priority to current and future claims that fulfill these criteria. The subordination did not apply to claims from profit participation rights which arise or become due in the absence of insolvency or liquidation of the company. Servicing of the profit participation rights was not restricted to future revenues or profits. The agreed repayment date was December 31, 2013. However, the bank only debited the repayment on January 2, 2014.

6.14 Pensions and other post-employment benefits

The provisions for severance payment obligations, pensions, and long-service awards as described below and reported in the IFRS consolidated statement of financial position as of December 31, 2013, were calculated by an actuary and substantiated in an actuarial expert opinion, unless otherwise indicated.

6.14.1 Swiss pension obligations

Swiss statutes require the Group to provide occupational pension schemes for employees and pay contributions into pension funds. The Group fulfills this obligation by way of a defined benefit plan. Due to regional legal differences it may be necessary to make supplementary payments for some employees when they retire. Pension obligations and current service cost were calculated using the projected unit credit method, applying a discount rate of 2.25% (previous year: 2.00%) and a salary increase rate of 2.00% (previous year: 2.00%). The staff turnover discount as per the Swiss Federal Law on Occupation Retirement (BVG 2010) was between 1.29% and 24.16% (previous year: 1.29% and 24.16%). Mortality, invalidity and withdrawal probabilities were calculated in accordance with BVG 2010.

6.14.2 Swiss long-service awards

Long-services award commitments in Switzerland are based on collective or other agreements granting employees long-term claims depending on their remuneration levels and duration of service. Provisions for long-service awards were calculated applying a discount rate of 2.25% (previous year: 2.00%), a salary increase rate of 2.00% (previous year: 2.00%), and a staff turnover rate per BVG 2010 of between 1.29% and 24.16% (previous year: between 1.29% and 24.16%).

6.14.3 German pension obligations

The Group assumed pension obligations from a defined benefit plan for ten executive staff in the course of the acquisition of MVZ Leverkusen Group. The obligations include comprehensive old-age pensions, early retirement, survivors' and invalidity pensions. Pension claims accrue based on years of service and annual salary levels. They are calculated applying a discount rate of 3.80% (previous year: 3.45%) and a pension increase trend of 1.50% (previous year: 1.50%). The assumed rate for salary increases was 2.00% (previous year: 2.00%) and for the assessment limit increase 2.00% as well (previous year: 2.00%). The biometric probability of events such as death, invalidity and marriage as well as collective age differences between spouses was taken from the reference guidelines published by Dr. Klaus Heubeck from 2005 ("Richttafeln 2005 G"). The assumed final funding age was the earliest possible pensionable age pursuant to German pension statutes, i.e. according to the Pension Insurance—Retirement Age Adjustment Act (RV-Altersgrenzenanpassungsgesetz). Staff turnover rates of 1.00% to 8.00% (previous year: 1.00% to 8.00%) were factored in.

As part of the asset deal concluded by synlab Umweltinstitut GmbH for another two laboratories in Germany (Hürth-Knapsack and Wiesbaden, Hürth and Wiesbaden), the Group assumed obligations for old-age pensions, early retirement, survivors' and invalidity pensions. The defined benefit plan includes basic pensions and complementary schemes. For basic pensions, salary-related contributions are deducted from the employee's salary and transferred to external pension plan providers (pension funds). Under certain circumstances the company may alternatively assume direct responsibility for part of the basic pension. The complementary scheme is a defined benefit plan in which benefits accrue based on years of service and salary levels.

6.14.4 German phased retirement program obligations

Under phased retirement agreements pursuant to the Phased Retirement Act (AltTZG) the Group is required to pay compensation and 'top-up' amounts plus other ancillary payments to those employees covered by agreement. The calculations were made based on a discount rate of 1.25% (previous year: 3.95%) and a salary increase rate of 2.00% (previous year: 2.00%). The biometric probability of events such as death and invalidity was taken from the reference guidelines published by Dr. Klaus Heubeck from 2005 ("Richttafeln 2005 G").

6.14.5 German long-service awards

Provisions for long-service award obligations were based on the biometric probability of events such as death and invalidity taken from the reference guidelines published by Dr. Klaus Heubeck from 2005 ("Richttafeln 2005 G"). The calculations were made based on a discount rate of 3.80% (previous year: 3.95%) and salary increases of 2.00% (previous year: 2.00%). Staff turnover rates of 7.00% to 12.50% (previous year: 7.00%) were factored in.

6.14.6 Italian severance pay obligations

Pursuant to the 1982 statutory regulations (Trattamento di Fine Rapporto, TFR), employees in Italy are entitled to a onetime severance payment when they leave the company. The amount depends on the employee's term of service and salary level. The company has recorded provisions for these entitlements accordingly. At the beginning of 2007, the statutory regulations were revised to the effect that a company is obligated to record provisions for severance payment obligations for up to 50 employees. If a company has more than 50 employees, it is obligated to contribute to a provision fund for those employees entitled to severance payments, these funds being disbursable to the employee upon leaving the company. Company obligations arising before 2007 are exempt and remain in the company. When calculating provisions thus relating to the defined benefit portion of the plan, the 11% tax deduction on index-related adjustments of the TFR nor the 0.50% social security payments to the INPS insolvency fund are included. Calculations are made applying an assumed inflation rate of 2.00% (previous year: 2.00%), a discount rate of 3.10% (previous year: 3.30%), and a staff turnover rate of 5.00% (previous year: 5.00%). The mortality rate was calculated based on RG48, the invalidity rate on the basis of INPS. The average retirement age was assumed to be 66 years. In the case of a newly acquired Italian company (Synlab Emilia Romagna S.r.l.), provisions in the amount of 209 thousand euros were calculated applying methods of mathematical finance.

6.14.7 Austrian severance pay obligations

Statutory regulations require the Group to pay one-time severance payments in the case of retirement, and in some cases upon early ending of employment as well. These payments depend on term of service and the salary received by the employee. These statutory regulations govern all employment agreements commencing prior to January 1, 2003. They are calculated using a discount rate of 3.10% (previous year: 4.20%) and a salary increase rate of 2.70% (previous year: from 2.00% to 2.70%). The staff turnover discount remained at the previous year's levels, i.e. between 0.00% and 6.50%. The AVÖ 2008-P "mixed" Pagler & Pagler calculation basis for pension insurance was used as a biometric basis. The computational retirement age was the earliest possible payment date for pension distribution pursuant to the 2004 pension reform, taking the transitional arrangements into consideration. For female members with accrued credits the computational retirement age corresponding to the Federal Constitutional Law on Different Retirement Ages of Men and Women under Social Security (Bundesverfassungsgesetz über die unterschiedliche Altersgrenzen von männlichen und weiblichen Sozialversicherten) was increased step-by-step. If retirement age has already been reached by the valuation date, retirement is assumed to start 6 months after the calculation date. Accrued entitlements to payments to survivors were determined according to the collective method.

6.14.8 Austrian long-service awards

Provisions for long-service awards are accrued for claims based on collective agreements or long-term claims based on other employee agreements depending on the duration of service with the company in accordance with IAS 19. Provisions for long-service awards factored in payroll taxes of 7.90% (previous year: 7.90%). Furthermore, the same calculation parameters as for calculating severance pay obligations were applied.

6.14.9 Other post-employment benefits

In the Slovak Republic, the Group is legally obligated to make a one-time salary-based severance payment to a retiring employee. Provisions for this defined benefit plan have been recorded in the amount of 53 thousand euros (previous year: 41 thousand euros). The calculations were made based on a discount rate of 3.10% (previous year: 4.20%) and a salary increase rate of 2.00% (previous year: 2.50%). Staff turnover rates of 2.50% to 4.00% (previous year: 2.50% to 4.00%) were factored in. The retirement age was assumed to be 62 to 64 years.

In Belgium, employees may take early retirement from the age of 60 if certain requirements are met. If this is the case, the Group is legally obligated to pay salary-based top-ups until these employees reach the statutory retirement age of 65. The respective provisions as of December 31, 2013 amounted to 87 thousand euros.

Pursuant to statutory regulations, employees in the United Arab Emirates are entitled to a one-time severance payment when they leave the Company. The amount depends on the employee's term of service and salary level. The respective provisions as of December 31, 2013 amounted to 273 thousand euros.

As outlined above, synlab Umweltinstitut GmbH assumed pension obligations as part of an asset deal for another two laboratories in Germany (Knapsack). The Group thus assumed additional obligations for continued salary payments in case of death and year-end payments. The basic pensions form the basis for calculating the Company's salary-based elated defined benefit plan obligations for continued salary payment in case of death and the year-end payment at retirement.

In Hungary, provisions for long-service awards were recorded for the first time as of December 31, 2012. In 2013, provisions for long-service award obligations were reversed due to termination of a benefit plan and amount to 0 thousand euros as of December 31, 2013 (previous year: 24 thousand euros).

6.14.10 Overview of pensions and similar obligations

The change in pensions and similar obligations was as follows. The reconciliation is based on the revised IAS 19; previous-year figures were restated accordingly. For further details please refer to section 3.3 'Restatement in accordance with IAS 8'.

Service cost	1,282	13	33	126	(6)	1,448
Interest cost	105	94	70	32	6	307
Effects of plan settlements/ plan curtailments	0	5	30	0	0	35
Revaluation of other long-term obligations	(73)	0	(207)	3	0	(277)
Total annual net expense	**1,314**	**112**	**(74)**	**161**	**0**	**1,513**
thereof recorded in other comprehensive income						
Actuarial gains/losses from changes in demographic assumptions	(551)	0	0	0	0	(551)
Actuarial gains/losses from changes in financial assumptions	1,640	215	44	40	0	1,939
Adjustments based on past experience	330	(15)	(11)	13	0	317
Income/expenses from plan assets, excluding amounts included in interest cost)	(661)	0	0	0	0	(661)
Total annual amount recorded in other comprehensive income	**758**	**200**	**33**	**53**	**0**	**1,044**
Total annual expenses for pensions and similar obligations	**2,072**	**312**	**(41)**	**214**	**0**	**2,557**

(*) Restated as per revised IAS 19.

Current service cost, effects of plan settlements and plan curtailments, and revaluation of other long-term obligations were included in the amounts recorded in "Personnel expenses"; interest costs were included in the respective expense items.

6 Information on the consolidated statement of financial position (Continued)

The fair value of plan assets breaks down by asset classes as follows; all fair values are quoted on active markets.

	2013	2012
	KEUR	KEUR
Cash and cash equivalents	3,050	86
Equity instruments	6,853	4,770
Debt instruments	6,470	9,603
Real estate	5,877	4,791
Other	2,745	1,745
	24,995	**20,995**

Plan assets do not contain the Company's own financial instruments, real estate held for the Company's own use, or any other assets used by the Company.

The Group expects to pay contributions to defined benefit plans for fiscal year 2014 in the amount of 1,053 thousand euros (previous year: 926 thousand euros).

The following sensitivity analysis shows the impact on net present value of the defined benefit obligations if the most important actuarial assumptions were to change.

	Changed by	Impact on DBO amount
		KEUR
Salary increases	(0.50)%	36,166
Salary increases	0.50%	36,659

	Changed by	Impact on DBO amount
		KEUR
Discount rate	(0.50)%	38,786
Discount rate	0.50%	34,408

The following defined benefit plan payments are expected to be disbursed in the next years:

	KEUR
Within the next 12 months	1,153
In 2 years	1,018
In 3 years	1,040
In 4 years	1,167
In 5 years	1,356
In the 5 years thereafter	7,841

The average duration of all post-employment benefit payments in the countries listed below is as follows:

(in years)	Switzerland	Italy	Germany	Austria	Other
as of 12/31/2012	16	12	20	10	10
as of 12/31/2013	13	10	19	10	5

(*) Previous year's figure restated as per IAS 8.

The contingent consideration in the amount of 14,434 thousand euros is from the acquisition of Quattromed Finland OY, and the contingent consideration in the amount of 815 thousand euros is from the acquisition of Med. Labor Olten MLO AG. Utilization of the provisions for the acquisition of Quattromed Finland OY is expected in June 2014 in the amount of 2,700 thousand euros, and in June 2015 in the amount of 11,830 thousand euros.

Utilization of provisions for contingent consideration from the previous year in connection with the acquisition of Laboratoire d'analyses medicales Dr. Jean Collard SPRL amounted to 15,200 thousand euros, and 500 thousand euros to acquire shares in synlab Holding Austria. The reversal in the amount of 808 thousand euros is related to the acquisition of Synlab Emilia Romagna S.r.l., and the provisions for onerous contracts are for laboratory agreements yielding negative margins until their expiration.

The other additions to provisions are mainly related to restructuring costs (approx. 1,500 thousand euros).

6 Information on the consolidated statement of financial position (Continued)

6.16 Other financial liabilities

	Non-current		Current		Total	
	12/31/2013	12/31/2012	12/31/2013	12/31/2012	12/31/2013	12/31/2012
	KEUR	KEUR	KEUR	KEUR	KEUR	KEUR
Liabilities from salaries and social security payments	0	0	14,362	13,757	**14,362**	**13,757**
Non-controlling interests in partnerships	1,086	2,443	2,845	825	**3,931**	**3,268**
Liabilities from VAT and other taxes	82	70	4,307	4,236	**4,389**	**4,306**
Purchase price obligations	1,419	364	5,986	12,476	**7,405**	**12,840**
Other	431	422	269	352	**700**	**774**
Total	**3,018**	**3,299**	**27,769**	**31,646**	**30,787**	**34,945**

Non-controlling interests in partnerships include the exit claims of the non-controlling interests in Medizinisches Versorgungszentrum Labor München Zentrum GbR.

Purchase price obligations include outstanding payments from acquisitions in Hungary and Italy and from acquisitions of various laboratories in Germany. Please also refer to the information in section 4. In addition, current liabilities include obligations from cooperation agreements in Switzerland.

6.17 Other liabilities

Other liabilities break down as follows:

	12/31/2013	12/31/2012
	KEUR	KEUR
Liabilities from contribution of synlab Services Group	6,365	7,811
Liabilities to employees	5,887	6,191
Customer overpayments	611	704
Deferred income	762	624
Other	2,566	4,312
Total	**16,191**	**19,642**

Liabilities from contribution concern liabilities from acquired medical care units which have not yet been settled.

Liabilities to employees principally concern accrued overtime pay and vacation pay.

7 Financial instruments and financial risk management

Financial assets recognized at fair value through profit or loss	AtFVPL	4	0	0	4	0	4

Cash and cash equivalents, trade receivables, and other current assets usually have residual maturity terms of less than one year. Their carrying amounts at the reporting date thus approximate their respective fair values. Any trade receivables for which allowances have been made are exclusively attributable to default and credit risk level 3, as the input factors for assessing the creditworthiness of these trade receivables are materially based on company-internal estimates. In part these have to do with classifications for trade receivables aging, the country of the debtor ("country-specific risks"), or a combination of the two, and are derived from historical data. Specific factors such as information regarding a customer's insolvency also play a role in such estimates. The value adjustment rate varies between 0.5% and 100%.

The fair value of other non-current receivables equals the present value of the asset-related payments, taking into account the respective current interest rate parameters which reflect the market and partner-related changes in expectations and terms and conditions.

7 Financial instruments and financial risk management (Continued)

Trade accounts payable and other liabilities usually have residual maturity terms of less than one year. Their carrying amounts thus approximate their respective fair values.

The fair values of interest-bearing loans and borrowings are determined as the present value of the liability-related payments, using the respective applicable yield curves and credit-spread curves for the respective currency. The fair value of derivative financial liabilities is measured using the mark-to-market method and interest rates congruent with the terms of the liabilities. These fair values are classified to hierarchy level 2.

The fair value of non-controlling interests in a partnership (puts on NCI) was measured based on the compensation formula set forth in the partnership agreement, taking into account multiples, and in consideration of the Company's planning and market interest rates. The fair value thus measured is therefore classifiable to hierarchical level 3 per IFRS 13, and led to a charge against earnings in the amount of 1,006 thousand euros in the year under review (previous year: 978 thousand euros).

There was no change in classification in the past fiscal year.

	2013					
			From measurement subsequent to acquisition			
	From interest	From charges	At fair value	Exchange rate differences	Impairment	Net result
	KEUR	KEUR	KEUR	KEUR	KEUR	KEUR

Financial liabilities valued at amortized cost	(31,249)	0	0	0	0	(31,249)
Financial instruments held for trading	0	(27)	1,985	0	0	1,958
Total	**(30,957)**	**(27)**	**1,985**	**(678)**	**(7,585)**	**(37,262)**

	2012					
			From measurement subsequent to acquisition			
	From interest	From charges	At fair value	Exchange rate differences	Impairment	Net result
	KEUR	KEUR	KEUR	KEUR	KEUR	KEUR
Loans and receivables	229	0	0	349	(6,615)	(6,037)
Financial liabilities valued at amortized cost	(29,844)	0	0	(968)	0	(30,812)
Financial instruments held for trading	0	1	(2,583)	0	0	(2,582)
Total	**(29,615)**	**1**	**(2,583)**	**(619)**	**(6,615)**	**(39,431)**

The components of the net result are recorded in finance income or finance costs, with the exception of impairments on trade receivables, which are recorded under "Other operating expenses".

The interest result from financial liabilities of the valuation category "Financial liabilities valued at amortized cost" principally include interest expenses arising from interest-bearing, secured loans.

Financial risks

As an international company, SYNLAB HOLDING is exposed to entrepreneurial and industry-specific risks. Managing risks and rewards is an integral part of Company and management decision-making.

In order to be properly prepared for competitive and market environment changes and efficiently manage the company's added value, the parent company has implemented a risk management system which is monitored by the Group management.

The risk management handbook and supplementary Group guidelines define the risk management processes, the limits to be observed and the use of financial instruments for risk management. The goal behind operating the risk management system is being able to recognize and evaluate any emerging risks. These identified risks are immediately communicated, managed, and monitored.

The chief risks to which the Group is exposed are liquidity, credit, interest rate and currency risks. Group risk management is aimed at containing risks arising as a result of business and financing activities. This is accomplished mainly by using derivative and non-derivative hedging instruments.

Liquidity risk

The liquidity risk of the Group has to do with the potential inability to fulfill current or future financial obligations due to lack of sufficient cash. Minimizing and managing liquidity risks are among the primary tasks of company management. The Group monitors its liquidity daily. In order to manage future liquidity needs, the Company uses an eight-week forecast prepared weekly, and a twelve-month rolling liquidity plan prepared on a monthly basis. Beyond that, management continually analyzes compliance with the covenants specified in the long-term loan agreement.

In addition to EBIT and EBITDA, monitoring the change in net working capital and cash flow is important in managing and optimizing the existing finance structure. The Group's goal is to maintain a balance between continuity of funding and ensuring flexibility by utilizing overdraft facilities, bank loans, finance leases, and lease-purchase agreements. To ensure the Group's liquidity, uncommitted overdraft facilities in the amount of 2,960 thousand euros (previous year: 500 thousand euros) were available as of December 31, 2013.

As a result of regular evaluations of risk concentration with respect to debt refinancing, the Group has come to the conclusion that this risk can be seen as low. In particular, the newly agreed Group-wide financing showed that financing sources are sufficiently available. Debt with a term of up to 12 months can be either paid off or extended with existing lenders on the basis of the current liquidity and capital flow planning.

The maturity structure of Group financial obligations is as follows:

	December 31, 2013			
	Residual maturity			
	up to 1 year	more than 1 and up to 5 years	more than 5 years	Total
	KEUR	KEUR	KEUR	KEUR

(1) Including "Other interest-bearing loans and borrowings".

All instruments still held at the reporting date and for which payments were contractually agreed were included. Target figures are not taken into consideration with regard to future new liabilities. Amounts denominated in foreign currencies were translated at the respective spot price as of the reporting date. Variable interest payments from financial instruments were calculated using the interest rates last determined prior to the reporting date. Financial liabilities repayable at any time are always allotted to the earliest time slot. The amounts for derivative financial instruments presented correspond to the net undiscounted cash flows.

Credit risk

Financial instruments pose a default risk for the Group in that a business partner might not meet obligations in connection with a financial instrument or customer master agreement, potentially leading to financial losses. These include credit risks (in particular risks arising from trade receivables), as well as risks related to financing activities, including deposits at banks and financial institutions, currency transactions and other financial instruments.

Trade receivables

The risk of default on customer receivables is managed by the corresponding business unit, observing group guidelines, procedures and controls for customer default risk management. This means that all outstanding receivables from customers are regularly monitored and collected when overdue using a multi-step collections procedure. In doing so however, the Group business and related customer structure should be taken into account: On the one hand, the Group is unable to proactively minimize risk prior to transactions because it must fulfill its public service obligation. However, the Group receives well over a third of its revenues (30.25%; previous year: 35%) from business with health insurance providers which only pose a minor risk of default due to their structure as statutory health insurance companies or regional authorities.

Whenever any default risks are discernible with respect to financial assets, an impairment is recorded. The need for impairment is analyzed individually for major customers on each reporting date. In addition, a large number of small receivables are grouped and assessed collectively for impairment. The calculation is based on actual historical data. The maximum default risk as of the reporting date corresponds to the carrying amount of all financial asset classes reported in this section.

There is no evident default risk concentration from business relationships with individual customers, as customers reside in various countries and belong to very disparate customer groups, of which the greater part carries only a minimal default risk.

Financial instruments and deposits

The default risk for deposits with banks and financial institutes is managed in accordance with Group Treasury guidelines. The Company only invests surplus funds in approved business partners, and allocates such funds to the respective parties only within the scope of available credit lines. The credit limits for business partners are reviewed annually by management, and may be adjusted during the year if the situation so requires. Credit limits are set in order to minimize risk concentration, consequently keeping financial losses resulting from the potential default of a business partner as low as possible. The Group's maximum default risk for the statement of financial position items as of December 31, 2013 and 2012 is equal to the carrying amount of all classes of financial assets reported in this section.

The default risk related to derivative financial instruments is minimized by the fact that such transactions are conducted only with contractual partners with top credit ratings. For this reason, the general default risk in connection with derivative financial instruments used by the Group is deemed to be insubstantial.

Interest rate risk

The Group is exposed to interest rate risk due to its financing activities. In particular, market-induced interest rate fluctuations may impact the interest debt in connection with variable interest-bearing loans. Interest rate fluctuations affect the interest-related cash flow. The Group holds interest rate swaps, collars and caps to minimize the risk from variable cash flows or to convert these variable cash flows into fixed cash flows, and to hedge against interest rate fluctuations. As the Group capitalizes financial liabilities at amortized cost instead of at market value, there is no economic risk from changes of the carrying amount of the financial liabilities due to interest rate changes.

The Group bears interest rate risk mainly in the euro zone, in the Czech Republic, Hungary and in Switzerland.

In accordance with the Group's risk strategy and the approach taken in the previous year, no hedging relationships were recorded for variable interest loans and interest hedging instruments because an effective hedging relationship could not be demonstrated given the business transactions and the payment structure. Accordingly, these hedging relationships are recorded at fair value through profit or loss.

Pursuant to IFRS 7, the Group is required to use sensitivity analyses to present any relevant interest rate risks. These analyses show the effects of changes in market interest rates on interest payments, interest income and expense.

7 Financial instruments and financial risk management (Continued)

The following table illustrates the contractually agreed maturities of the swaps held for trading as of December 31, 2013:

Hedge instrument	Commences	Ends	Nominal volume	Local currency	Reference rate
			(KEUR)		
Swap	04/04/2007	03/31/2014	544		4.30%
Swap	05/06/2008	12/31/2014	904		4.58%
Swap	10/07/2008	12/31/2014	417		4.50%
Swap	01/14/2009	09/30/2014	10,000		3.93%
Swap	04/01/2012	03/31/2015	35,677	(978,436 KCZK)	2.70%
Swap	04/01/2012	06/30/2015	15,000		2.64%

The following table illustrates the contractually agreed maturities of the collars that are held for trading.

Hedge instrument	Commences	Ends	Nominal volume	Reference rate floor	Reference rate cap
			(KEUR)		
Collar	04/01/2012	03/31/2015	75,000	0.40%	2.00%
Collar	04/01/2012	03/31/2015	75,000	0.40%	2.00%

The following table illustrates the contractually agreed maturities of the caps that are held for trading.

Hedge instrument	Commences	Ends	Nominal volume	Local currency	Reference rate
			(KEUR)		
Cap	07/01/2011	06/30/2014	10,000		2.75%

Interest rate sensitivity

The following table demonstrates the sensitivity of this portion of the loans to a change in interest rates which appears fundamentally possible based on sound business judgment, after the effect of hedging transactions. Assuming all other variables remain constant, the consolidated profit or loss for the year before taxes is affected as follows, due to the impact on variable-interest loans. There is only an immaterial effect on Group equity.

	Increase/decrease in basis points	Effect on profit/loss
		KEUR
2013	+100	(4,055)
	—(2)	—
2012	+100	(1,146)
	(100)	1,142

(2) In view of the currently low interest rate levels, a sensitivity analysis showing further decreases in base rates was not necessary.

The assumed basis point development in a sensitivity analysis of interest rates is based on the currently prevailing market environment, and compared to previous years a higher volatility was observed.

Foreign currency risk

Foreign currency risk is the risk to which the fair value or future cash flows of a financial instrument are exposed due to exchange rate fluctuations. The Group is particularly exposed to foreign currency risks arising from its business activities and Company-internal financing in foreign currencies because revenues and/or expenses are, to a certain extent, denominated in currencies other than the Group's functional currency.

In order to manage foreign currency risks, the Group has arranged loans for net investments in foreign operations in those currencies in which the expected cash flows from these net investments will be generated.

7 Financial instruments and financial risk management (Continued)

Exchange rate fluctuation sensitivity

The following table demonstrates the sensitivity of the consolidated profit/loss for the year before taxes (due to changes in the fair value of the monetary assets and liabilities, including non-designated foreign currency derivatives) to fluctuations in the Czech crown, the Hungarian forint and the Swiss franc which appear fundamentally possible on the basis of sound business judgment. All other variables remain constant. The Group risk regarding exchange rate fluctuations in all other currencies is immaterial.

Based on past experience, the following scenarios have been developed for assessing sensitivity to exchange rate fluctuations:

2013

	Positive exchange rate trend Rate	Negative exchange rate trend Rate
Swiss franc	1.3000	1.1000
Czech crown	28.0000	24.0000
Hungarian forint	320.0000	270.0000

The effect on profit or loss before taxes is as follows:

	Changes due to positive exchange rate trend	Changes due to negative exchange rate trend
	KEUR	KEUR
Statement of financial position items with exchange rate risk		
Financial obligations	(2,288)	4,953
Trade receivables minus trade accounts payable	495	(830)
Cash and cash equivalents	(62)	(18)
Effect on profit or loss before tax in %	**24.2%**	**−53.5%**

2012

	Positive exchange rate trend Rate	Negative exchange rate trend Rate
Swiss franc	1.4000	1.0000
Czech crown	26.0000	24.0000
Hungarian forint	310.0000	270.0000

The effect on profit or loss before taxes is as follows:

	Changes due to positive exchange rate trend	Changes due to negative exchange rate trend
	KEUR	KEUR
Statement of financial position items with exchange rate risk		
Financial obligations	(6,025)	9,152
Trade receivables minus trade accounts payable	81	(41)
Cash and cash equivalents	(19)	28
Effect on profit or loss before tax in %	**24.4%**	**37.4%**

8 Share-based payment

In 2010, the SYNLAB HOLDING shareholders resolved to allow certain members of the extended management of the SYNLAB GROUP to participate in the Group's success by granting them an indirect interest in SYNLAB HOLDING equity as part of their compensation package. This management participation program provides the individuals mentioned above the possibility as limited partners (*Kommanditisten*) to purchase a certain amount of shares in synlab Management-Beteiligungs GmbH & Co. KG, a company outside the scope of consolidation of SYNLAB HOLDING, which holds a maximum 3% of the registered capital in synlab Holding GmbH. Conditions for participation were determined at the shareholders meeting.

8 Share-based payment (Continued)

Starting in fiscal year 2011, the Company indirectly granted shares in SYNLAB HOLDING, the parent company of the Group, to directors and senior staff of SYNLAB HOLDING and its domestic and foreign subsidiaries as part of their share-based remuneration packages. This entails either paying in cash a purchase price based on the fair value of the shares at the time of issue or financing the purchase price with loans agreed under normal market conditions.

The shares acquired in this manner are subject to a vesting period as long as the individual beneficiary remains in a management position with the Group until the occurrence of either a good-leaver event or exit of the major shareholder of SYNLAB HOLDING. Company management estimated the average vesting period for this program, introduced in 2011, to be four years for a good-leaver event and five years for an exit event. For shares newly granted in 2012, an average vesting period of one and a half years was assumed for a good leaver event, and three years for exit. Average vesting period assumptions for shares newly granted in 2013 were one year for either a bad or good-leaver event and two years for exit. After expiry of the vesting period, i.e. after a good-leaver event or an exit, the recipient will receive a payment based on his/her shares in synlab Management-Beteiligungs GmbH & Co. KG. Entitlement lapses, however, if the recipient's employment is terminated by way of a bad-leaver event, i.e. prior to expiry of the vesting period.

In fiscal year 2011, Company executives participated in the amount of 0.72% of SYNLAB HOLDING registered capital or 20 thousand euros, and 0.11% or 3 thousand euros in fiscal year 2012. A further increase by 0.07% or 2 thousand euros followed in 2013. In 2011, 65.2% of the executive shares granted went to company directors (0.46%). In 2012 and 2013 none of the shares granted were allotted to company directors.

These share-based commitments are structured as equity-settled instruments. Pre-tax expenses for share-based payments in fiscal year 2013 amounted to 148 thousand euros (previous year: 253 thousand euros) and comprised exclusively awards made in the scope of the aforementioned programs and settled with equity instruments.

The fair value of the shares granted was calculated as the difference between the present value of expected payments to members of management based on the payout structure and vesting period and the purchase price paid by members of management on the date the shares were granted. The fair value of all commitments granted in fiscal years 2011 to 2013 amounted to 760 thousand euros (previous year: 926 thousand euros).

9 Related party disclosures

The consolidated financial statements include SYNLAB HOLDING and the subsidiaries designated in the list of shareholdings.

The Management Board of SYNLAB HOLDING in the fiscal year ended was composed as follows:

- Dr. med. Bartl Wimmer . . . . CEO / Managing Director
- Alexander Hoffmann . . . . COO
- Markus Stötter . . . . CFO / Managing Director

In the reporting period, Management Board members received total remuneration of 616 thousand euros (previous year: 635 thousand euros). This includes a share-based payment in the amount of 103 thousand euros (previous year: 79 thousand euros). At the time of issue, share-based payments granted to management had a fair value of 420 thousand euros (previous year: 360 thousand euros).

For further information please refer to section 13.4.

The advisory board of the Company is composed as follows:

- Dr. Ewald Walgenbach (Chairman), Managing Director of BC Partners
- Michael Wunderlich (Vice-Chairman), Partner of BC Partners
- Maximilian Kastka, Principal of BC Partners
- Christian Mogge, Principal of BC Partners

9 Related party disclosures (Continued)

- Dr. med. Fred Buchwald, Laboratory Medicine Specialist (*Facharzt für Laboratoriumsmedizin*)
- Miroslav Herden, Kaufmann (German business management degree)
- Rolf Norbert Schöngen, Laboratory Medicine Specialist (*Facharzt für Laboratoriumsmedizin*)

Advisory board members received no compensation in the year under review.

SYNLAB HOLDING, Augsburg, Germany, is the top-level controlling parent company. This company prepares the consolidated financial statements for the smallest and largest consolidated groups. Furthermore, SL Lux SCA, Luxembourg, holds a 72.27% share in the SYNLAB HOLDING registered capital, and thus controls the company. All shares of SL Lux SCA, Luxembourg (100.00%) are held by funds managed by BC Partners.

Trade receivables do not bear interest and are usually due within between 30 to 120 days. All payments to or from related parties as well as sales to or purchases from related parties are made on an arm's length basis.

There are no guarantees for receivables from or payables to related parties. Interest on other receivables from related companies is charged at normal market rates.

10 Contingent liabilities and other financial obligations

10.1 Obligations relating to operating leases where the Group is the lessee

The Group has concluded rental and lease agreements as lessee primarily for company buildings, fixtures, fittings, and office equipment, data processing equipment and vehicles. The lease agreements have an average term of between three and five years.

At the reporting date, there were the following future minimum lease payment obligations arising from contractual operating leases:

	December 31, 2013				
	Fixtures, fittings, and office equipment	Analysis equipment	Leases on buildings	Other	Total
	KEUR	KEUR	KEUR	KEUR	KEUR
Up to 1 year	583	803	19,955	2,774	**24,115**

Up to 1 year	3,409	7,743	13,262	830	**25,244**
1 - 5 years	1,902	165	37,215	1,024	**40,306**
More than 5 years	0	123	17,428	0	**17,551**
Total	**5,311**	**8,031**	**67,905**	**1,854**	**83,101**
Operating lease payments during the fiscal year	4,243	20,458	19,103	962	**44,766**

The Group has concluded lease agreements for technical machines and equipment. The average term of these lease agreements is between three and five years. The lease agreements do not include an extension option beyond the maximum duration of five years. The lease agreements place no restrictions on the Group as lessee. Lease payments for analysis equipment are mostly invoiced according to the variable use of the leased objects.

10.2 Obligations arising from financial leases

The Group has concluded financial leases for various technical equipment and fixtures, fittings, and office equipment. These leases provide for lease extensions at the then prevailing market conditions. Options for extension may only be exercised by the corresponding contracting company. Future minimum lease payments from financial leases may be restated at present value as follows:

	December 31, 2013		December 31, 2012	
	Minimum lease payments	Present value of minimum lease payments	Minimum lease payments	Present value of minimum lease payments
	KEUR	KEUR	KEUR	KEUR
Up to 1 year	8,214	7,478	7,770	6,828
1 - 5 years	16,235	15,366	15,330	14,539
More than 5 years	817	810	2,354	1,901
Total minimum lease payments	**25,266**	**23,654**	**25,454**	**23,268**
Less interest portion	(1,612)		(2,186)	
Total	23,654		**23,268**	
Lease payments for the year		9,693		7,455

10.3 Contingent liabilities

Total contingent liabilities as of December 31, 2013 amounted to 140 thousand euros. These principally include the UniCredit contract performance guarantee at synlab in Poland in the amount of 45 thousand euros, asset retirement obligations and planning expenses at Steinlach-Klinik GmbH in the amount of 35 thousand euros and a fixed amount for damages at SYNLAB HOLDING in the amount of 35 thousand euros. There were no significant contingent liabilities in the previous year.

11 Capital management

The overriding goal of Group capital management is to ensure that the Group is and will be able to pay its debts and remains financially healthy. In addition to EBIT and EBITDA, monitoring changes in net working capital and cash flow are important in monitoring, managing and optimizing the existing finance structure. Net debt includes interest-bearing loans and borrowings less cash and cash equivalents.

	2013	2012
	KEUR	KEUR
Interest-bearing loans and borrowings	508,250	411,475
Cash and cash equivalents	(64,579)	(43,787)
Net debt	**443,671**	**367,688**
Equity attributable to equity holders of the parent	**215,030**	**234,375**(*)
Equity and net debt	**658,701**	**602,063**(*)

(*) Previous year's figure restated as per IAS 8.

Under the financing agreement of January 24, 2012, the Company is obligated to observe certain financial covenants. Non-compliance with these requirements could have the consequence that the lender terminates financing and demands immediate repayment of the respective value of the loan. The covenants contained in the loan agreement involve maintaining a certain net debt-to-EBITDA ratio, EBITDA-to-interest ratio, and cash flow-to-interest-and-principal ratio. These ratios allow calculation of the relative burden on the Company posed by debt/interest payments. The existing financing agreement was amended in March and December 2013, and the restrictions and covenants originally agreed were expanded substantially.

12 Segment reporting

For management purposes, the Group is organized into nine separately managed and monitored segments. Reconciliations include the central functions, financing and taxes, and consolidation. The Group's laboratory business is subject to various opportunity and risk profiles as well as varying government regulations in the countries where the Group operates; thus the internal reporting structure is organized according to geographic segmentation of the Group.

SYNLAB HOLDING management has the highest discretionary authority. EBITDA of the business entities is monitored separately by management in order to make decisions regarding distribution of resources and determine the profitability of the entities. EBITDA figures are used to measure segment performance and is reflected in the consolidated financial statements. Group financing (including finance costs and income) and income taxes are managed at Group level, however, rather than at the individual business segment level.

The Company has introduced structural changes to its internal control mechanisms vis-à-vis the previous year's segment reporting. Operating activities in Hungary were separated from the Rest-of-the-World segment and a new Hungary segment was formed. Another two segments, Belgium and Baltic States, were introduced as a result of the acquisitions in Belgium end of 2012 and of the companies in Estonia, Finland and Lithuania in 2013.

Accounting principles used in deriving segment information conform with the accounting rules used in the consolidated financial statements. Transfer prices between business segments are determined based on normal market conditions for transactions with third parties.

Because Group assets are of minor importance for management of the Company, Company management does not monitor these separately by business segment.

Description of segments subject to reporting requirements

The SYNLAB GROUP portfolio comprises activities in 20 countries, distinguishing only the following segments according to the opportunity and risk profile:

Germany

In Germany the SYNLAB GROUP's activities are concentrated mainly in southern and western Germany. The SYNLAB GROUP operates four large central laboratories in these areas, as well as numerous small local laboratories in order to ensure regional accessibility to its referring physicians. In addition, the SYNLAB GROUP also operates a small hospital as well as hospital laboratories that were taken over under outsourcing contracts.

Switzerland

Similar to operations in Germany, the SYNLAB GROUP provides laboratory services in Switzerland primarily for samples sent in by private physicians and for hospital laboratories as part of outsourcing projects. The SYNLAB GROUP is among the big six providers in the Swiss market which together comprise approximately 57% of the accessible market.

Italy

In Italy, the SYNLAB GROUP is mainly represented in the industrial north. Due to government regulation, only about a third of the Italian laboratory market is accessible to private laboratory service providers. In addition, the market is strongly influenced by regional authorities which determine the maximum number of tests private providers may conduct.

Belgium

The SYNLAB GROUP concentrates particularly on the human medicine sector in Belgium, but also offers laboratory services for the veterinary sector.

12 Segment reporting (Continued)

Czech Republic

Activities of the SYNLAB GROUP in the Czech Republic are basically the same as in the markets or segments described above. Any significant differences are attributable to the way the public health sector is organized, to market concentration, and the dominant market position of the Group's activities in the Czech market. The Group is one of the three largest market participants in the Czech Republic.

Austria

Due to government regulations, only a small part of the market in Austria is accessible to laboratory service providers which are corporations. The SYNLAB GROUP is the leading participant in this limited market, particularly in Vienna and the surrounding metropolitan area. The activities here are the same is in the segments discussed above.

Slovak Republic

Activities of the SYNLAB GROUP in Slovakia are similar to those in the above-mentioned markets or segments. Substantial differences arise from the particular organization of the public healthcare system. In Slovakia the Group is among the three leading market participants.

Hungary

In addition to laboratory services for privately insured patients, the SYNLAB GROUP also offers environmental and forensic analytical services in Hungary, and is the only service provider in the forensic sector.

Baltic States

This segment comprises the SYNLAB GROUP laboratories in Estonia, Finland and Lithuania. In Estonia and Finland, laboratory services for private physicians are the main business, whereas in Lithuania most business is with privately insured patients. In Estonia, the SYNLAB GROUP is the market leader.

Rest of World

The segment ROW comprises Group activities in Slovenia, Macedonia, Croatia, Romania, Poland, the Republic of Belarus, the United Kingdom, Turkey and the United Arab Emirates which do not fulfill the quantitative thresholds for reportable segments, and thus are summarized in a separate category.

Reconciliations

Reconciliations include all Group central functions such as management, legal, Group finances, internal audit and strategic procurement which cannot be attributed to individual operating segments. Furthermore, reconciliations include finance income and expenses and taxes because they are centrally managed by the Group, and therefore cannot be attributed to individual business segments, as well as the consolidation transactions to be conducted among the individual segments.

12 Segment reporting (Continued)

Income from transactions with other segments is eliminated for consolidation purposes.

13 Supplementary information pursuant to the German Commercial Code (HGB)

13.1 Company management

In the year under review the Company management members were:

Dr. med. Bartl Wimmer, Specialist Doctor for Laboratory Medicine (Facharzt für Laboratoriumsmedizin), CEO/ Managing Director, Berchtesgaden, Germany

Markus Stötter, Diplom-Kaufmann (German business administration degree), CFO/Managing Director), Augsburg, Germany

13.2 Shareholdings and exemptions

The information regarding shareholdings required pursuant to sec. 313 (2) of German Commercial Code is presented in the list of shareholdings.

13 Supplementary information pursuant to the German Commercial Code (HGB) (Continued)

Companies for which exemptions were claimed pursuant to sec. 264 (3) of the German Commercial Code (HGB), sec. 291 of the German Commercial Code, sec. 245 (1) of the Austrian Commercial Code (UGB), sec. 62 (2) of vyhláška č. 500/2002 Sb.(Slovenian regulation), art. 27, § 3, § 4, of the Decreto legislativo 9 aprile 1991 n. 127 (Italian regulation), art. 663f OR (Swiss code), and Accounting Act Sec. 29 (1), 2)., RT I 2002, 102, 600, passed 11/20/2002 were marked correspondingly in the list of shareholdings.

13.3 Employees

On average, the number of employees in the Group was as follows:

	2013 Employees	2012 Employees
Administration	2,246	1,866
Operations	5,299	4,983
	7,545	**6,849**
Domestic	4,218	4,247
Foreign	3,327	2,602
	7,545	**6,849**

The increased number of employees is largely attributable to company acquisitions in the Baltic States.

13.4 Information on management compensation

The Company reserves the right per sec. 286 (4) of German Commercial Code to not disclose total compensation received by management.

13.5 Audit fees

The following fees were paid for the services of Ernst & Young GmbH Wirtschaftsprüfungsgesellschaft, Eschborn, Germany:

	2013 KEUR	2012 KEUR
Audit	799	768
Other auditing services	42	15
Tax advice	128	184
Other services	883	0
Total	**1,852**	**967**

14 Events after the reporting period

14.1 Acquisitions in 2014

The following significant acquisitions took place after the reporting date and before release of these financial statements:

Name of acquired company	Date of acquisition (effective date)	Revenue contribution* 2014	EBITDA contribution* 2014	Purchase price	Shareholding
		(KEUR)	(KEUR)	(KEUR)	
Labor Dr. Nae Silvia	01/01/2014	411	163	fixed: 462 plus max. variable component: 20	asset deal
INTERLAB GmbH central lab services-worldwide	02/01/2014	6,250	1,756	fixed: 11,500, variable: 2,000	100%
GUT	04/01/2014	1,037	133	fixed: 235 plus max. variable component: 40	asset deal
Pliambulatorio Dante Srl & Centro Diagnostico Riminese S.r.l.	04/02/2014	517	127	fixed: 400	100%

* The revenue and EBITDA contributions for 2014 reflect current corporate planning.

All acquisitions were aimed at strengthening the Group's presence in a particular region or area of specialization.

In addition, synlab Services GmbH, and therefore indirectly SYNLAB HOLDING, acquired the remaining 49% shareholding in the company Synlab ILK Referans saglik hizmetleri sanayi ve ticaret anonim sirketi as of February 20, 2014. Due to the controlling interest in the company existing prior to that date, the Group reported the acquired company's revenues in the amount of 3,177 thousand euros (previous year: 2,479 thousand euros), and its net income for the year in the amount of 263 thousand euros (previous year: 351 thousand euros) in the Group's income statement as in the years before. The purchase price for the acquired remaining shareholding consisted of a fixed portion of 327 thousand euros and a variable portion of 827 thousand euros.

Detailed information required by IFRS 3, i.e. items IFRS 3 B64e, f, h, i, j, and k, regarding business combinations taking place after the end of the reporting period, cannot be provided for the aforementioned business combinations at present because at the time the financial statements were released for publication the various sellers were unable to provide final financial statement figures.

14.2 Other events after the reporting period

Pursuant to an agreement concluded on January 31, 2014, SYNLAB HOLDING and several subsidiaries substantially expanded the existing SYNLAB GROUP financing agreement with respect to the credit facilities, the restrictions originally agreed for the SYNLAB GROUP and the covenants to be observed. As a result of this change, an amount of 55,284 thousand euros from the amortizing tranche A1 was transferred to a tranche A5 falling due at final maturity. This change in the existing agreement does not involve any exchange of debt instruments with substantially differing contractual terms, rather simply a modification of existing contractual terms. Accordingly, the modification does not require different treatment of the transaction costs incurred in January 2012 in connection with conclusion of the financing agreement.

In a second step, SYNLAB HOLDING and various subsidiaries concluded an agreement on March 28, 2014 resulting in the transfer of another portion of the to date uncommitted acquisition facility (30,000 thousand euros), as well as the remaining portion of the uncommitted revolving credit facility (10,000 thousand euros) to respective committed facilities. These facilities may now be utilized directly. In

14 Events after the reporting period (Continued)

this respect, the Company entered into business relationships with two new banks which joined the existing consortium under the provisions of the senior facilities agreement entered into in January 2014.

Augsburg, April 14, 2014

Statutory auditors' review report on the "Interim condensed consolidated financial statements"

For the period January 1, 2015 to March 31, 2015

This is a free translation into English of the statutory auditors' review report on the financial information for the period January, 1st, 2015 to March 31, 2015 issued in French and is provided solely for the convenience of English-speaking users. This report includes information relating to the specific verification of information given in the Group's management report. This report should be read in conjunction with, and construed in accordance with, French law and professional standards applicable in France.

To the Chairman of the Board of Directors,

As statutory auditors' of Labco SA and at your request, we have reviewed the accompanying interim condensed consolidated financial statements of Labco SA for the period January 1, 2015 to March 31, 2015.

These interim condensed consolidated financial statements were prepared under the responsibility of the Board of Directors. Our role is to express a conclusion on these interim condensed consolidated financial statements based on our review.

We conducted our review in accordance with professional standards applicable in France. A review primarily consists of making inquiries of persons responsible for financial and accounting matters, and applying analytical and other review procedures. Those procedures are substantially less in scope than an audit conducted in accordance with professional standards applicable in France and consequently the assurance obtained that the interim condensed consolidated financial statements, taken as a whole, are free of material misstatement is moderate and less than that obtained by an audit.

Based on our review, nothing has come to our attention that causes us to believe that the interim condensed consolidated financial statements are not prepared, in all material respects, in accordance with IAS 34—IFRS as adopted by the European Union applicable to interim financial information.

Without qualifying our conclusion, we draw your attention to the matter set out in note 2 "significant accounting policies" to the interim condensed consolidated financial statements regarding the implementation of the new standard and interpretation IFRIC 21 applied from January 1, 2015.

GENERAL INFORMATION

Labco Group primarily is involved in clinical diagnostics testing and screening services mainly in France, Spain, Portugal, Italy, Belgium, the United Kingdom and Switzerland and we also provide clinical laboratory testing services to customers in Eastern Europe, Latin America, the Middle East and North Africa. It employs approximately 6 000 people.

The parent company of Labco Group is Labco SA (the "Company"), which is a limited liability company incorporated and domiciled in France. The address of the Company's registered office is 60 - 62, rue de Hauteville, 75010, Paris, France.

The unaudited interim condensed consolidated financial statements of the Company as at and for the period ended March 31, 2015 comprise the Company and its subsidiaries (together referred to as the "Group" and individually as "Group entities") and the Group's interest in associates and jointly controlled entities. They were authorised for issue by the Board of Directors on May, 26 2015.

All the amounts in the present report are in thousands of Euros (K€) unless otherwise stated.

Labco Group has applied IFRIC21—*Levies* as of January 1st, 2015 with impacts recognized retrospectively in accordance with IAS 8. As stated in the 2014 audited consolidated financial statements, such application does not have a significant impact and is limited to a timing impact between quarters in the recognition of certain levies. For a better comparability, and given the final impacts are limited to French levies called C3S, Labco decided to present only the impact on consolidated statement of income and consolidated statement of cash flows for the comparative period of March 31, 2014. Indeed the reduction in EBITDA is offset by an increase in other current liabilities, IFRIC 21 has no impact on cash flow from operating activities.

Labco Group has applied IFRIC21—*Levies* as of January 1st, 2015 with impacts recognized retrospectively in accordance with IAS 8. As stated in the 2014 audited consolidated financial statements, such application does not have a significant impact and is limited to a timing impact between quarters in the recognition of certain levies. For a better comparability, and given the final impacts are limited to French levies called C3S, Labco decided to present only the impact on consolidated statement of income and consolidated statement of cash flows for the comparative period of March 31, 2014. Indeed the reduction in EBITDA is offset by an increase in other current liabilities, IFRIC 21 has no impact on cash flow from operating activities.

The accompanying notes are an integral part of these consolidated financial statements.

SELECTED EXPLANATORY NOTES

Note 1 Basis of preparation

The unaudited interim condensed consolidated financial statements of Labco are presented for the three-months period ended March 31, 2015 and have been prepared in accordance with IAS 34 Interim Financial Reporting.

These unaudited interim condensed consolidated financial statements do not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Group's annual consolidated financial statements as at 31 December 2014.

Details specific to the preparation of the interim condensed consolidated financial statements

1.1 Corporate income tax

The income tax charge for the period is calculated based on the estimated effective tax rate for the full year, for each tax entity or sub-group.

1.2 Employee benefits and shared based payment

Post employment benefits provision in France have not been updated for the preparation of the consolidated interim financial statements but the projected service costs and interests estimated by actuarial expert during year-end 2014 and 2013 closing process have been expensed in first quarter 2015 and first quarter 2014 respectively.

For the compensation costs related to IFRS 2 shared based payment, a prorata basis of the net charge calculated for full-year 2014 and 2015 has been included depending on when the shared based payment scheme has been implemented.

1.3 Seasonality of operations

Revenue, recurring operating income and all operating indicators are subject to seasonal fluctuations due to the Summer time vacation periods and the related impact on activity in certain laboratories as well as to the impact of severe weather conditions, if any, during winter period. The extent of this seasonal impact varies according to the countries in which we operate. Furthermore, the SDN group is subject to seasonal effect as a consequence of the way Campania ASL is managing the budget for the year. Indeed since the SDN group's laboratories are accredited, most of their activities are subject to applicable price rules and to the budget allocated for the year by the Campania ASL. Once the annual budget has been used up, which generally occurs during the fourth quarter of the year, ASL no longer reimburses or reimburses only partially the diagnostic tests performed by SDN, irrespective of whether they involve nuclear medicine, radiology or clinical testing. Since each activity has its own separate budget, the date on which the annual budget is used up varies from one business to another. As a result, the SDN group's revenue is subject to seasonal variation (a larger proportion of revenue is generated in the first half of the year) as is its operating performance, particularly EBITDA. The Group has estimated that this seasonal variation leads the SDN group to generate between 65% and 75% of its revenue and between 75% and 85% of its EBITDA in the first 7 months of the financial year.

Consequently, the interim results for the 3 months ended March 31, 2015 are not necessarily representative of those that may be expected for full-year 2015.

1.4 Use of estimate and judgments

The preparation of the interim condensed consolidated financial statements, in conformity with IFRS, requires management to make judgments and estimates and use assumptions that affect the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the interim condensed consolidated financial statements and the reported amounts of revenue and expenses. The significant areas of estimates, described in note 2.5 of the December 31, 2014 consolidated financial statements, concerned:

- Leased assets
- Subsidiaries and consolidation method
- Goodwill

Note 1 Basis of preparation (Continued)

- Revenue
- Non-financial assets
- Derivative financial instruments, including hedge accounting

The Group's management makes these estimates and assessments continuously on the basis of its past experience and various other factors considered to be reasonable.

Note 2 Significant accounting policies

The accounting policies adopted in the preparation of the interim condensed consolidated financial statements are consistent with those applied in preparing the Group's annual consolidated financial statements for the year ended December 31, 2014, except for the adoption of the new Standards and Interpretations as of 1st January 2015 issued by the IASB/IFRIC and not already early implemented by Labco. The new IFRS effective from January 1, 2015, as described in Note 2.2.2 "New standards, amendments and interpretations not applicable as of January 1. 2014" to the audited Consolidated Financial Statements of Labco for the year ended December 31, 2014, which were applicable to the first quarter of 2015, had no material impact on Labco Group interim condensed consolidated financial statements.

Labco Group has applied IFRIC21—*Levies* as of January 1st, 2015 with impacts recognized retrospectively in accordance with IAS 8. As stated in the 2014 audited consolidated financial statements, such application does not have a significant impact and is limited to a timing impact between quarters in the recognition of certain levies. For a better comparability, and given the final impacts are limited to French levies called C3S, Labco decided to present only the impact on consolidated statement of income and consolidated statement of cash flows for the comparative period of March 31, 2014. Indeed the reduction in EBITDA is offset by an increase in other current liabilities, IFRIC 21 has no impact on cash flow from operating activities.

The impact represents a gross amount (excluding deferred tax effect of 132 K€) of 395 K€ additional levies expenses recorded in other operating expenses for the period ended March 31, 2014. The impact on equity as at December 31, 2014 restated for IFRIC 21 first time implementation amounts to 259 K€.

Note 4 Significant events

4.1 Acquisitions, business set-up, disposals and mergers

4.1.1 Acquisitions and business set-up

Main acquisitions and business set-up during the reporting period are shown below by country.

Acquisition date	Country	Entities	
17.02.2015	France	Laboratoire Defasque	Commercial Goodwill
12.02.2015	Belgium	CPG Laboratoire	Commercial Goodwill
09.02.2015	Belgium	CPG Laboratorium	Set-up

Labco sets up a new company in Belgium called CPG Laboratorium which executed then the acquisition of the commercial goodwill of CPG Laboratoire, a routine laboratory in the Brussel area.

4.1.2 Mergers and legal reorganization

Labco group has performed the following merger during the first quarter period ended March 31, 2015:

Country	Mergers
Italy	Visconteo has been merged with CAM

On top of that, the Supply Chain Agreement in relation with the outsourcing contracts with Taunton and Somerset NHS Foundation Trust and Yeovil District Hospital NHS Foundation Trust signed in 2012 was amended on March 2015 and restructured into two separate contracts, one regarding site management and material (related to the provision of material, reagents, consumables and support functions) and the other relating to provision of staff (related to the provision of technical team) between iPP and Southwest Pathology Services LLP. This amendment puts the commercial organization in line with the one put in place for the outsourcing contracts signed in 2014 with Basildon and Thurrock University Hospitals NHS Foundation Trust and Southend University Hospital NHS Foundation Trust.

Note 4 Significant events (Continued)

4.2 Additional 8,5% Senior Secured Notes due 2018 issued for an aggregate nominal of 100 M€

Labco S.A. issued on February 11, 2015 €100 million in aggregate principal amount of its 8.5% Senior Secured Notes due 2018, which constitutes an add-on of, and form a single class with, Labco's existing 600M€ 8.5% Senior Secured Notes due 2018. The Additional Senior Secured Notes will mature on January 15, 2018. The gross proceeds of the issuance amounts to 103,75 M€, ie meaning a yield of 7.19% and were used to repay the outstanding amounts borrowed under Labco's revolving credit facility, pay the costs, fees and expenses in relation to the issuance transaction and for general corporate purposes. As a consequence Labco revolving credit facility amounting to 128,25 M€ has been reimbursed for an amount of 100 M€ with the proceed of the additional Notes issuance (RCF was drawn for an amount of 108 M€ as at additional Notes issuance date, ie February 11, 2015).

Fees directly linked to the debt issuance or linked to the strategic refinancing project amount to 3,1 M€ (excluding VAT) and following the preliminary analysis are capitalized as debt issuance costs. Capitalized debt issuance costs have also been netted with issuance premium amounting to 3,75 M€ and the net balance of capitalized debt issuance costs has to be amortized over the bond maturity using the effective interest rate method.

4.3 Capital evolution

The holders of most of the warrants Manager (all BSA 2005-1-1, BSA 2005-1-2, BSA 2006-1-1, BSA 2007-1-1 and BSA 2007-1-2 except 50 200 BSA (2005-1-2 and BSA 2007-1-2 exercised early April) have exercised their warrants during first quarter 2015.

Consequently capital increases have been registered corresponding to the issuance of 1 864 633 new shares at par value for a subscription price of €1,00 or €2,50 by the exercise of BSA 2005-1-1, BSA 2005-1-2, BSA 2006-1-1, BSA 2007-1-1 and BSA 2007-1-2 by their beneficiaries and after applying the protection right against the dilutive effect of the capital increase performed at par on March 12, 2012.

Following those operations (including the one performed subsequently early April), there is no remaining BSA Managers except the BSA 2008-1-1 and BSA 2010-1-1.

Furthermore, a distribution of part of the specific reserve for the warrants holders has been implemented for an amount of 597 K€, given beneficiaries having exercised their warrants as described above are entitled to €0,32 per share.

4.4 Strategic project

Labco announced its intention to go public by the end of June 2015 depending on market conditions and filed with the AMF (French Stock Exchange regulator) a document de base on April 7, 2015 available on Labco website. As a consequence, the Group, mainly Labco SA, has incurred in Q1 2015 non-recurring costs for an amount of 1,3 M€ related to external advisors, lawyers and auditors fees for the preparation of the IPO project. Most of those costs may qualify as equity issuance costs and would be capitalised and deducted from equity premium. As a consequence, those costs have temporarily been capitalised as deferred charges as at March 31, 2015 and will be recorded after analysis and the initial public offering in deduction of equity premium for the part directly related to the expected capital increase of 320 millions euros.

Note 5 Acquisitions of subsidiaries

No share deals have been performed during the reporting period. Labco made acquisitions of asset that generated an increase of goodwill amounting to 2,3 M€.

All small to medium size acquired companies earn revenues from medical analyses. Through these acquisitions the Group expects to reduce costs through economies of scale, and the goodwill thus represents mainly the fair value of the expected synergies resulting from the acquisition.

All amounts are provisional and subject to modification in the twelve months period following the acquisition date.

Note 6 Geographical information

The information by geographical segment presented below corresponds to the information used by the Group General management to allocate resources to the various segments and to assess each segment's performance. It is extracted from the Group's consolidated reporting system and prepared in accordance with the same accounting rules as in the consolidated financial statements and set out in the notes thereto. The policies applied to determine the operating segments presented are set out in Note 3.18. of the audited Consolidated Financial Statements of Labco for the year ended December 31, 2014.

SEGMENT REPORTING (€ 000)	Southern Europe	Northern Europe	Total Group
Total revenue	**68 114**	**112 114**	**180 227**
EBITDA	**15 946**	**22 362**	**38 308**
Results from operating activities after non-recurring activities	**12 620**	**17 898**	**30 518**
Net finance costs			**(16 145)**
Income tax expenses			**(8 076)**
Share of profit of associates			**0**
Net profit of the period			**6 297**
Including Depreciation, impairment losses and amortization, provisions and reversals	*(2 833)*	*(3 878)*	*(6 711)*
Capital expenditures	**3 416**	**4 598**	**8 014**

Capital expenditures correspond to gross non-current tangible and intangible asset purchases, including cash timing difference and excluding purchases of assets under finance lease.

The detail of revenue by country is as follows for the first quarters ended 31 March 2015 and 31 March 2014:

€ 000	Three months ended March 31, 2015	%	2014	%
		Unaudited		
Northern Europe	**112 114**	**62%**	**101 071**	**67%**
France	**89 634**	**50%**	88 582	59%
Belgium	**8 604**	**5%**	7 435	5%
United Kingdom	**13 285**	**7%**	4 604	3%
Switzerland	**591**	**0%**	450	0%
Southern Europe	**68 114**	**38%**	**49 948**	**33%**
Iberian Peninsula	**41 590**	**23%**	39 998	26%
Italy	**26 523**	**15%**	9 950	7%
Total revenue	**180 227**	**100%**	**151 019**	**100%**

Iberian Peninsula corresponds to the aggregate of Portugal and Spain.

The contribution of SDN group for the first quarter ended 31 March 2015 amounts to 15,8 M€.

Note 7 Non recurring income and expenses

€ 000	Three months ended March 31, 2015	2014
Restructuring expenses and provisions for major litigations	**(6 936)**	(911)
Perimeter effect	**(12)**	0
Impairment of goodwill	**0**	0
Impairment and reversal of impairment on other non-operational assets and liabilities	**5 853**	265
Gains/(losses) on sale of assets	**16**	65
Non-recurring income and expenses	**(1 079)**	**(582)**

Note 7 Non recurring income and expenses (Continued)

Restructuring expenses, provisions for major litigations, impairment and reversal of impairment on other non-operational assets and liabilities mainly include in the first three months 2015 following expenses or provisions:

- 5,6 M€ of non-recurring expenses incurred in relation with the repurchase of rights to priority dividends of certain French biologists executed early 2015 but already accrued as at December 31, 2014 when the commitment to repurchase was taken. The corresponding use of restructuring provision has been recorded in the line Impairment and reversal of impairment on other non-operational assets and liabilities. Refer to the Note 5.3 and 3.1.1 of the audited Consolidated Financial Statements of Labco for the year ended December 31, 2014, for a description of such operations and the accounting treatment as a non-recurring restructuring expense.
- 0,3 M€ of restructuring expense in Spain in relation with the first actions implemented in the context of the Barcelona concentration project. The corresponding use of restructuring provisions has been recorded in the line Impairment and reversal of impairment on other non-operational assets and liabilities.
- 0,8 M€ of non-recurring costs expensed in relation to strategic projects, mainly the preparation work for a refinancing operation.

Restructuring expenses, provisions for major litigations, impairment and reversal of impairment on other non-operational assets and liabilities mainly include in the first three months 2014 following expenses or provisions:

- 0,3 M€ of restructuring expense in Spain in relation with the remaining actions of the 2013 restructuring plan implemented in the context of contract renegotiation with a major client. The corresponding use of restructuring provisions has been recorded in the line Impairment and reversal of impairment on other non-operational assets and liabilities.
- 0,4 M€ of non-recurring costs expensed mainly in relation to strategic projects.

Note 8 Net finance costs

	Three months ended March 31,	
	2015	**2014**
Financial income	**363**	309
Interest Expenses on Financial liabilities measured at amortized costs	**(15 817)**	(14 817)
Other interest expenses	**(444)**	(395)
Derivatives for hedging	**0**	0
Derivatives at fair value through P&L	**(19)**	(74)
Subtotal Cost of net debt	**(15 918)**	**(14 977)**
Other financial expenses	**(227)**	(162)
Net Finance Costs	**(16 145)**	**(15 139)**

As a consequence of the issuance on February 11, 2015 of additional 8,5% Senior Secured Notes due 2018 for an aggregate nominal of 100 M€, the financial charges have increased proportionally.

The interest expenses correspond now mainly to the 500 M€ Senior Secured Bonds at an effective interest rate of 9%, the first additional 100 M€ Senior Secured Bonds at an effective interest rate of 8,6%, the second additional 100 M€ Senior Secured Bonds at an effective interest rate of 8.44% and the commitments fees and amortization of amended RCF debt issuance costs for the undrawn part of the Revolving Credit Facility as at March 31, 2015.

Note 9 Income tax expenses

€ 000	Three months ended March 31, 2015	2014 Restated IFRIC 21	2014
Current income tax expenses	**(7 280)**	**(5 687)**	**(5 687)**
CVAE Tax in France	**(910)**	(882)	(882)
Deferred tax expenses	**115**	**(108)**	**(240)**
Total income tax expenses	**(8 076)**	**(6 678)**	**(6 810)**

The deferred tax income of 115 K€ booked in first three months 2015 was mainly the result of deferred tax income on temporary differences.

The Group has operations in various tax jurisdictions which have different tax laws and rates. Consequently, the effective tax rate on consolidated income may vary from year to year, according to the source of earnings. The effective tax rate on consolidated income is also impacted by several factors described in the Note 12 *Income tax expenses* of the audited Consolidated Financial Statements of Labco for the year ended December 31, 2014.

The income tax expense in Italy has been computed as prescribed by IAS12 for interim period by taking into account the expected positive effect on the effective tax rate of the main SDN group entities joining the Italian existing tax group managed by Labco Italia. Indeed the SDN entities will request their accession to the tax group only during Summer according to Italian tax rules but with retroactive effect as at January 1st, 2015.

Note 10 Goodwill

The aggregate carrying amounts of goodwill allocated to each group of unit are as follows:

€ 000	Total	France	Italy	Iberian Peninsula	Belgium
Goodwill carrying amount at 31 December 2013 (audited)	**581 483**	**367 748**	**30 606**	**165 364**	**17 764**
Goodwill carrying amount at 31 December 2014 (audited)	**702 415**	**386 456**	**128 619**	**167 979**	**19 361**
Goodwill carrying amount at 31 March 2015 (unaudited)	**704 755**	**386 785**	**128 619**	**168 011**	**21 341**
Change in goodwill carrying amount 31.12.2014 - 31.03.2015	**2 340**	**329**	**0**	**32**	**1 980**

As described in Note 13 *Goodwill* of the audited Consolidated Financial Statements of Labco for the year ended December 31, 2014, the annual impairment analysis performed at year-end 2014 shows that there was no impairment to record. No indication of impairment has been identified during the first three months 2015. Therefore, no update of impairment analysis has been performed, it will be updated during annual process implemented at year-end.

Goodwill computed for the acquisitions performed during the first three months ended 31 March 2015 are provisional and subject to modification in the twelve months period following the acquisition date.

For acquisitions performed during 2014, at the end of the 1 year window period as at March 31, 2015, goodwill have been confirmed without significant changes.

Note 11 Trade receivables and other current assets

€ 000	31.03.2015 (unaudited)	31.12.2014 (audited)

Cash and cash equivalents	**83 890**	**74 120**	**125 539**
Bank overdrafts	**(138)**	(79)	(422)
Cash and cash equivalents in the statement of cash flows	**83 752**	**74 041**	**125 117**

Note 13 Capital and reserves attributable to owners of the parent

Ordinary shares

As at March 31, 2015 the authorized share capital consisted of 70 600 820 shares. The shares have a par value of one euro (1 €), all shares being fully paid. The shares are denominated into five types, the holders of shares are entitled to the same rights to receive dividends, and are entitled to one vote per share at general meetings of shareholders of the Company. The share capital of Labco is divided into five types of shares, each held by a different category of shareholder:

- certain laboratory doctors from whom we acquired clinical laboratories (the "A Shareholders") holding approximately 16,65% of share capital ;
- our shareholders known as "founders" (the "B Shareholders") holding approximately 17,85% of share capital ;
- financial investors (the "C Shareholders") holding approximately 40,60% of share capital ;
- other shareholders (the "D Shareholders" and the "Ordinary Shareholders") such as our management, family members and estate planning entities of the laboratory doctors who are also our A Shareholders holding approximately 23,90% (D shares) and 1,09% (ordinary shares) of share capital.

Note 13 Capital and reserves attributable to owners of the parent (Continued)

Issuance of ordinary shares during the period

In Q1 2015, capital increases have been registered with the issuance of 1 864 633 new shares at par value for a subscription price of €1,00 or €2,50 by the exercise of BSA 2005-1-1, BSA 2005-1-2, BSA 2006-1-1, BSA 2007-1-1 and BSA 2007-1-2 by their beneficiaries and after applying the protection right against the dilutive effect of the capital increase performed at par on March 12, 2012. As a consequence, an increase of the share capital and additional paid in capital was recorded for 2 131 K€.

As a consequence of the issuance of new shares, a distribution of part of the specific reserve for the warrants holders was made for an amount of 597 K€, given beneficiaries having exercised their warrants as described above are entitled to €0,32 per share.

Reserve for own shares

At 31 December 2014, the Group held 646 K€ of the Company's shares, corresponding to 80 709 shares. (80 707 A shares and 2 D shares).

During Q1 2015, the Group repurchased at par value the 18 440 shares owned by a former manager having left the Group. As a consequence, as at March 31, 2015 the Group held 664 K€ of the Company's shares, corresponding to 99 149 shares (80 707 A shares and 18 442 D shares)

Equity Warrant schemes

Labco has issued warrants to financial investors and key management personnel of our Group. Refer to Note 22 *Capital and reserves attributable to owners of the parent* of the audited Consolidated Financial Statements of Labco for the year ended December 31, 2014 for details.

Warrants Issued to Financial Investors

No financial investors' warrants were exercised during first three months 2015.

An agreement has been signed on January 21, 2015 according to which Labco SA is committed irrevocably to acquire, at the date of settlement and delivery of the Company's shares issued or sold as part of an initial public offering of Labco SA, all the warrants BSA 10x (one of the category of warrants attached to the ABSA C1, ABSA C2 and BEABSA) from their holders at a total price of 6,6 M€, with a view to the immediate cancelation of the BSA10x upon their purchase.

Furthermore, holders of all of the BSA 12x (another category of warrants attached to the ABSA C1 and BEABSA) granting rights to subscribe 411 454 new shares at a €1,00 subscription price have irrevocably undertaken to Labco SA to exercise these 12x Warrants at the date of the first listing of the shares of the Company at the latest, subject to the non-retroactive condition of the first listing of the shares sold or issued in connection with the initial public offering of the Company.

Warrants Issued to Mezzanine Lenders

No mezzanine lenders' warrants were exercised during first three months 2015.

An agreement has been signed on January 21, 2015 according to which Labco SA is committed irrevocably to acquire, at the date of settlement and delivery of the Company's shares issued or sold as part of an initial public offering of Labco SA, all the warrants BSA Mezzanine C from their holders at a total price of 1,0 M€, with a view to the immediate cancelation of the BSA Mezzanine C upon their purchase.

By couriers addressed to Labco SA on March 26, 2015, the Mezzanine A Warrant holders confirmed to Labco SA that they irrevocably undertake not to exercise these Mezzanine A Warrants and will transfer them to the Company for cancelation at the date of settlement/delivery of the shares sold or issued in connection with the initial public offering of the Company, as long as this happens before July 31, 2015.

Warrants Issued to Management

All warrants BSA 2005-1-1, BSA 2005-1-2, BSA 2006-1-1, BSA 2007-1-1, BSA 2007-1-2 issued to management (except 50 200 BSA exercised subsequently early April) were exercised during first quarter

Note 13 Capital and reserves attributable to owners of the parent (Continued)

2015. As a consequence, after the subsequent exercise of 50 200 BSA, the only remaining warrants issued to Management are the 438 317 BSA 2008-1-1 and the 156 668 BSA 2010-1-1 with following conditions:

Class of Manager Warrants	Number of Manager Warrants granted but not yet exercised	Maximum Number of Shares that may be issued on exercise of Manager Warrants	Subscription price per share
2008-1-1 Warrants	438,317	688,784	For 11 shares subscribed: 7 shares at €8 per share and 4 shares at €1 per share That is, for an average price of approx.. €5,45 per share
2010-1-1 Warrants	156,668	246,193	For 11 shares subscribed: 7 shares at €14,84 per share and 4 shares at €1 per share That is, for an average price of approx.. €9,81 per share
Total	**594,985**	**934,977**	

Please refer to the Note 20 *Events after the reporting* period for a description of the evolution of the remaining warrants.

Provision for litigation

In the normal conduct of its business, the Group is involved in legal suits relating to different matters (personnel, taxes, suppliers) with uncertainties about the amount or timing of the outflows. According to management and as confirmed by legal counsels, the recorded provision is considered to be sufficient to cover probable losses.

The provision recorded by SDN covers the risk to pay a tax for the care of the doctors for which the tax base is currently disputed by some companies in the medical sector in front of the court. SDN has paid every year, for several years, the tax based on only the turnover generated by the doctors whereas an interpretation may result in considering that the tax base should include the full turnover of clinical diagnostic company.

The Group has recorded a non-recurring provision amounting to 650 K€ for covering the risk related to the Dillenburg litigation. Indeed the share purchase agreement for the disposal of the German entities to Sonic dated December 2, 2013 stipulates a liability warranty clause covering notably that Dillenburg litigation (refer to Note 27 *Litigations and contingent liabilities* of the audited Consolidated Financial Statements of Labco for the year ended December 31, 2014).

The Group had recorded a provision for risk amounting to 520 K€ as at December 31, 2011 covering the litigation related to the Fosty entity, former executive administrator of Labco SA at the time it was a private limited liability company (*société par actions simplifiée*). The Fosty entity was claiming, pursuant to the contract signed in 2008, damages in relation to the termination of its function decided by the Group end of 2011. Following the sentence issued by the Paris commercial court in November 2014 and the provisional execution, Labco used the provision and paid the claimed amount. However Labco SA has since appealed against the decision to the Paris Court of Appeal on January 5, 2015.

Provisions for restructuring

The provisions for restructuring correspond mainly to the restructuring in Spain decided of 2014 in the context of the Barcelona reorganization for which a provision of 1,1 M€ has been recorded as at December 31, 2014. The provision was partially used during first quarter 2015 for an amount of 0,3M€ and remaining provision amounts to 0,8 M€ as at March 31, 2015.

They also include the provision for restructuring recorded by iPP to cover the restructuring costs to be incurred during the first years of the implementation of the outsourcing contract. The iPP provision amounted to 0,6 M€ as at December 31, 2014.

The provision amounting to 5,6 M€ recorded during 3rd quarter 2014 as a consequence of the commitment to repurchase the rights to priority dividends of certain French biologists for 2 French SELs have been used early 2015 with the execution of the repurchase. (refer to Note 7 *Non recurring income and expenses*)

Other Provisions

The other provisions correspond mainly to the provision for negative share of investments in associates recorded under equity method.

As described in Note 27 *Litigations and Contingent Liabilities* of the audited Consolidated Financial Statements of Labco for the year ended December 31, 2014, Labco Group is involved in various litigations against the French Ordre des pharmaciens and Ordre des médecins. The Court of Justice of the European Union confirmed in appeal on December 10, 2014 that the Ordre des pharmaciens had restrained competition in the clinical laboratory services market and set up the fine imposed to the Ordre des pharmaciens to €4,75 million.

Aggrieved parties such as the Labco Group are entitled to seek damages before French courts on the basis of the European Commission's findings as confirmed by the Court. Consequently, the Company commenced proceedings in 2013 against the Ordre des pharmaciens seeking damages. Those proceedings are still underway before the Paris Administrative Court.

8,5% Secured Senior Notes covenants

Depending on the terms of the bonds indentures, Labco has to respect certain covenants mainly related to reporting and information requirement.

Note 15 Borrowings and other financial liabilities (Continued)

Revolving Credit Facility (RCF) covenants

The RCF includes certain financial covenants as defined in the agreements.

- leverage ratio tested quarterly (calculated as the ratio of consolidated total net debt at each quarter end to consolidated adjusted EBITDA for the 12 months ending on that quarter end),
- super senior gross leverage ratio tested quarterly (calculated as the ratio of total super senior gross debt at each quarter end to adjusted EBITDA for the 12 months ending on that quarter end) which should achieve the following ratio for each period: < 1.75 ;
- minimum cash balance of €15 million, tested quarterly.

For details on the covenants, please refer to Note 23 *Borrowings and other financial liabilitie*s of the audited Consolidated Financial Statements of Labco for the year ended December 31, 2014.

As at 31 March 2015, Labco achieved the expected covenants ratio targets.

Note 17 Capital commitments and contingencies

Operating lease and commercial commitments

The group has entered into commercial leases on certain motor vehicles and items of machinery. These leases have an average life of between two and five years with no renewal option included in the contracts.

Furthermore Labco leases almost all of the properties where its labs are located. The lease in France is mainly on a 3/6/9 year lease contracts and in Portugal and Spain, situation is such that Labco can exit leases at 6-12 months notice.

Operating lease expense related to property amounted to 7,3 M€ in first quarter 2015 (2014: 5,8 M€) and equipment lease expense of approximately 2,1 M€ in first quarter 2015 (2014: 1,8 M€).

Finance lease and commercial commitments

Reagents suppliers in certain instances provide the testing equipment free of charge to laboratories in exchange for exclusive purchasing commitments, including sometimes minimum volume commitments. Management believes minimum volume commitments for consumables are substantially below current volumes and therefore we do not consider these minimum purchase commitments to be material for us.

Some of these contracts have been qualified as capital lease over an average duration of 5 years because the contracts have tacit renewal clauses, but no purchase options. Renewals are at the option of the specific entity that holds the leases. For details, refer to the Note 30 of the audited Consolidated Financial Statements of Labco for the year ended December 31, 2014.

Note 17 Capital commitments and contingencies (Continued)

Off balance sheet commitments given and received

The Group's off-balance sheet commitments consist principally of guarantees given in the course of its investing and financing activities, especially securities given to secure the Notes and the RCF.

Indeed the obligations taken by Labco in the Senior Secured Notes indentures and by the borrowing entities, direct subsidiaries of Labco, according to the RCF agreement, have been guaranteed by commitments given by a certain number of Group entities, called Guarantors. Please refer to the Note 30 of the audited Consolidated Financial Statements of Labco for the year ended December 31, 2014 including the detailed full list of Guarantors and securities given.

As a consequence of refinancing operation of February 11, 2015, all obligations and guarantees given in the context of the Senior Secured Notes indentures have been extended to cover the additional 100M€ Senior Secured Bonds.

Furthermore in the context of the outsourcing contracts in the UK with certain NHS trusts, Labco SA has issued parent company guarantees to the benefit of the Trusts according to which it guarantees the performance of the operating obligations of its UK entities managing the contracts (iPP, iPP Analytics and iPP Facilities) under the outsourcing contract and for a period lasting over contract period plus two years in general.

Note 19 Related parties

The Group's relationships with its related parties did not change significantly in terms of amounts and/or scope compared to the information described in the Note 32 of the audited Consolidated Financial Statements of Labco for the year ended December 31, 2014

Note 20 Events after the reporting period

Capital and potential capital evolution

On April 2, 2015 the remaining 50 200 Manager Warrants BSA 2005-1-2 and BSA 2007-1-2 have been exercised and as a consequence 78 885 new shares have been issued at par value for a subscription price of €1,00 or €2,50.

As a consequence, following all those operations on existing Manager warrants, there is no remaining Manager warrants except the following Manager warrants, 438 317 BSA 2008-1-1 and 156 668 BSA 2010-1-1 (refer to Note 13 for details).

Disposal of assets and acquisitions

In April and May (until board of directors meeting on May 26, 2015), the Group made 4 acquisitions in France and in Italy.

Early April, two acquisitions have been performed, TMA and TMA Medica in Genoa in Italy for a total consideration of around 2 M€ in order to reinforce the Group's clinical imaging offer in this region.

On May 22, 2015, the Group implemented in France the acquisitions of Unibionor and Unibio laboratoire for a global enterprise value of approximately €45 million. Those companies own a group of laboratories that is one of the leading clinical testing players in the Lille region. The group operates 15 sites, including a technical platform, and treats around 1,700 patients per day. It has around 130 employees and generated revenue of €17,5 million in the financial year ended December 31, 2014. The acquisition will enable the Group to achieve broader and denser geographical coverage of the Group in France. It will lead to a structural reorganization in the region, since two of the Group's laboratories will be merged with the acquired companies, eventually forming a new structure with revenue of €35 million across 23 sites, including a central technical platform.

This is a free translation into English of the statutory auditors' report on the consolidated financial statements issued in the French language and is provided solely for the convenience of English speaking users.

The statutory auditors' report includes information specifically required by French law in such reports, whether modified or not. This information is presented below the audit opinion on the consolidated financial statements and includes explanatory paragraph discussing the auditors' assessments of certain significant accounting and auditing matters. These assessments were considered for the purpose of issuing an audit opinion on the consolidated financial statements taken as a whole and not to provide separate assurance on individual account balances, transactions or disclosures.

This report also includes information relating to the specific verification of information given in the Group's management report.

This report should be read in conjunction with, and is construed in accordance with, French law and professional auditing standards applicable in France.

LABCO

Société Anonyme—A Limited liability Company under French law

60-62, rue d'Hauteville
75010 Paris, France

Statutory Auditors' Report on the Consolidated Financial Statements

For the year ended 31 December 2014

To the Shareholders,

In compliance with the assignment entrusted to us by your annual general meeting, we hereby report to you, for the year ended 31 December 2014, on:

- the audit of the accompanying consolidated financial statements of LABCO;
- the justification of our assessments;
- the specific verification required by law.

These consolidated financial statements have been approved by the Board of Directors. Our role is to express an opinion on these consolidated financial statements based on our audit.

I. Opinion on the consolidated financial statements

We conducted our audit in accordance with professional standards applicable in France. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit involves performing procedures, using sampling testing techniques or other methods of selection, to obtain audit evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made, as well as the overall presentation of the consolidated financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

In our opinion, the consolidated financial statements give a true and fair view of the assets and liabilities, and of the financial position of the Group as at 31 December 2014 and of the results of its operations for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union.

II. Justification of our assessments

In accordance with the requirements of Article L.823-9 of the French Company Code (Code de commerce) relating to the justification of our assessments, we bring to your attention the following matters:

Note 3.1.1 to the consolidated financial statements outline the specific corporate structure and governance implemented by the group in the French laboratories on which the management has exercised its judgment to conclude on the control of those laboratories and consolidate them in accordance with the global integration method. Our audit of the scope of consolidation included the assessment of the factual and legal aspects on which management relied and the appropriateness of the information contained in notes 3.1.1, 5.2 and 33 in this regards.

Notes 3.9.2 and 3.10.2 to the consolidated financial statements outline the accounting rules and methods relating to the goodwill and indefinite useful life assets carrying amounts and retirement costs and other employee benefits. Our procedures consisted in verifying the appropriateness of the accounting methods applied, data and assumptions used, documentation provided and resulting valuations. We also satisfied ourselves that Notes 13 and 24 provide appropriate disclosure.

These assessments were performed as part of our audit approach for the consolidated financial statements taken as a whole and contributed to the expression of the opinion in the first part of this report.

III—Specific verification

As required by law, we have also verified in accordance with professional standards applicable in France the information presented in the Group's management report.

We have no matters to report as to its fair presentation and its consistency with the consolidated financial statements.

Lille and Paris, March 24, 2015

Notes to the consolidated financial statements
for the year ended 31 December 2014

Note 1 Reporting entity

The parent company of Labco Group is Labco SA (the "Company"), which is a limited liability company incorporated and registered in France. The address of the Company's registered office is 60 - 62, rue de Hauteville, 75010, Paris, France. The consolidated financial statements of the Company as at and for the year ended 31 December 2014 comprise the Company and its subsidiaries (together referred to as the "Group" and individually as "Group entities") and the Group's interest in associates. The Group is primarily involved in clinical diagnostics testing and imaging services mainly in France, Spain, Portugal, Italy, Belgium, the United Kingdom and Switzerland and also provides clinical laboratory testing services to customers in Latin America, the Middle East and North Africa.

Note 2 Basis of preparation

2.1. Statement of compliance

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRSs), as adopted by the European Union (EU) and IFRS as published by IASB effective as at December 31, 2014. As a reminder, the Group's consolidated financial statements have been prepared for the first time in 2010 in accordance with IFRSs, the opening IFRS balance sheet being prepared as of January 1, 2009.

The accounting policies retained are the same as those used in preparing the consolidated financial statements at 31 December 2013, except for the Standards and Interpretations adopted by the European Union applicable as from January 1,2014 which have no significant effect on the consolidated financial statements of the Group.

As indicated in the 2013 audited consolidated IFRS financial statements, Labco has elected to implement early adoption in 2013 of *IFRS 10—Consolidated Financial Statements*, *IFRS 11—Joint Arrangements* and *IFRS 12—Disclosures of Interests in Other Entities*, as well as the resulting revised *IAS 27* and *IAS 28.* The impacts on the Group of those Standards and Amendments were limited.

The consolidated financial statements were authorized for issue by the Board of Directors on March 23, 2015.

2.2. IFRS basis adopted

2.2.1. Standards, amendments and interpretations effective as of January 1, 2014

The Group's consolidated financial statements comply with the amendments to published standards and interpretations which came into effect on January 1. 2014 and have been adopted by the European Union. The following amendments and interpretations are mandatorily applicable as of January 1. 2014:

- IFRS 10 *Consolidated Financial Statements*

IFRS 10 replaces the requirements and guidance in IAS 27 relating to consolidated financial statements. This standard introduces a single consolidation framework for all types of investee entities, and gives a new definition of control. According to IFRS 10, an investor controls an investee when the investor is exposed, or has rights, to variable returns from its involvement with the investee and has the current ability to affect those returns through its power over the investee. The retrospective application of the standard on the Group's consolidation scope has no effect on the Group's comparative information reported in financial statements as at December 31, 2013.

- IFRS 11 *Joint Arrangements*

IFRS 11, *Joint Arrangements* replaces IAS 31 *Interests in joint venture* and especially abolishes the proportionate integration method. Labco was in a joint arrangement through its subsidiary iPP, the joint venture with Sodexo, in the United Kingdom. The retrospective application of the standard has no effect on the Group's comparative information presentation because the jointly controlled entity iPP was already under IAS 31 recorded under equity method. Indeed the option, proposed by IAS 31, of using equity method for jointly controlled entity was chosen by Labco in 2011.

Note 2 Basis of preparation (Continued)

- IFRS 12, *Disclosures of interest in other entities*

IFRS 12, *Disclosures of interest in other entities*, integrates and makes consistent the disclosure requirements for interests in subsidiaries, joint arrangements, associates, and unconsolidated structured entities and presents those requirements in a single IFRS.

These standards were already early implemented by Labco for the annual consolidated financial statements as at 31 December 2013 with a limited impact on Group financial statements.

- Amendments to IAS 32—*Financial Instruments: Presentation—Offsetting Financial Assets and Financial Liabilities*
- Amendments to IAS 36—*Recoverable Amount Disclosures for Non-Financial Assets*
- Amendments to IAS 39—*Novation of Derivatives and Continuation of Hedge Accounting*

These amendments have no significant impact on the Group consolidated financial statements.

2.2.2. Standards, amendments and interpretations not mandatorily applicable as of January 1, 2014

The Group has elected not to early adopt the following standards or amendments whose application is not mandatory as of January 1, 2014.

- IFRIC 21—*Levies*

IFRIC 21—*Levies* was published in May 2013 and adopted by the European Union in June 2014. This interpretation aims to clarify the trigger event for the provisioning for all taxes other than income taxes. This interpretation will modify existing practices for annual taxes whose payment is triggered, for an entity, by being in operations on a specified date or by achieving a certain level of activity. Its impact should be recognized retrospectively in accordance with IAS 8.

The Group has decided not to early apply IFRIC 21, as this interpretation was not expected to impact significantly the Group's financial statements. Furthermore, such application should have only a timing impact between quarters in the recognition of certain levies.

Had the Group decided to apply IFRIC 21 from January 1, 2014, the impacts for the Group, mainly in France, would have been the following:

- a reduction in first-quarter EBITDA of around €0,7 million;
- a reduction in first-half EBITDA of around €0,5 million;
- a reduction in nine-month EBITDA of around €0,2 million;
- no impact on full-year EBITDA.

Given that the above reductions in EBITDA would have been offset by an increase in other current liabilities, IFRIC 21 would have had no impact on cash flow from operating activities.

2.2.3. New standards, amendments and interpretations not applicable as of January 1. 2014

A number of new standards, amendments to standards and interpretations are not yet effective for the year ended 31 December 2014, and have not been applied in preparing these consolidated financial statements.

- IFRS 9—*Financial Instruments: Classification and Measurement*
- IFRS 15—*Revenue from contract with customers*

The Group is currently reviewing these standards, amendments and interpretations to assess their possible effect on its financial information.

2.2.4. Summary of options used on the first time adoption of IFRS

As a first time adopter in 2010, the opening IFRS balance sheet has been prepared as of January 1, 2009 (i.e. date of transition to IFRS) using IFRSs as adopted by the European Union effective

Note 2 Basis of preparation (Continued)

December 31, 2010. In accordance with IFRS 1, the Group has elected to use the following main exemptions for the preparation of its first IFRS financial statements:

- business combinations that occurred before the date of transition to IFRS are not retrospectively restated in accordance with IFRS 3—*Business Combinations;*
- the long term employee benefits have been fully recorded;
- for the share based payment transactions, only the 2008 scheme has been restated according to IFRS 2, and
- financial instruments held have all been classified as financial assets available for sale at the date of transition, with the exception of liabilities and receivables and trade receivables.

2.3. Basis of measurement

The consolidated financial statements have been prepared on the historical cost basis except for the following items in the statement of financial position:

- derivative financial instruments are measured at fair value
- certain long term financial assets are measured at fair value

2.4. Functional and presentation currency

These consolidated financial statements are presented in euro, which is the Company's functional currency. All financial information presented in euro has been rounded to the nearest thousand.

2.5. Use of estimates and judgments

The preparation of the consolidated financial statements in conformity with IFRSs requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

Information about critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the consolidated financial statements is included in the following notes:

- **Note 3.1.1**—Subsidiaries and consolidation method
- **Note 3.2.2**—Derivative financial instruments, including hedge accounting
- **Note 3.7**—Leased assets
- **Note 3.9.2**—Non-financial assets
- **Note 3.12**—Revenue

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year are included in the following notes:

- **Note 3.6.1** and **Note 6**—Goodwill and acquisition of subsidiaries

Note 3 Significant accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these consolidated financial statements, unless otherwise indicated.

The accounting policies have been applied consistently by Group entities.

Note 3 Significant accounting policies (Continued)

3.1. Basis of consolidation

3.1.1. Subsidiaries and consolidation method

Subsidiaries are entities controlled by the Group. Control is the power to direct the relevant activities in order to use it to affect its exposure or rights to variable returns from its involvement. In assessing control, the Group takes into consideration, if any, potential and substantive voting rights, for which the Group has the practical ability to exercise them. Potential and substantive rights are only considered for the subsidiary Test SA in Switzerland, owned at 48% by the Group which benefits from call options at determined price over the remaining 52%.

Regulations governing the ownership and certification of laboratories in certain jurisdictions require us to hold each clinical laboratory or a limited number of the clinical laboratories through a separate subsidiary. Certain countries also regulate the corporate form through which laboratories may be held, such as "SELs" (société d'exercice liberal) in France.

In France, we are subject to regulatory constraints on the ownership of share capital and voting rights of SELs operating clinical laboratories by persons other than laboratory doctors and laboratory companies. As a consequence for the French entities (refer to note 7 *Segment information* for the contribution of the French subsidiaries), as described hereafter, the control exercised over French subsidiaries is based on specific governance mechanisms and contractual agreements, qualified by the Group as de facto control.

To comply with such regulatory constraints, we have put in place a specific corporate structure pursuant to which and subject to a few exceptions, we directly and indirectly hold shares representing approximately up to 99.9% of the share capital of our historical SELs while some of the laboratory doctors practicing in said SEL hold the remaining shares. Nonetheless, the articles of association of all the Group's SEL grant 50.01% of voting rights in all the shareholders' general meetings to laboratory doctors who are shareholders in the SEL in which they practice, qualified as "associés professionnels internes" (les "API"). The new French law on medical biology adopted on May 30, 2013 made it mandatory that more than 50% of the share capital (in addition to more than 50% of voting rights) of a clinical laboratory operating as a SEL be held by the laboratory doctors practicing in this SEL. The law also contemplated that existing SELs which are operating under a different ownership structure as of the date of enactment of the law will be grandfathered in (anteriority clause) and will continue to operate under their existing structure and have the majority of their share capital held by laboratory companies.

As a consequence, the Group hold, directly and indirectly through Istituto il Baluardo S.p.A., one of its Italian subsidiaries, approximately 99,9% of the share capital of the SEL which benefit from the grandfathering clause implemented by the law of May 30, 2013. Given this structure could not be used for the majority of the acquisitions performed in France since the enactment of that law, an alternative structure has been implemented and concerned only 2 entities as at December 31, 2014. That alternative structure is based on the issuance of preferred shares which grant the Group substantially all of the economic rights but complying the fact that laboratory doctors practicing in said SEL held more than 50% of the share capital.

Applying equally to the historical structure or the alternative structure, even though we cannot have the majority of the voting rights in our SEL (nor the majority of share capital for new entities), we have put in place mechanisms that grant us substantially all of the economic rights in such SELs and allow us to control the relevant activities, in accordance with the French regulatory framework, and fully consolidate our French network. As we acquire SEL, we change their articles of association to implement one of the two legal structures described above but also to adopt specific provisions, in particular with respect to governance. In addition, the majority of the API, generally the one having sold their shares in the SEL but continuing to practice in them, have agreed a number of contractual commitments vis-à-vis Labco Group, mainly in their integration agreement into Labco Group or in the share purchase agreement for the shares they hold in the SEL where they continue to practice. The agreed commitments are for example loyal and good faith adherence to the Group legal organization, including the membership of the SEL to the GIE Labco Gestion and the use of its central administrative support services (bookkeeping shared services, finance, legal affairs, purchasing, Information Technology, human resources, scientific information and quality management), the firm and definitive acceptance of the constraints related to Group banking and high yield bonds financing, the commitment to participate fully in the Group's development and

Note 3 Significant accounting policies (Continued)

restructuring, the prior agreement of their remuneration definition and the reinstatement of a proportionality between voting rights and share capital, in case of regulation amendments.

That contractual framework committing the API is such that the decisions impacting relevant activities proposed by the Group, are intended to be adopted with the favorable vote of the API and enable the Group to exercise exclusive control and to conclude that French SEL should be fully consolidated.

During summer 2014, in order to adapt the corporate governance provisions to the development of the network's laboratories and to harmonize the corporate governance provisions of all the French laboratories benefiting from the anteriority clause, the Group has started to deploy in France a new corporate governance, contractual and organizational, structure for its SEL. A significant percentage of the Group's SEL, representing approximately 63% of the total French contribution to turnover for the year-end December 31, 2014, had adopted these new corporate governance arrangements.

That new framework of arrangements (articles of association, shareholder's agreement, private practice agreement model, internal reules and charter of management board members) re-emphasizes the contractual commitments existing historically and strengthen the control over the strategic and financial operations, which are deemed to be the relevant activities in the SEL, while enabling to comply strictly with the French regulations requiring that the majority (50,01%) of the voting rights of a SEL be held by the laboratory doctors (API) practicing in this SEL. Indeed, the shareholder's agreements signed with the laboratory doctors re-emphasize the commitments they accept, in continuity with the commitments stipulated historically in the integration agreements into Labco Group and in the share purchase agreement, and define new commitments among which obligations to sell their shares in the SEL. As a consequence, laboratory doctors from whom the Group acquires SEL or clinical laboratories who decide to stay in the Group, continue to run it on a day-to-day basis but are contractually bound to comply with the Group's policies and standards in terms of reporting, and in particular with respect to financial and accounting information, financing and centralized cash management, budgeting and, insofar as compatible with the French regulatory framework, management of the SEL. Moreover that new framework set up Strategic Committee, as stipulated in the shareholders' agreements, governing bodies which enable the Group to exercise an exclusive control in the business management. Those strategic committees take strategic and financial decisions by a simple majority vote and are composed equally of API who are members of the SEL management boards (which are generally composed of three members) and of the representatives of the Group (in equivalent number). Given the contractual commitments made by the API parties to the agreements, the decisions proposed by the Group, are intended to be adopted with a favorable vote from the API who are members of the Strategic Committees.

The compliance of that new framework of governance with the principles of IFRS 10 *Consolidated financial statements* was analysed and it enables to conclude that the French SEL shall continue to be fully consolidated.

The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. The acquisition date is the date on which control is transferred to the acquirer. Judgment is applied in determining the acquisition date and determining whether control is transferred from one party to another. The accounting policies of subsidiaries have been changed when necessary to align them with the policies adopted by the Group.

Non-controlling interests ("minority interests") represent the part of net income or loss, and of net equity not held by the Group. They are presented in the consolidated Income Statement, the Consolidated Statement of Comprehensive Income and in equity in the Consolidated Statement of Financial Position, separately from equity attributable to the owners of the Company. In the case of medical biology companies, whether controlled de jure or de facto, minority interests of other shareholders, i.e. laboratory doctors, must be assessed based on the financial rights attached to their shares rather than voting rights. These shares of stock are entitled to a priority dividend, calculated on a formula defined in each company's by-laws so long as their holders are professionally active in the company. However their rights to any surplus on liquidation (net assets) are strictly limited, which gives this portion a non-significant accounting value. Most by-laws of consolidated French companies call for two classes of shares. Class A shares are held by laboratory doctors associated in the SEL (Sociétés d'exercice liberal). In certain SEL they are awarded a priority dividend according to a formula worked out in the by-laws of each company and representing a profit sharing arrangement. They have this right as long as they are professionally active in the company. They are not actually minority interests but rather a mechanism of compensation for the services such professionals render to the Group. Consequently dividends thereon are recognized as compensation expense in profit or loss in the period in which services giving rise to profit sharing are rendered. Over the last 2 years, a number of SEL having a Priority Dividend mechanism have evolved towards variable remuneration schemes according to which computation and payment mechanisms are determined based on multicriteria achievements.

Labco board of directors authorized during 2014 the repurchase of A shares in certain SEL granting rights to priority dividends for certain French biologists. Based on the substance analysis under IFRS as described above, such operation is recorded as a non-recurring restructuring expense corresponding to the repurchase of variable remuneration rights. Indeed the concerned biologists will earn after that operation a classical variable remuneration significantly lower than the former priority dividend.

3.1.2. Investments in associates (equity accounted investees)

An associate is an entity over which the Group has significant influence and that is not a subsidiary. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control over those policies. Investments in associates are accounted for using the equity method (equity accounted investees) and are recognized initially at cost. The Group's investment includes goodwill identified on acquisition, net of any accumulated impairment losses. The consolidated financial statements include the Group's share of the income and expenses and equity movements of equity accounted investees, after adjustments to align the accounting policies with those of the Group, from the date that significant influence commences until the date that significant influence ceases.

3.1.3. Interests in joint ventures

A joint venture is a contractual arrangement whereby the Group and other parties undertake an economic activity that is subject to joint control (i.e. when the strategic financial and operating policy decisions relating to the activities of the joint venture require the unanimous consent of the parties sharing control). Jointly controlled entities are consolidated using the equity method in accordance with IFRS 11 and revised IAS 28 as they were previously recorded since 2011 according to the option provided by IAS 31, Interests in Joint Ventures.

3.1.4. Transactions eliminated on consolidation

Intra-group balances and transactions, and any internal income and expenses arising from intra-group transactions, are eliminated in preparing the consolidated financial statements. Unrealized gains arising from transactions with equity accounted investees are eliminated against the investment to the extent of the Group's interest in the investee. Internal losses are eliminated in the same way as internal gains, but only to the extent that there is no evidence of impairment.

3.1.5. Business combinations

For acquisitions on or after 1 January 2009, the Group applies IFRS 3 revised (2008) and measures goodwill as the difference between (a) the sum of (i) the fair value of the consideration transferred, (ii) the recognized amount of any non-controlling interest in the acquiree, (iii) the acquisition date fair value of any previously held interest in the acquiree, and (b) the net recognized amount (generally fair value) of the identifiable assets acquired and liabilities assumed, all measured as of the acquisition date. Consideration transferred includes the fair values of the assets transferred, liabilities incurred by the Group to the previous owners of the acquiree, and equity interests issued by the Group. It also includes the fair value of any contingent consideration. When this difference is negative (negative goodwill), a bargain purchase gain is recognized immediately in profit or loss.

For business combinations that occurred since 2009, the Group measured any non-controlling interest in majority of cases at its proportionate interest in the identifiable net assets of the acquiree.

Transaction costs that the Group incurs in connection with a business combination, such as finder's fees, legal fees, due diligence fees, and other professional and consulting fees are expensed as incurred.

Note 3 Significant accounting policies (Continued)

If a business combination is achieved in stages, re-measurement of any previously held equity interest in the acquiree at its acquisition-date is performed at fair value with any resulting gain or loss recognized in the statement of earnings.

A contingent liability of the acquiree assumed in a business combination is recognized only if such a liability represents a present obligation and arises from a past event, and its fair value can be measured reliably.

If consideration transferred include a contingent consideration (earn-out for example), it is recorded at fair value at acquisition date. For a contingent consideration recorded as financial instrument in the scope of IAS 39, subsequent fair value variations are recognized in statement of income. If a contingent consideration is classified as equity, it will not be remeasured.

Acquisitions and disposal of non-controlling interests

Acquisitions and/or disposal of non-controlling interests are accounted for as transactions with equity holders in their capacity as equity holders. Therefore no goodwill is recognized or derecognized as a result of such transactions.

3.2. Financial instruments

Financial instruments include financial assets and financial liabilities. Financial assets comprise available-for-sale financial assets, loans and receivables carried at amortized cost including trade and other receivables, and financial assets measured at fair value through income, including derivative financial instruments. Financial liabilities include borrowings, trade and other payables, derivative financial instruments and other financial liabilities.

3.2.1. Non-derivative financial instruments

Non-derivative financial instruments comprise investment in equity and debt securities, trade and other receivables, loans and borrowing at amortized cost and trade and other payables.

The Group initially recognizes trade and other receivables on the date that they are originated. All other financial assets are recognized initially on the trade date at which the Group becomes a party to the contractual provisions of the instrument.

Available-for-sale financial assets

The Group's investments in equity securities (generally the non-consolidated investments) and certain debt securities are classified as available-for-sale financial assets. These items are measured at fair value on initial recognition, which generally correspond to the acquisition cost plus any directly attributable transaction costs. Subsequent to initial recognition, they are measured at fair value and changes therein, other than impairment losses are recognized in other comprehensive income and presented within equity in the fair value reserve. When an investment is derecognized, the cumulative gain or loss in other comprehensive income is transferred to profit or loss.

Loans and receivables at amortized cost

Loans and receivables, including trade and other receivables are financial assets with fixed or determinable payments that are not quoted in an active market.

Loans and receivables primarily include loans and advances to associates or non-consolidated companies, and guarantee deposits, are recognized initially at fair value, plus any directly attributable transaction costs. Subsequent to initial recognition, loans and receivables are measured at amortized cost using the effective interest rate method, less any impairment losses.

On initial recognition, trade and other receivables are recorded at fair value, which generally corresponds to their nominal value. Impairment losses are recorded based on the estimated risk of non-recovery.

Note 3 Significant accounting policies (Continued)

Financial assets and liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Group has a legal right to offset the amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

Financial liabilities including trade and other liabilities

Financial liabilities, such as loans and borrowings carried at amortized cost, trade and other payables are recognized initially at fair value. Subsequent to initial recognition, these financial liabilities are measured at amortized cost using the effective interest rate method. On initial recognition, any issue or redemption premiums and discounts and issuing costs are added to/deducted from the nominal value of the borrowings concerned. These items are taken into account when calculating the effective interest rate and are therefore recorded in the consolidated income statement over the life of the borrowings using the amortized cost method.

Financial liabilities are broken down into current and non-current liabilities in the consolidated statement of financial position. Current financial liabilities comprise:

- Financial liabilities with a settlement or maturity date within 12 months of the statement of financial position date
- Financial liabilities in respect of which the Group does not have an unconditional right to defer settlement for at least 12 months after the statement of financial position date

3.2.2. Derivative financial instruments, including hedge accounting

The Group holds derivative financial instruments to hedge its interest rate risk exposures, for certain contracts the formal documentation of hedging relationship at inception has been prepared enabling hedge accounting according to IAS 39, whereas other instruments used in economic hedges have not been formally documented as hedging relationship therefore not qualifying for hedge accounting.

Derivatives are recognized initially at fair value; attributable transaction costs are recognized in profit or loss as incurred. Subsequent to initial recognition, derivatives are measured at fair value, and changes therein are accounted for as described below.

Cash flow hedges

When a derivative is designated as the hedging instrument in a hedge of the variability in cash flows attributable to a particular risk associated with a recognized asset or liability or a highly probable forecast transaction that could affect profit or loss, the effective portion of changes in the fair value of the derivative is recognized in other comprehensive income and presented in the hedging reserve in equity. The amount recognized in other comprehensive income is removed and included in profit or loss in the same period as the hedged cash flows affect profit or loss under the same line item in the statement of comprehensive income as the hedged item. Any ineffective portion of changes in the fair value of the derivative is recognized immediately in profit or loss as financial income or expenses.

On initial designation of the hedge, the Group formally documents the relationship between the hedging instrument and hedged item, including the risk management objectives and strategy in undertaking the hedge transaction, together with the methods that will be used to assess the effectiveness of the hedging relationship. The Group makes an assessment, both at the inception of the hedge relationship as well as on an ongoing basis, whether the hedging instruments are expected to be "highly effective" in offsetting the changes in the fair value or cash flows of the respective hedged items during the period for which the hedge is designated, and whether the actual results of each hedge are within a range of 80-125 percent. For a cash flow hedge of a forecast transaction, the transaction should be highly probable to occur and should present an exposure to variations in cash flows that could ultimately affect reported net income.

If the hedging instrument no longer meets the criteria for hedge accounting, expires or is sold, terminated or exercised, then hedge accounting is discontinued prospectively. The cumulative gain or loss previously recognized in other comprehensive income and presented in the hedging reserve in equity remains there until the forecast transaction occurs. If the forecast transaction is no longer expected to occur, then the balance in other comprehensive income is recognized immediately in profit or loss. In other

Note 3 Significant accounting policies (Continued)

cases the amount recognized in other comprehensive income is transferred to profit or loss in the same period that the hedged item affects profit or loss.

Other derivatives

When a derivative financial instrument is not designated in a qualifying hedge relationship, all changes in its fair value are recognized immediately in profit or loss.

3.3. Cash and cash equivalent

Cash and cash equivalents comprise cash on hand, bank current accounts, and other bank deposits and short term investments considered to be readily convertible into a known amount of cash and where the risk of a change in their value is deemed to be negligible based on the criteria set out in IAS 7.

Bank overdrafts that are repayable on demand and form an integral part of Group's cash management are recorded under "Short term borrowings" but included as a component of cash and cash equivalents for the purpose of the statement of cash flows.

3.4. Share capital

Ordinary shares

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares and share options are recognized as a deduction from equity, net of any tax effects.

Repurchase of share capital (Treasury shares)

Own equity instruments which are repurchased (treasury shares) are presented as a deduction from equity. The amount of the consideration paid, which includes directly attributable costs, net of any tax effects, is recognized as a deduction from equity. No gain or loss is recognized in the consolidated statement of income on the purchase, sale, issue or cancelation of the Group own equity, but the resulting surplus or deficit on the transaction is transferred to/from retained earnings.

3.5. Property, plant and equipment

3.5.1. Recognition and measurement

Items of property, plant and equipment are measured at cost less accumulated depreciation and accumulated impairment losses.

Cost includes expenditure that is directly attributable to the acquisition of the asset. Purchased software that is integral to the functionality of the related equipment is capitalized as part of that equipment.

When parts of an item of property, plant and equipment have different useful lives or provide benefits in a different pattern, they are accounted for as separate items (major components) of property, plant and equipment, thus necessitating the use of different depreciation rates and methods.

An item of property, plant and equipment is derecognized on disposal or when the asset is permanently withdrawn from use and no future economic benefits are expected. Gains and losses on disposal of an item of property, plant and equipment are determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment, and are recognized net within results from non-recurring activities in profit or loss. When revaluated assets are sold, the amounts included in the revaluation reserve are transferred to retained earnings.

3.5.2. Depreciation

Depreciation is based on the depreciable amount, which is the cost of an asset, or other amount substituted for cost, less its residual value. The residual value is estimated to be nil at the end of the useful life, except for real estate in certain cases.

Depreciation is recognized in profit or loss on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Group will obtain ownership by the end of the lease term. Land is not depreciated.

The estimated useful lives for the current and comparative periods are as follows:

- buildings . . . . . 15 - 30 years
- leasehold improvements & fixtures . . . . . 3 - 10 years
- Laboratory & Office equipment . . . . . 3 - 10 years
- fixtures and fittings . . . . . 2 - 10 years
- Other . . . . . 2 - 10 years

3.6. Depreciation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.Intangible assets

3.6.1. Goodwill

Goodwill that arises upon the acquisition of subsidiaries, either through share deals or asset deals, is included in intangible assets. For the measurement of goodwill at initial recognition, see *Note 6—Acquisitions of subsidiaries*

Subsequent measurement

Goodwill is measured at cost less accumulated impairment losses if any. In respect of equity accounted investees, the carrying amount of goodwill is included in the carrying amount of the investment, and an impairment loss on such an investment is not allocated to any asset, including goodwill, that forms part of the carrying amount of the equity accounted investee.

3.6.2. Other intangible assets

Other intangible assets that are acquired by the Group and have finite useful lives are measured at cost less accumulated amortization and accumulated impairment losses. Other intangible assets consist primarily of software and licenses.

3.6.3. Subsequent expenditure

Subsequent expenditure is capitalized only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is recognized in profit or loss as incurred.

3.6.4. Amortization

Amortization is calculated over the cost of the asset, or other amount substituted for cost, less its residual value. Amortization is recognized in profit or loss on a straight-line basis over the estimated useful lives of intangible assets, other than goodwill, from the date that they are available for use, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. The estimated useful lives for the current and comparative periods are as follows:

- Licenses . . . . . 1 - 5 years
- Software . . . . . 1 - 5 years

Amortization methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.

3.7. Leased assets

Leases in terms of which the Group assumes substantially all the risks and rewards of ownership are classified as finance leases. Upon initial recognition the leased asset is measured at an amount equal to the lower of its fair value and the present value of the minimum lease payments. Subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to that asset. However, if there is no reasonable certainty that the Group will obtain ownership by the end of the lease term, the finance lease assets are depreciated over the shorter of the estimated useful life of the asset and the lease term.

The Group regularly reviews its contracts and arrangements to determine whether an arrangement is, or contains a lease. The analysis is based on the substance of the arrangement at inception date. If the Group believes the fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset, then the arrangement contains a lease and IAS 17 is applicable to the lease element. At inception, payments required by the arrangement are split into lease payments and payments related to other elements of such arrangement based on their relative fair values.

The Group uses equipment for its medical analyses. The contracts in use for this activity stipulate that the equipment is put at disposal for free if the laboratory buys exclusively from the supplier chemical reagents for a certain indicative volume during the term of the contract. As stated before, despite the fact that these agreements are not in the legal form of a lease, the arrangements qualify as lease contracts and Labco applied the requirements of IAS 17 to the lease element whereby the payments required by the arrangement are split into lease payments and payments relating to the other elements of the arrangement based on their relative fair values. For these contracts that are classified as finance leases, the related assets have been recognized in the statement of financial position of the Group.

Other leases are operating leases and the leased assets are not recognized in the Group's statement of financial position. Operating lease payments are recognized as an expense in the consolidated statement of income.

3.8. Inventories

Inventories consist of raw materials ("reagents") and consumables and are measured at the lower of cost and net realizable value. The cost of inventories is based on the weighted average unit costs, and includes expenditure incurred in acquiring the inventories and other costs incurred in bringing them to their existing location and condition.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

3.9. Impairment

3.9.1. Financial assets (including receivables)

A financial asset not carried at fair value through profit or loss is assessed at each reporting date to determine whether there is objective evidence that it is impaired. A financial asset is impaired if objective evidence indicates that a loss event has occurred after the initial recognition of the asset, and that the loss event had a negative effect on the estimated future cash flows of that asset.

Objective evidence that financial assets (including equity securities) are impaired can include default or delinquency by a debtor, restructuring of an amount due to the Group on terms that the Group would not consider otherwise, indications that a debtor or issuer will enter bankruptcy, or the disappearance of an active market for a security. In addition, for an investment in an equity security, a significant (more than 30%) or prolonged decline in its fair value below its cost is objective evidence of impairment.

3.9.2. Non-financial assets

The carrying amounts of the Group's non-financial assets, but other than inventories and deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. For goodwill, and intangible assets that have indefinite useful lives or that are not yet available for use, the recoverable amount is estimated each year at the same date time during the year-end closing process, and additionally whenever there is an indication that such assets may be impaired.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money, all the other risks specific to the assets being considered in the estimated future cash flows from the assets. Depending on the timely availability each year of long term business plans, future cash flows are either estimated based on the long term 5 year business plans approved by senior management or estimated based on the budget prepared for the following year and which are afterward extrapolated over the next 4 years consistently with the latest 5 years business plan, plus in any case the estimate of the terminal value using a perpetual growth rate.

For the purpose of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the "cash-generating unit, or CGU").

For the purposes of goodwill impairment testing, the lowest level at which goodwill is monitored for internal reporting purposes corresponds to the following geographical areas: France, Iberia, Italy, Belgium, Switzerland and United Kingdom. Goodwill acquired in a business combination is allocated to CGUs or groups of CGUs that are expected to benefit from the synergies of the combination. The Group's corporate assets (Labco SA, Labco Belgium, Labco Finance) could not be allocated on a reasonable and consistent basis to each cash-generating units. As such, they are included in the group of cash-generating units' impairment test (global test). Local holdings are included in their respective country.

An impairment loss is recognized if the carrying amount of an asset or its CGU exceeds its estimated recoverable amount. Impairment losses are recognized in profit or loss. Impairment losses recognized in respect of CGUs or groups of CGUs are allocated first to reduce the carrying amount of any goodwill allocated to the units or group of units, and then to reduce the carrying amounts of the other assets in the unit (group of units) on a *pro rata* basis.

An impairment loss in respect of goodwill is not reversed. In respect of other assets, impairment losses recognized in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

Goodwill that forms part of the carrying amount of an investment in an associate is not recognized separately, and therefore is not tested for impairment separately. Instead, the entire amount of the investment in an associate is tested for impairment as a single asset when there is objective evidence that the investment in an associate may be impaired. Such impairment loss can be reversed if the recoverable amount subsequently increases.

3.10. Employee benefits

3.10.1. Short-term employee benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

A liability is recognized for the amount expected to be paid under short-term cash bonus or profit-sharing plans if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the obligation can be estimated reliably.

3.10.2. Long term employee benefits, including retirement agreements

Depending on the laws and practices in force in the countries where Labco operates, Group companies have legal obligations in terms of pensions, early retirement payments and retirement bonuses. Such obligations are generally defined State contribution plans, which costs are expensed based on the amount of contribution payable in the period.

The Group is also concerned by other post-employment or post-retirement employee benefits which correspond to the legal retirement indemnity mainly applicable in France and Italy.

Commitments at retirement date and other similar advantages essentially correspond to the retirement compensations due to employees when they retire. Their assessment is made on the basis of an actuarial calculation using the projected unit credit method and taking into account the rate of staff turnover and mortality rates which are determined based on official age tables and estimated future salary increase. Discount rates are determined by the reference to the yield at the measurement date on high-quality corporate bonds.

In compliance with IAS 19 revised, actuarial gains and losses are recognized directly in other comprehensive income in equity and are not amortized in the Income Statement.

3.10.3. Termination benefits

Termination benefits are recognized as an expense when the Group is committed demonstrably, without realistic possibility of withdrawal, to a formal detailed plan to either terminate employment before the normal retirement date, or to provide termination benefits as a result of an offer made to encourage voluntary redundancy. Termination benefits for voluntary redundancies are recognized as an expense if the Group has made an offer of voluntary redundancy, it is probable that the offer will be accepted, and the number of acceptances can be estimated reliably. If benefits are payable more than 12 months after the reporting period, then they are discounted to their present value.

3.10.4. Share-based payment transactions

The grant date fair value of share-based payment awards granted to employees is recognized as an expense, with a corresponding increase in equity, over the period required for the employees unconditionally becoming entitled to the awards. The amount recognized as an expense is adjusted to reflect the number of awards for which the related service and non-market vesting conditions are expected to be met, such that the amount ultimately recognized as an expense is based on the number of awards that do meet the related service and non-market performance conditions at the vesting date.

Share-based payment arrangements in which the Group receives goods or services as consideration for its own equity instruments are accounted for as equity-settled share-based payment transactions, regardless of how the equity instruments are obtained by the Group. The expenses include also if any the social charges to be paid on the shares granted.

3.11. Provisions

A provision is recognized if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions giving rise to a cash outflow after more than one year are discounted if the impact is material. Discount rates reflect current assessments of the time value of money and risks that are specific to the liability and not included in expected cash flows. The unwinding of the discount is recognized as finance cost.

3.12. Revenue

The Group earns revenues from a wide range of analysis and diagnostic testing services which are invoiced to insurance companies, hospitals, individuals, pharmacies, and National Heath entities. Those services include notably the clinical biological testing, including routine and specialty tests (esoteric), anatomical pathology, histological or cytological testings and the diagnostic imaging using medical and molecular imaging technologies.

Revenue from medical analyses and diagnostics in the course of ordinary activities is measured at the fair value of the consideration received or receivable, net of returns, trade discounts and volume rebates. Revenue in connection with rendered services is recognized at the time the service is provided. Revenue is based on the net amount billed or billable if it can be estimated reliably. If it is probable that discounts will be granted and the amount can be measured reliably, then the discount is recognized as a reduction of revenue as the sales are recognized.

The process of estimating the ultimate collection of receivables associated with our clinical testing business involves significant assumptions and judgments. Billings for services reimbursed by third-party payers, including social security systems, are recorded as revenue net of allowances for differences between amounts billed and the estimated receipts from such payers. Adjustments to the allowances, based on actual receipts from the third-party payers, are recorded upon settlement as an adjustment to net revenue.

Government payers

Payments for clinical laboratory testing services made by the government are based on fee schedules set by governmental authorities. Collection of such receivables is normally a function of providing the complete and correct billing information within the various filing deadlines. Collection varies from country to country.

Private insurers

Reimbursements from private insurers are based on negotiated fee-for-service schedules and on capitated payment rates.

Substantially all of the accounts receivable due from private insurers represent amounts billed under negotiated fee-for-service arrangements. We utilize a standard approach to establish allowances for doubtful accounts for such receivables, which considers the aging of the receivables, historical collection experience and other factors.

Client payers

Client payers include physicians, hospitals, employers and other commercial laboratories. Credit risk and ability to pay are more of a consideration for these payers than healthcare insurers and government payers. We utilize a standard approach to establish allowances for doubtful accounts for such receivables, which considers the aging of the receivables, as well as specific account reviews, historical collection experience and other factors.

Patient receivables (individuals)

Patients are billed based on established patient fee schedules, subject to any limitations on fees negotiated with healthcare insurers or physicians on behalf of their patients. Collection of receivables due from patients is subject to credit risk and ability of the patients to pay. We utilize a standard approach to establish allowances for doubtful accounts for such receivables, which considers the aging of the receivables, historical collection experience and other factors.

Other income in revenue mainly corresponds to interests earned on operating receivables as well as income generated by activities not directly related to clinical diagnostics and imaging services.

3.13. Lease payments

Payments made under operating leases are recognized in profit or loss on a straight-line basis over the term of the lease. Lease incentives received are recognized as an integral part of the total lease expense, over the term of the lease.

Minimum lease payments made under finance leases are apportioned between the finance expense and the reduction of the outstanding liability. The finance expense is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability (effective interest rate method).

3.14. Finance income and finance costs

Finance income comprises interest income on funds invested (including available-for-sale financial assets), dividend income, gains on hedging instruments that are recognized in profit or loss, and foreign currency gains. Interest income is recognized as it accrues in profit or loss, using the effective interest method. Dividend income is recognized in profit or loss on the date that the Group's right to receive payment is established.

Finance costs comprise of cost of net debt and other financial expenses. Cost of net debt includes interest expense on borrowings and financial leases, as well as expenses related to derivatives. Other financial expenses mainly include unwinding of the discount on provisions. Borrowing costs that are not directly attributable to the acquisition, construction or production of a qualifying asset are recognized in profit or loss using the effective interest method. Labco Group does not own any qualifying asset.

Note 3 Significant accounting policies (Continued)

3.15. Income tax

Income tax (income or expense) comprises current and deferred tax. Current tax and deferred tax are recognized in profit or loss except to the extent that it relates to a business combination, or items recognized directly in equity or in other comprehensive income.

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognized for the following temporary differences: the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss, and differences relating to investments in subsidiaries to the extent that it is probable that they will not reverse in the foreseeable future. In addition, deferred tax is not recognized for taxable temporary differences arising on the initial recognition of goodwill. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

A deferred tax asset is recognised for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Additional income taxes that arise from the distribution of dividends; are recognized at the same time that the liability to pay the related dividend is recognized;

For French entities of the Group, the former Business Tax has been modified by a law enacted December 30, 2009. The Business Tax now consists of two components:

- “Cotisation Foncière des Entreprises (CFE)”,which is a tax on rental value of lands
- “Cotisation sur la Valeur Ajoutée des Entreprises (CVAE)”, which is a tax determined on added value as defined based on statutory accounts

In accordance with the definition of income tax in IAS 12 and the definition of added value stipulated by article 1586 sexies of French Tax code, and by homogeneity with the treatment in other countries of taxes based on net aggregate of income and charges, Labco considers that the CVAE tax should be recorded as an income tax given its definition.

3.16. Results from operating activities, and net non-recurring expenses

Results from operating activities correspond to the operating performance of the various activities performed by Labco Group. Results from operating activities before non-recurring activities is an indicator used by the Group to present “a level of operational performance that can be used as part of an approach to forecast recurring performance”.

In order to facilitate understanding of recurring operating performance, non-recurring expenses and income lines have been defined and include non recurring, unusual, items that are clearly not related to recurring activities and of certain significance. Those non recurring expenses and income consist of:

- Impairment and reversal of impairment on non-operational assets and liabilities
- Gains / losses on sale of assets
- Restructuring expenses and provisions for major litigations
- Perimeter effect including transaction costs for significant and unusual acquisitions (cancelled or realized as for realized acquisitions, costs are expensed according to IFRS 3 revised guidance implemented starting 2009 by Labco), as well as earn out variations of fair value subsequent to the 1 year window period.

Note 3 Significant accounting policies (Continued)

3.17. Earnings per share

The Group has not issued shares in a public market. Therefore the Group is not required to but has decided to present voluntarily basic and diluted earnings per share (EPS) data for its ordinary shares in accordance with IAS 33. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period, adjusted for own shares held. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding, adjusted for own shares held and, for the effects of all dilutive potential ordinary shares, which comprise warrants and free shares granted to employees.

3.18. Segment information

The Group has not issued shares in a public market. Therefore the Group is not required to but has decided to disclose segment information in accordance with IFRS 8.

In accordance with IFRS 8, the reportable segments are components of the Group that engage in business activities and whose operating results based on the internal reporting are regularly reviewed by the chief operating decision-maker.

The Group is organized for management purposes by country and by geographical segments leading to define as reportable segments the geographical areas Northern Europe (France, UK, Belgium, Switzerland) and Southern Europe (Iberia comprising of Spain and Portugal, Italy). Segment information is reported on the same basis as used internally by the Chief Executive Officer and Executive Management Committee to determine allocation of resources to segments and assess their performance.

Segment performance is evaluated mainly based on total revenue and EBITDA and is measured consistently with the statement of income in the published consolidated financial statements. The Group's financing (including finance costs and finance income) and income taxes are centrally managed on a Group basis and are not allocated to operating segments. The use of shared resources, mainly provided by the Group holdings, is taken into account in segment result by allocating costs among the segments pro-rata the total revenue of each segment.

3.19. EBITDA (Earnings Before Interest, Taxes, Depreciation and Amortization)

EBITDA is a non-Gaap measure but corresponds to an aggregate that is commonly used by stakeholders for analyzing the Group's performance. EBITDA has been defined by the Group based on Results from operating activities before non-recurring activities restated for net depreciation, amortization and impairment, provisions and reversal. EBITDA is not a financial measure defined by IFRS as a measurement of financial performance and may not be comparable to other similarly-titled indicators used by other companies.

3.20. Share based payment transactions and transaction costs for usual small size acquisition

Labco presents in its operating result certain cost items on a specific line in order to help management and financial investors to better understand the Group' economic performance because it identifies separately elements which are non operational and inherently difficult to predict due to their irregular nature, even if the costs are for a certain period not very significant.

3.21. Determination of fair values

A number of the Group's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. IFRS 13 defines fair value for financial reporting purpose as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability as well as classification according to IFRS 13.

Note 3 Significant accounting policies (Continued)

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows:

- Level 1: inputs are quoted prices in active markets for identical assets and liabilities that the entity can access at the measurement date
- Level 2: inputs other than quoted market prices included in level 1 that are observable for the asset or liability, either directly or indirectly (like prices for similar items or identical assets in market not active)
- Level 3 unobservable inputs for the assets and liabilities notably Labco's own data

3.21.1. Property, plant and equipment

The fair value of property, plant and equipment recognised as a result of a business combination is based on market values. The market value of property is the estimated amount that would be received to sell a property in an orderly transaction between market participants at the measurement date. The fair value of items of plant, equipment, fixtures and fittings is based on the market approach and cost approaches using quoted recent market prices for similar items when available and current replacement cost when appropriate.

3.21.2. Trade and other receivables

The fair value of trade and other receivables is estimated as the present value of future cash flows, discounted at the market rate of interest at the reporting date. The net carrying value is considered as a reasonable estimate of their fair value considering the short payment and settlement periods applied by Labco Group. This fair value is determined for disclosure purposes.

3.21.3. Derivatives

The fair value of interest rate swaps is based on broker quotes. Those quotes are tested for reasonableness on an ad-hoc basis by discounting estimated future cash flows based on the terms and maturity of each contract and using market interest rates for a similar instrument at the measurement date. Fair values also reflect the credit risk of the instrument and include adjustments to take account of the credit risk of the Group entity and counterparty when appropriate.

3.21.4. Non-derivative financial liabilities

Fair value, which is determined for disclosure purposes, is calculated based on the present value of future principal and interest cash flows, discounted at the market rate of interest at the reporting date. For finance leases the market rate of interest is determined by reference to similar lease agreements.

3.21.5. Share-based payment transactions

The fair value of employee share options is generally measured using a binomial lattice model. Measurement inputs include share price on measurement date, exercise price of the instrument, expected volatility (based on weighted average historic volatility of similar quoted entities), weighted average expected life of the instruments (based on historical experience and general option holder behaviour), expected dividends, and the risk-free interest rate (based on government bonds). Service and non-market performance conditions attached to the transactions are not taken into account in determining fair value.

Note 4 Financial risk management

This note presents information about the Group's exposure to each of the above risks, the Group's objectives, policies and processes for measuring and managing risk, and the Group's management of capital. Further quantitative disclosures are included throughout these consolidated financial statements.

4.1. Overview

The Group has exposure to the following risks from its use of financial instruments:

- credit risk
- liquidity risk
- market risk

Note 4 Financial risk management (Continued)

4.2. Risk management framework

The Board of Directors has overall responsibility for the establishment and oversight of the Group's risk management framework.

The Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits.

The Group Audit Committee oversees how management monitors compliance with the Group's risk management policies and procedures.

4.3. Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's receivables from customers and investment securities.

Detailed quantitative information on credit risk are provided in *Note 20 Trade and other receivables*.

4.3.1. Trade and other receivables

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The Group has no significant concentrations of credit risks due to the large numbers of customers and individually immateriality of amounts due. The Group performs ongoing credit evaluations of its receivables and establishes an allowance for impairment that represents its estimate of incurred losses in respect of trade and other receivables. The main components of this allowance are a specific loss component that relates to individually significant exposures.

4.3.2. Investments and cash and cash equivalents

The Group's exposure to credit risk arises from default of the counterparty. The Group limits its exposure to credit risk by investing mainly in liquid securities with counterparties that have a high credit rating. Management actively monitors its investments and does not expect any counterparty to fail to meet its obligations.

4.4. Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation. This planning considers the maturity of both its financial assets, and its projected cash flow from operations.

Typically the Group ensures that it has sufficient cash on demand to meet expected operational expenses for a period of 60 days, including the servicing of financial obligations. In addition, the Group maintains a line of credit (Revolving Credit Facility) under which drawings could be made for financing acquisitions or for general financing purposes. Refer to the *Note 23 Borrowings and other financial liabilities* for a description of the main characteristics of our Revolving Credit Facility.

Detailed quantitative information on liquidity risk are provided in *Note 29 Financial instruments*.

4.5. Market risk—interest rate risk

Market risk is the risk that changes in market prices, such as interest rates, will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

The Group's exposure to the risk of changes in market interest rates relates primarily to the debt drawn on the revolving credit facility (RCF). Major part of our Group long term debt is at fixed rate, enabling to limit the impacts of market risks.

Detailed quantitative information on interest rate risk are provided in *Note 29 Financial instruments*.

Note 4 Financial risk management (Continued)

4.6. Operational risk

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the Group's processes, personnel, technology and infrastructure, and from external factors other than credit, market and liquidity risks such as those arising from legal and regulatory requirements and generally accepted standards of corporate behaviour. Operational risks arise from all of the Group's operations.

The Group's objective is to manage operational risk so as to balance the avoidance of financial losses and damage to the Group's reputation with overall cost effectiveness and to avoid control procedures that restrict initiative and creativity or impair operational independence of laboratory managers in countries where regulations emphasize medical independence of laboratory managers.

The primary responsibility for the development and implementation of controls to address operational risk is assigned to senior management within each business unit. This responsibility is supported by the development of overall Group standards for the management of operational risk in the following areas:

- compliance with regulatory and other legal requirements
- review regular accreditation procedures
- requirements for the periodic assessment of operational risks faced, and the adequacy of controls and procedures to address the risks identified
- requirements for the reporting of operational losses and proposed remedial action
- training and professional development
- Ethical and business standards.

4.7. Capital management

The Board of Directors's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business.

The Board of Directors seeks to maintain a balance between the higher returns that might be possible with higher levels of borrowings and the advantages and security afforded by a sound capital position.

There were no changes in the Group's approach to capital management during the year.

Neither Labco SA nor any of its subsidiaries are subject to externally imposed capital requirements.

Note 5 Significant events

5.1. Acquisitions, business set-up, disposals and mergers

5.1.1. Acquisitions and business set-up

Refer to *Note 6—Acquisition of subsidiaries* for detailed information on acquisitions performed in 2013.

01.01.2014 . . .	Mexico	CIC Mexico	Set-up

On July 30th, 2014, the Group has executed a strategic acquisition in Italy for an amount of 115 M€ with the acquisition of the SDN group, which is the leading Italian provider of medical imaging and laboratory diagnostic services. The SDN group offers integrated diagnostic services covering clinical laboratory diagnostic (both routine and specialty) and the full range of medical imaging: radiology, MRI but also the most sophisticated technologies of scanners by positron emission tomography (PET), combining molecular imaging and nuclear medicine. The SDN group, located in Naples and operating 5 sites with 255 employees, generated a 2013 turnover of 47 M€ and shows an accretive profitability compared to the one of the Group.

The Group has acquired on September 25th, 2014, through its subsidiary Bio-Rhônes subscribing a capital increase, 32,35% of the capital of Alpigène, a laboratory specialized in genetic accredited for both prenatal and postnatal testing. In compliance with the French regulation, the doctor specialised in genetics, who founded the laboratory remains the owner of the majority of the capital and manages the laboratory. However the Group is entitled to 55% of the economic benefits, whereas the group Carso, which historically supported the laboratory's growth, remains shareholder with 30% economic benefits. Given the governance schemes implemented, which are in line with the «new governance 2014» currently in progress within Labco Group, Labco will have the power to direct the relevant activities and therefore consolidated globally Alpigène in compliance with IFRS 10.

iPP Analytics and iPP Facilities, created in May 2014, have started on October 1st 2014 the activity related to the contract with Basildon and Thurrock University Hospital NHS Foundation Trust and the Southend University Hospital NHS Foundation Trust.

Through this contract, iPP Analytics and iPP Facilities deliver the full range of laboratory services whilst the clinical interpretation and clinical advice functions continue to be provided by the Trusts' medical staff who remain employed by the NHS. iPP Analytics has been set up in order to integrate NHS staff following the transfert of employees from public to private sector (under *TUPE* regulations). The partnership and related contract will last for 10 years, with a possible extension of 5 years. Those partnerships, similarly to the Taunton & Somerset contract, would allow other Trusts in the region to join the collaboration. As at December 31, 2014 iPPA and iPPF contributed to the Group turnover for an amount of 8,0 M€.

5.1.2. Disposals

As described in the audited Consolidated Financial Statements of Labco for the year ended December 31, 2013, Labco group disposed its German cash generating unit to Sonic Healthcare on December 2nd, 2013 for an enterprise value of €76 million and generating a minor consolidated loss on sale. As a consequence, former German Cash Generating Unit is treated as discontinued operations under IFRS 5 and the comparative information for the period ended December 31, 2013 is restated for consolidated statement of income and statement of cash flow.

- Profit and loss items for the comparative period ended 31 December 2013 for Germany are reclassified after elimination of intercompany operations in a specific line: Net profit of the period from discontinued operations.
- Cash flow items for the comparative period ended 31 December 2013 for Germany are reclassified after elimination of intercompany operations in specific lines Cash flows from (used in) activities of discontinued operations for each aggregates Operating, Investing and Financing.
- For consistency all information in the disclosures related to comparative information of December 31, 2013 have been presented by restating German entities related information

Moreover on July 31st, 2014, the Group has disposed the entity Sabater Pharma in Spain, which was providing diagnostic services to the pharmaceutical industry for a price estimated to 1,2 M€. The Sabater Pharma entity generated a turnover amounting to 1,6 M€ for the twelve months ending December 31, 2013.

Note 5 Significant events (Continued)

5.1.3. Mergers and legal reorganisation

Labco Group has continued in 2014 like in 2013 to implement numerous mergers between French SELs, in order to reinforce, in compliance with French regulation, synergies actions by concentrating laboratories. Moreover similar mergers have also been performed in Spain and Portugal.

Country	Mergers
Portugal	Endoclab has been merged with J. Marinheira Monteiro, Miguel Pereira & Maria do Sameiro Sequeira, S.A
Portugal	Laboratorio de Analises Clinicas Dr. Joao Ribeiro e Dra. Maria da Graça Cardoso has been merged with J. Marinheira Monteiro, Miguel Pereira & Maria do Sameiro Sequeira, S.A
Portugal	Laboratorio de Analises Clinicas Dra. Maria da Graça Duarte Nunes, S.A has been merged with J. Marinheira Monteiro, Miguel Pereira & Maria do Sameiro Sequeira, S.A
Portugal	SGUS Madeira, SGPS, S.A has been merged with Laboratorio Medico Dr. David Santos Pinto e Dr. Fernando Teixeira, S.A
Portugal	LPD—Laboratorio Português de Analises Clinicas, S.U has been merged with Laboratorio Medico Dr. David Santos Pinto e Dr. Fernando Teixeira, S.A
Portugal	Rotarobal, SGPS, S.A has been merged with Laboratorio Medico Dr. David Santos Pinto e Dr. Fernando Teixeira, S.A
Portugal	Novanalise—Laboratorio de Analises Clinicas de Torres Novas, S.A has been merged with Laboratorio Medico Dr. David Santos Pinto e Dr. Fernando Teixeira, S.A
Portugal	Miralinese—Laboratorio de Analises Clinicas de Mira de Aire, S.A has been merged with Laboratorio Medico Dr. David Santos Pinto e Dr. Fernando Teixeira, S.A
France	Baud David has been merged with Bio-Rhône (ex Laboratoire de l'Avenue)
France	Laboratoire Chiche has been merged with LBM Labo Gascogne
France	Mallia has been merged with Mazarin
France	La Biologie Médicale has been merged with Novabio
France	LBMR Centre (Ternois) has been merged with BioAlliance

Moreover, a legal chart reorganization has been implemented leading to a joint ownership of the holding Labco Diagnostic Espana, which owns all our activities in Iberia, by Labco SA and our Belgian laboratory Roman Pais. As part of this reorganization, the Group initiated the liquidation process of the financial holding located in Sweden and owned by Labco Diagnostic Espana.

5.2. Implementation of a new framework of governance in the French SEL

During summer 2014, in order to adapt the corporate governance provisions to the development of the network's laboratories and to harmonize the corporate governance provisions of all the French laboratories benefiting from the anteriority clause, the Group has started to deploy in France a new corporate governance, contractual and organizational, structure for its SEL. A significant percentage of the Group's SEL, representing approximately 63% of the total French contribution to turnover for the year-end December 31, 2014, had adopted these new corporate governance arrangements.

That new framework of arrangements (articles of association, shareholder's agreement, private practice agreement model, internal rules and charter of management board members) re-emphasizes the contractual commitments existing historically and strengthen the control over the strategic and financial operations, which are deemed to be the relevant activities in the SEL, while enabling to comply strictly with the French regulations requiring that the majority (50,01%) of the voting rights of a SEL be held by the laboratory doctors (API) practicing in this SEL.

Note 5 Significant events (Continued)

Indeed, the shareholder's agreements signed with the laboratory doctors re-emphasize the commitments they accept, in continuity with the commitments stipulated historically in the integration agreements into Labco Group and in the share purchase agreement, and define new commitments among which obligations to sell their shares in the SEL. As a consequence, laboratory doctors from whom the Group acquires SEL or clinical laboratories who decide to stay in the Group, continue to run it on a day-to-day basis but are contractually bound to comply with the Group's policies and standards in terms of reporting, and in particular with respect to financial and accounting information, financing and centralized cash management, budgeting and, insofar as compatible with the French regulatory framework, management of the SEL.

Moreover that new framework set up Strategic Committee, as stipulated in the shareholders' agreements, governing bodies which enable the Group to exercise an exclusive control in the business management. Those strategic committees take strategic and financial decisions by a simple majority vote and are composed equally of API who are members of the SEL management boards (which are generally composed of three members) and of the representatives of the Group (in equivalent number). Given the contractual commitments made by the API parties to the agreements, the decisions proposed by the Group, are intended to be adopted with a favorable vote from the API who are members of the Strategic Committees.

5.3. Non-recurring restructuring plans

Follow up of "Deep Dive" efficiency program in France

In 2012, Group management performed a full and detailed review of French operations in order to restructure the French network by identifying productivity improvements through accelerated concentration and in-depth reorganization. This "Deep Dive" program into the French network resulted in a staff optimization plan including its associated implementation cost (severance packages).

As a consequence, non-recurring restructuring expenses were incurred in 2012 for 0,7 M€ and in 2013 for 0,8 M€. The provision of 0,1 M€ recorded as at December 31, 2013 for the residual measures has been reversed in 2014.

Program of rights to priority dividends repurchase for certain French laboratory doctors

Labco board of directors authorized in 2014 the repurchase of preference shares granting rights to priority dividends (called A shares) in certain SEL. As a consequence, since July 2014, share purchase agreements for those preference shares have been signed with the laboratory doctors practicing in 4 SEL for a total amount of 8,8 M€. Those preference shares repurchase operations are accompanied also by a renegotiation of the compensation schemes of each concerned laboratory doctor, essentially of the variable part which consequently decreased given the concerned laboratory doctors will no longer receive a priority dividends but a classical and significantly lower than the previous priority dividend variable compensation.

Restructuring in Spain

In the context of contract renegotiation with a major client, Labco management decided in Q1 2013 to significantly restructure the operations of the laboratories managing the contract in coordination with the client service need and incidentally the overheads. A formal restructuring plan has been implemented in Q1 2013 leading to record a non-recurring provision of 0,8 M€, partly used in 2013 for 0,5 M€ and the remainder has been fully used in 2014 with non-recurring expenses recorded for an amount of 0,4 M€.

Furthermore the Group acquired on October 2nd, 2014 a building located in Barcelona to bring together the activities of 5 production plants, a storage facility and administrative offices at a single location. That consolidation on a unique site will lead to deeply reorganize the operations in the Barcelona area and will enable to optimize the productivity and to reduce the structure costs.

Those restructuring measures include dismissal of employees, transforming certain laboratories into collection centers, as well as early cancelation of equipment and real estate leasing agreements.

As a consequence, a provision for restructuring amounting to 1 144 K€ and assets depreciation for 281 K€ have been recorded as at December 31, 2014.

Note 5 Significant events (Continued)

5.4. Strategic projects

End of August 2014, Labco Group, following the request from the board of directors and with the full support of its shareholders, confirmed during the shareholders' meeting of October 2nd 2014, initiated the review of strategic options for an initial public offering (IPO) project in order to fuel the growth strategy. Taking into account end 2014 stock markets evolution, the IPO project has been postponed to 2015 and the opportunity to make the initial public offering will be analysed depending on the market conditions changes.

As a consequence, the Group, mainly Labco SA, has incurred non-recurring costs for an amount of 5,3 M€ related mainly to external advisors, lawyers or auditors fees for works to be used internally for various strategic options and for the preparation of the IPO project. Those costs are recorded in non-recurring expenses as at December 31, 2014.

Note 6 Acquisitions of subsidiaries

Business combination

Main acquisitions during the 2013 reporting period are shown below by country. At the end of the 1 year window period, most goodwill have been confirmed with no significant changes.

Country	Entities	Goodwill
France	Baud David	6 290
France	Mallia	4 404
France	Jollivet Bernard	3 020
France	Notteghem	2 443
France	Chiche	1 851
France	Chatelier Peronneau	900
France	Vial & Le Dunff	866
Spain	Laboratorio Global	325
UK	iPP 49% d'intérêts minoritaires	(806)

Main acquisitions during the reporting period are shown below by country:

Acquisition date	Country	Entities	Goodwill
30.07.2014	Italy	SDN S.p.A	96 075
27.03.2014	France	LBMR Centre	8 898
27.03.2014	France	LBMR Normandie	5 255
20.06.2014	Italy	Visconteo	1 936
31.03.2014	France	LABM Lesaulnier	1 746
01.07.2014	Belgium	Van Risseghem	1 597
31.03.2014	France	SCP Horstmann (Les Abraysiennes)	1 441
17.02.2014	Spain	Clinic Baleares	1 378
01.07.2014	France	Bourelly	935
30.04.2014	Spain	CIG-GM	874
28.02.2014	Spain	Sanilab Molecular	578
25.09.2014	France	Alpigène	308

All small to medium size acquired companies earn revenues from medical analyses. Through these acquisitions the Group expects to reduce costs through economies of scale, and the goodwill thus represents mainly the fair value of the expected synergies resulting from the acquisition. Through the strategic acquisition of SDN group, the Group is extending its reach into fully integrated diagnostics and nuclear medicine. Furthermore thanks to that acquisition, Labco is becoming one of the leaders of medical diagnostic in Italy. The goodwill generated by SDN group acquisition allocated to Cash Generating Unit Italy represents mainly the fair value of a leadership position, technical leadership and know-how of employees and expansion of activities for Labco Group.

All amounts are provisional and subject to modification in the twelve months period following the acquisition date.

Note 6 Acquisitions of subsidiaries (Continued)

The cumulative effect of usual small size acquisitions on the Group's assets and liabilities on acquisition date corresponding to identifiable assets acquired and liabilities assumed for share deals acquisitions performed in 2014 as well as cumulative consideration transferred is presented below:

Acquisition price	**19 634**
In thousand of euros	**TOTAL**
Property, Plant and Equipment	**1 605**
Intangible assets	**2**
Investment in equity accounted investees	**0**
Other non-current assets	**245**
Deferred tax assets	**43**
Inventory	**166**
Trade Receivables	**1 388**
Other current assets	**782**
Cash and cash equivalents	**3 494**
TOTAL ASSETS	**7 725**
Provisions	**120**
Employee benefits liabilities	**254**
Deferred tax liabilities	**0**
Financial liabilities	**3 903**
Trade Liabilities	**1 202**
Other current liabilities	**1 185**
TOTAL LIABILITIES	**6 665**
Contingent liabilities	**0**
Total net identifiable assets	**1 060**
Goodwill	**18 573**

In addition to Goodwill generated by share deals, Labco also made acquisitions of asset that generated an increase of goodwill amounting to 6,4 M€.

The effect of the strategic acquisition of SDN group on the Group's assets and liabilities on acquisition date corresponding to identifiable assets acquired and liabilities assumed as well as consideration transferred is presented below. The purchase price of SDN group amounts to 115 M€ including a deferred payment of 10 M€ to be paid in 2 years time under certain condition. Had SDN group been consolidated from January 1, 2014 the consolidated statement of income would have included additional revenue of 33,9 M€ and EBITDA of 18,1 M€. The contribution of SDN group since the acquisition date amounts to 14,1 M€ of total revenue and 3,8 M€ of EBITDA.

Note 6 Acquisitions of subsidiaries (Continued)

SDN Group:

In thousand of euros	TOTAL
Acquisition price	**115 000**
Property, Plant and Equipment	**12 246**
Intangible assets	**45**

Note 7 Segment information

The information by geographical segment presented below corresponds to the information used by the Group General management to allocate resources to the various segments and to assess each segment's performance. It is extracted from the Group's consolidated reporting system and prepared in accordance with the same accounting rules as in the consolidated financial statements and set out in the notes thereto. The policies applied to determine the operating segments presented are set out in Note 3.18.

SEGMENT REPORTING (€ 000)	Southern Europe	Northern Europe	Total Group
Total revenue	**214 308**	**401 322**	**615 630**
EBITDA	**34 000**	**79 249**	**113 250**
Results from operating activities after non-recurring activities	**19 133**	**49 088**	**68 221**
Net finance costs			(64 506)
Income tax expenses			(18 701)
Share of profit of associates			431
Net profit of the period			**(14 554)**
Including Depreciation, impairment losses and amortization, provisions and reversals	*(9 268)*	*(14 913)*	*(24 181)*
Capital expenditures	**18 618**	**17 385**	**36 003**

Capital expenditures correspond to gross non-current tangible and intangible asset purchases, including cash timing difference and excluding purchases of assets under finance lease.

Note 7 Segment information (Continued)

Detailed revenue by country breaks down as follows:

€ 000	2014	%	2013	%
Northern Europe	**401 322**	**65%**	**357 873**	**65%**
France	**342 330**	**56%**	325 350	59%
Belgium	**29 999**	**5%**	27 161	5%
United Kingdom	**27 002**	**4%**	4 429	1%
Switzerland	**1 990**	**0%**	933	0%
Southern Europe	**214 308**	**35%**	**189 438**	**35%**
Iberian Peninsula	**158 697**	**26%**	151 190	28%
Italy	**55 611**	**9%**	38 248	7%
Total revenue	**615 630**	**100%**	**547 311**	**100%**

Iberian Peninsula (Iberia) corresponds to the aggregate of Portugal and Spain.

Note 8 Payroll related expenses

€ 000	2014	2013
Subcontracting and temporary staff	**(12 686)**	**(9 698)**
Salaries and wages	**(180 680)**	**(163 632)**
Social security contributions	**(52 137)**	**(49 862)**
Other personnel related costs	**(11 261)**	**(9 261)**
Total payroll related expenses	**(256 763)**	**(232 452)**

Number of persons	2014	2013
Executives	**620**	490
Liberal agreement	**357**	345
Employees	**5 234**	4 277
Total Number of persons	**6 211**	**5 112**

Other personnel related costs include amongst other profit sharing, pensions expenses, travel expenses, fees for training of personnel, food allowances.

Salaries and wages expenses include also the variable remuneration paid to biologists under various legal forms, either compensation paid as salary or fees or, mainly for French biologists, the priority dividends paid on the current year result.

As explained in the basis of preparation section, the priority dividends to be paid to certain laboratory doctors after year-end are recognized as employee benefits expense and liability in the current year.

Information about the share based payment transactions is included in *note 25—Share based payment schemes.*

Note 9 Other operating expenses

€ 000	2014	2013
Operating lease & rental expenses	**(34 226)**	(29 359)
Taxes	**(4 128)**	(2 720)
Repairs & maintenance & insurance expenses	**(17 085)**	(14 316)
Consulting & advisory fees	**(12 824)**	(10 888)
Utilities	**(20 485)**	(18 487)
Other expenses	**(13 382)**	(8 757)
Total other operating expenses	**(102 130)**	**(84 527)**

Other operating expenses include amongst other service charges relating to security and cleaning, marketing related expenses, storage costs as well as write off related to receivables.

Note 9 Other operating expenses (Continued)

According to revised IFRS 3 the transactions costs related to acquired entities are recorded in the consolidated statement of income, as well as with transaction costs for abandoned deals. Given the non operational, irregular or non-recurring nature of these costs, they have been presented on a separate line of consolidated statement of income, and depending on the amount of costs incurred by transaction project, they are qualified as transaction costs for usual small size acquisitions recorded as other operating expenses, or they are qualified as transaction costs for significant and unusual transactions (for example the strategic acquisition of SDN group in July 2014) recorded as non recurring operating expenses in the line Perimeter effect

The Group incurred acquisition-related costs of 1 473 K€ in 2014 (2013: 972 K€) for usual small size acquisition relating to external legal fees, due diligence costs and stamp taxes.

Note 10 Non recurring income and expenses

€ 000	2014	2013
Restructuring expenses and provisions for major litigations	**(13 127)**	(5 525)
Perimeter effect	**(1 806)**	356
Impairment of goodwill	**0**	0
Impairment and reversal of impairment on other non-operational assets and liabilities	**(6 424)**	2 352
Gains/(losses) on sale of assets	**510**	3 091
Non-recurring income and expenses	**(20 848)**	**273**

Restructuring expenses, provisions for major litigations, impairment and reversal of impairment on other non-operational assets and liabilities mainly include in 2014 following expenses or provisions:

- 8,8 M€ of non-recurring expenses incurred in relation with the repurchase of, or the commitment to repurchase, rights to priority dividends of certain French biologists for 4 French SELs. (refer to Note *Significant Events*)
- 0,4 M€ of restructuring expense in Spain in relation with the remaining actions of the 2013 restructuring plan implemented in the context of contract renegotiation with a major client. The corresponding use of restructuring provisions has been recorded in the line Impairment and reversal of impairment on other non-operational assets and liabilities.
- 5,3 M€ of non-recurring costs expensed mainly in relation to strategic projects, and especially the preparation of the IPO project.
- 0,6 M€ of non-recurring expenses related to a significant litigation with an IT service provider as a consequence of our laboratory Roman Pais in Belgium being condemned in appeal after 10 years of proceedings.
- 0,7 M€ of non-recurring provisions to cover the risk related to Dillenburg litigation. Indeed the share purchase agreement signed with Sonic on December 2nd 2013 stipulates a liability warranty covering notably the Dillenburg litigation. (refer to Note 27 *Litigations and contingent liabilities*).
- 1,7 M€ of non-recurring expenses related to an amicable settlement with the CPAM (Primary Sickness Insurance Funds). Indeed, a French laboratory issued erroneous invoices during several years as a consequence of an input mistake for the price of a new testing in its IT system. It voluntarily informed the CPAM of that error and an amicable settlement has been signed in order to reimburse the wrongly over-invoicing.
- 1,1 M€ of restructuring provisions in Spain in the context of the Barcelona concentration project (refer to the Note *Significant Events*).

Perimeter effect in 2014 corresponds to the transactions costs for major acquisitions projects amounting to 2,0 M€, mainly related to the strategic acquisition of SDN group in Italy implemented on July 30, 2014 as well as changes in fair value of earn-outs after the evaluation period of one year for proceeds of 152 K€. Gains on sale of assets mainly include the consolidated gain on Sabater Pharma disposal.

Note 10 Non recurring income and expenses (Continued)

Restructuring expenses, provisions for major litigations, impairment and reversal of impairment on other non-operational assets and liabilities mainly include in 2013 following expenses or provisions:

- 0,7 M€ of restructuring expenses in relation with the remaining actions of the 2011 restructuring schemes implemented in Iberia with the corresponding use of restructuring provisions.
- 0,8 M€ of restructuring expenses in relation with the French "Deep dive" efficiency program actions performed in 2013
- 0,8 M€ of restructuring provision set up in Spain in Q1 2013 for the new restructuring plan implemented in the context of contract renegotiation with a major client and provision used for 0,5 M€ during the last nine months 2013
- 1,8 M€ of non-recurring costs expensed mainly in relation to strategic projects including indirect advisors costs for the refinancing operation.
- 0,8 M€ of income related to the badwill generated by the iPP acquisition.

Furthermore the iPP step up acquisition leads also to record a non-recurring gain on sale of assets amounting to 3,4 M€ corresponding to the historical 51% Labco's share in iPP recorded previously under equity method as well as its remeasurement at fair value at acquisition date.

Perimeter effect corresponds to earn out variations of fair value subsequent to the 1 year window period for an income of 356 K€.

Note 11 Net finance costs

€ 000	2014	2013
Financial income	**878**	740
Interest Expenses on Financial liabilities measured at amortized costs	**(62 771)**	(57 746)
Other interest expenses	**(1 666)**	(1 422)
Derivatives for hedging	**(108)**	0
Derivatives at fair value through P&L	**14**	16
Subtotal Cost of net debt	**(63 653)**	**(58 411)**
Other financial expenses	**(853)**	(720)
Net Finance Costs	**(64 506)**	**(59 131)**

Other financial expenses correspond mainly to the unwinding of the discount on provisions and other financial charges like foreign exchanges gains and losses.

As a consequence of the issuance on February 13, 2013 of additional 8,5% Senior Secured Notes due 2018 for an aggregate nominal of 100 M€, the financial charges have increased proportionally.

The interest expenses correspond now mainly to the 500 M€ Senior Secured Bonds at an effective interest rate of 9%, the additional 100 M€ Senior Secured Bonds at an effective interest rate of 8.6%, and the commitments fees and amortization of RCF debt issuance costs for the undrawn part of the Revolving Credit Facility as at December 31, 2014.

Moreover, the cost of net debt include also some one-off costs related to the amendments of the revolving credit facility agreement dated January 2011 (RCF), implemented end of 2014, which substantially modified the terms and conditions. Indeed, the debt issuance costs related to the previous RCF capitalized and not yet amortized have been recorded as non-recurring financial expenses amounting to 3,1 M€ whereas the debt issuance costs related to the amended agreement have been capitalized and will be amortized over the amended maturity. Please refer to the note 23 *Borrowings and other financial liabilities* for the description of the substantial modifications negotiated especially in terms of duration, interest rate (margin decreased by 75 points) and covenants.

Note 12 Income tax expenses

Write off of Deferred Tax Assets	0	0
Cancellation of hedging financial instruments & net investment hedge	(266)	(11)
*Other (including tax rates difference impact)	(623)	(969)
Total explained	**(15 391)**	**(9 632)**

Unrecognized deferred tax assets correspond mainly to the losses incurred and the non tax deductible interests.

The Group has incurred losses for which no deferred tax asset has been recognized because to date, no expected future tax benefits, which according to financial projections based on current financing structure and conditions, can be used to offset future taxable income in a timeframe of 5 years.

The non-deductible expenses correspond mainly to the effect of the restatements of priority dividends paid to French biologists that have been classified as remuneration expenses under IFRS and as non-recurring expenses for the priority dividends rights repurchased. In fact those priority dividends are not an expense recorded in statutory books, and as a consequence it will not generate any tax benefits.

Note 12 Income tax expenses (Continued)

Tax losses and tax credits not recognised as deferred tax assets amounted to 113 M€ as of December 31, 2014, tax losses mainly originated in Iberia.

€ 000	
Total tax losses carried forward at 1 January 2014	**111 026**
Losses generated during the year	**7 182**

Note 13 Goodwill (Continued)

Impairment testing for cash-generating units containing goodwill

For the purpose of impairment testing, goodwill is allocated to groups of cash-generating units defined at the level of a country, except for Iberia (including Spain and Portugal), which represent the lowest level within the Group at which the goodwill is monitored for internal management purposes.

The aggregate carrying amounts of goodwill allocated to each group of unit and key assumptions of the impairment testing model are as follows:

€ 000	Total	France	Italy	Iberia	Germany	Belgium
Goodwill carrying amount at 31 December 2013	581 483	367 747	30 606	165 364	0	17 764
Goodwill carrying amount at 31 December 2014	**702 415**	**386 455**	**128 617**	**167 979**	**0**	**19 360**
Change in goodwill carrying amount 31.12.2014 - 31.12.2013	**120 932**	**18 709**	**98 011**	**2 615**	**(0)**	**1 597**
Perpetual Growth Rate 2013	0.5% - 2.0%	0,5%	2,0%	0,5%	NA	2,0%
Discount rate 2013	8,5%	8,5%	8,5%	8,5%	NA	8,5%
Perpetual Growth Rate 2014	**0.5% - 2.0%**	**0,5%**	**2,0%**	**0,5%**	**NA**	**2,0%**
Discount rate 2014	**8,0%**	**8,0%**	**8,0%**	**8,0%**	**NA**	**8,0%**

The recoverable amount of each cash-generating unit was based on its value in use which was determined by discounting the future cash flows generated from the continuing use of the unit. The main assumptions on which the value in use of a cash generating unit is based are the discount rate and trends in volumes, prices and direct costs (inflation) over the period. The calculation of the value in use was based on the following key components:

- The Group's 5 years business plans updated during Autumn 2014 in the context of strategic projects, rationalized with 2015 budget and with the year 2019 extrapolated using perpetual growth rate assumptions. Trends in volumes, prices and direct costs are based on past trends and on the future market outlook which include a certain level of uncertainties, especially in the current context of economic difficult environment in certain European countries.
- The cash flows projections for the years 2014 to 2019 include also:
  - Taxes impact by applying an average theoretical rate per country;
  - Working capital variance;
  - Capital expenditures corresponding in general to 2,5% of forecasted annual turnover.
- The terminal value is then calculated by discounting the forecast flows of the last year (2019) using a perpetual growth rate between 0,5% and 2% depending on the cash generating unit. This percentage is management's best estimate of the expected market evolution based on an organic growth rate such as inflation.
- The discount rate is based on the Group's weighted average cost of capital (WACC) including a leveraged beta, cost of debt and cost of equity (including market risk premium and size premium); Discount rates used are post-tax discount rates applied to post tax cash flows. Applying those rates result in value in use similar to those computed using pre-tax discount rates applied to pre-tax cash flows. (as requested by IAS 36).

Result of annual impairment testing

After having performed the annual impairment testing on goodwill, it appeared that no impairment had to be recorded.

With regards to the assessment of value in use of the cash generating units, management believes that no reasonably possible change in any of the above key assumption would cause the carrying value of the unit to exceed materially its recoverable amount.

Note 13 Goodwill (Continued)

By applying the sensitivity test to the discount rate and growth rate assumptions, it appears that an increase or a decrease of 100 basis point would not significantly change the conclusions of the impairment tests.

Note 14 Intangible assets

The line "Perimeter variations" in 2013 corresponds mainly to the effect of the full consolidation of iPP and the Taunton & Sommerset intangible contract recorded as a consequence of the measurement at fair value of assets acquired.

Impairment testing on Software and Patents and other intangible assets

As of December 31, 2014, the Group has assessed that there were no impairment indicators relating to software, patents and other intangible assets.

Note 15 Property, plant and equipment (Continued)

Leased plant and machinery

Included in the Property, Plant and equipment schedule are the finance lease plant and machinery:

€ 000	31.12.2014	31.12.2013
Leasing—Buildings & improvements (gross)	**4 015**	6 347
Leasing—Buildings & improvements—(dep)	**(293)**	(239)
Net-book value	**3 722**	**6 108**
Leasing—furniture, industrial fixtures, equipment and tooling (gross)	**45 816**	39 946
Leasing—furniture, industrial fixtures, equipment and tooling (amt)	**(29 627)**	(24 460)
Net-book value	**16 189**	**15 486**
Leasing—motor vehicles (gross)	**852**	706
Leasing—Motor vehicles (dep)	**(519)**	(447)
Net-book value	**332**	**259**
Leasing—IT equipment (gross)	**77**	72
Leasing—IT equipment (dep)	**(28)**	(12)
Net-book value	**49**	**60**
Net lease property under finance leases	**20 292**	**21 914**

The leased plant and machinery mainly relate to the automats included in technical equipment used for medical analyses. The contracts in use for this activity stipulate that, if the laboratory buys exclusively from the supplier chemical reagents for a certain indicative volume during the term of the contract, the supplier, in return, puts an automat at the disposal of the Group for free during the contractual period (referred to as "pay per test" equipment").

These "put at disposal" schemes, although not under the legal form of a leasing agreement, correspond, in substance, to a lease agreement whereby the global price paid for the reagent includes the cost of the consumable and the rent/lease of the machine. As a consequence under IFRS, such agreements are analysed in accordance with IAS 17 on leases with respect to the transfer of majority of risks and rewards.

A number of such contracts have been classified as finance leases. For these contracts, the relating finance lease assets and liabilities have been recognized on the balance sheet at the lower of the fair value of the asset and the present value of the minimum lease payment at inception of the contract. The assets are depreciated over the average lease term (60 months).

Note 16 Investments in associates

The Group's share of profit in its associates (equity accounted investees) for the year was 431 K€ (2013: (1 265) K€).

Following the acquisition of the controlling ownership in 2013 of the UK joint venture iPP and the Spanish laboratory Genetica Molecular Laboratorio SL, the remaining investments in associates of Labco Group are mainly a 49% interest in a French biology laboratory (Val de Garonne), a 36% interest in an entity, Labo des Charentes, owned by Isolab and a Spanish biology laboratory (Lab Dos Analisis).

Otherwise the Group owned interests between 10% and 50% in local Economic Interest Group (so called Société Civile de Moyens [SCM] in France and Consorzio in Italy), which corresponds to entity in which support functions are pooled and working for the Labco group labs but also other external entities. For those entities, the Group has significant influence but no control of the entities.

In 2014 the Group receives dividends from its investments in equity accounted investees for an amount of 379 K€ (2013: 329 K€).

Note 16 Investments in associates (Continued)

Details of the Group's associates at the end of the reporting period are as follows:

€ 000 Companies	31.12.2014 Equity	% interest	Gross value including goodwill	Provisions for losses
VAL DE GARONNE	2 443	**49%**	1 348	0
SCM AZURLAB	(6)	**28%**	(2)	0
SCM GRAM	(8)	**40%**	(3)	0
SCI ST COME	(122)	**48%**	0	58
CAM ECO SERVICE	165	**41%**	68	0
CONSORZIO	85	**33%**	28	0
CONSORZIO GENETICO	210	**33%**	70	0
LAB DOS ANALISIS	383	**50%**	188	0
LABO DES CHARENTES	952	**36%**	340	
Total	**4 101**		**2 037**	**58**

Summarized financial information for the main investments in associates is as follows (100% of amounts) :

€ 000	31.12.2014	31.12.2013
Current assets	**6 289**	5 879
Non current assets	**780**	814
TOTAL ASSETS	**7 069**	**6 693**
Shareholders' equity (Group share)	**4 109**	4 026
Financial debt	**69**	69
Other liabilities and provisions	**2 891**	2 598
TOTAL LIABILITIES	**7 069**	**6 693**

Income statement	31.12.2014	31.12.2013
Revenue	**17 430**	17 063
Results from operating activities	**1 146**	1 183
Net profit for the period	**754**	**786**

Note 17 Other non-current assets

€ 000	31.12.2014	31.12.2013
Available-for-sale financial assets (non consolidated investments)	**1 126**	836
Other available-for-sale financial assets	**2 524**	2 093
Deposits and guarantees	**5 415**	5 364
Derivatives used for hedging	**0**	0
Non-current receivables	**2 065**	972
Other non current assets	**11 131**	**9 265**

Non-current assets correspond mainly to deposits and guarantees provided to lessors for the renting of buildings and other premises, as well as non-current other receivables.

For entities in which the Group has an ownership below 20% or no significant influence, they are not consolidated and the investments in those entities have been classified as available for sale financial assets pursuant to IAS 39 and, as such, recognized at fair value or historical value when fair value could not be reliably estimated. Available-for-sale financial assets (non consolidated investments) and other available-for-sale assets are categorized within level 3. Unrealized gains and losses are taken directly to other comprehensive income, except for impairment losses that are recognized in the Income Statement. No unrealized gain or loss was recognized in 2014 and 2013.

Note 17 Other non-current assets (Continued)

The principal equity investments in unconsolidated companies held by the Group are as follows:

€ 000	31.12.2014	% ownership	31.12.2013	% ownership
Nancy Haut SCI	**13**	**3,16%**	13	3,16%

Clinévora, Clínica Médica de Évora, Lda.	**72**	**37,00%**	72	37,00%
Laboratorios Martinez Reig	**40**	**100,00%**	44	100,00%
CIC Peru	**0**	**70,00%**	33	70,00%
Hematologia y genetica	**29**	**49,00%**	29	49,00%
Labco Coporate Assistance	**10**	**100,00%**	10	100,00%
Labco Services France	**10**	**100,00%**	10	100,00%
Other unconsolidated equity investments	**54**		73	
Total unconsolidated equity investments	**1 126**		836	

The entities Labco Corporate Assistance and Labco Services France owned at 100% by Labco SA are not consolidated as at December 2014 because they have no activity since their creation at year-end 2012. Those entities join in 2013 the Labco SA tax integration but remain with no activity until Labco management decides otherwise. The entity Laboratorios Martinez Reig was acquired in 2012 and Hematologia y genetic has been acquired in 2013 and for both entities financial information are not available timely but they have a limited activity. CIC Peru set up in 2013 and CIC Mexico set up in 2014 are also not consolidated because they have a very limited activity and no financial information is available timely. Following the acquisition of the SDN group, we own a scientific non-profit trust, Fondazione SDN, which perform research related to improvements of nuclear medicine technologies and is involved in European program benefiting from European funds.

Note 18 Deferred tax assets and liabilities

€ 000	Notes	31.12.2014	31.12.2013
Deferred tax assets on temporary differences book to tax		**2 631**	944
Deferred tax liabilities on temporary differences book to tax		**(5 985)**	(4 957)
Tax Losses carried forward	(a)	**4 807**	5 193
Temporary differences relating to provisions (mainly retirement indemnities)		**3 681**	2 137
Temporary differences relating to fixed asset (mainly finance leases)		**(259)**	165
Deferred tax on derivatives		**46**	51
Net deferred tax		**4 920**	**3 533**
—Deferred tax assets		**10 909**	8 579
—Deferred tax liabilities		**(5 988)**	(5 046)
Net deferred tax		**4 920**	**3 533**

(a) Capitalized tax losses carried-forward represent mainly French entities for 2,1 M€, Iberian entities for 2,0 M€ and UK entities for 0,7 M€. The activation of deferred tax assets on tax losses carried forward is completed based on Labco's management estimate of the probability to use these losses within the next 5 years based on our forecasts taking into account the current financing structure and conditions.

Note 19 Inventories

€ 000	31.12.2014	31.12.2013
Raw materials	**2 538**	1 346
Reagents (net)	**8 742**	6 884
Total Inventories	**11 280**	**8 230**

There were no significant write-offs regarding inventories during 2013 and 2014. The inventories increase is mainly due to the recent start in Q4 2014 of the activity related to the Basildon & Southend outsourcing contract.

Note 20 Trade receivables and other current assets

€ 000	31.12.2014	31.12.2013
Trade receivables	**91 355**	**85 517**
Other current assets	**23 469**	**12 946**
Prepaid expenses and accrued income	**3 942**	3 377
Receivables related to taxes	**16 533**	7 438
Other receivables	**2 994**	2 130
Current derivatives	**0**	0
Trade receivables and other current assets	**114 825**	**98 463**

The increase in Trade receivables is explained by the effect of the acquisitions, especially the acquisition of the SDN group in July 2014.

€ 000	Gross	Impairment	Net
Trade receivables	**94 743**	**(3 387)**	**91 355**
Other current assets	**24 058**	**(589)**	**23 469**
Prepaid expenses and accrued income	3 942	0	**3 942**
Receivables related to taxes	16 533	0	**16 533**
Other receivables	3 583	(589)	**2 994**
Current derivatives	0	0	**0**
Trade receivables and other current assets	**118 801**	**(3 976)**	**114 825**

Note 20 Trade receivables and other current assets (Continued)

The Group's exposure to credit and currency risks related to trade and other receivables is disclosed below.

Credit risk

Exposure to credit risk

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was:

€ 000	31.12.2014	31.12.2013
Available-for-sale financial assets	**1 126**	836
Other available-for-sale financial assets	**2 524**	2 093
Cash and cash equivalents	**74 120**	167 801
Loans and receivables	**114 825**	98 463
Total	**192 595**	**269 193**

Impairment losses

The movement in the allowance for impairment in respect of loans and receivables during the year was as follows:

€ 000	2014	2013
Balance at 1 January	**(3 304)**	**(3 612)**
Increase	**(2 230)**	(1 465)
Reversal	**1 776**	1 353
Perimeter variations	**2**	(161)
Other	**(221)**	581
Balance at 31 December	**(3 976)**	**(3 304)**

In 2013, the line "Other" include the effect of the German entities disposal

The Group has no significant concentrations of credit risk due to the large number of customers and individually non-significance of amounts due. The Group performs ongoing credit evaluations of its receivables.

The actual write off relating to trade receivables as at 31 December 2014 amounts to 4,1 M€ and relates mainly to the French laboratories and several non-significant clients especially in Iberia and Belgium. As at 31 December 2013 it amounted to 2,3 M€. The increase is explained by the write off of bad debts in France for a total amount of 2,9 M€ in 2014 compared to 0,6 M€ in 2013 and with a reversal of receivable depreciation for 1,5 M€. Those one-off receivables write offs in France as at December 31, 2014 are coming out mainly from the in-depth analysis performed at year-end 2014 using the operating IT system of the SEL which resulted in identifying aged receivables barred for an amount of 1,7 M€ as well as unjustified discrepancies between amounts invoiced and paid by private hospitals in 2 SEL for 0,6 M€.

Based on historical default rates, the Group believes that, apart from the above, no additional impairment allowance is necessary in respect of trade receivables. At 31 December 2014, as for 2013, the Group does not have any collective impairment on its loans and receivables or its investments, impairment allowances are analyzed on a case by case basis depending on the country and the customers' credit analysis.

Note 21 Cash and cash equivalents

For the purposes of the consolidated statement of cash flows, cash and cash equivalents include cash on hand and in banks, net of outstanding bank overdrafts and cash equivalent. Cash and cash equivalents

Note 21 Cash and cash equivalents (Continued)

at the end of the reporting period as shown in the consolidated statement of cash flows can be reconciled to the related items in the consolidated statement of financial position as follows:

€ 000	31.12.2014	31.12.2013
Cash equivalents	**15 286**	115 787
Cash on hand and bank deposits	**58 834**	52 014
Cash and cash equivalents	**74 120**	**167 801**
Bank overdrafts	**(79)**	(372)
Cash and cash equivalents in the statement of cash flows	**74 041**	**167 430**

Cash equivalents correspond, according to the categorization by hierarchy of fair values as stated by IFRS 7, to financial instrument of level 1. The amended Revolving Credit Facility ("RCF amended") covenants impose to keep a minimum cash balance of 15 M€ at each quarter end.

Note 22 Capital and reserves attributable to owners of the parent

Ordinary shares

As at December 31, 2014 the authorised share capital comprised 68 736 187 shares. The shares have a par value of one euro (1 €), all shares being fully paid. The shares are denominated into five types, the holders of shares are entitled to the same rights to receive dividend, and are entitled to one vote per share at general meetings of shareholders of the Company. The share capital of Labco is divided into five types of shares, each held by a different category of shareholder:

- certain laboratory doctors from whom we acquired clinical laboratories (the "A Shareholders");
- our shareholders known as "founders" (the "B Shareholders");
- financial investors (the "C Shareholders"); and
- other shareholders (the "D Shareholders" and the "Ordinary Shareholders") such as our management, family members and estate planning entities of the laboratory doctors who are also our A Shareholders.

Certain laboratory doctors of our Group are A Shareholders, holding together with some of their affiliates who are also A Shareholders, approximately 17.1% of the Company's share capital. These laboratory doctors became shareholders of the Company by reinvesting a part of the purchase price we paid to acquire their laboratories.

The B Shareholders, representing the "founding" shareholders of our Group, are Eric Souêtre, Stéphane Chassaing, Luis Vieira and the shareholders from whom we acquired "General Lab S.A." in 2007. Together, they hold approximately 16,7% of the Company's share capital.

The C Shareholders are financial investors who together hold approximately 41,7% of the Company's share capital. To date, the investment vehicles managed by "3i" are, together, our largest shareholder, the latter having invested €115 million and holding approximately 17,6% of our share capital. "3i" is an international investor focused on private equity, infrastructure and debt management. Other financial investors include notably Viking Limited, a private equity firm that invested in Labco in 2004, CM-CIC Investissements, TCR Capital and Ixen Investissement.

The D Shareholders and the Ordinary Shareholders, comprised of our management and the family members and estate planning entities of the laboratory doctors who are also our shareholders, hold the remaining approximately 24,5% of the Issuer's share capital (i.e., approximately 23,4% of D shares and 1,1% of ordinary shares).

The remaining part of the share capital, ie approximately 0,1%, is held by the Company as Treasury shares.

In number of shares	2014	2013
On issue at 1 January	**68 459 322**	**68 459 322**
Issued for cash	**276 865**	
Exercise of share options		
On issue at 31 December	**68 736 187**	**68 459 322**

Issuance of ordinary shares during the period

On June 30, 2014, the board of directors recorded an increase in the share capital and additional paid in capital of 2 215 K€ by the issuance of 276 865 A shares at a subscription price of €8,00 per share.

In total, the share capital amounts to €68 736 187 as at December 31, 2014.

Hedging reserve

The hedging reserve comprises the effective portion of the cumulative net change in the fair value of cash flow hedging instruments related to hedged transactions that have not yet occurred and of net investment hedge.

Stock option plan reserve

The stock option reserve comprises the employee expenses relating to the share-based payment plans of the Group.

Actuarial gains and losses reserve

The actuarial gains and losses reserve comprises the cumulative net change in actuarial gains and losses (due to discount rate and main actuarial assumptions) computed for the long term employee benefits valuation.

Reserve for own shares

The reserve for own shares comprises the costs of the Company's shares held by the Group. As of December 31, 2013, the Group held 646 K€ of the Company's shares, corresponding to 80 709 shares. As of December 31, 2014, the Group held 646 K€ of the Company's shares, corresponding to 80 709 shares (80 707 A shares and 2 D shares).

Dividends

No dividends were declared and paid to the shareholders of Labco SA during 2013 and 2014.

Moreover a shareholder's general meeting held on March 17, 2014 has decided (i) a distribution of the share premium to the shareholders for an amount of €21 906 983,06, i.e., €0,32 per shares, and (ii) a setup of a specific reserve for the warrants holders for an amount of €2 442 589,49, which will be distributed when they exercise the rights attached to their warrants, if the conditions for exercising are met. The specific reserve for the warrants holders has been increased to an amount of €5 076 494,86 by the shareholder's general meeting held on June 19, 2014.

As at December 31, 2014 the share premium distribution was nearly fully paid for an amount of 21,5 M€.

Equity Warrant schemes

Labco has issued warrants to financial investors and key management personnel of our Group.

Note 22 Capital and reserves attributable to owners of the parent (Continued)

Warrants Issued to Financial Investors

During the year ended December 31, 2008, the Company issued three warrant schemes entitling the holders, upon exercise of the warrants to subscribe for other financial instruments or shares of the Company at a fixed price of €1 per share.

The number of warrants that can be exercised depends on the ability of the Group to meet certain financial and operational targets. The exact terms of the exchange at the exercise dates were determined when the Company entered into the issuance agreements. Subject to the fulfillment of their conditions, the warrants are exercisable at any time during a period of 15 years after their date of subscription.

A total of 4 223 394 "ABSA C1" were issued, i.e., 4 223 394 Class C shares to which a total of 16 893 576 warrants of four different kinds were attached, providing subscription rights for a maximum of 4 113 531 new Class C shares at a price of €1 per share. A total of 80 878 shares were issued in 2009 by the exercise of 80 878 warrants attached to the "ABSA C1", pursuant to their terms and conditions.

A total of 4 223 394 "ABSA C2" were issued, i.e., 4 223 394 Class C shares to which a total of 8 446 788 warrants of two different kinds were attached, giving subscription rights for a maximum of 2 323 852 new Class C shares at a price of €1 per share. A total of 27 049 shares were issued in 2010 by the exercise of 27 049 warrants attached to the "ABSA C2", pursuant to their terms and conditions.

A total of 1 967 083 "BEABSA" were issued, i.e., 1 967 083 options giving subscription rights for a maximum of 2 097 145 "ABSA C3", i.e., 2 097 145 Class C shares to which a total of 4 541 820 warrants of two different kinds could be attached, giving subscription rights for a maximum of 1 176 860 new Class C shares at a price of €1 per share. A total of 2 020 660 "ABSA C3" were issued in 2009 by exercise of the 1 967 083 "BEABSA", pursuant to their terms and conditions.

A total of 54 367 C shares were issued in 2012 by the exercise of 54 367 financial investors warrants.

On January 18, 2013, general meetings of holders of certain securities issued by Labco and an extraordinary general meeting of Labco's shareholders decided to amend the terms and conditions of the ABSA C1, ABSA C2 and BEABSA in order to modify their conditions of exercise.

No financial investors' warrants were exercised during 2014.

In subsequent period, an agreement has been signed on January 21, 2015 according to which Labco SA is committed irrevocably to acquire, at the date of settlement and delivery of the Company's shares issued or sold as part of an initial public offering of Labco SA, all the warrants BSA 10x (one of the category of warrants attached to the ABSA C1, ABSA C2 and BEABSA) from their holders at a total price of 6,6 M€.

Warrants Issued to Mezzanine Lenders

Three additional warrant schemes were issued by the Company in July 2008. These warrants entitle the holders upon exercise of the instrument to buy one share of the Company at either a fixed price of €1 (mezzanine B and C) or €14,206582 (mezzanine A) per share. The warrants were granted at a price of €0,0001 per warrant. A total of 494 241 Senior Mezzanine warrants, split in 313 243 Senior Mezzanine A, 38 752 Senior Mezzanine B and 142 246 Senior Mezzanine C, were issued. A total of 6 018 shares were issued in 2010 by exercise of 6 018 Senior Mezzanine B warrants, pursuant to their terms and conditions.

A total of 1 464 175 Junior Mezzanine warrants, consisting of 927 975 Junior Mezzanine A, 114 800 Junior Mezzanine B and 421 400 Junior Mezzanine C, were issued. A total of 17 829 shares were issued in 2010 by exercise of 17 829 Junior Mezzanine B warrants, pursuant to their terms and conditions.

A total of 1 460 443 Junior additional Mezzanine warrants, consisting of 925 609 Junior Additional Mezzanine A, 114 508 Junior Additional Mezzanine B and 420 326 Junior Additional Mezzanine C, were issued. A total 17 784 shares were issued in 2010 by exercise of 17 784 Junior Additional Mezzanine B warrants, pursuant to their terms and conditions.

On January 18, 2013, Labco entered into a settlement agreement with the Mezzanine lenders and the C Shareholders regarding the exercise conditions of certain Mezzanine warrants.

No mezzanine lenders' warrants were exercised in 2014.

Note 22 Capital and reserves attributable to owners of the parent (Continued)

In subsequent period, an agreement has been signed on January 21, 2015 according to which Labco SA is committed irrevocably to acquire, at the date of settlement and delivery of the Company's shares issued or sold as part of an initial public offering of Labco SA, all the warrants BSA Mezzanine C from their holders at a total price of 1,0 M€.

Ordinary and Extraordinary Shareholder's General Meeting of October 2, 2014

The ordinary and extraordinary shareholder's general meeting held on October 2, 2014 has authorized the Board of Directors to grant, during a 2 month period and only once, free shares of the Company to officers and employees, with no preferential subscription right, and up to 1% of the share capital and subject to performance conditions. (refer to note 25 *Share based payment schemes*)

The Company is currently considering an initial public offering and in connection with such project, the above shareholder's general meeting has also delegated to the Board of Directors, for a 15 month period, the authority to decide a share capital increase of the Company, without preferential subscription right for the shareholders, through the public offering, on one or more times, of ordinary shares up to a maximum total nominal amount of €50,000,000.

Moreover, as part of this project, the ordinary and extraordinary shareholder's general meeting has also, subject to the non-retroactive condition precedent of settlement and delivery of the Company's shares issued or sold as part of its initial public offering, (i) appointed nine directors, including seven independent directors, (ii) authorized a share redemption program of its own shares by the Company, (iii) granted to the Board of Directors a number of delegations of authority to increase the share capital of the Company and to issue shares or securities giving access to the share capital of the Company, with or without preferential subscription right for the shareholders, (iv) authorized the Board of Directors to grant free shares or options to subscribe for or purchase shares of the Company to officers and employees, (v) to amend the by-laws of the Company, and (vi) to amend the terms and conditions relating to the exercise of the BSA 2008 and BSA 2010 share warrants.

Note 23 Borrowings and other financial liabilities

This note provides information about the contractual terms of the Group's interest-bearing loans, borrowings, which are measured at amortized cost, and other financial liabilities. For more information

Note 23 Borrowings and other financial liabilities (Continued)

about the Group's exposure to interest rate, foreign currency and liquidity risk, see note 29 *Financial Instruments*.

Labco performed a refinancing operation early 2011 with an additional issuance early 2013 that significantly modified the sources of fundings for Labco Group.

On January 14, 2011, Labco SAS issued High Yield Senior Secured Notes (also, the "Bond") due 2018 for 500M€ with international investors in London and with Deutsche Bank as Trustee. The main terms and conditions of the Notes are:

- Fixed interest rate amounting to 8.5%, with interests paid semi-annually in arrears.
- Maturity of the Notes is January 15, 2018
- The Notes are guaranteed on a senior secured basis by certain subsidiaries, mainly through first ranking liens over the capital stock of certain subsidiaries and certain present and future intercompany loan receivables
- Under the Notes indentures, Labco will have to respect certain covenants mainly related to reporting and information requirement.
- The Notes have been listed on the Official List of the Irish Stock Exchange and admitted to trading on the Irish Stock Exchange.

The Notes proceeds have been primarily used to repay the December 31, 2010 existing bank debt facilities as well as fees related to this operation. Fees directly linked to the debt issuance or linked to the strategic refinancing project amounted to approximately 16 M€ (excluding VAT) and following their analysis have been either expensed or capitalized as debt issuance costs to be amortized over the Notes maturity using the effective interest rate method.

At the same time end of January 2011, Labco SAS entered into a 135 M€ revolving credit facility under a syndicated Revolving Credit Facility Agreement (the "RCF") with Credit Suisse, Deutsche Bank, Natixis and UBS as lead banks, and Natixis as agent. The main terms and conditions of the RCF were described in the Note 23 *Borrowings and other financial liabilities* of the Labco Group consolidated audited financial statements for the year ended December 31, 2013.

Fees directly linked to the debt issuance amounted to approximately 8.8 M€ (excluding VAT) in 2011 and have been capitalized as debt issuance costs to be amortized over the RCF maturity using the effective interest rate method.

On December 18, 2014, Labco SA negotiated and signed an amendment of the revolving credit facility (RCF) agreement dated January 2011 which substantially modified certain conditions, especially in terms of duration, interest rates (decreased by 75 basis points) and covenants.

The main terms and conditions of the RCF are:

- The amount of the facility is fixed at 128.25 M€ until maturity of the RCF on December 24, 2017, or February 15, 2019 in case of refinancing of the high yield bonds of Labco.
- Floating interest rate defined as Euribor + a margin of 3.75% per annum (margin that may be reduced to 3.25% or 2.75% per annum by reference to a total net debt to adjusted EBITDA test, ie leverage covenant);
- The commitment fees amount to 40% of the margin
- Borrowings under the RCF will mandatory be used to finance part or all of purchase price and related costs of certain permitted acquisitions (as defined in the agreement), refinance existing indebtedness of entities acquired, finance restructuring costs in relation with acquisition, finance capital expenditure and fund working capital and other general corporate purposes of the Group, provided that the aggregate outstanding amounts of utilization under capital expenditure or working capital funding may not at any time exceed 50 M€;
- The RCF is guaranteed on a joint and several basis by certain subsidiaries qualified as Guarantors, mainly through first ranking liens over the capital stock of certain subsidiaries and certain present and future intercompany loan receivables. The RCF requires that the EBITDA of the Guarantors represent not less than 70% of consolidated EBITDA of the Group;
- The Revolving Credit Facility Agreement also requires Labco, each Borrower and each Guarantor (together, the "Obligors") to observe certain customary affirmative and restrictive covenants, subject to certain exceptions, including:
  - covenants relating to financial information and accounting policies;
  - covenants relating to obtaining required authorizations; compliance with laws; compliance with environmental laws; information about environmental claims; payment of taxes; *pari passu* ranking of unsecured payment obligations; insurance; granting of access; intellectual property; compliance with financial assistance laws; guarantor coverage (as described above); publicity; limitations on disposals and reorganizations; additional restrictions on distribution of dividends;
  - no other financial indebtedness ranking senior to, or *pari passu* with, the RCF (other than, subject to lenders' consent, additional revolving credit facilities);
  - restriction on incurring additional indebtedness subject to customary exceptions including up to (i) 35 M€ at any time for all members of the Group and (ii) a "capital lease" basket of 30 M€ which may be increased to a maximum of 50 M€ depending of turnover evolution, and (iii) 15 M€ at any time for any other members of the Group than the borrowers and the guarantors ; and
  - restriction on incurring recourse factoring or similar arrangements in excess of 5.0 M€ in aggregate at any time.

The Revolving Credit Facility Agreement also requires Labco to ensure compliance with some financial covenants detailed below.

As a consequence, the initial 2011 debt issuance costs capitalized and not yet amortized have been recorded as non-recurring financial expenses for an amount of 3,1 M€ whereas the debt issuance costs for

Note 23 Borrowings and other financial liabilities (Continued)

the new amended revolving credit facility amounting to 2,8 M€ have been capitalized and will be amortized over the maturity of the amended RCF using the effective interest rate method.

An Intercreditor Deed Agreement has also been signed between, among others, the Obligors, Deutsche Bank AG, London Branch as Security Agent, Natixis as senior Agent, Deutsche Bank AG, London Branch as Senior Secured Notes Trustee, the Lenders (as Revolving Credit Facility Lenders), the Arranger (as Senior Arrangers), the Hedge Counterparties (each as defined in the Intercreditor Deed), and the Intra-Group Lenders (as defined in the Intercreditor Deed) to define securities and guarantees provided by certain subsidiaries in the context of Bond and RCF issuance.

Moreover, Labco S.A. issued on February 13, 2013 100 M€ in aggregate principal amount of its 8.5% Senior Secured Notes due 2018, which constitutes an add-on of, and form a single class with, Labco's existing 500 M€ 8.5% Senior Secured Notes due 2018. The Additional Senior Secured Notes will mature on January 15, 2018. The gross proceeds of the issuance amounts to 103 M€, ie meaning a yield of 7.75% and were used to repay the outstanding amounts borrowed under Labco's revolving credit facility, pay the costs, fees and expenses in relation to the issuance transaction and for general corporate purposes.

Fees directly linked to the debt issuance or linked to the strategic refinancing project amounted to 3,7 M€ (excluding VAT) and following the analysis were either expensed for around 0,3 M€ or capitalized as debt issuance costs for 3,4 M€. Capitalized debt issuance costs have also been netted with issuance premium amounting to 3,0 M€ and the net balance of capitalized debt issuance costs has to be amortized over the bond maturity using the effective interest rate method.

In addition, in subsequent period, Labco SA issued on February 11, 2015 100 M€ in aggregate principal amount of its 8.5% Senior Secured Notes due 2018, which constitutes an add-on of, and form a single class with, Labco's existing 600 M€ 8.5% Senior Secured Notes due 2018. Please refer to 34 *Events after the reporting period.*

As a consequence, the revolving credit line (amended RCF) amounting to 128,25 M€ and drawn for 108 M€ at that date, has been partially reimbursed up to 100 M€ but not canceled.

As of December 31, 2014, the Group borrowings comprises

- A €600 million, in principal, 8,5% Senior Secured Notes due 2018 net of debt issuance costs, with interests paid semi-annually in arrears
- Some bilateral bank borrowings for a total of 13,6 M€
- The Revolving Credit Facility (amended RCF) amounting 128,25 M€ has been drawn as at December 31, 2014 for an amount of 75 M€. Nevertheless the capitalized debt issuance costs are amortized over RCF maturity.

8.5% Secured Senior Notes covenants

Under the Notes indentures, Labco has to respect certain covenants mainly related to reporting and information requirement.

Revolving Credit Facility (RCF) covenants

The RCF includes certain financial covenants as defined in the agreements.

- leverage ratio tested quarterly (calculated as the ratio of consolidated total net debt at each quarter end to consolidated adjusted EBITDA for the 12 months ending on that quarter end),

Note 23 Borrowings and other financial liabilities (Continued)

- super senior gross leverage ratio tested quarterly (calculated as the ratio of total super senior gross debt at each quarter end to adjusted EBITDA for the 12 months ending on that quarter end) which should achieve the following ratio for any period: < 1.75 ;
- minimum cash balance of €15 million, tested quarterly.

"Leverage Ratios" in clause 26.2(a) of the Revolving Credit Facility Agreement is as follows:

Relevant Period	Ratio
Until 31 December 2015	5.50:1
From 1st January 2016 to 31 December 2016	5.25:1
After 1st January 2017	5.00:1

As of December 31, 2014, Labco achieved the expected covenants ratio targets.

Furthermore, Labco should also comply with an incurrence ratio when it is willing to draw on the RCF. The incurrence ratio is calculated as the ratio of pro forma the acquisitions consolidated total net debt to consolidated adjusted EBITDA for the immediate preceding period pro forma the effect of acquisitions.

"Incurrence Ratios" in clause 27.14(c) of the Revolving Credit Facility Agreement is as follows:

Relevant Period	Ratio
Until 30 September 2015	5.50:1
From 1st October 2015 to 31 March 2016	5.25:1
From 1st April 2016 to 31 December 2016	5.00:1
After 1st January 2017	4.75:1

Furthermore, in case of an IPO of Labco SA, the agreement stipulates the further implementation of substantial modifications of interest rates and covenants.

Finance lease liabilities

The Group has finance leases mainly for the technical equipment (refer to note 15 *Property, plant and equipment*).

Note 24 Employee benefit liabilities

All of employees of the Group are covered by state pension and collective plans managed by third parties if required under local legislation. Those plans are defined contribution plans.

In addition to these legal pension schemes, a provision is set up for post-employment benefits in France and Italy amounting to 14,0 M€ as of December 31, 2014 (11,0 M€ and 3,0 M€ respectively). In Italy, there is a legal obligation (so called TFR) to pay 7,4% of the employee's annual remuneration for every working year at the departure date.

In France the principal assumptions used for the purposes of the actuarial valuations are as follows:

Principal assumptions	2014	2013
Voluntary departure	**100%**	100%
Discount rate	**1,75%**	3,15%
Social charge rate	**52%**	52%
Employer contribution rate	**50%**	50%
Age at retirement	**67 years**	67 years
Salary increase	**1,5%**	1,5%
Employee turnover rate	**low**	low

The collective agreement for the clinical diagnostic laboratories has been modified in 2014 with the withdrawal of the haircut of 30% on indemnities to be paid to non-executive staff as a consequence of the alignment of conditions for non-executive staff on the one for executives.

Note 24 Employee benefit liabilities (Continued)

The movements in the provision for post employment benefits in France and in Italy can be summarized as follows:

€ 000	French Post Employment benefit	Italian Post Employment benefit	Total
Balance at 1 January 2014	**6 623**	**1 997**	**8 620**
Current service cost	(266)	65	**(201)**
Interest cost on benefit obligation	201		**201**
Net actuarial loss recognised in OCI	4 076		**4 076**
Impact from business combination	331	972	**1 303**
Balance at 31 December 2014	**10 965**	**3 034**	**13 999**

The French post employment benefit and the portion of TFR before January 1st, 2007 accounted for as post employment benefit are not financed through external fundings.

The cumulative net actuarial gains and losses recognized in OCI is detailed in the table Other comprehensive Income and amount to (4 123) K€ (2013: 323 K€).

Note 25 Share based payment schemes

__Warrants Issued to Management__

On March 24, 2005, the Company established two manager share warrant schemes (denominated “BSA 2005-1-1” and “BSA 2005-1-2”) that entitle key management personnel to subscribe for new shares of the Company, subject to the fulfillment of the conditions detailed in the corresponding issuance agreements. On June 7, 2006 (“BSA 2006-1-1”), March 13, 2007 (“BSA 2007-1-1”), December 30, 2007 (“BSA 2007-1-2”), March 5, 2008 (“BSA 2008-1-1”) and September 20, 2010 (“BSA 2010-1-1”), additional manager share warrant schemes were implemented in favor of key management personnel of the Group.

Each share warrant gives the beneficiary the right to subscribe for one share of the Company at an exercise price determined on the allocation date, on predetermined graded vesting dates. The exercise conditions mainly depended on certain financial targets and, in some cases, include an employment condition. The meeting of the Strategic Committee of the Company held on April 23, 2008 established that the exercise conditions of the three categories of share warrants issued on June 7, 2006, March 13, 2007 and December 30, 2007 (BSA 2006-1-1, BSA 2007-1-1 and BSA 2007-1-2) were fulfilled, pursuant to their terms and conditions, so as to allow the holders to exercise such share warrants at any time.

The general meeting of shareholders held on December 30, 2008 modified the terms and conditions of the two categories of share warrants issued on March 24, 2005 (BSA 2005-1-1 and BSA 2005-1-2) to remove all constraints in order to allow the holders to exercise such share warrants at any time. As a result of these decisions and the modifications to the schemes, the beneficiaries can exercise the share warrants granted by these five schemes at any time, within a period of ten years following the date of subscription. According to IFRS 1, the Group did not apply IFRS 2 to 2005, 2006 and 2007 share-based payment arrangements since they had vested at the date of transition.

For the BSA 2008-1-1 scheme, the share warrants vest in 2009, 2010 and 2011. For the BSA 2010-1-1 scheme, the share warrants can be exercised only upon the sale or initial public offering of the Company.

The Ordinary and Extraordinary Shareholder’s General Meeting of October 2, 2014 decided, subject to the non-retroactive condition precedent of settlement and delivery of the Company’s shares issued or sold as part of an initial public offering, to amend the terms and conditions relating to the exercise of the BSA 2008 and BSA 2010 share warrants by enabling their holders to exercise their BSA without any condition and at any time between June 1st 2015 and December 31, 2017.

No warrants issued to management were exercised in 2014.

The 2008 BSA and 2010 BSA schemes are now fully vested, there is no IFRS 2 expense in 2014 related to those two schemes.

A performance share plan was implemented in the UK in April 2014, benefiting iPP’s two main managers through a “UK Employee Shareholders Scheme”. Under that plan, 7% of iPP’s shares were

Note 25 Share based payment schemes (Continued)

awarded to those managers. The economic rights to those shares are subject to a 5-year vesting period (20% per year). Those managers have been granted a put option that can be exercised when all the economic rights to the shares have vested. The Company has a call option that can be exercised one year after the end of the vesting period and at any time in the event of a change in control of the Company or iPP. The valuation of the shares is based on a price formula specified in the contract relating to that option. That plan has therefore been analysed as a share based payment scheme cash settled, the estimated charge corresponding to the share award plan is subject to regular measurement in the Group's financial statements.

The ordinary and extraordinary shareholder's general meeting held on October 2, 2014 has authorized the Board of Directors to grant, during a 2 month period and only once, free shares of the Company to officers and employees, with no preferential subscription right, and up to 1% of the share capital and subject to performance conditions. The Board of Directors has used that delegation and established in November 2014 a free shares award schemes (hereafter "Free shares 2014") which grant to the beneficiaries up to 687 361 free shares, subject to the achievement of the conditions detailed in the issuance agreement. Those conditions include cumulatively a performance condition and conditional to an active employment period of 2 years. IFRS 2 has been applied to the scheme Free shares 2014 which qualifies as share based payment equity settled. The shares are definitively granted after a vesting period of 2 years with an obligation to keep the shares for an additional 2 years period. The fair value of the services rendered in exchange of the free shares is based on the fair value of the free shares granted, estimated with the assistance of an external valuation advisor, by using the business plan and applying assumptions consistent with the one used especially for the impairment tests. An illiquidity discount and a staff turnover rate has been used in order to determine the fair value of the granted free shares and the full amount of shares has been granted given the performance condition was achieved as at December 31, 2014. The total fair value of the "Free shares 2014" has been estimated to 4,2 M€.

The total amount of Fair Value reserves related to the stock options and performance stocks plans amounts to 4,1 M€ as at December 31, 2014 (3,8 M€ as at December 31, 2013).

Terms and conditions of the share option programs

The terms and conditions relating to the grants of share warrants are as follows; all share warrants are to be settled by physical delivery of shares:

Plan	Number of instruments	Exercise period	Exercise price	Option price	Average fair value at grant date
BSA 2005-1-1	907 067	At any time between 30 December 2008 and 23 June 2015	1	0,1	0,21
BSA 2005-1-2	108 782	At any time between 30 December 2008 and 23 June 2015	1	0,1	0,21
BSA 2006-1-1	6 796	At any time between 23 April 2008 and 7 June 2016	1	0,1	1,08
BSA 2007-1-1	109 806	At any time between 23 April 2008 and 13 March 2017	2,5	0,25	1,34
BSA 2007-1-2	104 337	At any time between 23 April 2008 and 30 December 2017	2,5	0,25	3,74
BSA 2008-1-1	438 317	At any time between 1 January 2009, 1 January 2010 and 1 January 2011 (each tranche ⅓ of the options)	8	0,8	4,97
BSA 2010-1-1	191 668	Upon sale or initial public offering of Labco	14,84	1,5	7,02
Total	**1 866 773**				

The Ordinary and Extraordinary Shareholder's General Meeting of October 2, 2014 decided, subject to the non-retroactive condition precedent of settlement and delivery of the Company's shares issued or sold as part of an initial public offering, to amend the terms and conditions relating to the exercise of the

Note 25 Share based payment schemes (Continued)

BSA 2008 and BSA 2010 share warrants by enabling their holders to exercise their BSA without any condition and at any time between June 1st 2015 and December 31, 2017.

In subsequent period, certain holders of BSA 2005-1-1 have exercised their warrants. Refer to note 34 *Events after the reporting period.*

Given the dilutive effect of March 12, 2012 capital increase at par value, all equity warrants holders have been granted a protection right against the dilutive effect. In fact, pursuant to the ninth resolution adopted by the general shareholders' meeting held on March 12, 2012, holders of securities granting access to the share capital will be allowed to subscribe to new shares as of right, at the ratio of four new shares with a par value of one euro each for seven shares subscribed with their securities (seven shares subscribed by exercise of their securities granting access to the share capital giving the right to subscribe to four additional new shares at a subscription price of one euro per share).

Fair value of the options granted during the period

The fair value of the services received in return for share options is based on the fair value of the share options granted, measured using the Binomial model for BSA 2008 scheme and using a weighted average models of scenarios for the "BSA 2010-1-1" scheme, for the UK plan and for the Free shares 2014 scheme.

The Group recognized as share-based payment expense 1 222 K€ during the year for the UK plan and the Free shares 2014 scheme as well as social charges to be paid in France for the French beneficiaries of the free shares scheme for an amount of 743 K€. In 2013 it was 336 K€ for 2010 BSA scheme. The total amount of reserves related to the stock options plans amounts to 4 118 K€ (3 840 K€ in 2013).

Movements in share options during the year

€ 000	2014 Number of share options	2014 Weighted average exercise price	2013 Number of share options	2013 Weighted average exercise price
Outstanding at the beginning of the year	**1 954 373**	**5**	1 954 373	5
Granted during the year	**0**	**0**	0	0
Forfeited during the year	**(87 600)**	**0**	0	0
Exercised during the year	**0**	**0**	0	0
Expired during the year	**0**	**0**	0	0
Outstanding at the end of the year	**1 866 773**	**5**	1 954 373	5
Of which exercisable at the end of the year	**1 675 105**		1 675 105	

No options have been exercised in 2013 or in 2014.

As a reminder, the protection right of equity warrants holders against the dilutive effect of March 12, 2012 capital increase enables them to subscribe in case of exercise of the warrants new shares at the ratio of four new shares with a par value of one euro each for seven shares subscribed with their securities.

Note 26 Provisions

€ 000	Provisions for litigations	Provisions for restructuring	Other provisions	Total

The "Other" line corresponds mainly to the effect of SDN group acquisition.

Note 26 Provisions (Continued)

Provisions for litigation

In the normal conduct of its business, the Group has legal suits relating to different matters (personnel, taxes, suppliers) with uncertainties about the amount or timing of the outflows. According to management and as confirmed by legal counsels, the recorded provision is considered to be sufficient to cover probable losses.

The provision recorded by SDN covers the risk to pay a tax for the care of the doctors for which the tax base is currently disputed by some companies in the medical sector in front of the court. SDN has paid every year, for several years, the tax based on only the turnover generated by the doctors whereas an interpretation may result in considering that the tax base should include the full turnover of clinical diagnostic company.

The Group has recorded a non-recurring provision amounting to 650 K€ for covering the risk related to the Dillenburg litigation. Indeed the share purchase agreement for the disposal of the German entities to Sonic dated December 2, 2013 stipulates a liability warranty clause covering notably that Dillenburg litigation (refer to Note 27 *Litigations and contingent liabilities*).

The Group had recorded a provision for risk amounting to 520 K€ as at December 31 2011 covering the litigation related to the Fosty entity, former executive administrator of Labco SA at the time it was a private limited liability company (*société par actions simplifiée*). The Fosty entity was claiming, pursuant to the contract signed in 2008, damages in relation to the termination of its function decided by the Group end of 2011. Following the sentence issued by the Paris commercial court in November 2014 and the provisional execution, Labco used the provision and paid the claimed amount. However Labco SA has since appealed against the decision to the Paris Court of Appeal on January 5, 2015.

Provisions for restructuring

The provisions for restructuring correspond mainly to provisions for restructuring in Spain. They concern the restructuring implemented during Q1 2013 in the context of contract renegotiation with a major client and for which a residual provision of 0,3 M€ was recorded as at December 31, 2013 and has been used in 2014. It also includes the restructuring decided end of 2014 in the context of the Barcelona reorganization for which a provision of 1,1 M€ has been recorded as at December 31, 2014.

They also include the provision for restructuring recorded by iPP to cover the restructuring costs to be incurred during the first years of the implementation of the outsourcing contract. The iPP provision amounted to 0,8 M€ as at December 31, 2013 and has been used for 0,2 M€ in 2014.

A provision amounting to 5,6 M€ was recorded during 3rd quarter 2014 as a consequence of the commitment to repurchase the rights to priority dividends of certain French biologists for 2 French SEL. (refer to Note *Significant events*)

Other Provisions

The other provisions correspond mainly to the provision for negative share of investments in associates recorded under equity method.

Note 27 Litigations and Contingent liabilities

Group companies are involved in various legal proceedings arising in the ordinary course of business, including disputes concerning professional liability and employee related matters, as well as inquiries from governmental agencies and health insurance carriers regarding, among other things, billing issues or litigations with tax, social security and customs authorities. Provisions have been set aside for the probable costs, as estimated by the Group's entities and their counsel, for the various litigations.

As described in Note 33 *Assets and liabilities held for sale and discontinued operations* of the Labco Group consolidated audited financial statements for the year ended December 31, 2013, the Group disposed its German activities to Sonic group on December 2, 2013. As a consequence of this transaction, the contractual commitment due to the possible application of common warranty clauses is capped at usual level for this type of transaction. These warranties will expire after 18 months, except for tax issues and guarantees upon capital property, which expire at the end of the regulatory limitation period.

Note 27 Litigations and Contingent liabilities (Continued)

Pursuant to the share purchase agreement, two specific litigations existing at the date of sale to Sonic group are covered by a specific warranty without any time limitation but cap to an amount of 3 M€ in order to compensate Sonic group of any financial costs related to the evolution of those litigations starting the 1st euro and limited to the cap.

MVZ Medizinisches Fachlabor Dillenburg GmbH

A legal proceeding brought by the board of the professional association of doctors for the Nordrhein region against former Group subsidiary MVZ Medizinisches Fachlabor Dillenburg GmbH, relates to alleged over-billing and fraud relating to the manipulation of testing results and the related invoices. That litigation Dillenburg, described in the consolidated financial statements of Labco for the year ended December 31, 2012 relates to fees incorrectly invoiced to the German health insurer Kassenärztliche Vereiningung Hessen ("KV Hessen") and private mutual health insurers by the managers and previous shareholders of that subsidiary, before it was acquired by the Group. Internal audits performed by the Group found irregularities which led to civil and criminal legal proceedings against the former managers. As part of the criminal investigation led by the local prosecuting authority, victim-offender mediation took place, as a result of which the Group's former subsidiary was indemnified in an amount of 5,5 M€ under a settlement agreement with the former managers and shareholders.

Moreover the Group's former subsidiary has already made an undertaking to the board of the professional association of doctors for the Nordrhein region to correct invoices issued between July 1, 2008 and the second quarter of 2012, and to pay the recovery fees arising from the situation. Given the liability warranty to the benefit of Sonic group, Labco Group recorded a non-recurring provision to cover the risk of reimbursement of the alleged fraudulent activities with the regional health insurance body (KV) for an amount of 0,7 M€.

MVZ Labor Duisburg GmbH

Proceedings involving former Group subsidiary MVZ Labor Duisburg GmbH relate to a claim commenced on March 1, 2013 by the North Rhine Appeals Committee of Physicians and Statutory Health.

The health insurer stated that it had carried out random checks for the period between the third quarter of 2008 and the third quarter of 2011 following claims that a doctor, who has now left the subsidiary, had overprescribed drugs to a patient suffering from hemophilia.

Those checks found an abnormally large number of prescriptions for that patient. After initial proceedings against the doctor, the health insurer's supervisory body also commenced administrative proceedings against MVZ Labor Duisburg GmbH, seeking the reimbursement of prescriptions made by that doctor between April 24, 2008 and July 25, 2011, i.e. 1,3 M€. The hearing before the appeal committee took place on October 29, 2014 and the Group is awaiting its decision, but considers that the claims against its former subsidiary are without foundation.

No contingent liability has been identified for which it will be necessary to disclose information in the notes to the consolidated financial statements.

Additionally, we operate in a regulated industry. As such, in the ordinary course of business, we are subject to national and local regulatory scrutiny, supervision and controls.

Below is a summary of the challenges and proceedings brought against us by the French Ordre des pharmaciens and Ordre des médecins and of the litigation we brought against the Ordre des pharmaciens before the European Commission.

Ordre des Pharmaciens and Ordre des Médecins

In France, the Ordre des pharmaciens and, to a lesser extent, the Ordre des médecins have challenged the Group's organization and legal structure. In numerous instances, the Ordres des pharmaciens have instituted disciplinary actions against the Group's SELs or laboratory doctors. In 2003, shortly after the Group was created, the Ordre des pharmaciens and the Ordre des médecins (together, the "Ordres"), in a joint letter to the Company, expressed the view that Labco's project of creating a network of laboratories contravened the principle of independence of laboratory doctors. In that joint letter, the Ordres highlighted two aspects of the Group's structure: (i) capital ownership and voting rights arrangements between the laboratory doctors working in each SEL and the rest of the Group; and (ii) the ultimate ownership of a network of laboratories by a financial holding company not subject to the French regulations pertaining to clinical laboratories.

In keeping with this initial position, the Ordre des pharmaciens, as well as in several instances the Ordre des médecins, have raised a number of objections to the organization of the Group's French operations in the context of their administrative review of proposed changes in the articles of association or ownership structure of SELs of clinical laboratories. Those objections were communicated to the competent administrative authorities in charge of granting the administrative approvals and authorizations necessary for the Group's SELs to operate their laboratories. All such approvals and authorizations were nevertheless eventually granted. Most of the objections raised by the Ordres dealt with the capital ownership structure of the Group's SELs of clinical laboratories in France. The Ordres argued that ownership of a large majority of shares in a SEL operating a clinical laboratory by a person or entity other than the laboratory doctors working in that laboratory constituted a threat to the independence of such laboratory doctors, notwithstanding the fact that such laboratory doctors retained a majority of the voting rights at shareholders' meetings, as required by regulations. It also challenged the separation of voting rights from economic rights in such a manner. In addition, the Ordre des pharmaciens expressed the view that the qualified majority voting provisions contained in the articles of association of the Group's SELs for certain matters were incompatible with the principle of independence of laboratory doctors insofar as they took away from doctors practicing within the laboratory the final decision-making power over a number of matters pertaining to the laboratory. Finally, the Ordre des pharmaciens challenged the formula set forth in the articles of association of SELs and providing for the distribution of Priority Dividends to those laboratory doctors who are also shareholders in their laboratory company. The Ordre des pharmaciens argued that such a formula, by limiting ex ante the share of dividends to be distributed to laboratory doctors, was incompatible with the principle of the independence of laboratory doctors. Both the Ordre des pharmaciens and the Ordre des médecins have, in several cases, raised objections to the registration, based on one or more of the above grounds, of one of the Group's SELs on their respective national registries.

At the disciplinary level, the Ordre des pharmaciens brought a number of actions against certain Group SELs, as well as against laboratory doctors practicing within those SELs. Several of these actions, some of which are still pending, directly challenge the capital ownership structure and the qualified majority voting provisions contained in the articles of association of the Group's SELs as a breach of the principle of independence of laboratory doctors. The Group's SELs and laboratory doctors concerned have appealed decisions of the disciplinary body of the Ordre des pharmaciens to the highest French administrative court (Conseil d'Etat) and won a number of cases on procedural grounds. The Ordre des pharmaciens has also regularly brought, or threatened to bring, disciplinary actions against the Group's SELs for failing in a timely manner to file with it proposed changes in articles of association or capital ownership. Some of those actions are still pending. The Group's SELs and laboratory doctors concerned have appealed these decisions and have won a number of cases on procedural grounds. In addition, certain of the Group's laboratory doctors and SELs have been disciplined for failing to maintain adequate health, safety and quality standards. Certain of these disciplinary procedures, brought on the grounds of a failure to meet filing requirements or to maintain adequate quality and safety standards, resulted in decisions to close, for periods ranging from one week to several months, several of the Group's laboratories. In several instances, however, the Group successfully obtained from the competent administrative authority a requisition order to prevent such closing, arguing the public need for access to local laboratory testing services.

In 2007, the Company filed a complaint with the European Commission, arguing that the Ordre des pharmaciens had inappropriately used its administrative and disciplinary powers to impede the development of free competition and the creation of groups of laboratories in the French clinical laboratories services market. On December 8, 2010, the European Commission ruled against the Ordre des pharmaciens, finding that the Ordre des pharmaciens had (i) systematically targeted groups like Labco since 2003 with the aim of impeding their development and (ii) set minimum prices on the French market between September 2004 and September 2007, limiting the negotiation of discounts under contracts with large customers such as hospitals or insurance bodies. The European Commission held that the Ordre des pharmaciens had breached competition rules and provisions relating to restrictive business practices in the Treaty establishing the European Community by introducing such distortions to competition without this

Note 27 Litigations and Contingent liabilities (Continued)

being justified by public health grounds, and imposed a €5 million fine on the Ordre des pharmaciens and its governing bodies. According to the press release issued by the European Commission commenting on this decision, the European Commission's ruling did not extend to an appreciation of the French laws regulating the clinical laboratories market, but was only directed at the behavior of the Ordre des pharmaciens. The Ordre des pharmaciens appealed against that decision to the European General Court, which, on December 10, 2014, confirmed that the Ordre des pharmaciens had restrained competition in the clinical laboratory services market. Even though the Court confirmed the decision of the Commission, it reduced the fine imposed on the Ordre des pharmaciens from €5 to €4.75 million. Through a press release dated February 23, 2015, the Ordre des pharmaciens confirmed that it would not appeal against that decision to the Court of Justice of the European Union.

Aggrieved parties such as the Group are entitled to seek damages before French courts on the basis of the European Commission's findings as confirmed by the Court. Consequently, the Company commenced proceedings in 2013 against the Ordre des pharmaciens seeking damages. Those proceedings are still underway before the Paris Administrative Court.

Note 29 Financial instruments

The Group's principal financial instruments, other than derivatives, comprise bank loans and overdrafts, debentures, finance leases, trade payables, purchase contracts and loans granted. The main purpose of these financial instruments is to raise finance for the Group's operations. The Group has various financial assets such as accounts receivables and cash and short-term deposits, which arise directly from its operations.

Note 29 Financial instruments (Continued)

€ 000	Carrying amount	Market value	Fair value through income	Available for sale	Loans and receivables	financial liabilities measured at amortised cost	Derivatives qualifying for hedge accounting	Derivatives not qualifying for hedge accounting

Other current liabilities	61 240	61 240	662			60 578		
Trade payables	74 341	74 341				74 341		

The main risks arising from the Group's financial instruments are credit risk, liquidity risk and interest rate risk. Under our current financing strategy, the Secured Senior Notes are 8,5% fixed rate, therefore we are only exposed to market risk arising from fluctuations in interest rates of our Revolving Credit Facility (the amended RCF) drawn as at December 31, 2014 for an amount of 75 M€, but reimbursed in subsequent period with the funds obtained from the additional 8,5% Senior Secured Notes due 2018 issued for an aggregate nominal of 100 M€ on February 11, 2015. We are not required to enter into hedging transactions or to use derivative financial instruments to mitigate the adverse effects of interest rate fluctuations pursuant to the RCF Agreement. We do not enter into financial instruments for trading or speculative purposes.

Labco has only a few non-significant instrument, one for hedging the sale operations in Brazilian reals of our subsidiary CIC in 2013 and part of 2014 that qualifies under hedge accounting and one for a laboratory in Belgium accounted for as trading derivatives (fair value through P&L). Those derivatives correspond, according to the categorization by hierarchy of fair value as stated in IFRS 7, to level 2 financial instruments. Labco do not have any level 3 financial instruments.

Due to the Group's specific interest rate risk position and funding structure, risk management policies require to manage the cash flow volatility.

Liquidity risk

The Group monitors its risk to a shortage of funds using a systematic liquidity planning scheme. This scheme considers the maturity of its financial investments and assets and the projected cash flows from operations.

Please refer to Note 23 *Borrowings and other financial liabilities* for a detail of maturities of financial indebtedness, as well as for a description of the covenants in place with the RCF agreement. Under these covenants, if the Group does not respect contractual requirements, it may result in early repayment clause being activated by syndicated borrowers.

€ 000	31.12.2014	31.12.2013
Cash and cash equivalents	**74 120**	167 801
Undrawn line of credit (RCF)	**55 848**	135 000
Total gross amount of liquidity	**129 968**	**302 801**
Current loans and borrowings	**33 222**	33 666
Total liquidity net of current loans and borrowings	**96 746**	**269 136**

Note 29 Financial instruments (Continued)

Revolving Credit Facility ("RCF") covenants impose to keep a minimum cash balance of 15 M€ at each quarter end.

The refinancing operation performed February 11, 2015 has subsequently modified the source of financing, please refer to Note 34 *Events after the reporting period* and to the prospective liquidity analysis presented in that paragraph.

Interest rate risk

At the reporting date the interest rate profile of the Group's interest-bearing financial instruments was:

€ 000	31.12.2014	31.12.2013
Fixed rate instruments		
Financial assets	**0**	0
Financial liabilities	**627 016**	629 897
Variable rate instruments		
Financial assets	**74 120**	167 801
Financial liabilities	**73 848**	(3 782)

The fixed rate financial liabilities correspond to 8.5% Senior Secured Notes, the finance leasing, the recourse factoring and the bilateral loan and borrowings, that are under fixed rate, whereas the variable rate instruments correspond to cash and cash equivalent for financial assets and to the RCF drawn and floating rates loan and borrowings, as well as bank overdrafts.

The other financial instruments of the Group that are not included in the above table are non-interest bearing and are therefore not subject to interest rate risk.

Cash flow sensitivity analysis for variable rate instruments

Following the refinancing operation performed February 11, 2015 resulting in the RCF being almost fully reimbursed (refer to note 34 *Events after the reporting period*) and if RCF remains undrawn, a change of 100 basis points in interest rates would have increased or decreased the annual interest rate charges by less than 0.1 M€ (2013: 0,1 M€). If the RCF would be drawn for its maximum amount of 128,25 M€, exposure to interest risk rate on financial liabilities would amount to a maximum of 1,3 M€ for an increase of variable interest rate of 100 basis points. That limited exposure to interest rate risk on financial liabilities would be compensated by the positive effect on financial income generated by cash equivalents, which are mostly based on variable rate instruments and for which a change of 100 basis points in interest rates would have a non significant impact. This analysis assumes that all other variables remain constant.

Fair values

The basis for determining fair values is disclosed in note 3.21 *Determination of fair values*.

- *Fair value of the Group's financial assets and financial liabilities that are measured at fair value on a recurring basis*

Some of the Group's financial assets and financial liabilities are measured at fair value at the end of each reporting period. They consist mainly on private equity investments, call option on minority interests with agreed price determination formula (as detailed in note 17 *Other non current assets*) as well as contingent consideration recorded in a business combination (as detailed in note 28 *Trade and other liabilities*) which are all categorized within level 3 and for which fair values have been usually determined in accordance with generally accepted pricing models based on a discounted cash flow analysis, with the most significant input being the discount rate that reflects the credit risk of counterparties.

- *Fair value of financial assets and financial liabilities that are not measured at fair value on a recurring basis (but fair value disclosures are required)*

The fair values of financial assets and liabilities, together that are not at fair value in the statement of financial position, are not significantly different from recorded carrying amounts.

Note 29 Financial instruments (Continued)

- *Reconciliation of Level 3 fair value measurements*

The total fair value gains or losses on contingent considerations recognized in the statement of income are included in Perimeter effect line of Non recurring income and expenses detailed in note 10 *Non recurring income and expenses.*

The total gains or losses for the year relating to financial assets that are measured at fair value at the end of each reporting period are included in the line Other financial expenses detailed in note 11 *Net finance costs*. All gains and losses, if any, included in other comprehensive income related to available-for-sale unlisted shares are reported in the line Net changes in fair value of available for sale assets detailed in the Consolidated statement of comprehensive income.

No transfer out of level 3 category have been performed given the nature of financial assets and liabilities measured at fair value.

Note 30 Capital commitments and contingencies

Operating lease and commercial commitments

The Group has entered into commercial leases on certain motor vehicles and items of machinery. These leases have an average life of between two and five years with no renewal option included in the contracts.

€ 000	31.12.2014	31.12.2013
Within one year	**7 579**	5 675
Between 1 and 5 years	**6 672**	4 817
More than 5 years	**171**	156
Operating lease Equipment	**14 422**	**10 648**

Furthermore Labco leases almost all of the properties where its labs are located. The lease in France is on a 3/6/9 year lease contracts and in Portugal and Spain, situation is such that Labco can exit leases at 6-12 months notice.

€ 000	31.12.2014	31.12.2013
Within one year	**20 583**	18 906
Between 1 and 5 years	**57 659**	43 596
More than 5 years	**17 014**	14 274
Operating lease Buildings	**95 257**	**76 776**

Operating lease expense related to property amounted to 26,2 M€ in 2014 (2013: 22,1 M€) and equipment lease expense of around 7,9 M€ (2013 : 7,2 M€).

Finance lease and commercial commitments

The Group has entered into finance leases and commercial commitments on certain testing equipments as well as motor vehicles, items of machinery or IT equipments.

Reagents suppliers in certain instances provide the testing equipment free of charge to laboratories in exchange for exclusive purchasing commitments, including sometimes minimum volume commitments. Management believes minimum volume commitments for consumables are substantially below current volumes and therefore we do not consider these minimum purchase commitments to be material for us.

As stated in *Note 15 Property, Plant and Equipment*, some of these contracts have been qualified as capital lease over an average duration of 5 years because the contracts have tacit renewal clauses, but no

Note 30 Capital commitments and contingencies (Continued)

purchase options. Renewals are at the option of the specific entity that holds the leases. Future minimum lease payments under the finance leases are as follows:

€ 000	31.12.2014	31.12.2013
Within one year	**6 453**	6 430
Between 1 and 5 years	**10 013**	12 072
More than 5 years	**3 499**	5 748
Total finance lease commitments	**19 965**	**24 250**

Off balance sheet commitments given and received

As of December 31, 2014, the Group's off-balance sheet commitments consist principally of guarantees given in the course of its investing and financing activities, especially securities given to secure the Notes and the RCF, or also for the Group cash pooling activities.

Indeed the obligations taken by Labco in the Senior Secured Notes indentures and by the borrowing entities, direct subsidiaries of Labco, according to the RCF agreement, have been guaranteed by commitments given by a certain number of Group entities, called Guarantors.

The amended RCF dated December 18, 2014 stipulates, until the high yield bonds have not been refinanced, that the commitments from borrowers pursuant to RCF agreement are jointly guaranteed like for the high yield bonds (i) by the company Labco SA (ii) by some subsidiaries representing more than 70% of the Group EBITDA and (iii) by any subsidiary that would be acquired and for which the EBITDA would be equal or greater to 3 million euros.

Furthermore, until the high yield bonds have not been refinanced, the commitments guaranteeing the amended RCF are the same than the one guaranteeing the high yield bonds. They are mainly composed of (i) pledge over the shares of certain subsidiaries and over the shares of all entity acquired for which the EBITDA is equal or greater than 3 million euros and (ii) the pledge over the long term intercompany loans receivables under any intra group loan in excess of 5 million euros.

All those commitments given have been renewed on December 18, 2014 in the context of the amendment to the revolving credit facility (amended RCF) and extended on February 11, 2015 to cover the additional €100 million 8.5% Senior Secured Notes due 2018, given they constitute an add-on of, and form a single class with, Labco's existing 600 M€ 8.5% Senior Secured Notes due 2018.

Note 30 Capital commitments and contingencies (Continued)

As at December 31, 2014, the Guarantors are the following entities:

Guarantors

Country	Name of Guarantor	Registration number (or equivalent, if any) Jurisdiction of Incorporation

Note 32 Related party transactions

Transactions with key management personnel

Key executive management compensation

With the exception of the standing independent members of the board of directors, members of the board of directors and the executive committee receive no compensation for their services on either of these committees. The independent member of the board of director, Daniel Bour, received in 2014 a compensation of €40 000 per year.

Note 32 Related party transactions (Continued)

Certain members of the board of directors (Philippe Charrier, Andreas Gaddum, Stéphane Chassaing, Albert Sumarroca, Philippe Dauchy, Philippe Sellem, Xavier Merlen, Thierry Mathieu, Gilles Meshaka) and the executive committee (Philippe Charrier, Albert Sumarroca, Luis Vieira, Etienne Couelle, Santiago Valor, Philippe Cailly, Stuart Quin, Ginette Leclerc and Vincent Marcel) are, or were in 2014, compensated for certain other services they render to our Group. Such remuneration is paid to them (or to professional companies wholly owned by them) by way of a fixed annual salary (or fees) and an annual bonus. The aggregate remuneration paid to or accrued on behalf of members of the board of directors and the executive committee for such other services was 9,7 M€ for the year ended December 31, 2014 (2013: 5,6 M€ after restating the remuneration of Comex member in charge of Germany). That remuneration includes especially an amount of 3,2 M€ paid to two board members who are laboratory doctors in France for the repurchase of their preferred shares (called category A share) in the SEL in which they practice and which grant rights to priority dividends (refer to the note 5.3 *Non-recurring restructuring plans*).

€ 000	Note	2014	2013
Short term benefits		**5 599**	5 573
Post-employment benefits	*(i)*	**NS**	NS
Special indemnities (including termination)	*(ii)*	**3 228**	0
Share-based payments	*(iii)*	**921**	0
Total		**9 748**	5 573

(i) Post-employment benefits are not significant and correspond only for the few members concerned to French legal post-employment benefits due to employees as described in *note 24 Employee benefit liabilities*.

(ii) The specific indemnities correspond to the amounts paid to two board members who are laboratory doctors in France for the repurchase of their preferred shares (called category A share) in the SEL in which they practice and which grant rights to priority dividends (refer to the note 5.3 *Non-recurring restructuring plans*).

(iii) Certain key members of the senior management benefit from the Free shares 2014 scheme granted in November 2014 with a performance condition and conditional to an active employment period of 2 years (plus then an obligation to keep the shares for an additional 2 years period). On top of that, the Executive committee member in charge of developing the UK business benefits from a share based payment plan (refer to note 25 *Share based payments*). The estimated IFRS 2 expense for those beneficiaries recorded prorata temporis in the consolidated statement of income for the year ended December 31, 2014 amounts to 0,9 M€.

Other related party transactions with key management members

Certain French entities of the Group (SEL) have entered into real estate lease agreements with the company "Société Immobilière de Laboratoires". This entity is a real estate company, for which Philippe Dauchy, a board member of Labco SA, is the managing director and which is owned directly or indirectly by a few board members of Labco SA among which Philippe Charrier. Its business purpose is to build or refurbish commercial or industrial premises in order to lease them to certain SEL. The lease agreements stipulate conditions which are considered as usual commercial conditions, it being specified, however, that executed lease agreements are with a duration exceeding the usual commercial leases in France and that, in compliance with French commercial law (Code de Commerce) articles L. 145-18, L. 145-21 et L. 145-24, the duration of these leases is fixed meaning that the lessee is not entitled to exit the lease at the end of each three-year period.

As at December 31, 2014, twelve lease agreements have been executed with certain SEL and it is forecasted that one new operation will be implemented before end 2014. The operations of premises leasing implemented with Société Immobilière de Laboratoires having been designed for laboratory or technical platform operations by the SEL, they enable in most of cases to put at disposal of the SEL of the Group premises compliant with the technical requirements of those SEL and located in geographical areas corresponding to the presence of clinical diagnostics laboratories of the Group.

Other related party transactions

Balances and transactions between Labco SA and its subsidiaries, which are related parties of Labco SA, have been eliminated on consolidation and are not disclosed in this note.

Note 32 Related party transactions (Continued)

A number of associates accounted for under the equity method incur expenses for certain subsidiaries of the Group. These operating expenses are recharged to the relevant subsidiaries. The net operating expenses that have been recharged by the associates amounted to nil in 2014 (2013: nil).

All transactions and outstanding balances with the related parties during the year are priced on an arm's length basis. None of the balances is secured.

Note 33 Group entities

The consolidation scope at December 31, 2014 and December 31, 2013 was established as follows:

Note 34 Events after the reporting period

Additional 8,5% Senior Secured Notes due 2018 issued for an aggregate nominal of 100 M€

Labco S.A. issued on February 11, 2015 €100 million in aggregate principal amount of its 8.5% Senior Secured Notes due 2018, which constitutes an add-on of, and form a single class with, Labco's existing 600 M€ 8.5% Senior Secured Notes due 2018. The Additional Senior Secured Notes will mature on January 15, 2018. The gross proceeds of the issuance amounts to 103,75 M€, ie meaning a yield of 7,19% and will be used to repay the outstanding amounts borrowed under Labco's revolving credit facility, pay the costs, fees and expenses in relation to the issuance transaction and for general corporate purposes. As a consequence Labco revolving credit facility amounting to 128,25 M€ drawn for 108 M€ has been reimbursed for an amount of 100 M€.

Note 34 Events after the reporting period (Continued)

Prospective liquidity analysis at refinancing date taking into account balances for other financial debts and trade payables as at December 31st, 2014 is as follows

€ 000	Note	Carrying amount	Cash Flow	1 year or less	1 - 5 years	More than 5 years
Non derivatives financial instruments						
Bonds loans		**700 000**	**(878 500)**	(59 500)	(819 000)	
Revolving Credit Facility	*(a)*	**8 000**	**(15 973)**	(2 658)	(13 316)	
Other financial debts		**57 129**	**(60 219)**	(34 210)	(25 542)	(467)
Trade payables		**74 341**	**(74 341)**	(74 341)		

(a) Revolving Credit Facility amounting 128,25 M€ has been reimbursed for an amount of 100 M€ with the proceed of the additional Notes issuance (RCF was drawn for an amount of 108 M€ as at additional Notes issuance date ie February 11, 2015). Amounts to be paid are estimated at refinancing date as the commitments fees paid on undrawn facility until end 2017 with a rate corresponding to 40% of margin (margin being estimated at 3,75%). Revolving Credit Facility will be however drawn for financing future acquisitions if necessary and subject to achieving financial covenants.

(b) Other financial debt corresponds to other loans and borrowings, finance lease liabilities, accrued HYB interests to be paid in January.

Disposal of assets and acquisitions

In February and early March (until board of directors meeting on March 23, 2015) one acquisition has been performed for a total consideration of 2,2 M€. It corresponds to an asset deal in Belgium.

Capital and potential capital evolution

Labco SA has signed an agreement on January 21, 2015 with the holders of BSA10x according to which it is committed irrevocably to acquire, at the date of settlement and delivery of the Company's shares issued or sold as part of an initial public offering of Labco SA, all the warrants BSA 10x from their holders at a price computed on the basis of 0,80€ per share, which may result from the exercise of the BSA 10x, ie for a total acquisition price of 6 585 K€ and in order to cancel the BSA 10x immediately after their acquisition.

At the same time as the signature of the BSA 10x agreement, and given the purpose of the BSA Mezzanine C is to protect their holders against the dilutive effect of the BSA 10x exercise, Labco SA and holders of BSA Mezzanine C have signed an agreement in order to draw the appropriate conclusions of the potential purchase of BSA 10x by Labco SA. Pursuant to that agreement, Labco SA is committed irrevocably to acquire, at the date of settlement and delivery of the Company's shares issued or sold as part of an initial public offering of Labco SA, all the warrants BSA Mezzanine C from their holders at a price computed on the basis of 0,80€ per share, which may result from the exercise of the BSA Mezzanine C, ie for a total acquisition price of 1 036 K€ and in order to cancel the BSA Mezzanine C immediately after their acquisition.

Certain holders of warrants 2005-1-1 (BSA 2005-1-1) have exercised 650 014 warrants since January 1st 2015. The board of directors, during its meeting on February 23, 2015, has registered a capital increase of 1 021 K€ by the issuance of 1 021 451 new shares (category B shares in accordance with statutory provisions) for a subscription price of €1,00 per share as a result of those BSA exercise and after applying the protection right against the dilutive effect of the capital increase performed at par on March 12, 2012.

Note 35 Auditor fees

The amount of the signatory statutory auditors' fees for the consolidated financial statements of Labco for the year 2014 for all the consolidated companies, where they are appointed is broken down as follow.

		2014		2013	
€ 000	**Note**	**Deloitte**	**Aplitec**	**Deloitte**	**Aplitec**
Legal audit	*(a)*	**1 331**	**253**	**583**	**98**
Agreed upon services	*(b)*	**323**	**70**	**33**	**0**
Other services				**0**	**0**
Auditor fees		**1 654**	**323**	**616**	**98**

(a) The increase in audit fees is mainly explained by the limited reviews performed by the auditors as at June 30, 2014 and September 30, 2014 in the context of the preparation of the strategic projects.

(b) Include mainly the fees related to the preliminary diligences for the draft prospectus in the context of the initial public offering (IPO) project initiated during 2nd semester 2014.

This is a free translation into English of the statutory auditors' report on the consolidated financial statements issued in the French language and is provided solely for the convenience of English speaking users.

The statutory auditors' report includes information specifically required by French law in such reports, whether modified or not. This information is presented below the audit opinion on the consolidated financial statements and includes explanatory paragraph discussing the auditors' assessments of certain significant accounting and auditing matters. These assessments were considered for the purpose of issuing an audit opinion on the consolidated financial statements taken as a whole and not to provide separate assurance on individual account balances, transactions or disclosures.

This report also includes information relating to the specific verification of information given in the Group's management report.

This report should be read in conjunction with, and is construed in accordance with, French law and professional auditing standards applicable in France.

LABCO

Société Anonyme—A Limited liability Company under French law

60-62, rue d'Hauteville
75010 Paris, France

Statutory Auditors' Report on the Consolidated Financial Statements

For the year ended 31 December 2013

To the Shareholders,

In compliance with the assignment entrusted to us by your annual general meeting, we hereby report to you, for the year ended 31 December 2013, on:

- the audit of the accompanying consolidated financial statements of LABCO;
- the justification of our assessments;
- the specific verification required by law.

These consolidated financial statements have been approved by the Board of Directors. Our role is to express an opinion on these consolidated financial statements based on our audit.

I. Opinion on the consolidated financial statements

We conducted our audit in accordance with professional standards applicable in France. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit involves performing procedures, using sampling testing techniques or other methods of selection, to obtain audit evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made, as well as the overall presentation of the consolidated financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

In our opinion, the consolidated financial statements give a true and fair view of the assets and liabilities, and of the financial position of the Group as at 31 December 2013 and of the results of its operations for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union.

II. Justification of our assessments

In accordance with the requirements of Article L.823-9 of the French Company Code (Code de commerce) relating to the justification of our assessments, we bring to your attention the following matters:

Notes 3.9.2 and 3.10.2 to the consolidated financial statements outline the accounting rules and methods relating to the goodwill and indefinite useful life assets carrying amounts and retirement costs and other employee benefits.

Our procedures consisted in verifying the appropriateness of the accounting methods applied, data and assumptions used, documentation provided and resulting valuations. We also satisfied ourselves that Notes 13 and 24 provide appropriate disclosure.

These assessments were performed as part of our audit approach for the consolidated financial statements taken as a whole and contributed to the expression of the opinion in the first part of this report.

III—Specific verification

As required by law, we have also verified in accordance with professional standards applicable in France the information presented in the Group's management report.

We have no matters to report as to its fair presentation and its consistency with the consolidated financial statements.

Lille and Levallois-Perret, April 7, 2014

Notes to the consolidated financial statements
for the year ended 31 December 2013

Note 1 Reporting entity

The parent company of Labco Group is Labco SA (the "Company"), which is a limited liability company incorporated and registered in France. The address of the Company's registered office is 60 - 62, rue de Hauteville, 75010, Paris, France. The consolidated financial statements of the Company as at and for the year ended 31 December 2013 comprise the Company and its subsidiaries (together referred to as the "Group" and individually as "Group entities") and the Group's interest in associates. The Group primarily is involved in clinical diagnostics testing and screening services mainly in France, Spain, Portugal, Italy, Belgium, the United Kingdom and Switzerland and also provides clinical laboratory testing services to customers in Latin America, the Middle East and North Africa.

Note 2 Basis of preparation

2.1. Statement of compliance

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRSs), as adopted by the European Union (EU) and IFRS as published by IASB effective as at December 31, 2013. As a reminder, the Group's consolidated financial statements have been prepared for the first time in 2010 in accordance with IFRSs, the opening IFRS balance sheet being prepared as of January 1, 2009.

The accounting policies retained are the same as those used in preparing the consolidated financial statements at 31 December 2012, except for

- The Standards and Interpretations adopted by the European Union applicable as from 1 January 2013, which have no significant effect on the consolidated financial statements of the Group
- Certain Standards and Interpretations adopted by the European Union not mandatorily applicable as from 1 January 2013 but for which the Group has elected to implement early adoption and which have limited impact on the consolidated financial statements of the Group:
  - IFRS 10—Consolidated Financial Statements, IFRS 11—Joint Arrangements and IFRS 12—Disclosures of Interests in Other Entities, as well as the resulting revised IAS 27 and IAS 28

The consolidated financial statements were authorised for issue by the Board of Directors on March 31, 2014.

2.2. IFRS basis adopted

2.2.1. Standards, amendments and interpretations effective as of January 1, 2013

The Group's consolidated financial statements comply with the amendments to published standards and interpretations which came into effect on January 1. 2013 and have been adopted by the European Union. The following amendments and interpretations are mandatorily applicable as of January 1. 2013:

- Amendment to IAS 1—*Presentation of Items of Other Comprehensive Income*
- Amendment to IAS 19—*Employee Benefits*

These amendments were already early implemented by Labco for the annual consolidated financial statements as at 31 December 2012.

- IFRS 13—*Fair Value Measurement*

This standard is applicable prospectively and has no effect on the fair value currently measured by the Group.

- Amendment to IFRS 7—*Disclosures—Offsetting Financial Assets and Financial Liabilities*
- Amendment to IAS 12—*Deferred Tax: Recovery of Underlying Assets*

These amendments have no significant impact on the Group consolidated financial statements.

Note 2 Basis of preparation (Continued)

2.2.2. Standards, amendments and interpretations not mandatorily applicable as of January 1, 2013

The Group has elected to early adopt the following standards or amendments whose application is not mandatory as of January 1, 2013:

- IFRS 10 *Consolidated Financial Statements*

IFRS 10 replaces the requirements and guidance in IAS 27 relating to consolidated financial statements. This standard introduces a single consolidation framework for all types of investee entities, and gives a new definition of control. According to IFRS 10, an investor controls an investee when the investor is exposed, or has rights, to variable returns from its involvement with the investee and has the current ability to affect those returns through its power over the investee. The retrospective application of the standard on the Group's consolidation scope has no effect on the Group's comparative information reported in financial statements as at December 31, 2013.

- IFRS 11 *Joint Arrangements*

IFRS 11, *Joint Arrangements* replaces IAS 31 *Interests in joint venture* and especially abolishes the proportionate integration method. Labco was in a joint arrangement through its subsidiary iPP in the United Kingdom, the joint venture with Sodexo. The retrospective application of the standard has no effect on the Group's comparative information presentation because the jointly controlled entity iPP was already under IAS 31 recorded under equity method. Indeed the option, proposed by IAS 31, of using equity method for jointly controlled entity was chosen by Labco in 2011.

- IFRS 12, *Disclosures of interest in other entities*

IFRS 12, *Disclosures of interest in other entities*, integrates and makes consistent the disclosure requirements for interests in subsidiaries, joint arrangements, associates, and unconsolidated structured entities and present those requirements in a single IFRS.

2.2.3. New standards, amendments and interpretations not applicable as of January 1. 2013

A number of new standards, amendments to standards and interpretations are not yet effective for the year ended 31 December 2013, and have not been applied in preparing these consolidated financial statements.

- IFRS 9—*Financial Instruments: Classification and Measurement*
- Amendments to IFRS 7—*Financial Instruments: Disclosures* and Amendments to IAS 32—*Financial Instruments: Presentation*
- Amendments to IAS 36—*Recoverable Amount Disclosures for Non-Financial Assets*
- Amendments to IAS 39—*Novation of Derivatives and Continuation of Hedge Accounting*
- IFRIC 21—*Levies*

The Group is currently reviewing these standards, amendments and interpretations to assess their possible effect on its financial information.

2.2.4. Summary of options used on the first time adoption of IFRS

As a first time adopter in 2010, the opening IFRS balance sheet has been prepared as of January 1, 2009 (i.e. date of transition to IFRS) using IFRSs as adopted by the European Union effective December 31, 2010. In accordance with IFRS 1, the Group has elected to use the following main exemptions for the preparation of its first IFRS financial statements:

- business combinations that occurred before the date of transition to IFRS are not retrospectively restated in accordance with IFRS 3—*Business Combinations;*
- the long term employee benefits have been fully recorded;
- for the share based payment transactions, only the 2008 scheme has been restated according to IFRS 2, and

Note 2 Basis of preparation (Continued)

- financial instruments held have all been classified as financial assets available for sale at the date of transition, with the exception of liabilities and receivables and trade receivables.

2.3. Basis of measurement

The consolidated financial statements have been prepared on the historical cost basis except for the following items in the statement of financial position:

- derivative financial instruments are measured at fair value
- certain long term financial assets are measured at fair value

2.4. Functional and presentation currency

These consolidated financial statements are presented in euro, which is the Company's functional currency. All financial information presented in euro has been rounded to the nearest thousand.

2.5. Use of estimates and judgments

The preparation of the consolidated financial statements in conformity with IFRSs requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

Information about critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the consolidated financial statements is included in the following notes:

- **Note 3.1.1**—Subsidiaries and consolidation method
- **Note 3.2.2**—Derivative financial instruments, including hedge accounting
- **Note 3.7**—Leased assets
- **Note 3.9.2**—Non-financial assets

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year are included in the following notes:

- **Note 3.6.1** and **Note 6**—Goodwill and acquisition of subsidiaries

Note 3 Significant accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these consolidated financial statements, unless otherwise indicated.

The accounting policies have been applied consistently by Group entities.

3.1. Basis of consolidation

3.1.1. Subsidiaries and consolidation method

Subsidiaries are entities controlled by the Group. Control is the power to direct the relevant activities in order to use it to affect its exposure or rights to variable returns from its involvement. In assessing control, the Group takes into consideration potential and substantive voting rights, for which the Group has the practical ability to exercise them.

Regulations governing the ownership and certification of laboratories in certain jurisdictions require us to hold each clinical laboratory or a limited number of the clinical laboratories through a separate subsidiary. Certain countries also regulate the corporate form through which laboratories may be held, such as "SELs" (société d'exercice liberal) in France.

Note 3 Significant accounting policies (Continued)

In France, we are subject to regulatory constraints on the ownership of share capital and voting rights of SELs operating clinical laboratories by persons other than laboratory doctors and laboratory companies.

To comply with such constrain, we have established a specific corporate structure pursuant to which and subject to a few exceptions, we directly and indirectly hold shares representing approximately up to 99.9% of the share capital of our historical SELs and the laboratory doctors operating such SELs hold the remainder. However, the articles of association of all of our SELs grant to the laboratory doctors operating them 50.01% of the voting rights at all the shareholders' general meetings. The new French law on medical biology adopted in May 2013 requires that more than 50% of the share capital and voting rights of a clinical laboratory operating as a SEL be held by laboratory doctors practicing within such SEL. The law also contemplated that existing SELs which are operating under a different ownership structure as of the date of enactment of the law will be grandfathered in and will continue to operate under their existing structure and have the majority of their share capital held by laboratory companies.

Although we cannot have the majority of the voting rights in our SELs (nor the majority of share capital for new entities), we have put in place mechanisms that grant us substantially all of the economic rights over such SELs and allow us to control the relevant activities, within the French regulatory framework, and fully consolidate our French network. As we acquire SELs, we change their articles of association to implement the capital structure described above but also to adopt specific provisions, in particular with respect to governance.

The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. The acquisition date is the date on which control is transferred to the acquirer. Judgment is applied in determining the acquisition date and determining whether control is transferred from one party to another. The accounting policies of subsidiaries have been changed when necessary to align them with the policies adopted by the Group.

Non-controlling interests ("minority interests") represent the part of net income or loss, and of net equity not held by the Group. They are presented in the consolidated Income Statement, the Consolidated Statement of Comprehensive Income and in equity in the Consolidated Statement of Financial Position, separately from equity attributable to the owners of the Company. In the case of medical biology companies, whether controlled de jure or de facto, minority interests of other shareholders, i.e. laboratory doctors, must be assessed based on the financial rights attached to their shares rather than voting rights. These shares of stock are entitled to a priority dividend, calculated on a formula defined in each company's by-laws so long as their holders are professionally active in the company. However their rights to any surplus on liquidation (net assets) are strictly limited, which gives this portion a non-significant accounting value. Most by-laws of consolidated French companies call for two classes of shares. Class A shares are held by laboratory doctors associated in the SELs (Sociétés d'exercice liberal). In certain SELs they are awarded a priority dividend according to a formula worked out in the by-laws of each company and representing a profit sharing arrangement. They have this right as long as they are professionally active in the company. They are not actually minority interests but rather a mechanism of compensation for the services such professionals render to the Group. Consequently dividends thereon are recognized as compensation expense in profit or loss in the period in which services giving rise to profit sharing are rendered. Over the last 2 years, a number of SELs having a Priority Dividend mechanism have evolved towards variable remuneration schemes according to which computation and payment mechanisms are determined based on multicriteria achievements.

3.1.2. Investments in associates (equity accounted investees)

An associate is an entity over which the Group has significant influence and that is not a subsidiary. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control over those policies. Investments in associates are accounted for using the equity method (equity accounted investees) and are recognised initially at cost. The Group's investment includes goodwill identified on acquisition, net of any accumulated impairment losses. The consolidated financial statements include the Group's share of the income and expenses and equity movements of equity accounted investees, after adjustments to align the accounting policies with those of the Group, from the date that significant influence commences until the date that significant influence ceases.

Note 3 Significant accounting policies (Continued)

3.1.3. Interests in joint ventures

A joint venture is a contractual arrangement whereby the Group and other parties undertake an economic activity that is subject to joint control (i.e. when the strategic financial and operating policy decisions relating to the activities of the joint venture require the unanimous consent of the parties sharing control). Jointly controlled entities are consolidated using the equity method in accordance with IFRS 11 and revised IAS 28 as they were previously recorded since 2011 according to the option provided by IAS 31, Interests in Joint Ventures.

3.1.4. Transactions eliminated on consolidation

Intra-group balances and transactions, and any internal income and expenses arising from intra-group transactions, are eliminated in preparing the consolidated financial statements. Unrealised gains arising from transactions with equity accounted investees are eliminated against the investment to the extent of the Group's interest in the investee. Internal losses are eliminated in the same way as internal gains, but only to the extent that there is no evidence of impairment.

3.1.5. Business combinations

For acquisitions on or after 1 January 2009, the Group applies IFRS 3 revised (2008) and measures goodwill as the difference between (a) the sum of (i) the fair value of the consideration transferred, (ii) the recognised amount of any non-controlling interest in the acquiree, (iii) the acquisition date fair value of any previously held interest in the acquiree, and (b) the net recognised amount (generally fair value) of the identifiable assets acquired and liabilities assumed, all measured as of the acquisition date. Consideration transferred includes the fair values of the assets transferred, liabilities incurred by the Group to the previous owners of the acquiree, and equity interests issued by the Group. It also includes the fair value of any contingent consideration. When this difference is negative (negative goodwill), a bargain purchase gain is recognized immediately in profit or loss.

For business combinations that occurred since 2009, the Group measured any non-controlling interest in majority of cases at its proportionate interest in the identifiable net assets of the acquiree.

Transaction costs that the Group incurs in connection with a business combination, such as finder's fees, legal fees, due diligence fees, and other professional and consulting fees are expensed as incurred.

If a business combination is achieved in stages, re-measurement of any previously held equity interest in the acquiree at its acquisition-date is performed at fair value with any resulting gain or loss recognized in the statement of earnings.

A contingent liability of the acquiree assumed in a business combination is recognized only if such a liability represents a present obligation and arises from a past event, and its fair value can be measured reliably.

If consideration transferred include a contingent consideration (earn-out for example), it is recorded at fair value at acquisition date. For a contingent consideration recorded as financial instrument in the scope of IAS 39, subsequent fair value variations are recognized in statement of income. If a contingent consideration is classified as equity, it will not be remeasured.

Acquisitions and disposal of non-controlling interests

Acquisitions and/or disposal of non-controlling interests are accounted for as transactions with equity holders in their capacity as equity holders. Therefore no goodwill is recognized or derecognized as a result of such transactions.

3.2. Financial instruments

Financial instruments include financial assets and financial liabilities. Financial assets comprise available-for-sale financial assets, loans and receivables carried at amortized cost including trade and other receivables, and financial assets measured at fair value through income, including derivative financial instruments. Financial liabilities include borrowings, trade and other payables, derivative financial instruments and other financial liabilities.

Note 3 Significant accounting policies (Continued)

3.2.1. Non-derivative financial instruments

Non-derivative financial instruments comprise investment in equity and debt securities, trade and other receivables, loans and borrowing at amortized cost and trade and other payables.

The Group initially recognizes trade and other receivables on the date that they are originated. All other financial assets are recognized initially on the trade date at which the Group becomes a party to the contractual provisions of the instrument.

Available-for-sale financial assets

The Group's investments in equity securities (generally the non-consolidated investments) and certain debt securities are classified as available-for-sale financial assets. These items are measured at fair value on initial recognition, which generally correspond to the acquisition cost plus any directly attributable transaction costs. Subsequent to initial recognition, they are measured at fair value and changes therein, other than impairment losses are recognised in other comprehensive income and presented within equity in the fair value reserve. When an investment is derecognised, the cumulative gain or loss in other comprehensive income is transferred to profit or loss.

Loans and receivables at amortized cost

Loans and receivables, including trade and other receivables are financial assets with fixed or determinable payments that are not quoted in an active market.

Loans and receivables primarily include loans and advances to associates or non-consolidated companies, and guarantee deposits, are recognized initially at fair value, plus any directly attributable transaction costs. Subsequent to initial recognition, loans and receivables are measured at amortised cost using the effective interest rate method, less any impairment losses.

On initial recognition, trade and other receivables are recorded at fair value, which generally corresponds to their nominal value. Impairment losses are recorded based on the estimated risk of non-recovery.

Financial assets and liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Group has a legal right to offset the amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Financial liabilities including trade and other liabilities

Financial liabilities, such as loans and borrowings carried at amortized cost, trade and other payables are recognized initially at fair value. Subsequent to initial recognition, these financial liabilities are measured at amortised cost using the effective interest rate method. On initial recognition, any issue or redemption premiums and discounts and issuing costs are added to/deducted from the nominal value of the borrowings concerned. These items are taken into account when calculating the effective interest rate and are therefore recorded in the consolidated income statement over the life of the borrowings using the amortized cost method.

Financial liabilities are broken down into current and non-current liabilities in the consolidated statement of financial position. Current financial liabilities comprise:

- Financial liabilities with a settlement or maturity date within 12 months of the statement of financial position date
- Financial liabilities in respect of which the Group does not have an unconditional right to defer settlement for at least 12 months after the statement of financial position date

3.2.2. Derivative financial instruments, including hedge accounting

The Group holds derivative financial instruments to hedge its interest rate risk exposures, for certain contracts the formal documentation of hedging relationship at inception has been prepared enabling hedge accounting according to IAS 39, whereas other instruments used in economic hedges have not been formally documented as hedging relationship therefore not qualifying for hedge accounting.

Note 3 Significant accounting policies (Continued)

Derivatives are recognised initially at fair value; attributable transaction costs are recognised in profit or loss as incurred. Subsequent to initial recognition, derivatives are measured at fair value, and changes therein are accounted for as described below.

Cash flow hedges

When a derivative is designated as the hedging instrument in a hedge of the variability in cash flows attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction that could affect profit or loss, the effective portion of changes in the fair value of the derivative is recognised in other comprehensive income and presented in the hedging reserve in equity. The amount recognised in other comprehensive income is removed and included in profit or loss in the same period as the hedged cash flows affect profit or loss under the same line item in the statement of comprehensive income as the hedged item. Any ineffective portion of changes in the fair value of the derivative is recognised immediately in profit or loss as financial income or expenses.

On initial designation of the hedge, the Group formally documents the relationship between the hedging instrument and hedged item, including the risk management objectives and strategy in undertaking the hedge transaction, together with the methods that will be used to assess the effectiveness of the hedging relationship. The Group makes an assessment, both at the inception of the hedge relationship as well as on an ongoing basis, whether the hedging instruments are expected to be "highly effective" in offsetting the changes in the fair value or cash flows of the respective hedged items during the period for which the hedge is designated, and whether the actual results of each hedge are within a range of 80-125 percent. For a cash flow hedge of a forecast transaction, the transaction should be highly probable to occur and should present an exposure to variations in cash flows that could ultimately affect reported net income.

If the hedging instrument no longer meets the criteria for hedge accounting, expires or is sold, terminated or exercised, then hedge accounting is discontinued prospectively. The cumulative gain or loss previously recognised in other comprehensive income and presented in the hedging reserve in equity remains there until the forecast transaction occurs. If the forecast transaction is no longer expected to occur, then the balance in other comprehensive income is recognised immediately in profit or loss. In other cases the amount recognised in other comprehensive income is transferred to profit or loss in the same period that the hedged item affects profit or loss.

Other derivatives

When a derivative financial instrument is not designated in a qualifying hedge relationship, all changes in its fair value are recognised immediately in profit or loss.

3.3. Cash and cash equivalent

Cash and cash equivalents comprise cash on hand, bank current accounts, and other bank deposits and short term investments considered to be readily convertible into a known amount of cash and where the risk of a change in their value is deemed to be negligible based on the criteria set out in IAS 7.

Bank overdrafts that are repayable on demand and form an integral part of Group's cash management are recorded under "Short term borrowings" but included as a component of cash and cash equivalents for the purpose of the statement of cash flows.

3.4. Share capital

Ordinary shares

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares and share options are recognised as a deduction from equity, net of any tax effects.

Repurchase of share capital (Treasury shares)

Own equity instruments which are repurchased (treasury shares) are presented as a deduction from equity. The amount of the consideration paid, which includes directly attributable costs, net of any tax effects, is recognised as a deduction from equity. No gain or loss is recognized in the consolidated statement of income on the purchase, sale, issue or cancelation of the Group own equity, but the resulting surplus or deficit on the transaction is transferred to/from retained earnings.

3.5. Property, plant and equipment

3.5.1. Recognition and measurement

Items of property, plant and equipment are measured at cost less accumulated depreciation and accumulated impairment losses.

Cost includes expenditure that is directly attributable to the acquisition of the asset. Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment.

When parts of an item of property, plant and equipment have different useful lives or provide benefits in a different pattern, they are accounted for as separate items (major components) of property, plant and equipment, thus necessitating the use of different depreciation rates and methods.

An item of property, plant and equipment is derecognised on disposal or when the asset is permanently withdrawn from use and no future economic benefits are expected. Gains and losses on disposal of an item of property, plant and equipment are determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment, and are recognised net within results from non-recurring activities in profit or loss. When revaluated assets are sold, the amounts included in the revaluation reserve are transferred to retained earnings.

3.5.2. Depreciation

Depreciation is based on the depreciable amount, which is the cost of an asset, or other amount substituted for cost, less its residual value. The residual value is estimated to be nil at the end of the useful life, except for real estate in certain cases.

Depreciation is recognized in profit or loss on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Group will obtain ownership by the end of the lease term. Land is not depreciated.

The estimated useful lives for the current and comparative periods are as follows:

• buildings	15 - 30 years
• leasehold improvements & fixtures	3 - 10 years
• Laboratory & Office equipment	3 - 10 years
• fixtures and fittings	2 - 10 years
• Other	2 - 10 years

Depreciation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.

3.6. Intangible assets

3.6.1. Goodwill

Goodwill that arises upon the acquisition of subsidiaries, either through share deals or asset deals, is included in intangible assets. For the measurement of goodwill at initial recognition, see *Note 6—Acquisitions of subsidiaries*

Subsequent measurement

Goodwill is measured at cost less accumulated impairment losses if any. In respect of equity accounted investees, the carrying amount of goodwill is included in the carrying amount of the investment, and an impairment loss on such an investment is not allocated to any asset, including goodwill, that forms part of the carrying amount of the equity accounted investee.

Note 3 Significant accounting policies (Continued)

3.6.2. Other intangible assets

Other intangible assets that are acquired by the Group and have finite useful lives are measured at cost less accumulated amortisation and accumulated impairment losses. Other intangible assets consist primarily of software and licenses.

3.6.3. Subsequent expenditure

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is recognised in profit or loss as incurred.

3.6.4. Amortisation

Amortisation is calculated over the cost of the asset, or other amount substituted for cost, less its residual value. Amortisation is recognised in profit or loss on a straight-line basis over the estimated useful lives of intangible assets, other than goodwill, from the date that they are available for use, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. The estimated useful lives for the current and comparative periods are as follows:

• Licenses	1 - 5 years
• Software	1 - 5 years

Amortisation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.

3.7. Leased assets

Leases in terms of which the Group assumes substantially all the risks and rewards of ownership are classified as finance leases. Upon initial recognition the leased asset is measured at an amount equal to the lower of its fair value and the present value of the minimum lease payments. Subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to that asset. However, if there is no reasonable certainty that the Group will obtain ownership by the end of the lease term, the finance lease assets are depreciated over the shorter of the estimated useful life of the asset and the lease term.

The Group regularly reviews its contracts and arrangements to determine whether an arrangement is, or contains a lease. The analysis is based on the substance of the arrangement at inception date. If the Group believes the fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset, then the arrangement contains a lease and IAS 17 is applicable to the lease element. At inception, payments required by the arrangement are split into lease payments and payments related to other elements of such arrangement based on their relative fair values.

The Group uses equipment for its medical analyses. The contracts in use for this activity stipulate that the equipment is put at disposal for free if the laboratory buys exclusively from the supplier chemical reagents for a certain indicative volume during the term of the contract. As stated before, despite the fact that these agreements are not in the legal form of a lease, the arrangements qualify as lease contracts and Labco applied the requirements of IAS 17 to the lease element whereby the payments required by the arrangement are split into lease payments and payments relating to the other elements of the arrangement based on their relative fair values. For these contracts that are classified as finance leases, the related assets have been recognised in the statement of financial position of the Group.

Other leases are operating leases and the leased assets are not recognised in the Group's statement of financial position. Operating lease payments are recognised as an expense in the consolidated statement of income.

3.8. Inventories

Inventories consist of raw materials ("reagents") and consumables and are measured at the lower of cost and net realisable value. The cost of inventories is based on the weighted average unit costs, and includes expenditure incurred in acquiring the inventories and other costs incurred in bringing them to their existing location and condition.

Note 3 Significant accounting policies (Continued)

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

3.9. Impairment

3.9.1. Financial assets (including receivables)

A financial asset not carried at fair value through profit or loss is assessed at each reporting date to determine whether there is objective evidence that it is impaired. A financial asset is impaired if objective evidence indicates that a loss event has occurred after the initial recognition of the asset, and that the loss event had a negative effect on the estimated future cash flows of that asset.

Objective evidence that financial assets (including equity securities) are impaired can include default or delinquency by a debtor, restructuring of an amount due to the Group on terms that the Group would not consider otherwise, indications that a debtor or issuer will enter bankruptcy, or the disappearance of an active market for a security. In addition, for an investment in an equity security, a significant (more than 30%) or prolonged decline in its fair value below its cost is objective evidence of impairment.

3.9.2. Non-financial assets

The carrying amounts of the Group's non-financial assets, but other than inventories and deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. For goodwill, and intangible assets that have indefinite useful lives or that are not yet available for use, the recoverable amount is estimated each year at the same date time during the year-end closing process, and additionally whenever there is an indication that such assets may be impaired.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money, all the other risks specific to the assets being considered in the estimated future cash flows from the assets. Depending on the timely availability each year of long term business plans, future cash flows are either estimated based on the long term 5 year business plans approved by senior management or estimated based on the budget prepared for the following year and which are afterward extrapolated over the next 4 years consistently with the latest 5 years business plan, plus in any case the estimate of the terminal value using a perpetual growth rate.

For the purpose of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the "cash-generating unit, or CGU").

For the purposes of goodwill impairment testing, the lowest level at which goodwill is monitored for internal reporting purposes corresponds to the following geographical areas: France, Iberia, Italy, Belgium and United Kingdom. Goodwill acquired in a business combination is allocated to CGUs or groups of CGUs that are expected to benefit from the synergies of the combination. The Group's corporate assets (Labco SA, Labco Belgium, Labco Finance) could not be allocated on a reasonable and consistent basis to each cash-generating units. As such, they are included in the group of cash-generating units' impairment test (global test). Local holdings are included in their respective country.

An impairment loss is recognized if the carrying amount of an asset or its CGU exceeds its estimated recoverable amount. Impairment losses are recognized in profit or loss. Impairment losses recognized in respect of CGUs or groups of CGUs are allocated first to reduce the carrying amount of any goodwill allocated to the units or group of units, and then to reduce the carrying amounts of the other assets in the unit (group of units) on a *pro rata* basis.

An impairment loss in respect of goodwill is not reversed. In respect of other assets, impairment losses recognized in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

Note 3 Significant accounting policies (Continued)

Goodwill that forms part of the carrying amount of an investment in an associate is not recognised separately, and therefore is not tested for impairment separately. Instead, the entire amount of the investment in an associate is tested for impairment as a single asset when there is objective evidence that the investment in an associate may be impaired. Such impairment loss can be reversed if the recoverable amount subsequently increases.

3.10. Employee benefits

3.10.1. Short-term employee benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

A liability is recognised for the amount expected to be paid under short-term cash bonus or profit-sharing plans if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the obligation can be estimated reliably.

3.10.2. Long term employee benefits, including retirement agreements

Depending on the laws and practices in force in the countries where Labco operates, Group companies have legal obligations in terms of pensions, early retirement payments and retirement bonuses. Such obligations are generally defined State contribution plans, which costs are expensed based on the amount of contribution payable in the period.

The Group is also concerned by other post-employment or post-retirement employee benefits which correspond to the legal retirement indemnity mainly applicable in France and Italy.

Commitments at retirement date and other similar advantages essentially correspond to the retirement compensations due to employees when they retire. Their assessment is made on the basis of an actuarial calculation using the projected unit credit method and taking into account the rate of staff turnover and mortality rates which are determined based on official age tables and estimated future salary increase. Discount rates are determined by the reference to the yield at the measurement date on high-quality corporate bonds.

In compliance with IAS 19 revised, actuarial gains and losses are recognized directly in other comprehensive income in equity and are not amortized in the Income Statement.

3.10.3. Termination benefits

Termination benefits are recognised as an expense when the Group is committed demonstrably, without realistic possibility of withdrawal, to a formal detailed plan to either terminate employment before the normal retirement date, or to provide termination benefits as a result of an offer made to encourage voluntary redundancy. Termination benefits for voluntary redundancies are recognised as an expense if the Group has made an offer of voluntary redundancy, it is probable that the offer will be accepted, and the number of acceptances can be estimated reliably. If benefits are payable more than 12 months after the reporting period, then they are discounted to their present value.

3.10.4. Share-based payment transactions

The grant date fair value of share-based payment awards granted to employees is recognised as an expense, with a corresponding increase in equity, over the period required for the employees unconditionally becoming entitled to the awards. The amount recognised as an expense is adjusted to reflect the number of awards for which the related service and non-market vesting conditions are expected to be met, such that the amount ultimately recognised as an expense is based on the number of awards that do meet the related service and non-market performance conditions at the vesting date.

Share-based payment arrangements in which the Group receives goods or services as consideration for its own equity instruments are accounted for as equity-settled share-based payment transactions, regardless of how the equity instruments are obtained by the Group.

Note 3 Significant accounting policies (Continued)

3.11. Provisions

A provision is recognised if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions giving rise to a cash outflow after more than one year are discounted if the impact is material. Discount rates reflect current assessments of the time value of money and risks that are specific to the liability and not included in expected cash flows. The unwinding of the discount is recognised as finance cost.

3.12. Revenue

The Group earns revenues from medical analyses both routine and esoteric which are invoiced to insurance companies, hospitals, individuals, pharmacies, and National Heath entities.

Revenue from medical analyses in the course of ordinary activities is measured at the fair value of the consideration received or receivable, net of returns, trade discounts and volume rebates. Revenue in connection with rendered services is recognized at the time the service is provided. Revenue is based on the net amount billed or billable if it can be estimated reliably. If it is probable that discounts will be granted and the amount can be measured reliably, then the discount is recognised as a reduction of revenue as the sales are recognised.

The process of estimating the ultimate collection of receivables associated with our clinical testing business involves significant assumptions and judgments. Billings for services reimbursed by third-party payers, including social security systems, are recorded as revenue net of allowances for differences between amounts billed and the estimated receipts from such payers. Adjustments to the allowances, based on actual receipts from the third-party payers, are recorded upon settlement as an adjustment to net revenue.

Government payers

Payments for clinical laboratory testing services made by the government are based on fee schedules set by governmental authorities. Collection of such receivables is normally a function of providing the complete and correct billing information within the various filing deadlines. Collection varies from country to country.

Private insurers

Reimbursements from private insurers are based on negotiated fee-for-service schedules and on capitated payment rates.

Substantially all of the accounts receivable due from private insurers represent amounts billed under negotiated fee-for-service arrangements. We utilize a standard approach to establish allowances for doubtful accounts for such receivables, which considers the aging of the receivables, historical collection experience and other factors.

Client payers

Client payers include physicians, hospitals, employers and other commercial laboratories. Credit risk and ability to pay are more of a consideration for these payers than healthcare insurers and government payers. We utilize a standard approach to establish allowances for doubtful accounts for such receivables, which considers the aging of the receivables, as well as specific account reviews, historical collection experience and other factors.

Patient receivables (individuals)

Patients are billed based on established patient fee schedules, subject to any limitations on fees negotiated with healthcare insurers or physicians on behalf of their patients. Collection of receivables due from patients is subject to credit risk and ability of the patients to pay. We utilize a standard approach to establish allowances for doubtful accounts for such receivables, which considers the aging of the receivables, historical collection experience and other factors.

Note 3 Significant accounting policies (Continued)

Other income in revenue mainly corresponds to interests earned on operating receivables as well as income generated by activities not directly related to clinical diagnostics and screening services.

3.13. Lease payments

Payments made under operating leases are recognised in profit or loss on a straight-line basis over the term of the lease. Lease incentives received are recognised as an integral part of the total lease expense, over the term of the lease.

Minimum lease payments made under finance leases are apportioned between the finance expense and the reduction of the outstanding liability. The finance expense is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability (effective interest rate method).

3.14. Finance income and finance costs

Finance income comprises interest income on funds invested (including available-for-sale financial assets), dividend income, gains on hedging instruments that are recognised in profit or loss, and foreign currency gains. Interest income is recognised as it accrues in profit or loss, using the effective interest method. Dividend income is recognised in profit or loss on the date that the Group's right to receive payment is established.

Finance costs comprise of cost of net debt and other financial expenses. Cost of net debt includes interest expense on borrowings and financial leases, as well as expenses related to derivatives. Other financial expenses mainly include unwinding of the discount on provisions. Borrowing costs that are not directly attributable to the acquisition, construction or production of a qualifying asset are recognised in profit or loss using the effective interest method. Labco Group does not own any qualifying asset.

3.15. Income tax

Income tax (income or expense) comprises current and deferred tax. Current tax and deferred tax are recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in other comprehensive income.

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for the following temporary differences: the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss, and differences relating to investments in subsidiaries to the extent that it is probable that they will not reverse in the foreseeable future. In addition, deferred tax is not recognised for taxable temporary differences arising on the initial recognition of goodwill. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

A deferred tax asset is recognised for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Additional income taxes that arise from the distribution of dividends; are recognized at the same time that the liability to pay the related dividend is recognized;

Note 3 Significant accounting policies (Continued)

For French entities of the Group, the former Business Tax has been modified by a law enacted December 30, 2009. The Business Tax now consists of two components:

- "Cotisation Foncière des Entreprises (CFE)",which is a tax on rental value of lands
- "Cotisation sur la Valeur Ajoutée des Entreprises (CVAE)", which is a tax determined on added value as defined based on statutory accounts

In accordance with the definition of income tax in IAS 12 and the definition of added value stipulated by article 1586 sexies of French Tax code, and by homogeneity with the treatment in other countries of taxes based on net aggregate of income and charges, Labco considers that the CVAE tax should be recorded as an income tax given its definition.

3.16. Results from operating activities, and net non-recurring expenses

Results from operating activities correspond to the operating performance of the various activities performed by Labco Group. Results from operating activities before non-recurring activities is an indicator used by the Group to present "a level of operational performance that can be used as part of an approach to forecast recurring performance".

In order to facilitate understanding of recurring operating performance, non-recurring expenses and income lines have been defined and include non recurring, unusual, items that are clearly not related to recurring activities and of certain significance. Those non recurring expenses and income consist of:

- Impairment and reversal of impairment on non-operational assets and liabilities
- Gains / losses on sale of assets
- Restructuring expenses and provisions for major litigations
- Perimeter effect including transaction costs for significant and unusual acquisitions (cancelled or realized as for realized acquisitions, costs are expensed according to IFRS 3 revised guidance implemented starting 2009 by Labco), as well as earn out variations of fair value subsequent to the 1 year window period.

3.17. Earnings per share

The Group has not issued shares in a public market and is not in the process of doing so. Therefore the Group is not required to but has decided to present voluntarily basic and diluted earnings per share (EPS) data for its ordinary shares in accordance with IAS 33. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period, adjusted for own shares held. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding, adjusted for own shares held and, for the effects of all dilutive potential ordinary shares, which comprise warrants and free shares granted to employees.

3.18. Segment information

The Group has not issued shares in a public market and is not in the process of doing so. Therefore the Group is not required to but has decided to disclose segment information in accordance with IFRS 8.

In accordance with IFRS 8, the reportable segments are components of the Group that engage in business activities and whose operating results based on the internal reporting are regularly reviewed by the chief operating decision-maker.

The Group is organized for management purposes by country and by geographical segments leading to define as reportable segments the geographical areas Northern Europe (France, UK, Belgium, Switzerland) and Southern Europe (Iberia comprising of Spain and Portugal, Italy). Segment information is reported on the same basis as used internally by the Chief Executive Officer and Executive Management Committee to determine allocation of resources to segments and assess their performance.

Segment performance is evaluated mainly based on total revenue and EBITDA and is measured consistently with the statement of income in the published consolidated financial statements. The Group's financing (including finance costs and finance income) and income taxes are centrally managed on a Group basis and are not allocated to operating segments. The use of shared resources, mainly provided by the Group holdings, is taken into account in segment result by allocating costs among the segments pro-rata the total revenue of each segment.

3.19. EBITDA (Earnings Before Interest, Taxes, Depreciation and Amortization)

EBITDA is a non-Gaap measure but corresponds to an aggregate that is commonly used by stakeholders for analyzing the Group's performance. EBITDA has been defined by the Group based on Results from operating activities before non-recurring activities restated for net depreciation, amortization and impairment, provisions and reversal. EBITDA is not a financial measure defined by IFRS as a measurement of financial performance and may not be comparable to other similarly-titled indicators used by other companies.

3.20. Share based payment transactions and transaction costs for usual small size acquisition

Labco presents in its operating result certain cost items on a specific line in order to help management and financial investors to better understand the Group' economic performance because it identifies separately elements which are non operational and inherently difficult to predict due to their irregular nature, even if the costs are for a certain period not very significant.

3.21. Determination of fair values

A number of the Group's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. IFRS 13 defines fair value for financial reporting purpose as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability as well as classification according to IFRS 13.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows:

- Level 1: inputs are quoted prices in active markets for identical assets and liabilities that the entity can access at the measurement date
- Level 2: inputs other than quoted market prices included in level 1 that are observable for the asset or liability, either directly or indirectly (like prices for similar items or identical assets in market not active)
- Level 3 unobservable inputs for the assets and liabilities notably Labco's own data

3.21.1. Property, plant and equipment

The fair value of property, plant and equipment recognised as a result of a business combination is based on market values. The market value of property is the estimated amount that would be received to sell a property in an orderly transaction between market participants at the measurement date. The fair value of items of plant, equipment, fixtures and fittings is based on the market approach and cost approaches using quoted recent market prices for similar items when available and current replacement cost when appropriate.

3.21.2. Trade and other receivables

The fair value of trade and other receivables is estimated as the present value of future cash flows, discounted at the market rate of interest at the reporting date. The net carrying value is considered as a reasonable estimate of their fair value considering the short payment and settlement periods applied by Labco Group. This fair value is determined for disclosure purposes.

Note 3 Significant accounting policies (Continued)

3.21.3. Derivatives

The fair value of interest rate swaps is based on broker quotes. Those quotes are tested for reasonableness on an ad-hoc basis by discounting estimated future cash flows based on the terms and maturity of each contract and using market interest rates for a similar instrument at the measurement date. Fair values also reflect the credit risk of the instrument and include adjustments to take account of the credit risk of the Group entity and counterparty when appropriate.

3.21.4. Non-derivative financial liabilities

Fair value, which is determined for disclosure purposes, is calculated based on the present value of future principal and interest cash flows, discounted at the market rate of interest at the reporting date. For finance leases the market rate of interest is determined by reference to similar lease agreements.

3.21.5. Share-based payment transactions

The fair value of employee share options is generally measured using a binomial lattice model. Measurement inputs include share price on measurement date, exercise price of the instrument, expected volatility (based on weighted average historic volatility of similar quoted entities), weighted average expected life of the instruments (based on historical experience and general option holder behaviour), expected dividends, and the risk-free interest rate (based on government bonds). Service and non-market performance conditions attached to the transactions are not taken into account in determining fair value.

Note 4 Financial risk management

4.1. Overview

The Group has exposure to the following risks from its use of financial instruments:

- credit risk
- liquidity risk
- market risk

This note presents information about the Group's exposure to each of the above risks, the Group's objectives, policies and processes for measuring and managing risk, and the Group's management of capital. Further quantitative disclosures are included throughout these consolidated financial statements.

4.2. Risk management framework

The Board of Directors has overall responsibility for the establishment and oversight of the Group's risk management framework.

The Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits.

The Group Audit Committee oversees how management monitors compliance with the Group's risk management policies and procedures.

4.3. Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's receivables from customers and investment securities.

Detailed quantitative information on credit risk are provided in *Note 20 Trade and other receivables*.

4.3.1. Trade and other receivables

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The Group has no significant concentrations of credit risks due to the large numbers of customers and individually immateriality of amounts due. The Group performs ongoing credit evaluations of its receivables and establishes an allowance for impairment that represents its estimate of incurred losses in respect of trade and other receivables. The main components of this allowance are a specific loss component that relates to individually significant exposures.

4.3.2. Investments and cash and cash equivalents

The Group's exposure to credit risk arises from default of the counterparty. The Group limits its exposure to credit risk by investing mainly in liquid securities with counterparties that have a high credit rating. Management actively monitors its investments and does not expect any counterparty to fail to meet its obligations.

4.4. Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation. This planning considers the maturity of both its financial assets, and its projected cash flow from operations.

Typically the Group ensures that it has sufficient cash on demand to meet expected operational expenses for a period of 60 days, including the servicing of financial obligations. In addition, the Group maintains a line of credit (Revolving Credit Facility) under which drawings could be made for financing acquisitions or for general financing purposes. Refer to the *Note 23 Borrowings and other financial liabilities* for a description of the main characteristics of our Revolving Credit Facility.

Detailed quantitative information on liquidity risk are provided in *Note 29 Financial instruments*.

4.5. Market risk—interest rate risk

Market risk is the risk that changes in market prices, such as interest rates, will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

The Group's exposure to the risk of changes in market interest rates relates primarily to the debt drawn on the revolving credit facility (RCF). Major part of our Group long term debt is at fixed rate, enabling to limit the impacts of market risks.

Detailed quantitative information on interest rate risk are provided in *Note 29 Financial instruments*.

4.6. Operational risk

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the Group's processes, personnel, technology and infrastructure, and from external factors other than credit, market and liquidity risks such as those arising from legal and regulatory requirements and generally accepted standards of corporate behaviour. Operational risks arise from all of the Group's operations.

The Group's objective is to manage operational risk so as to balance the avoidance of financial losses and damage to the Group's reputation with overall cost effectiveness and to avoid control procedures that restrict initiative and creativity or impair operational independence of laboratory managers in countries where regulations emphasize medical independence of laboratory managers.

The primary responsibility for the development and implementation of controls to address operational risk is assigned to senior management within each business unit. This responsibility is supported by the development of overall Group standards for the management of operational risk in the following areas:

- compliance with regulatory and other legal requirements
- review regular accreditation procedures
- requirements for the periodic assessment of operational risks faced, and the adequacy of controls and procedures to address the risks identified

Note 4 Financial risk management (Continued)

- requirements for the reporting of operational losses and proposed remedial action
- training and professional development
- Ethical and business standards.

4.7. Capital management

The Board of Directors's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business.

The Board of Directors seeks to maintain a balance between the higher returns that might be possible with higher levels of borrowings and the advantages and security afforded by a sound capital position.

There were no changes in the Group's approach to capital management during the year.

Neither Labco SA nor any of its subsidiaries are subject to externally imposed capital requirements.

Note 5 Significant events

5.1. Acquisitions, business set-up, disposals and mergers

5.1.1. Acquisitions and business set-up

Refer to *Note 6—Acquisition of subsidiaries* for detailed information on acquisitions performed in 2013.

Main acquisitions during the reporting period are shown below by country.

Acquisition date	Country	Entities	
17/01/2013	France	Jollivet Bernard	
07/03/2013	France	Vial & Le Dunff	
08/03/2013	France	Sarl des Hauts de Garonne 25% minority interests	Minority interest purchase
08/04/2013	France	Chatellier Peronneau	
01/06/2013	France	Busquet Maury	Asset deal
30/06/2013	France	Baud David	
17/07/2013	France	Notteghem	
13/09/2013	France	Mallia	
06/12/2013	France	Chiche	
25/02/2013	Spain	CIC Peru Analisis Clinicos Especiales SAC	Set up
28/02/2013	Spain	Vidal 11% minority interests	Minority interest purchase
01/07/2013	Spain	Laboratorio Global	
04/12/2013	Spain	Gemolab 47,6% of minority interest	Controlling ownership purchase
25/04/2013	Switzertland	Test Tailored Efficient Swiss Testing SA (Test SA)	Set up
25/10/2013	UK	iPP 49% of minority interests	Controlling ownership purchase
01/04/2013	UK	iPS	Set up

iPP, our joint venture with Sodexo for developing outsourcing clinical diagnostic business with NHS in the United Kingdom, has started on June 1st 2012 the operation of the contract with Taunton and Somerset NHS Foundation Trust and Yeovil District Hospital NHS Foundation Trust.

Sodexo decided to significantly decrease its investment in the joint venture during 4th quarter 2013 and Labco acquired the remaining interests in iPP and iPS. The business is now controlled exclusively by Labco leading to fully consolidate iPP from October 25, 2013 on. However Sodexo will continue to hold a 3% minority interest in iPP with a call and put option enabling Labco to acquire the residual interests at nominal value. As a consequence, no non-controlling interests are recognized in the statement of financial position or statement of income.

Note 5 Significant events (Continued)

5.1.2. Disposals

Over the Summer of 2013, Labco conducted a strategic review of its German operations. From 2008 on, the Group had built up, with five well-established laboratories in the West and South of Germany, a strong albeit regional only position. As a consequence Labco board of directors decided to withdraw from the German market for the moment in order to focus activities on national markets where Labco has or can rapidly reach a leading market share or differentiated positioning. Labco announced the signature of a Share Purchase Agreement with Sonic Healthcare on September 26, 2013 for an enterprise value of €76 million. Following antitrust approval in Germany, this transaction was closed on December 2, 2013 with economic effect as at November 30, 2013 generating a minor consolidated loss on sale. In 2012 Labco's annual revenues in Germany reached €53 million and a double-digit EBITDA margin.

As a consequence since the September 30, 2013 interim closing, German Cash Generating Unit is treated as discontinued operations under IFRS 5 in the consolidated statement of income, statement of financial position and statement of cash flow with comparative information restated also for consolidated statement of income and statement of cash flow. Refer to Note 33 *Assets and liabilities held for sale and discontinued operations* for details of the contents of the items relating to Discontinued Operations.

5.1.3. Mergers and legal reorganisation

Labco Group has continued in 2013 like in 2012 to implement numerous mergers between French SELs, in order to reinforce, in compliance with French regulation, synergies actions by concentrating laboratories. Moreover similar mergers have also been performed in Spain and Portugal.

Country	Mergers
France	Brigout has been merged with Centre Biologique de Calais
France	CVDD has been merged with Bioval Laboratoires
France	Isle has been merged with Novabio Diagnotics
France	Gritti Chiali has been merged with Centre Biologique de Calais
France	Anabiol has been merged with Barla
France	CBMP has been merged with Eslab
France	SEL Biologie has been merged with Bioliance
France	Degraef Pouliquen has been merged with Bioliance
France	Jollivet Bernard has been merged with Eslab
France	Trichereau has been merged with Bioliance
France	Auguet Larroua has been merged with Anabio
France	Medbio has been merged with Anabio
France	Chatellier Perroneau has been merged with Anabio
France	Haut de Garonne has been merged with Aquilab
France	Vial & Le Dunff has been merged with Mazarin
France	Seudre has been merged with Isolab
France	Notteghem has been merged with Probio
Germany	Marburg has been merged with Giessen renamed Mittelhessen
Portugal	General Lab Portugal has been merged with Sociedad de Preparacao Lab (Soprelab) renamed General Lab Portugal
Portugal	LABOR—Analises Clinicas Dr Fernando Godinho, Lda has been merged with Flaviano Gusmao
Portugal	Clinica de Diagnosticos de Ferreira do Alentejo has been merged with Flaviano Gusmao
Portugal	LPC Laboratorio de Patologia Clinica has been merged with Gnostica Laboratorio de Analises Clinicas
Spain	Laboser has been merged with General Lab
Spain	Vidal has been merged with General Lab
Spain	Biohemo has been merged with Laboratorio Canga Arqueros

Note 5 Significant events (Continued)

5.2. Additional 8,5% Senior Secured Notes due 2018 issued for an aggregate nominal of 100 M€

Labco S.A. issued on February 13, 2013 100 M€ in aggregate principal amount of its 8.5% Senior Secured Notes due 2018, which constitutes an add-on of, and form a single class with, Labco's existing 500 M€ 8.5% Senior Secured Notes due 2018. The Additional Senior Secured Notes will mature on January 15, 2018. The gross proceeds of the issuance amounts to 103 M€, ie meaning a yield of 7.75% and were used to repay the outstanding amounts borrowed under Labco's revolving credit facility, pay the costs, fees and expenses in relation to the issuance transaction and for general corporate purposes. As a consequence Labco revolving credit facility amounting to 135 M€ were fully reimbursed but not canceled and the unused portion of the proceeds of the Additional Senior Secured Notes remains as cash and cash equivalent on the balance sheet.

Fees directly linked to the debt issuance or linked to the strategic refinancing project amount to 3,7 M€ (excluding VAT) and following the analysis are either expensed for around 0,3 M€ or capitalized as debt issuance costs for 3,4 M€. Capitalized debt issuance costs have also been netted with issuance premium amounting to 3,0 M€ and the net balance of capitalized debt issuance costs has to be amortized over the bond maturity using the effective interest rate method.

5.3. Non-recurring restructuring plans

Follow up of "Deep Dive" efficiency program in France

In the context of additional price pressure in French biology, driven by the overall economic environment, Management has decided to launch in 2012 a full and detailed review of French operations in order to restructure the French network by identifying productivity improvements through accelerated concentration and in-depth reorganization. This "Deep Dive" program into the French network took place throughout first semester 2012 and resulted in a human resources optimization plan including its associated implementation cost (severance packages).

As a consequence, non-recurring restructuring expenses were incurred in 2012 for 0,7 M€ and a restructuring provision of 0,1 M€ was recorded as at December 31, 2012. With the finalization of the "Deep Dive" efficiency program, some restructuring measures have been implemented in 2013 for an amount of 0,8 M€ and a restructuring provision of 0,1 M€ was recorded as at December 31, 2013 for people notified before year-end.

Restructuring in Iberia (Portugal and Spain)

At year-end 2011, a significant restructuring program was initiated both in Spain and Portugal. As a consequence, a restructuring provision was recorded for an amount of 2,2 M€. Some restructuring measures have been implemented in 2012 leading to use the provision for an amount of 1,1 M€. The residual restructuring actions have been performed in 2013 for an amount of 0,8 M€ and the provision fully reversed.

Furthermore a new restructuring has been implemented in Q1 2013. Indeed in the context of contract renegotiation with a major client, Labco management decided to significantly restructure the operations of the laboratories managing the contract in coordination with the client service need and incidentally the overheads. A formal restructuring plan has been implemented in Q1 2013 leading to record a non-recurring provision of 0,8 M€, partly used in 2013 for 0,5 M€. As at December 31, 2013 the restructuring provision amounts to 0,3 M€ for remaining measures to be implemented during first semester 2014.

5.4. Strategic projects

In May 2012 and in the following months, Labco management received indications of interest from potential buyers interested in acquiring Labco. In compliance with the terms of our shareholders' agreement, our largest shareholder, 3i, appointed advisors and organized an orderly sale process, which led to several offers from potential buyers. 3i and the Board of Labco have reviewed these offers, and at the same time considered the potential of stand-alone value creation for Labco. Based on Management's renewed strategic plan, including the divestment of Germany, the reinforcement in the UK and the

Note 5 Significant events (Continued)

acceleration of the medical project, it was considered more attractive by both 3i and the Board of directors to focus on delivering stand-alone strategic plan.

Moreover, Labco has incurred non-recurring expenses for an amount of 1,8 M€ related mainly to external advisors and lawyers for diligences work used internally for various strategic options.

Note 6 Acquisitions of subsidiaries

Business combination

Main acquisitions during the 2012 reporting period are shown below by country. At the end of the 1 year window period, most goodwill have been confirmed with no significant changes.

Country	Entities	Goodwill
France	Isolab+Labo des Charentes	19 826
France	Chancé	5 314
France	Labotri (Trichereau)	3 788
France	Seudre et Loire	2 392
France	Acquisition of asset deal Marian	2 380
France	Sel Biologie—Sévre et Loire controlling ownership purchase	1 396
France	Acquisition of asset deal Archambeaud	1 284
France	Degraef Pouliquen controlling ownership purchase	1 275
France	Gritti Chiali	941
France	Evlab	869
France	Biobassin	748
France	Brigout controlling ownership purchase	750
France	Auguet Lauroua	715

Main acquisitions during the reporting period are shown below by country:

Country	Entities	Goodwill
France	Baud David	6 290
France	Mallia	4 404
France	Jollivet Bernard	3 028
France	Notteghem	2 443
France	Chiche	1 851
France	Chatellier Peronneau	1 039
France	Vial & Le Dunff	892
Spain	Laboratorio Global	325
UK	iPP 49% of minority interests	(806)

All companies acquired earn revenues from medical analyses. Through these acquisitions the Group expects to reduce costs through economies of scale, and the goodwill thus represents the fair value of the expected synergies resulting from the acquisition. Specifically for the iPP acquisition, the purchase price allocation exercise leads to record an intangible contract for the Taunton and Sommerset contract amortized over the contract duration as well as deferred tax asset for net operating losses and the residual badwill generated by this step up acquisition in a specific context has been recorded as a non-recurring income for an amount of 0,8 M€.

All amounts of goodwill are provisional and subject to modification in the twelve months period following the acquisition date.

Note 6 Acquisitions of subsidiaries (Continued)

The cumulative effect of acquisitions on the Group's assets and liabilities on acquisition date corresponding to identifiable assets acquired and liabilities assumed for share deals acquisitions performed in 2013 as well as cumulative consideration transferred is presented below:

Acquisition price	**23 821**
In thousand of euros	**TOTAL**
Property, Plant and Equipment	**8 941**
Intangible assets	**12 177**
Investment in equity accounted investees	**0**
Other non-current assets	**57**
Deferred tax assets	**737**
Inventory	**635**
Trade Receivables	**980**
Other current assets	**732**
Cash and cash equivalents	**6 128**
TOTAL ASSETS	**30 387**
Provisions	**803**
Employee benefits liabilities	**138**
Deferred tax liabilities	**2 434**
Financial liabilities	**13 877**
Trade Liabilities	**5 932**
Other current liabilities	**3 438**
TOTAL LIABILITIES	**26 621**
Contingent liabilities	**0**
Total net identifiable assets	**3 767**
Goodwill	**20 860**
Badwill	**(806)**

The goodwill is attributable mainly to the synergies expected to be achieved from integrating the companies into the Group. On top of goodwill generated by share deals, Labco also made acquisitions of asset deals that generated an increase of goodwill amounting to 0,6 M€.

Note 7 Segment information

The information by geographical segment presented below corresponds to the information used by the Group General management to allocate resources to the various segments and to assess each segment's performance. It is extracted from the Group's consolidated reporting system and prepared in accordance with the same accounting rules as in the consolidated financial statements and set out in the notes thereto. The policies applied to determine the operating segments presented are set out in Note 3.18.

SEGMENT REPORTING (€ 000)	**Southern Europe**	**Northern Europe**	**Total Group**
Total revenue	**189 438**	**357 873**	**547 311**
EBITDA	**30 752**	**75 503**	**106 255**
Results from operating activities after non-recurring activities	**22 301**	**65 226**	**87 527**
Net finance costs			**(59 131)**
Income tax expenses			**(21 130)**
Share of profit of associates			**(1 265)**
Net profit of the period from Continuing Operations			**6 000**
Including Depreciation, impairment losses and amortization, provisions and reversals	*(7 686)*	*(11 315)*	***(19 001)***
Capital expenditures	**4 847**	**14 071**	**18 918**

Note 7 Segment information (Continued)

Capital expenditures correspond to gross non-current tangible and intangible asset purchases, including cash timing difference and excluding purchases of assets under finance lease.

Detailed of revenue by country break down as follows:

€ 000	2013	%	2012 Represented IFRS 5	%
France	**325 350**	**59%**	301 773	59%
Iberia	**151 190**	**28%**	149 432	29%
Belgium	**27 161**	**5%**	25 911	5%
Italy	**38 248**	**7%**	35 849	7%
Switzerland	**933**	**0%**	0	0%
United Kingdom	**4 429**	**1%**	1 252	0%
Total revenue	**547 311**	**100%**	**514 216**	**100%**

Iberia corresponds to the aggregate of Portugal and Spain.

Note 8 Payroll related expenses

€ 000	2013	2012 Represented IFRS 5
Subcontracting and temporary staff	**(9 698)**	**(9 989)**
Salaries and wages	**(163 632)**	**(153 091)**
Social security contributions	**(49 862)**	**(47 895)**
Other personnel related costs	**(9 261)**	**(8 660)**
Total payroll related expenses	**(232 452)**	**(219 635)**

Number of persons	2013	2012 Represented IFRS 5
Executives	**372**	349
Employees	**4 172**	3 962
Total Number of persons	**4 544**	**4 311**

Other personnel related costs include amongst other profit sharing, pensions expenses, travel expenses, fees for training of personnel, food allowances.

Salaries and wages expenses include also the variable remuneration paid to biologists under various legal forms, either compensation paid as salary or fees or, mainly for French biologists, the priority dividends paid on the current year result.

As explained in the basis of preparation section, the priority dividends to be paid to certain laboratory doctors after year-end are recognized as employee benefits expense and liability in the current year.

Information about the share based payment transactions is included in *note 25—Share based payment schemes.*

Note 9 Other operating expenses

€ 000	2013	2012 Represented IFRS 5
Operating lease & rental expenses	**(29 359)**	(27 463)
Taxes	**(2 720)**	(2 423)
Repairs & maintenance & insurance expenses	**(14 316)**	(12 077)
Consulting & advisory fees	**(10 888)**	(9 885)

Other expenses	**(8 757)**	(7 950)
Total other operating expenses	**(84 527)**	**(77 749)**

Note 9 Other operating expenses (Continued)

Other operating expenses include amongst other service charges relating to security and cleaning, marketing related expenses, storage costs.

According to IFRS 3 revised the transactions costs related to acquired entities are recorded in the consolidated statement of income, as well as with transaction costs for abandoned deals. Given the non operational, irregular or non-recurring nature of these costs, they have been presented on a separate line of consolidated statement of income, and depending on the amount of costs incurred by transaction project, they are qualified as transaction costs for usual small size acquisitions recorded as other operating expenses, or they are qualified as transaction costs for significant and unusual transactions recorded as non recurring operating expenses in the line Perimeter effect

The Group incurred acquisition-related costs of 972 K€ in 2013 (2012: 1 529 K€) for usual small size acquisition relating to external legal fees, due diligence costs and stamp taxes.

Note 10 Non recurring income and expenses

€ 000	2013	2012 Represented IFRS 5
Restructuring expenses and provisions for major litigations	**(5 525)**	(7 825)
Perimeter effect	**356**	(2 715)
Impairment of goodwill	**0**	0
Impairment and reversal of impairment on other non-operational assets and liabilities	**2 352**	3 694
Gains/(losses) on sale of assets	**3 091**	336
Non-recurring income and expenses	**273**	**(6 509)**

Restructuring expenses, provisions for major litigations, impairment and reversal of impairment on other non-operational assets and liabilities mainly include in 2013 following expenses or provisions:

- 0,7 M€ of restructuring expenses in relation with the remaining actions of the 2011 restructuring schemes implemented in Iberia with the corresponding use of restructuring provisions.
- 0,8 M€ of restructuring expenses in relation with the French "Deep dive" efficiency program actions performed in 2013
- 0,8 M€ of restructuring provision set up in Spain in Q1 2013 for the new restructuring plan implemented in the context of contract renegociation with a major client and provision used for 0,5 M€ during the last nine months 2013
- 1,8 M€ of non-recurring costs expensed mainly in relation to strategic projects including indirect advisors costs for the refinancing operation.
- 0,8 M€ of income related to the badwill generated by the iPP acquisition.

Furthermore the iPP step up acquisition leads also to record a non-recurring gain on sale of assets amounting to 3,4 M€ corresponding to the historical 51% Labco's share in iPP recorded previously under equity method as well as it remeasurement at fair value at acquisition date.

Restructuring expenses, provisions for major litigations, impairment and reversal of impairment on other non-operational assets and liabilities mainly included in 2012 restructuring expenses for 1,9 M€ in relation with the restructuring schemes implemented in Spain, Portugal and Belgium (MAB) announced at year-end 2011 and the finalization of the closure of Brussels headquarter. Those costs having been accrued, corresponding use of restructuring provisions have been recorded in the line Impairment and reversal of impairment on other non-operational assets and liabilities for 1,9 M€.

It included also 2,8 M€ of non-recurring costs expensed mainly in relation to strategic projects; 0,8 M€ of restructuring expenses in relation with the "Deep dive" efficiency program implemented in France during first semester 2012; 1,5 M€ of IFRS 2 expenses as a consequence of the cancellation of the Restricted Stock Unit "Free shares 2011" scheme in Q2 2012 and 1,8 M€ of net non-recurring income related to the settlement indemnity to be received in context of the early termination of a clinic contract in France, net of estimated restructuring expenses.

Note 10 Non recurring income and expenses (Continued)

Perimeter effect corresponds to earn out variations of fair value subsequent to the 1 year window period for an income of 356 K€ (in 2012: an expense of 386 K€ and a specific expense of 2 329 K€ for the earn out contracted on the acquisition of the CIC Group).

Note 11 Net finance costs

Other financial expenses correspond mainly to unwinding of the discount on provisions and other financial charges like foreign exchanges gains and losses.

As a consequence of the issuance on February 13, 2013 of additional 8,5% Senior Secured Notes due 2018 for an aggregate nominal of 100 M€, the financial charges have increased proportionally.

The interest expenses correspond now mainly to the 500 M€ Senior Secured Bonds at an effective interest rate of 9%, the additional 100 M€ Senior Secured Bonds at an effective interest rate of 8.6%, and the commitments fees and amortization of RCF debt issuance costs for the undrawn part of the Revolving Credit Facility as at December 31, 2013.

In 2012, interest expense included also some one-off costs related to the covenant amendments implemented in April 2012 for 0,6 M€.

Reconciliation of effective tax rate

The Group has operations in various tax jurisdictions which have different tax laws and rates. Consequently, the effective tax rate on consolidated income may vary from year to year, according to the source of earnings.

The Group has incurred losses amounting to 10,7 M€, for which no deferred tax asset has been recognized because the Group is to date not expecting future tax benefits which according to financial projections can be used to offset future taxable income in a timeframe of 5 years. It is mainly related to losses incurred by holdings. The comparative information for 2012 have been re-presented to impact the

(a) The line Other include in 2012 the effect of the IFRS 5 treatement of the cash generating unit Germany (−2,1m€)

The non-deductible expenses correspond mainly to the effect of the restatements of priority dividends paid to French biologists that have been classified as remuneration expenses under IFRS according to a "substance over form" analysis. In fact priority dividends recorded as personnel expenses in the consolidated financial statements are not an expense recorded in local books, and as a consequence it will not generate any Tax deductibility.

Tax losses and tax credits not recognised as deferred tax assets amounted to 111 M€ as of December 31, 2013, tax losses mainly originated in Iberia.

Impairment testing for cash-generating units containing goodwill

For the purpose of impairment testing, goodwill is allocated to groups of cash-generating units defined at the level of a country, except for Iberia (including Spain and Portugal), which represent the lowest level within the Group at which the goodwill is monitored for internal management purposes.

The aggregate carrying amounts of goodwill allocated to each group of unit and key assumptions of the impairment testing model are as follows:

€ 000	Total	France	Italy	Iberia	Germany	Belgium
Goodwill carrying amount at 31 December 2012	**620 619**	**347 039**	**30 606**	**164 348**	**60 872**	**17 754**

Discount rate 2013	**8,5%**	**8,5%**	**8,5%**	**8,5%**	**NA**	**8,5%**

Note 13 Goodwill (Continued)

The recoverable amount of each cash-generating unit was based on its value in use which was determined by discounting the future cash flows generated from the continuing use of the unit. The main assumptions on which the value in use of a cash generating unit is based are the discount rate and trends in volumes, prices and direct costs (inflation) over the period. The calculation of the value in use was based on the following key components:

- The Group's 5 years business plans determined during Summer 2012 in the context of strategic operations, rationalized with 2014 budget and with 2017 - 2018 years extrapolated using perpetual growth rate assumptions. Trends in volumes, prices and direct costs are based on past trends and on the future market outlook which include a certain level of uncertainties, especially in the current context of economic difficult environment in certain European countries.
- The cash flows projections for the years 2014 to 2018 include also:
  - Taxes impact by applying an average theoretical rate per country;
  - Working capital variance;
  - Capital expenditures corresponding in general to 2,5% of forecasted annual turnover.
- The terminal value is then calculated by discounting the forecast flows of the last year (2018) using a perpetual growth rate between 0,5% and 2% depending on the cash generating unit. This percentage is management's best estimate of the expected market evolution based on an organic growth rate such as inflation.
- The discount rate is based on the Group's weighted average cost of capital (WACC) including a leveraged beta, cost of debt and cost of equity (including market risk premium and size premium); Discount rates used are post-tax discount rates applied to post tax cash flows. Applying those rates result in value in use similar to those computed using pre-tax discount rates applied to pre-tax cash flows. (as requested by IAS 36).

Result of annual impairment testing

After having performed the annual impairment testing on goodwill, there is no impairment to record.

With regards to the assessment of value in use of the cash generating units, management believes that no reasonably possible change in any of the above key assumption would cause the carrying value of the unit to exceed materially its recoverable amount.

By applying the sensitivity test to the discount rate and growing rate assumptions, it appears that an increase or a decrease of 100 basis point would not significantly change the conclusions of the impairment tests.

Impairment testing on Software and Patents and other intangible assets

As of December 31, 2013, the Group has assessed that there were no impairment indicators relating to software, patents and other intangible assets.

Note 15 Property, plant and equipment (Continued)

Leased plant and machinery

Included in the Property, Plant and equipment schedule are the finance lease plant and machinery:

€ 000	31.12.2013	31.12.2012
Leasing—Buildings & improvements (gross)	**6 347**	63
Leasing—Buildings & improvements—(dep)	**(239)**	(7)
Net-book value	**6 108**	**56**
Leasing—furniture, industrial fixtures, equipment and tooling (gross)	**39 946**	42 175
Leasing—furniture, industrial fixtures, equipment and tooling (amt)	**(24 460)**	(26 261)
Net-book value	**15 486**	**15 914**
Leasing—motor vehicles (gross)	**706**	663
Leasing—Motor vehicles (dep)	**(447)**	(340)
Net-book value	**259**	**323**
Leasing—IT equipment (gross)	**72**	0
Leasing—IT equipment (dep)	**(12)**	0
Net-book value	**60**	**0**
Net lease property under finance leases	**21 914**	**16 293**

The leased plant and machinery mainly relate to the automats included in technical equipment used for medical analyses. The contracts in use for this activity stipulate that, if the laboratory buys exclusively from the supplier chemical reagents for a certain indicative volume during the term of the contract, the supplier, in return, puts an automat at the disposal of the Group for free during the contractual period (referred to as "pay per test" equipment").

These "put at disposal" schemes, although not under the legal form of a leasing agreement, correspond, in substance, to a lease agreement whereby the global price paid for the reagent includes the cost of the consumable and the rent/lease of the machine. As a consequence under IFRS, such agreements are analysed in accordance with IAS 17 on leases with respect to the transfer of majority of risks and rewards.

A number of such contracts have been classified as finance leases. For these contracts, the relating finance lease assets and liabilities have been recognized on the balance sheet at the lower of the fair value of the asset and the present value of the minimum lease payment at inception of the contract. The assets are depreciated over the average lease term (60 months).

Note 16 Investments in associates

The Group's share of profit in its associates (equity accounted investees) for the year was (1 265) K€ (2012: (69) K€).

Following the acquisition of the controlling ownership in 2013 of the UK joint venture iPP and the Spanish laboratory Genetica Molecular Laboratorio SL, the remaining investments in associates of Labco Group are mainly a 49% interest in a French biology laboratory (Val de Garonne), a 36% interest in an entity, Labo des Charentes, owned by Isolab and a Spanish biology laboratory (Lab Dos Analisis). In 2012, Labco group acquired the controlling ownership of the 3 French biology laboratories historically recorded under equity method (Brigout, Degraef Pouliquen and Sèvre et loire biologie).

Otherwise the Group owned interests between 10% and 50% in local Economic Interest Group (so called Société Civile de Moyens [SCM] in France and Consorzio in Italy), which corresponds to entity in which support functions are pooled and working for the Labco group labs but also other external entities. For those entities, the Group has significant influence but no control of the entities.

In 2013 the Group receives dividends from its investments in equity accounted investees for an amount of 329 K€ (2012: 372 K€).

Derivatives used for hedging	**0**	0
Non-current receivables	**972**	528
Other non current assets	**9 265**	**8 938**

Non-current assets correspond mainly to deposits and guarantees provided to lessors for the renting of buildings and other premises, as well as non-current other receivables.

For entities in which the Group has an ownership below 20% or no significant influence, they are not consolidated and the investments in those entities have been classified as available for sale financial assets pursuant to IAS 39 and, as such, recognized at fair value or historical value when fair value could not be reliably estimated. Available-for-sale financial assets (non consolidated investments) and other available-for-sale assets are categorized within level 3. Unrealized gains and losses are taken directly to other comprehensive income, except for impairment losses that are recognized in the Income Statement. No unrealized gain or loss was recognized in 2013 and 2012.

The principal equity investments in unconsolidated companies held by the Group are as follows:

The entities Labco Corporate Assistance and Labco Services France owned at 100% by Labco SA are not consolidated as at December 2013 because they were created at year-end 2012 and have no activity. Those entities join in 2013 the Labco SA tax integration but remain with no activity until Labco management decides otherwise. The entity Laboratorios Martinez Reig was acquired in 2012 and Hematologia y genetic has been recently acquired and for both entities financial information are not available timely but they have a limited activity. CIC Peru has been set up in 2013 with no activity in 2013.

Note 18 Deferred tax assets and liabilities

€000	Notes	31.12.2013	31.12.2012
Deferred tax assets on temporary differences book to tax		**944**	**1 311**
Deferred tax liabilities on temporary differences book to tax		**(4 957)**	**(3 115)**
Tax Losses carried forward	(a)	**5 193**	**4 986**
Temporary differences relating to provisions (mainly retirement indemnities)		**2 137**	**1 846**
Temporary differences relating to fixed asset (mainly finance leases)		**165**	**149**
Deferred tax on derivatives		**51**	**69**
Net deferred tax		**3 533**	**5 246**
—Deferred tax assets		**8 579**	**7 615**
—Deferred tax liabilities		**(5 046)**	**(2 369)**
Net deferred tax		**3 533**	**5 246**

(a) Capitalized tax losses carried-forward represent French entities for 2,1 M€, Iberian entities for 2,3 M€ and UK entities for 0,7 M€. The increase compared to 2012 is explained for Iberia (+0,3 M€) by the update of our forecasts to use part of these losses within the next 5 years in a tax environment that remains uncertain and for the UK by the recognition in the business combination of the fair value of tax losses carried forward at acquisition date. The activation of deferred tax assets on tax losses carried forward is completed based on Labco's management estimate of the probability to use these losses within the next 5 years based on our forecasts including effects of restructuring actions implemented or to be implemented.

Note 19 Inventories

€ 000	31.12.2013	31.12.2012
Raw materials	**1 346**	1 705
Reagents (net)	**6 884**	7 233
Total Inventories	**8 230**	**8 938**

There were no significant write-offs regarding inventories during 2012 and 2013.

Note 20 Trade receivables and other current assets

€ 000	31.12.2013	31.12.2012
Trade receivables	**85 517**	**7 442**
Other current assets	**12 945**	**13 704**
Prepaid expenses and accrued income	**3 377**	2 962
Receivables related to taxes	**7 438**	6 526
Other receivables	**2 130**	4 217
Current derivatives	**0**	0
Trade receivables and other current assets	**98 462**	**111 146**

The decrease in Trade receivables is mainly explained by a continued improvement of overdue collection in Spain and Portugal compared to December 31, 2012 and by the disposal of the German entities, partly compensated by acquisition effects.

€ 000	Gross	Impairment	Net
Trade receivables	**88 480**	**(2 963)**	**85 517**
Other current assets	**13 285**	**(340)**	**12 945**
Prepaid expenses and accrued income	3 377	0	3 377
Receivables related to taxes	7 438	0	7 438
Other receivables	2 470	(340)	2 130
Trade receivables and other current assets	**101 766**	**(3 303)**	**98 462**

The Group's exposure to credit and currency risks related to trade and other receivables is disclosed below.

Note 20 Trade receivables and other current assets (Continued)

Credit risk

Exposure to credit risk

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was:

€ 000	31.12.2013	31.12.2012
Available-for-sale financial assets	**836**	687
Other available-for-sale financial assets	**2 093**	2 839
Cash and cash equivalents	**167 801**	56 595
Loans and receivables	**98 462**	111 146
Total	**269 193**	**171 267**

Impairment losses

The movement in the allowance for impairment in respect of loans and receivables during the year was as follows:

€ 000	2013	2012
Balance at 1 January	**(3 612)**	**(3 713)**
Increase	**(1 465)**	(1 553)
Reversal	**1 353**	996
Perimeter variations	**(161)**	(226)
Other	**581**	885
Balance at 31 December	**(3 304)**	**(3 612)**

The Group has no significant concentrations of credit risk due to the large number of customers and individually non-significance of amounts due. The Group performs ongoing credit evaluations of its receivables. The actual write off relating to trade receivables as at 31 December 2013 relates mainly to several non-significant clients especially in Iberia and Belgium and amounts to 2.3 M€. As at 31 December 2012 it amounts to 1,6 M€. Actual losses are however within management's expectations.

In 2012, given settlement received from Inami in Belgium in fourth quarter 2012, impairment losses of other receivables had been released (0.9 M€) and presented in the line "Other". In 2013, the line "Others" includes the effect of the disposal of German entities.

Based on historic default rates, the Group believes that, apart from the above, no additional impairment allowance is necessary in respect of trade receivables. At 31 December 2013, as for 2012, the Group does not have any collective impairments on its loans and receivables or its investments.

Note 21 Cash and cash equivalents

For the purposes of the consolidated statement of cash flows, cash and cash equivalents include cash on hand and in banks, net of outstanding bank overdrafts and cash equivalent. Cash and cash equivalents at the end of the reporting period as shown in the consolidated statement of cash flows can be reconciled to the related items in the consolidated statement of financial position as follows:

€ 000	31.12.2013	31.12.2012
Cash equivalents	**115 787**	8 745
Cash on hand and bank deposits	**52 014**	47 850
Cash and cash equivalents	**167 801**	**56 595**
Bank overdrafts	**(372)**	(466)
Cash and cash equivalents in the statement of cash flows	**167 430**	**56 129**

Cash equivalents correspond, according to the categorization by hierarchy of fair values as stated by IFRS 7, to financial instrument of level 1. The significant increase of cash equivalents corresponds to the

Note 21 Cash and cash equivalents (Continued)

residual cash obtained through the issuance of additional 8,5% Senior Secured Notes for an aggregate nominal of 100 M€ after reimbursing the drawn Revolving Credit Facility and to the proceeds received from the disposal of German entities. The Revolving Credit Facility ("RCF") covenants impose to keep a minimum cash balance of 20 M€ at each quarter end.

Note 22 Capital and reserves attributable to owners of the parent

Ordinary shares

As at December 31, 2013 the authorised share capital comprised 68 459 322 shares. The shares have a par value of one euro (1 €), all shares being fully paid. The shares are denominated into five types, the holders of shares are entitled to the same rights to receive dividend, and are entitled to one vote per share at general meetings of shareholders of the Company. The share capital of Labco is divided into five types of shares, each held by a different category of shareholder:

- certain laboratory doctors from whom we acquired clinical laboratories (the "A Shareholders");
- our shareholders known as "founders" (the "B Shareholders");
- financial investors (the "C Shareholders"); and
- other shareholders (the "D Shareholders" and the "Ordinary Shareholders") such as our management, family members and estate planning entities of the laboratory doctors who are also our A Shareholders.

Approximately 189 laboratory doctors of our Group are A Shareholders, holding together with some of their affiliates who are also A Shareholders, approximately 17.4% of the Company's share capital. These laboratory doctors became shareholders of the Company by reinvesting a part of the purchase price we paid to acquire their laboratories.

The B Shareholders, representing the "founding" shareholders of our Group, are Eric Souêtre, Stéphane Chassaing, Luis Vieira and the shareholders from whom we acquired "General Lab S.A." in 2007. Together, they hold approximately 17,6% of the Company's share capital.

The C Shareholders are financial investors who together hold approximately 41,4% of the Company's share capital. To date, the investment vehicles managed by "3i" are, together, our largest shareholder, the latter having invested €115 million and holding approximately 17,8% of our share capital. "3i" is an international investor focused on private equity, infrastructure and debt management. Other financial investors include notably Viking Limited, a private equity firm that invested in Labco in 2004, CM-CIC Investissements, TCR Capital and Ixen Investissement.

The D Shareholders and the Ordinary Shareholders, comprised of our management and the family members and estate planning entities of the laboratory doctors who are also our shareholders, hold the remaining approximately 23.5% of the Issuer's share capital (i.e., approximately 22.6% of D shares and 0.9% of ordinary shares).

The remaining part of the share capital, ie approximately 0,1%, is held by the Company as Treasury shares.

In number of shares	2013	2012
On issue at 1 January	**68 459 322**	**43 336 733**
Issued for cash		25 122 589
Exercise of share options		
On issue at 31 December	**68 459 322**	**68 459 322**

Issuance of ordinary shares during the period

None in 2013. In total, the share capital amounts as at December 31, 2013 to €68 459 322.

Note 22 Capital and reserves attributable to owners of the parent (Continued)

Hedging reserve

The hedging reserve comprises the effective portion of the cumulative net change in the fair value of cash flow hedging instruments related to hedged transactions that have not yet occurred. As a consequence of refinancing operations performed in January 2011, all cumulative fair value changes of cash flow hedging instruments recorded in other comprehensive Income have been recycled in profit & loss.

Stock option plan reserve

The stock option reserve comprises the employee expenses relating to the share-based payment plans of the Group.

Actuarial gains and losses reserve

The actuarial gains and losses reserve comprises the cumulative net change in actuarial gains and losses (due to discount rate and main actuarial assumptions) computed for the long term employee benefits valuation.

Reserve for own shares

The reserve for own shares comprises the costs of the Company's shares held by the Group. As of December 31, 2012, the Group held 646 K€ of the Company's shares, corresponding to 80 709 shares. As of December 31, 2013, the Group held 646 K€ of the Company's shares, corresponding to 80 709 shares (80 707 A shares and 2 D shares).

Dividends

No dividends were declared and paid to the shareholders of Labco SA during 2012 and 2013.

Equity Warrant schemes

Labco has issued warrants to financial investors and key management personnel of our Group.

Warrants Issued to Financial Investors

During the year ended December 31, 2008, the Company issued three warrant schemes entitling the holders, upon exercise of the warrants to subscribe for other financial instruments or shares of the Company at a fixed price of €1 per share.

The number of warrants that can be exercised depends on the ability of the Group to meet certain financial and operational targets. The exact terms of the exchange at the exercise dates were determined when the Company entered into the issuance agreements. Subject to the fulfillment of their conditions, the warrants are exercisable at any time during a period of 15 years after their date of subscription.

A total of 4 223 394 "ABSA C1" were issued, i.e., 4 223 394 Class C shares to which a total of 16 893 576 warrants of four different kinds were attached, providing subscription rights for a maximum of 4 113 531 new Class C shares at a price of €1 per share. A total of 80 878 shares were issued in 2009 by the exercise of 80 878 warrants attached to the "ABSA C1", pursuant to their terms and conditions.

A total of 4 223 394 "ABSA C2" were issued, i.e., 4 223 394 Class C shares to which a total of 8 446 788 warrants of two different kinds were attached, giving subscription rights for a maximum of 2 323 852 new Class C shares at a price of €1 per share. A total of 27 049 shares were issued in 2010 by the exercise of 27 049 warrants attached to the "ABSA C2", pursuant to their terms and conditions.

A total of 1 967 083 "BEABSA" were issued, i.e., 1 967 083 options giving subscription rights for a maximum of 2 097 145 "ABSA C3", i.e., 2 097 145 Class C shares to which a total of 4 541 820 warrants of two different kinds could be attached, giving subscription rights for a maximum of 1 176 860 new Class C shares at a price of €1 per share. A total of 2 020 660 "ABSA C3" were issued in 2009 by exercise of the 1 967 083 "BEABSA", pursuant to their terms and conditions.

A total of 54 367 C shares were issued in 2012 by the exercise of 54 367 financial investors warrants. No financial investors' warrants were exercised during 2013.

Note 22 Capital and reserves attributable to owners of the parent (Continued)

On January 18, 2013, general meetings of holders of certain securities issued by Labco and an extraordinary general meeting of Labco's shareholders decided to amend the terms and conditions of the ABSA C1, ABSA C2 and BEABSA in order to modify their conditions of exercise.

Warrants Issued to Mezzanine Lenders

Three additional warrant schemes were issued by the Company in July 2008. These warrants entitle the holders upon exercise of the instrument to buy one share of the Company at either a fixed price of €1 (mezzanine B and C) or €14,206582 (mezzanine A) per share. The warrants were granted at a price of €0,0001 per warrant. A total of 494 241 Senior Mezzanine warrants, split in 313 243 Senior Mezzanine A, 38 752 Senior Mezzanine B and 142 246 Senior Mezzanine C, were issued. A total of 6 018 shares were issued in 2010 by exercise of 6 018 Senior Mezzanine B warrants, pursuant to their terms and conditions.

A total of 1 464 175 Junior Mezzanine warrants, consisting of 927 975 Junior Mezzanine A, 114 800 Junior Mezzanine B and 421 400 Junior Mezzanine C, were issued. A total of 17 829 shares were issued in 2010 by exercise of 17 829 Junior Mezzanine B warrants, pursuant to their terms and conditions.

A total of 1 460 443 Junior additional Mezzanine warrants, consisting of 925 609 Junior Additional Mezzanine A, 114 508 Junior Additional Mezzanine B and 420 326 Junior Additional Mezzanine C, were issued. A total 17 784 shares were issued in 2010 by exercise of 17 784 Junior Additional Mezzanine B warrants, pursuant to their terms and conditions.

No mezzanine lenders' warrants were exercised in 2013.

On January 18, 2013, Labco entered into a settlement agreement with the Mezzanine lenders and the C Shareholders regarding the exercise conditions of certain Mezzanine warrants.

Note 23 Borrowings and other financial liabilities

This note provides information about the contractual terms of the Group's interest-bearing loans, borrowings, which are measured at amortized cost, and other financial liabilities. For more information about the Group's exposure to interest rate, foreign currency and liquidity risk, see note 29 *Financial Instruments*.

Note 23 Borrowings and other financial liabilities (Continued)

Labco performed a refinancing operation early 2011 with an additional issuance early 2013 that significantly modified the sources of fundings for Labco Group.

On January 14, 2011, Labco SAS issued High Yield Senior Secured Notes (also, the "Bond") due 2018 for 500M€ with international investors in London and with Deutsche Bank as Trustee. The main terms and conditions of the Notes are:

- Fixed interest rate amounting to 8.5%, with interests paid semi-annually in arrears.
- Maturity of the Notes is January 15, 2018
- The Notes are guaranteed on a senior secured basis by certain subsidiaries, mainly through first ranking liens over the capital stock of certain subsidiaries and certain present and future intercompany loan receivables
- Under the Notes indentures, Labco will have to respect certain covenants mainly related to reporting and information requirement.
- The Notes have been listed on the Official List of the Irish Stock Exchange and admitted to trading on the Irish Stock Exchange.

The Notes proceeds have been primarily used to repay the December 31, 2010 existing bank debt facilities as well as fees related to this operation. Fees directly linked to the debt issuance or linked to the strategic refinancing project amounted to approximately 16 M€ (excluding VAT) and following their analysis have been either expensed or capitalized as debt issuance costs to be amortized over the Notes maturity using the effective interest rate method.

At the same time end of January 2011, Labco SAS entered into a 135 M€ revolving credit facility under a syndicated Revolving Credit Facility Agreement (the "RCF") with Credit Suisse, Deutsche Bank, Natixis and UBS as lead banks, and Natixis as agent. The main terms and conditions of the RCF are:

- Floating interest rate defined as Euribor + a margin of 4,5% per annum (margin that may reduced to 4.0% or 3.5% per annum by reference to a total net debt to adjusted EBITDA test);
- Maturity of the RCF is February 15th, 2017;
- Borrowings under the RCF will mandatory be used to finance part or all of purchase price and related costs of certain permitted acquisitions (as defined in the agreement), refinance existing indebtedness of entities acquired, finance restructuring costs in relation with acquisition, finance capital expenditure and fund working capital and other general corporate purposes of the Group, provided that the aggregate outstanding amounts of utilization under capital expenditure or working capital funding may not at any time exceed 50 M€;
- The RCF is guaranteed on a joint and several basis by certain subsidiaries qualified as Guarantors, mainly through first ranking liens over the capital stock of certain subsidiaries and certain present and future intercompany loan receivables. The RCF requires that the EBITDA of the Guarantors represent not less than 70% of consolidated EBITDA of the Group;
- The Revolving Credit Facility Agreement also requires Labco, each Borrower and each Guarantor (together, the "Obligors") to observe certain customary affirmative and restrictive covenants, subject to certain exceptions, including:
  - covenants relating to financial information and accounting;
  - covenants relating to obtaining required authorizations; compliance with laws; compliance with environmental laws; information about environmental claims; payment of taxes; *pari passu* ranking of unsecured payment obligations; insurance; granting of access; intellectual property; compliance with financial assistance laws; guarantor coverage (as described above); publicity; limitations on disposals and reorganizations; additional restrictions on distribution of dividends;
  - no other financial indebtedness ranking senior to, or *pari passu* with, the RCF (other than additional Notes and, subject to lenders' consent, additional revolving credit facilities);

Note 23 Borrowings and other financial liabilities (Continued)

  - restriction on incurring additional indebtedness subject to customary exceptions including up to (i) 25 M€ at any time for all members of the Group and (ii) 15 M€ at any time for all members of the Group other than the Borrowers and the Guarantors; and
  - restriction on incurring recourse factoring or similar arrangements in excess of 5.0 M€ in aggregate at any time.

- The Revolving Credit Facility Agreement also requires Labco to ensure compliance with some financial covenants detailed below.

Fees directly linked to the debt issuance amounted to approximately 8.8 M€ (excluding VAT) and have been capitalized as debt issuance costs to be amortized over the RCF maturity using the effective interest rate method.

An Intercreditor Deed Agreement has also been signed between, among others, the Obligors, Deutsche Bank AG, London Branch as Security Agent, Natixis as senior Agent, Deutsche Bank AG, London Branch as Senior Secured Notes Trustee, the Lenders (as Revolving Credit Facility Lenders), the Arranger (as Senior Arrangers), the Hedge Counterparties (each as defined in the Intercreditor Deed), and the Intra-Group Lenders (as defined in the Intercreditor Deed) to define securities and guarantees provided by certain subsidiaries in the context of Bond and RCF issuance.

Moreover, Labco S.A. issued on February 13, 2013 100 M€ in aggregate principal amount of its 8.5% Senior Secured Notes due 2018, which constitutes an add-on of, and form a single class with, Labco's existing 500M€ 8.5% Senior Secured Notes due 2018. The Additional Senior Secured Notes will mature on January 15, 2018. The gross proceeds of the issuance amounts to 103 M€, ie meaning a yield of 7.75% and were used to repay the outstanding amounts borrowed under Labco's revolving credit facility, pay the costs, fees and expenses in relation to the issuance transaction and for general corporate purposes. As a consequence Labco revolving credit facility amounting to 135 M€ were fully reimbursed but not canceled and the unused portion of the proceeds of the Additional Senior Secured Notes remains as cash and cash equivalent on our balance sheet.

Fees directly linked to the debt issuance or linked to the strategic refinancing project amount to 3,7 M€ (excluding VAT) and following the analysis are either expensed for around 0,3 M€ or capitalized as debt issuance costs for 3,4 M€. Capitalized debt issuance costs have also been netted with issuance premium amounting to 3,0 M€ and the net balance of capitalized debt issuance costs has to be amortized over the bond maturity using the effective interest rate method.

As of December 31, 2013, the Group borrowings comprises

- A €600 million 8,5% Senior Secured Notes due 2018 net of debt issuance costs, with interests paid semi-annually in arrears
- Some bilateral bank borrowings for a total of 13,9 M€
- The Revolving Credit Facility (RCF) amounting 135 M€ entered in January 2011 has not been drawn as at December 31, 2013. Nevertheless the capitalized debt issuance costs continue to be amortized over RCF maturity.

Note 23 Borrowings and other financial liabilities (Continued)

8.5% Secured Senior Notes covenants

Under the Notes indentures, Labco has to respect certain covenants mainly related to reporting and information requirement.

Revolving Credit Facility (RCF) covenants

The RCF includes certain financial covenants as defined in the agreements.

- leverage ratio tested quarterly (calculated as the ratio of consolidated total net debt at each quarter end to consolidated adjusted EBITDA for the 12 months ending on that quarter end),
- super senior gross leverage ratio tested quarterly (calculated as the ratio of total super senior gross debt at each quarter end to adjusted EBITDA for the 12 months ending on that quarter end);
- minimum cash balance of €20 million, tested quarterly; and
- operating capital expenditure for a financial year not to exceed 3.5% of consolidated group revenue

Furthermore, Labco should also achieve an incurrence ratio when we are willing to draw on the RCF. The incurrence ratio is calculated as the ratio of pro forma the acquisitions consolidated total net debt to consolidated adjusted EBITDA for the immediate preceding period pro forma the effect of acquisitions.

"Leverage Ratios" in clause 26.2(a) of the Revolving Credit Facility Agreement is as follows:

Relevant Period	Ratio
Relevant Period expiring after 31 December 2011 but on or before 31 December 2012	5.75:1
Relevant Period expiring after 31 December 2012 but on or before 31 December 2013	5.75:1
Relevant Period expiring after 31 December 2013 but on or before 31 December 2014	5.50:1
Relevant Period expiring after 31 December 2014 but on or before 31 December 2015	5.25:1
Relevant Period expiring after 31 December 2015	5.00:1

"Incurrence Ratios" in clause 27.14(c) of the Revolving Credit Facility Agreement is as follows:

Relevant Period	Ratio
Relevant Period expiring after 31 December 2011 but on or before 31 December 2012	5.25:1
Relevant Period expiring after 31 December 2012 but on or before 31 December 2013	5.25:1
Relevant Period expiring after 31 December 2013 but on or before 31 December 2014	5.00:1
Relevant Period expiring after 31 December 2014 but on or before 31 December 2015	4.75:1
Relevant Period expiring after 31 December 2015	4.50:1

As of December 31, 2013, Labco achieved the expected covenants ratio targets.

Finance lease liabilities

The Group has finance leases mainly for the technical equipment (refer to note 15 *Property, plant and equipment*).

Note 24 Employee benefit liabilities

All of employees of the Group are covered by state pension and collective plans managed by third parties if required under local legislation. Those plans are defined contribution plans.

In addition to these legal pension schemes, a provision is set up for post-employment benefits in France and Italy amounting to 8,6 M€ as of December 31, 2013 (6,6 M€ and 2,0 M€ respectively). In Italy, there is a legal obligation (so called TFR) to pay 7,4% of the employee's annual remuneration for every working year at the departure date.

Note 24 Employee benefit liabilities (Continued)

In France the principal assumptions used for the purposes of the actuarial valuations are as follows:

Principal assumptions	2013	2012
Voluntary departure	**100%**	100%
Discount rate	**3,15%**	3,00%
Social charge rate	**52%**	45%
Employer contribution rate	**50%**	50%
Age at retirement	**67 years**	67 years
Salary increase	**1,5%**	1,5%
Employee turnover rate	**low**	low

The movements in the provision for post employment benefits in France and in Italy can be summarized as follows:

€ 000	French Post Employment benefit	Italian Post Employment benefit	Total
Balance at 1 January 2013	**6 201**	**1 957**	**8 158**
Current service cost	269	40	**310**
Interest cost on benefit obligation	192		**192**
Net actuarial loss recognised in OCI	(323)		**(323)**
Impact from business combination	283	0	**283**
Balance at 31 December 2013	**6 623**	**1 997**	**8 620**

The French post employment benefit and the portion of TFR before January 1st, 2007 accounted for as post employment benefit are not financed through external fundings.

The cumulative net actuarial gains and losses recognized in OCI is detailed in the table Other comprehensive Income and amount to 323 K€ (2012: 302 K€).

Note 25 Share based payment schemes

Warrants Issued to Management

On March 24, 2005, the Company established two manager share warrant schemes (denominated "BSA 2005-1-1" and "BSA 2005-1-2") that entitle key management personnel to subscribe for new shares of the Company, subject to the fulfillment of the conditions detailed in the corresponding issuance agreements. On June 7, 2006 ("BSA 2006-1-1"), March 13, 2007 ("BSA 2007-1-1"), December 30, 2007 ("BSA 2007-1-2"), March 5, 2008 ("BSA 2008-1-1") and September 20, 2010 ("BSA 2010-1-1"), additional manager share warrant schemes were implemented in favor of key management personnel of the Group.

Each share warrant gives the beneficiary the right to subscribe for one share of the Company at an exercise price determined on the allocation date, on predetermined graded vesting dates. The exercise conditions mainly depended on certain financial targets and, in some cases, include an employment condition. The meeting of the Strategic Committee of the Company held on April 23, 2008 established that the exercise conditions of the three categories of share warrants issued on June 7, 2006, March 13, 2007 and December 30, 2007 (BSA 2006-1-1, BSA 2007-1-1 and BSA 2007-1-2) were fulfilled, pursuant to their terms and conditions, so as to allow the holders to exercise such share warrants at any time.

The general meeting of shareholders held on December 30, 2008 modified the terms and conditions of the two categories of share warrants issued on March 24, 2005 (BSA 2005-1-1 and BSA 2005-1-2) to remove all constraints in order to allow the holders to exercise such share warrants at any time. As a result of these decisions and the modifications to the schemes, the beneficiaries can exercise the share warrants granted by these five schemes at any time, within a period of ten years following the date of subscription. According to IFRS 1, the Group did not apply IFRS 2 to 2005, 2006 and 2007 share-based payment arrangements since they had vested at the date of transition.

For the BSA 2008-1-1 scheme, the share warrants vest in 2009, 2010 and 2011. For the BSA 2010-1-1 scheme, the share warrants can be exercised only upon the sale or initial public offering of the Company.

No warrants issued to management were exercised in 2013.

Note 25 Share based payment schemes (Continued)

On April 7, 2011, the Company established a Restricted Stock Unit Plan (denominated "Free Shares 2011") that entitle key management personnel to obtain up to 150 000 free shares, subject to the fulfillment of the conditions detailed in the issuance agreement. That Free Shares 2011 plan was treated under IFRS 2 until it was cancelled in Q2 2012 resulting in the residual IFRS 2 estimated charges initially spread over vesting period to be immediately recorded in consolidated statement of income for an amount of 1 537 K€ in non-recurring expenses and the whole amount of Fair Value reserve related to Restricted Stock Unit scheme of 3.5 M€ recycled in other consolidation reserves.

The services received during 2013 (share-based payment expense) amounts to a total of 336 K€ for 2010 BSA scheme. Indeed, the 2008 BSA plan is now fully vested and the 2010 BSA schemes IFRS 2 expense has been revised due to the departure of certain beneficiaries. The total amount of Fair Value reserves related to the stock options plans amounts to 3.8 M€ as at December 31, 2013 (3,5 M€ as at December 31, 2012).

Terms and conditions of the share option programs

The terms and conditions relating to the grants of share warrants are as follows; all share warrants are to be settled by physical delivery of shares:

Plan	Number of instruments	Exercise period	Exercise price	Option price	Average fair value at grant date
BSA 2005-1-1	907 067	At any time between 30 December 2008 and 23 June 2015	1	0,1	0,21
BSA 2005-1-2	108 782	At any time between 30 December 2008 and 23 June 2015	1	0,1	0,21
BSA 2006-1-1	6 796	At any time between 23 April 2008 and 7 June 2016	1	0,1	1,08
BSA 2007-1-1	109 806	At any time between 23 April 2008 and 13 March 2017	2,5	0,25	1,34
BSA 2007-1-2	104 337	At any time between 23 April 2008 and 30 December 2017	2,5	0,25	3,74
BSA 2008-1-1	438 317	At any time between 1 January 2009, 1 January 2010 and 1 January 2011 (each tranche ⅓ of the options)	8	0,8	4,97
BSA 2010-1-1	279 268	Upon sale or initial public offering of Labco	14,84	1,5	7,02
Total	**1 954 373**				

Given the dilutive effect of March 12, 2012 capital increase at par value, all equity warrants holders have been granted a protection right against the dilutive effect. In fact, pursuant to the ninth resolution adopted by the general shareholders' meeting held on March 12, 2012, holders of securities granting access to the share capital will be allowed to subscribe to new shares as of right, at the ratio of four new shares with a par value of one euro each for seven shares subscribed with their securities (seven shares subscribed by exercise of their securities granting access to the share capital giving the right to subscribe to four additional new shares at a subscription price of one euro per share).

Note 25 Share based payment schemes (Continued)

Fair value of the options granted during the period

The fair value of the services received in return for share options is based on the fair value of the share options granted, measured using the Binomial model for 2008 scheme and using a weighted average models of scenarios for the "BSA 2010-1-1" scheme and "Free Shares 2011" plan with the following inputs:

	2010 scheme	2008 scheme
Expected volatility (% pa) (based on average volatility on certain indicators of results of comparable quoted entities)	na	32,95
Risk-free interest rate (% pa)	na	4
Expected dividend yield (% pa)	na	nil
Rate of pre-vesting forfeiture (% pa)	20%	nil
Rate of post-vesting leaving (% pa)	na	nil
Multiplier	na	3
Number of nodes	na	200

The Group recognized as share-based payment expense 336 K€ during the year (345 K€ in 2012) for 2010 schemes and in 2012, 220 K€ for Free shares 2011 for Q1 2012 as well as 1 537 K€ in non-recurring expenses following cancelation of the Free shares plan. The total amount of reserves related to the stock options plans amounts to 3 840 K€ (3 504 K€ in 2012).

Movements in share options during the year

	2013		2012	
	Number of share options	Weighted average exercise price	Number of share options	Weighted average exercise price
Outstanding at the beginning of the year	**1 954 373**	**5**	1 954 373	5
Granted during the year	**0**	**0**	0	0
Forfeited during the year	**0**	**0**	0	0
Exercised during the year	**0**	**0**	0	0
Expired during the year	**0**	**0**	0	0
Outstanding at the end of the year	**1 954 373**	**5**	1 954 373	5
Of which exercisable at the end of the year	**1 675 105**		1 675 105	

No options have been exercised in 2012 or in 2013.

As a reminder, the protection right of equity warrants holders against the dilutive effect of March 12, 2012 capital increase enables them to subscribe in case of exercise of the warrants new shares at the ratio of four new shares with a par value of one euro each for seven shares subscribed with their securities.

Note 26 Provisions

€ 000	Provision for litigations	Provisions for restructuring	Other provisions	Total
At 1 January 2013	**2 718**	**2 045**	**1 941**	**6 704**
Provisions made during the period	356	803	0	**1 159**
Provisions utilized/reversed during the period	(823)	(2 145)	(162)	**(3 129)**
Translation ajustment	0	15	0	**15**
Other	(620)	481	(1 720)	**(1 859)**
At 31 December 2013	**1 631**	**1 200**	**59**	**2 890**
Current at the end of the period	1 631	1 200	59	**2 890**
Non-current at the end of the period	0	0		**0**

The "Other" line corresponds mainly to the effect of perimeter variation with especially the disposal of German entities and the entry of iPP.

Note 26 Provisions (Continued)

Provision for litigation

In the normal conduct of its business, the Group has legal suits relating to different matters (personnel, taxes, suppliers) with uncertainties about the amount or timing of the outflows. According to management and as confirmed by legal counsels, the recorded provision is considered to be sufficient to cover probable losses.

Provisions for restructuring

The provisions for restructuring correspond mainly to provisions for 2011 restructuring in Iberia covering principally the severance payments and the remaining rental fees for the building to be abandoned and the new restructuring in Spain implemented in Q1 2013.

Indeed in the context of contract renegotiation with a major client, Labco management decided to significantly restructure the operations of the laboratories managing the contract in coordination with the client service need and incidentally the overheads. A formal restructuring plan has been implemented in Q1 2013 leading to record a non-recurring provision of 0,8 M€, partly used in 2013. Some measures remain to be implement in H1 2014 and the provision amount to 0,3 M€ as at December 31, 2013.

The 2011 restructuring plans both in Spain and Portugal have been finalized and remaining provision reversed.

Furthermore, a provision of 0,1 M€ has been set up for people notified before year-end in the framework of the Deep dive efficiency plan in France (refer to Note 5.3 Non-recurring restructuring plans).

Other Provisions

The other provisions correspond mainly to the provision for negative share of investments in associates recorded under equity method and the significant decrease in 2013 is related to iPP which is now fully consolidated.

Note 27 Litigations and Contingent liabilities

Group companies are involved in various legal proceedings arising in the ordinary course of business, including disputes concerning professional liability and employee related matters, as well as inquiries from governmental agencies and health insurance carriers regarding, among other things, billing issues or litigations with tax, social security and customs authorities. Provisions have been set aside for the probable costs, as estimated by the Group's entities and their counsel, for the various litigations.

We had a lawsuit against the seller of one of our clinical laboratories MVZ Dillenburg in a context of alleged fraudulent activities which was referred to in the audited Consolidated Financial Statements of Labco for the year ended December 31, 2012 as the Dillenburg litigation. For the evolution of the Dillenburg litigation, please refer to Note 33 *Assets and liabilities held for sale and discontinued operations*.

No contingent liability has been identified for which it will be necessary to disclose information in the notes to the consolidated financial statements.

Additionally, we operate in a regulated industry. As such, in the ordinary course of business, we are subject to national and local regulatory scrutiny, supervision and controls.

Below is a summary of the challenges and proceedings brought against us by the French Ordre des pharmaciens and Ordre des médecins and of the litigation we brought against the Ordre des pharmaciens before the European Commission.

Ordre des Pharmaciens and Ordre des Médecins

In France, the Ordre des pharmaciens and, to a lesser extent, the Ordre des médecins have challenged our organization and legal structure. In numerous instances, the Ordre des pharmaciens instituted disciplinary actions against our laboratories or laboratory doctors. In 2003, shortly after our creation, the Ordre des pharmaciens and the Ordre des médecins (together, the "Ordres" in a joint letter to Labco) expressed the view that Labco's project of creating a network of laboratories contravened the principle of independence of laboratory doctors. In their joint letter, the Ordres singled out two aspects of Labco's structure: (i) capital ownership and voting rights arrangements between the laboratory doctors working in each laboratory company and the rest of the Labco Group; and (ii) the ultimate ownership of a network of laboratories by a financial holding company not subject to the French regulations pertaining to clinical laboratories.

In keeping with this initial position, the Ordre des pharmaciens, as well as in several instances the Ordre des médecins, have raised a number of objections to the organization of our French operations in the context of their administrative review of proposed changes in the articles of association or ownership structure of clinical laboratories. These objections were communicated to the French administrative authorities in charge of granting the administrative authorization necessary to operate our laboratories. All such authorizations were nevertheless eventually granted. Most of the objections raised by the Ordres dealt with the capital ownership structure of our French laboratory companies. The Ordres argued that ownership of a large majority of shares in a clinical laboratory by a person or entity other than the laboratory doctors working in that laboratory constituted a threat to the independence of such laboratory doctors—notwithstanding the fact that such laboratory doctors retained a majority of the voting rights at shareholders' meetings, as required by French law. It also challenged the separation of voting rights from economic rights in such a manner. In addition, the Ordre des pharmaciens expressed the view that the supermajority voting provisions contained in the articles of association of our SELs for certain matters were incompatible with the principle of independence of laboratory doctors insofar as they took away from doctors practicing within the laboratory the final decision making power over a number of matters pertaining to the laboratory. Finally, the Ordre des pharmaciens challenged the formula set out in the articles of association of SELs for the distribution of Priority Dividends to those laboratory doctors who are also shareholders in their laboratory company. The Ordre des pharmaciens argued that such a formula, by limiting ex-ante the share of dividends to be distributed to laboratory doctors, was incompatible with the principle of the independence of laboratory doctors. Both the Ordre des pharmaciens and the Ordre des médecins have, in several cases, raised objections to the registration, based on one or more of the above grounds, of one of our SELs on their respective national registries.

At the disciplinary level, the Ordre des pharmaciens introduced a number of actions against SELs in the Labco network, as well as against laboratory doctors practicing within these SELs. Several of these actions, some of which are still pending, directly challenge the capital ownership structure and the supermajority voting provisions contained in the articles of association of our French laboratory companies as a breach of the principle of independence of laboratory doctors. Labco has appealed decisions of the disciplinary body of the Ordre des pharmaciens in the highest French administrative court (Conseil d'Etat) and has won a number of cases on procedural grounds. No final decision has, however, been reached on the merits of these cases. The Ordre des pharmaciens has also regularly brought, or threatened to bring, legal actions against our laboratory companies for failing to timely file with it proposed changes in articles of association or capital ownership. Some of these actions are still pending. We have appealed some of these decisions and have won a number of such appeals on procedural grounds.

In addition, certain of our laboratory doctors and laboratory companies have been disciplined for failing to maintain adequate health, safety and quality standards. Certain of these disciplinary procedures, brought on the grounds of a failure to meet filing requirements or to maintain adequate quality and safety standards, resulted in decisions to close, for periods ranging from one week to several months, several of our laboratories. In several instances, however, we successfully obtained from the responsible administrative authority a requisition order to prevent such closing, arguing the public need for access to local laboratory testing services.

In 2007, Labco filed a complaint with the European Commission, arguing that the Ordre des pharmaciens had inappropriately used the administrative and disciplinary powers granted to it to impede the development of free competition and the creation of groups of laboratories in the French clinical laboratories services market.

On December 8, 2010, the Commission ruled against the Ordre des pharmaciens, finding that the Ordre des pharmaciens had (i) systematically targeted groups like Labco since 2003 with the aim of impeding their development and (ii) attempted to set minimum prices on the French market between September 2004 and September 2007 by seeking to impose minimum prices for the provision of clinical laboratory services, limiting the negotiation of discounts under contracts with large customers such as

Note 27 Litigations and Contingent liabilities (Continued)

hospitals or insurance bodies. The Commission held that the Ordre des pharmaciens had breached the antitrust rules and provisions on restrictive business practices of the Treaty establishing the European Community by introducing such distortions to competition without adequate public health grounds to do so, and imposed a 5 M€ fine on the Ordre des pharmacien and its governing bodies. According to the press release issued by the European Commission commenting on this decision, the Commission's ruling did not extend to an appreciation of the French laws regulating the clinical laboratories market, but was only directed at the behavior of the Ordre des pharmaciens. The Ordre des pharmaciens has since appealed this decision before the General Court of the European Communities and the hearing took place in Luxembourg on February 6, 2014.

Pending a decision on appeal, aggrieved parties such as Labco are entitled to seek damages before French courts on the basis of the European Commission's findings.

Note 28 Trade and other liabilities

Note 29 Financial instruments

The Group's principal financial instruments, other than derivatives, comprise bank loans and overdrafts, debentures, finance leases, trade payables, purchase contracts and loans granted. The main purpose of these financial instruments is to raise finance for the Group's operations. The Group has

Note 29 Financial instruments (Continued)

various financial assets such as accounts receivables and cash and short-term deposits, which arise directly from its operations.

€ 000	Carrying amount	Market value	Breakdown by accounting classification: Fair value through income	Available for sale	Loans and receivables	financial liabilities measured at amortised cost	Derivatives qualifying for hedge accounting	Derivatives not qualifying for hedge accounting
Non-current assets								
Non-current financial assets	9 265	9 265		2 929	6 335			0
Current assets								
Trade receivables	85 517	85 517			85 517			
Other current financial assets	12 946	12 946		0	12 946			0
Cash and cash equivalents	167 801	167 801			167 801			
Non-current liabilities								
Borrowings and other financial liabilities—non current	616 010	616 010				615 966		45
Other non-current liabilities	1 481	1 481	771			711		
Current liabilities								
Borrowings and other financial liabilities—current	33 666	33 666				33 666		0
Other current liabilities	60 284	60 284	2 218			58 066		
Trade payables	60 878	60 878				60 878		

The main risks arising from the Group's financial instruments are credit risk, liquidity risk and interest rate risk. Under our current financing strategy, the Secured Senior Notes are 8,5% fixed rate, therefore we are only exposed to market risk arising from fluctuations in interest rates of our Revolving Credit Facility (the RCF) undrawn as at December 31, 2013. We are not required to enter into hedging transactions or to use derivative financial instruments to mitigate the adverse effects of interest rate fluctuations pursuant to the RCF Agreement. We do not enter into financial instruments for trading or speculative purposes.

Labco has only a few non-significant instrument, one for hedging the sale operations in Brazilian reals of our subsidiary CIC that qualifies under hedge accounting and one for a laboratory in Belgium accounted for as trading derivatives (fair value through P&L). Those derivatives correspond, according to the categorization by hierarchy of fair value as stated in IFRS 7, to level 2 financial instruments. Labco do not have any level 3 financial instruments.

Due to the Group's specific interest rate risk position and funding structure, risk management policies require to manage the cash flow volatility.

Liquidity risk

The Group monitors its risk to a shortage of funds using a systematic liquidity planning scheme. This scheme considers the maturity of its financial investments and assets and the projected cash flows from operations.

Please refer to Note 23 *Borrowings and other financial liabilities* for a detail of maturities of financial indebtedness, as well as for a description of the covenants in place with the RCF agreement. Under these covenants, if the Group does not respect contractual requirements, it may result in early repayment clause being activated by syndicated borrowers.

€ 000	31.12.2013	31.12.2012
Cash and cash equivalents	**167 801**	56 595
Undrawn line of credit (RCF)	**135 000**	94 000
Total gross amount of liquidity	**302 801**	**150 595**
Current loans and borrowings	**33 666**	31 917
Total liquidity net of current loans and borrowings	**269 136**	**118 678**

Revolving Credit Facility ("RCF") covenants impose to keep a minimum cash balance of 20 M€ at each quarter end.

Note 29 Financial instruments (Continued)

Prospective liquidity analysis as at December 31st, 2013 is as follows

€ 000	Note	2013 Carrying amount	2013 Cash Flow	1 year or less	1 - 5 years	More than 5 years
Non derivatives financial instruments						
Bonds loans		**600 000**	**(804 000)**	(51 000)	(753 000)	
Revolving Credit Facility	(a)		**(7 148)**	(2 747)	(4 401)	
Other financial debts		**60 622**	**(64 351)**	(34 600)	(28 572)	(1 179)
Trade payables		**60 878**	**(60 878)**	(60 878)		

(a) Revolving Credit Facility amounting 135 M€ has been fully reimbursed with the proceed of the additional Notes issuance (RCF was drawn for an amount of 67 M€ as at additional Notes issuance date ie February 13, 2013). Amounts to be paid are estimated as at December 31st, 2013 as the commitments fees paid on fully undrawn facility until early 2017 with a rate corresponding to 45% of margin (margin being estimated at 4.5%) on the committed available revolving credit facility which is contractually decreasing until maturity as follows : 5% in 2014, 10% in 2015 and 20% in 2016. Revolving Credit Facility will be however drawn for financing future acquisitions as soon as the excess cash obtained from additional €100 million Notes issuance and Germany entities disposal proceeds would have been used.

(b) Other financial debt corresponds to other loans and borrowings, finance lease liabilities, accrued HYB interests to be paid in January 2014 and factoring debt.

Interest rate risk

At the reporting date the interest rate profile of the Group's interest-bearing financial instruments was:

€ 000	31.12.2013	31.12.2012
Fixed rate instruments		
Financial assets	**0**	0
Financial liabilities	**629 897**	524 382
Variable rate instruments		
Financial assets	**167 801**	56 595
Financial liabilities	**(3 782)**	36 264

The fixed rate financial liabilities correspond to 8.5% Senior Secured Notes, the finance leasing, the recourse factoring and the bilateral loan and borrowings, that are under fixed rate, whereas the variable rate instruments correspond to cash and cash equivalent for financial assets and to the RCF drawn and floating rates loan and borrowings, as well as bank overdrafts.

The other financial instruments of the Group that are not included in the above table are non-interest bearing and are therefore not subject to interest rate risk.

Cash flow sensitivity analysis for variable rate instruments

Following the refinancing operation performed February 13, 2013 resulting in the RCF being fully reimbursed (refer to note 5 *Significant Events*) and if RCF remains undrawn, a change of 100 basis points in interest rates would have increased or decreased the annual interest rate charges by less than 0.1 M€ (2012: 0,1 M€). The financial income generated by cash equivalents is mostly based on fixed rate instruments, except for a 5 M€ instrument for which a change of 100 basis points in interest rates would have a non significant impact. This analysis assumes that all other variables remain constant.

Fair values

The basis for determining fair values is disclosed in note 3.21 *Determination of fair values*.

- *Fair value of the Group's financial assets and financial liabilities that are measured at fair value on a recurring basis*

Some of the Group's financial assets and financial liabilities are measured at fair value at the end of each reporting period. They consist mainly on private equity investments, call option on minority interests with agreed price determination formula (as detailed in note 17 *Other non current assets*) as well as

Note 29 Financial instruments (Continued)

contingent consideration recorded in a business combination (as detailed in note 28 *Trade and other liabilities*) which are all categorized within level 3 and for which fair values have been usually determined in accordance with generally accepted pricing models based on a discounted cash flow analysis, with the most significant input being the discount rate that reflects the credit risk of counterparties.

- *Fair value of financial assets and financial liabilities that are not measured at fair value on a recurring basis (but fair value disclosures are required)*

The fair values of financial assets and liabilities, together that are not at fair value in the statement of financial position, are not significantly different from recorded carrying amounts.

- *Reconciliation of Level 3 fair value measurements*

The total fair value gains or losses on contingent considerations recognized in the statement of income are included in Perimeter effect line of Non recurring income and expenses detailed in note 10 *Non recurring income and expenses.*

The total gains or losses for the year relating to financial assets that are measured at fair value at the end of each reporting period are included in the line Other financial expenses detailed in note 11 *Net finance costs*. All gains and losses, if any, included in other comprehensive income related to available-for-sale unlisted shares are reported in the line Net changes in fair value of available for sale assets detailed in the Consolidated statement of comprehensive income.

No transfer out of level 3 category have been performed given the nature of financial assets and liabilities measured at fair value.

Note 30 Capital commitments and contingencies

Operating lease and commercial commitments

The Group has entered into commercial leases on certain motor vehicles and items of machinery. These leases have an average life of between two and five years with no renewal option included in the contracts.

€ 000	31.12.2013	31.12.2012 presented IFRS 5
Within one year	**5 675**	6 851
Between 1 and 5 years	**4 817**	4 254
More than 5 years	**156**	0
Operating lease Equipment	**10 648**	**11 105**

Furthermore Labco leases almost all of the properties where its labs are located. The lease in France is on a 3/6/9 year lease contracts and in Portugal and Spain, situation is such that Labco can exit leases at 6-12 months notice.

€ 000	31.12.2013	31.12.2012 presented IFRS 5
Within one year	**18 906**	16 852
Between 1 and 5 years	**43 596**	35 390
More than 5 years	**14 274**	13 917
Operating lease Buildings	**76 776**	**66 159**

Operating lease expense related to property amounted to 22.1 M€ in 2013 (2012 restated of Germany: 19.8 M€) and equipment lease expense of around 7.2 M€ (2012 restated of Germany: 7.6 M€).

Finance lease and commercial commitments

The Group has entered into finance leases and commercial commitments on certain testing equipments as well as motor vehicles, items of machinery or IT equipments.

Note 30 Capital commitments and contingencies (Continued)

Reagents suppliers in certain instances provide the testing equipment free of charge to laboratories in exchange for exclusive purchasing commitments, including sometimes minimum volume commitments. Management believes minimum volume commitments for consumables are substantially below current volumes and therefore we do not consider these minimum purchase commitments to be material for us.

As stated in *Note 15 Property, Plant and Equipment*, some of these contracts have been qualified as capital lease over an average duration of 5 years because the contracts have tacit renewal clauses, but no purchase options. Renewals are at the option of the specific entity that holds the leases. Future minimum lease payments under the finance leases are as follows:

€ 000	31.12.2013	31.12.2012 presented IFRS 5
Within one year	**6 430**	5 919
Between 1 and 5 years	**12 072**	10 550
More than 5 years	**5 748**	57
Total finance lease commitments	**24 250**	**16 526**

Off balance sheet commitments given and received

As of December 31, 2013, the Group's off-balance sheet commitments consist principally of guarantees given in the course of its investing and financing activities, especially securities given to secure the Notes and the RCF.

Indeed the obligations taken by Labco in the Senior Secured Notes indentures and by the borrowing entities, direct subsidiaries of Labco, according to the RCF agreement, have been guaranteed by commitments given by a certain number of Group entities, called Guarantors.

Commitments given to the Security Agent are mainly:

- The initial Guarantors and Borrowers agreed to pledge the shares of certain subsidiaries they owned;
- If a Guarantor or Borrower acquires a subsidiary company which has an annual EBITDA equal to or greater than 750 K€, it agreed to pledge the shares of the said subsidiary company;
- If a company accedes to the RCF Agreement as a new Borrower, the said company must pledge the shares held in its direct subsidiaries which has an annual EBITDA equal to or greater than 750 K€;
- If a company accedes to the RCF Agreement as a new Guarantor, the said company must pledge the shares held in its direct subsidiaries which has an annual EBITDA equal to or greater than 1 M€;
- In any case, additional Borrowers and Guarantors agreed to pledge the long term intercompany loans receivables with other members of the Group they have or they could enter in the future arising under any intra group loan in excess of 1 M€.

All those commitments given have been extended on February 13, 2013 to cover the additional €100 million 8.5% Senior Secured Notes due 2018, given they constitute an add-on of, and form a single class with, Labco's existing 500M€ 8.5% Senior Secured Notes due 2018.

Note 30 Capital commitments and contingencies (Continued)

As a consequence of German entities disposal, all commitments given on German entities shares have been waived prior to the sale. As at December 31, 2013, the Guarantors are the following entities:

Guarantors

Note 32 Related party transactions

Transactions with key management personnel

Key executive management compensation

With the exception of the standing independent members of the board of directors, members of the board of directors and the executive committee receive no compensation for their services on either of these committees. The independent member of the board of director, Daniel Bour, received in 2013 a compensation of €40 000 per year.

Note 32 Related party transactions (Continued)

Certain members of the board of directors (Philippe Charrier, Andreas Gaddum, Stéphane Chassaing, Albert Sumarroca, Philippe Dauchy, Philippe Sellem, Xavier Merlen, Thierry Mathieu, Gilles Meshaka) and the executive committee (Philippe Charrier, Albert Sumarroca, Luis Vieira, Etienne Couelle, Oliver Harzer, Santiago Valor, Philippe Cailly, Andrew Geoffrey Searle and Vincent Marcel) are, or were in 2013, compensated for certain other services they render to our Group. Such remuneration is paid to them (or to professional companies wholly owned by them) by way of a fixed annual salary (or fees) and an annual bonus. The aggregate remuneration paid to or accrued on behalf of members of the board of directors and the executive committee for such other services was 5,6 M€ for the year ended December 31, 2013 (2012: 5,5 M€ after restating the remuneration of Comex member in charge of Germany).

(i) : Post-employment benefits are not significant and correspond only for the few members concerned to French legal post-employment benefits due to employees as described in *note 24 Employee benefit liabilities*.

(ii) : Restricted Stock Unit "Free Shares 2011" scheme to the benefit of certain senior management members has been canceled in Q2 2012, the 2008 BSA plan is fully vested since end of 2011 and no senior management members have any remaining 2010 BSA.

Other related party transactions with key management members

Legal Services

We have engaged Maryse Coppet, a partner in the law firm Cabinet Coppet Sprl, to provide us with various legal services. Mrs. Coppet was the wife of Mr. Eric Souêtre, one of our founding shareholders and a member of the board of directors. We believe that Mrs. Coppet's legal services are negotiated on an arm's length basis. Our payments to Cabinet Coppet Sprl amounts to 45 K€ as at December 31, 2013 (2012: nil).

Other related party transactions

Balances and transactions between Labco SA and its subsidiaries, which are related parties of Labco SA, have been eliminated on consolidation and are not disclosed in this note.

A number of associates accounted for under the equity method incur expenses for certain subsidiaries of the Group. These operating expenses are recharged to the relevant subsidiaries. The net operating expenses that have been recharged by the associates amounted to nil in 2013 (2012: nil).

All transactions and outstanding balances with the related parties during the year are priced on an arm's length basis. None of the balances is secured.

Note 33 Assets and liabilities held for sale and discontinued operations

German operations have been sold to Sonic Group on December 2, 2013 (and economic effect as of November 30, 2013). As a consequence, German Cash Generating Unit was treated as discontinued operations under IFRS 5 starting with the September 30, 2013 consolidated statement of income, statement of financial position and statement of cash flow. From a methodological standpoint it should be noted that with reference to the presentation required by IFRS 5, Discontinued Operations are included in the scope of consolidation of Labco Group for comparative information of December 31, 2012 but the comparative profit and cash flows from discontinued operations have been re-presented to include those operations classified as discontinued and disposed in the current year.

Note 33 Assets and liabilities held for sale and discontinued operations (Continued)

More specifically the approach was as follows:

- The individual line items presented in the statement of income under Net profit from continuing operations and the details of individual items included in these notes under Profit /(loss) from discontinued operations are presented after eliminating the intragroup transactions (mainly management fees and financing) between the continuing and discontinued operations.
- All cash flows from Discontinued Operations are reported in the appropriate items for operating activities, investing activities and financing activities in the statement of cash flows. These items refer exclusively to cash flows arising from transactions with parties outside the Labco Group.
- For consistency all information in the disclosures related to comparative information of December 31, 2012 but which are not statement of financial position information have been re-presented by excluding German entities related information

Details of statement of income items included in Discontinuing Operations are as follows:

INCOME OF STATEMENT (€ 000)	2013 11 months	2012 12 months
Revenue	**48 099**	53 296
Other income	**497**	585
Total revenue	**48 596**	**53 881**
Not disclosed for confidentiality purposes		
Results from operating activities before non-recurring activities	**2 675**	**4 226**
Restructuring Expenses and Provisions for major litigations	**4 272**	*(1 410)*
Perimeter effect	**384**	*0*
Impairment and reversal of impairment on non-operational assets and liabilities	**658**	*(36 767)*
Gains/losses on sale of assets	**65**	*23*
Non recurring income and expenses	**5 379**	(38 155)
Results from operating activities after non-recurring activities	**8 055**	**(33 928)**
Net finance costs	**(433)**	(785)
Income tax expenses	**20**	(255)
Net profit of the period operations	**7 642**	**(34 968)**
Consolidated gain (loss) on Germany sale	**(800)**	
Income tax expense on conso gain	**0**	
Net profit of the period after intragroup operations elimination	**6 842**	**(34 968)**
Profit attribuable to non controlling interest	**0**	0
Profit attribuable to the owners of the company	**6 842**	(34 968)

Based on an enterprise value of 76 M€, the net cash amount finally to be received by Labco Group amounts to 72 M€, net of disposal-related costs and including an escrow amounting to 1,5 M€ released after 18 months. As at December 31, 2013, liabilities related to that operation especially on disposal-related costs amount to 3,0 M€. The consolidated loss on sale recorded on the German cash generating unit disposal amounts to 800 K€ on December 31, 2013 (after final post-closing adjustment on net financial debt and working capital).

As a consequence of this transaction, the contractual commitment due to the possible application of common warranty clauses is capped at usual level for this type of transaction. These warranties will expire after 18 months, except for tax issues and guarantees upon capital property, which expire at the end of the regulatory limitation period.

Evolution of Dillenburg litigation

Labco S.A. and its subsidiaries, Labco Deutschland and MVZ Medizinisches Fachlabor Dillenburg GmbH, have signed a settlement agreement on March 27, 2013 with the former vendors of our laboratory in Dillenburg in the context of the major litigation initiated given the alleged fraudulent activities, and related consequences. That agreement stipulates the payment of a total indemnity of 5,5 M€

Note 33 Assets and liabilities held for sale and discontinued operations (Continued)

by the former vendors of Dillenburg and the waiver of the litigations they had initiated against Labco and its subsidiaries. The indemnity has been recorded in non-recurring and received in April for 5,0 M€ and the remaining 0,5 M€ paid at December 31, 2013 to MVZ Dillenburg. Moreover provision for social litigation and remaining earn out have been reversed generating a non-recurring income for a total amount of 0,8 M€.

Note 34 Group entities

The consolidation scope at December 31, 2013 and December 31, 2012 was established as follows:

Note 35 Events after the reporting period

Disposal of assets and acquisitions

Some acquisitions have been performed in February and March 2014 for a total consideration of 21,4 M€. It corresponds mainly to 4 entities, or asset deals in France and 3 entities or asset deals in Iberia operating esoteric clinical laboratories. Detailed information on entities acquired could not be disclosed as requested by IFRS 3 (2008) given the recent closings and the time necessary to obtain accounts on closing date.

Capital evolution

A shareholder's general meeting held on March 17, 2014 has decided (i) a distribution of the share premium to the shareholders for an amount of 21 906 983,06€, i.e., 0.32€ per shares, and (ii) a setup of a specific reserve for the warrants holders for an amount of 2 442 589,49€, which will be distributed when they exercise the rights attached to their warrants, if the conditions for exercising are met.

This operation had been approved by a majority of lenders of the revolving credit facility (RCF) earlier in March, while no specific prior consent was required under the indenture.

Note 36 Auditor fees

The amount of the signatory statutory auditors fees for the consolidated financial statements of Labco for the year 2013 for all the consolidated companies, where they are appointed is broken down as follow..

Statutory Auditors' Report on the consolidated financial statements

For the year ended 31 December 2012

Deloitte & Associés	**Pierre-Henri Scacchi et Associés**
67, rue de Luxembourg	8-10, rue Pierre Brossolette
59777 Euralille	92300 Levallois-Perret

This is a free translation into English of the statutory auditors' report on the consolidated financial statements issued in the French language and is provided solely for the convenience of English speaking users.

The statutory auditors' report includes information specifically required by French law in such reports, whether modified or not. This information is presented below the audit opinion on the consolidated financial statements and includes explanatory paragraph discussing the auditors' assessments of certain significant accounting and auditing matters. These assessments were considered for the purpose of issuing an audit opinion on the consolidated financial statements taken as a whole and not to provide separate assurance on individual account balances, transactions or disclosures.

This report also includes information relating to the specific verification of information given in the Group's management report.

This report should be read in conjunction with, and is construed in accordance with, French law and professional auditing standards applicable in France.

LABCO

Société Anonyme—A Limited liability Company under French law

60-62, rue d'Hauteville
75010 Paris, France

Statutory Auditors' Report on the Consolidated Financial Statements

For the year ended 31 December 2012

To the Shareholders,

In compliance with the assignment entrusted to us by your annual general meeting, we hereby report to you, for the year ended 31 December 2012, on:

- the audit of the accompanying consolidated financial statements of LABCO;
- the justification of our assessments;
- the specific verification required by law.

These consolidated financial statements have been approved by the Board of Directors. Our role is to express an opinion on these consolidated financial statements based on our audit.

I. Opinion on the consolidated financial statements

We conducted our audit in accordance with professional standards applicable in France. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit involves performing procedures, using sampling testing techniques or other methods of selection, to obtain audit evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made, as well as the overall presentation of the consolidated financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

In our opinion, the consolidated financial statements give a true and fair view of the assets and liabilities, and of the financial position of the Group as at 31 December 2012 and of the results of its operations for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union.

II. Justification of our assessments

In accordance with the requirements of Article L.823-9 of the French Company Code (Code de commerce) relating to the justification of our assessments, we bring to your attention the following matters:

Notes 3.9 and 3.10 to the consolidated financial statements outline the accounting rules and methods relating to the goodwill and indefinite useful life assets carrying amounts and retirement costs and other employee benefits.

Our procedures consisted in verifying the appropriateness of the accounting methods applied, data and assumptions used, documentation provided and resulting valuations. We also satisfied ourselves that Notes 3.9 and 24 provide appropriate disclosure.

These assessments were performed as part of our audit approach for the consolidated financial statements taken as a whole and contributed to the expression of the opinion in the first part of this report.

III—Specific verification

As required by law, we have also verified in accordance with professional standards applicable in France the information presented in the Group's management report.

We have no matters to report as to its fair presentation and its consistency with the consolidated financial statements.

Lille and Levallois-Perret, April 5, 2013

Notes to the consolidated financial statements

for the year ended 31 December 2012

Note 1 Reporting entity

Labco SAS (the "Company"), converted in Labco SA, société anonyme, on January 12, 2012, is a company domiciled in France. The address of the Company's registered office is 60 - 62, rue de Hauteville, 75010, Paris, France. The consolidated financial statements of the Company as at and for the year ended 31 December 2012 comprise the Company and its subsidiaries (together referred to as the "Group" and individually as "Group entities") and the Group's interest in associates. The Group primarily is involved in clinical diagnostics testing and screening services mainly in France, Spain, Portugal, Italy, Belgium, Germany and the United Kingdom and we also provide clinical laboratory testing services to customers in Latin America, the Middle East and North Africa.

Note 2 Basis of preparation

2.1. Statement of compliance

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRSs), as adopted by the European Union (EU) and IFRS as published by IASB effective as at December 31, 2012. As a reminder, the Group's consolidated financial statements have been prepared for the first time in 2010 in accordance with IFRSs, the opening IFRS balance sheet being prepared as of January 1, 2009.

The accounting policies retained are the same as those used in preparing the consolidated financial statements at 31 December 2011, except for

- The Standards and Interpretations adopted by the European Union applicable as from 1 January 2012, which have no significant effect on the consolidated financial statements of the Group
- Certain Standards and Interpretations adopted by the European Union not mandatorily applicable as from 1 January 2012 but for which the Group has elected to implement early adoption and which have limited impact on the consolidated financial statements of the Group:
    - Amendment to IAS 1—*Presentation of Items of Other Comprehensive Income*
    - Amendment to IAS 19—*Employee Benefits*

The consolidated financial statements were authorised for issue by the Board of Directors on April 4, 2013.

2.2. IFRS basis adopted

2.2.1. Standards, amendments and interpretations effective as of January 1, 2012

The Group's consolidated financial statements comply with the amendments to published standards and interpretations which came into effect on January 1. 2012 and have been adopted by the European Union. The following amendments and interpretations are mandatorily applicable as of January 1. 2012:

- Amendment to IFRS 7—Disclosures—*Transfers of Financial Assets*

This amendment has no material impact on the consolidated financial statements.

2.2.2. Standards, amendments and interpretations not mandatorily applicable as of January 1, 2012

The Group has elected to early adopt the following amendment whose application is not mandatory as of January 1, 2012:

- Amendment to IAS 1—*Presentation of Items of Other Comprehensive Income*
- Amendment to IAS 19—*Employee Benefits*

The impact for the Group of this amendment is limited since the Group already recognizes all actuarial gains and losses in other comprehensive income.

Note 2 Basis of preparation (Continued)

2.2.3. New standards, amendments and interpretations not applicable as of January 1. 2012

A number of new standards, amendments to standards and interpretations are not yet effective for the year ended 31 December 2012, and have not been applied in preparing these consolidated financial statements.

- IFRS 9—*Financial Instruments: Classification and Measurement*
- Amendment to IFRS 7—*Financial Instruments: Disclosures* and Amendment to IAS 32—*Financial Instruments: Presentation*
- Amendment to IAS 12—*Deferred Tax: Recovery of Underlying Assets*
- *IFRS 10—Consolidated Financial Statements, IFRS 11—Joint Arrangements and IFRS 12—Disclosures of Interests in Other Entities,* as well as the resulting *revised IAS 27* and *IAS 28*
- *IFRS 13—Fair Value Measurement*

The Group is currently reviewing these standards, amendments and interpretations to assess their possible effect on its financial information.

2.2.4. Summary of options used on the first time adoption of IFRS

As a first time adopter in 2010, the opening IFRS balance sheet has been prepared as of January 1, 2009 (i.e. date of transition to IFRS) using IFRSs as adopted by the European Union effective December 31, 2010. In accordance with IFRS 1, the Group has elected to use the following main exemptions for the preparation of its first IFRS financial statements:

- business combinations that occurred before the date of transition to IFRS are not retrospectively restated in accordance with IFRS 3—*Business Combinations;*
- the long term employee benefits have been fully recorded;
- for the share based payment transactions, only the 2008 scheme has been restated according to IFRS 2, and
- financial instruments held have all been classified as financial assets available for sale at the date of transition, with the exception of liabilities and receivables and trade receivables.

2.3. Basis of measurement

The consolidated financial statements have been prepared on the historical cost basis except for the following items in the statement of financial position:

- derivative financial instruments are measured at fair value
- certain long term financial assets are measured at fair value

2.4. Functional and presentation currency

These consolidated financial statements are presented in euro, which is the Company's functional currency. All financial information presented in euro has been rounded to the nearest thousand.

2.5. Use of estimates and judgments

The preparation of the consolidated financial statements in conformity with IFRSs requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

Note 2 Basis of preparation (Continued)

Information about critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the consolidated financial statements is included in the following notes:

- **Note 3.1.1**—Subsidiaries and consolidation method
- **Note 3.2.2**—Derivative financial instruments, including hedge accounting
- **Note 3.7**—Leased assets
- **Note 3.9.2**—Non-financial assets

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year are included in the following notes:

- **Note 3.6.1** and **Note 6**—Goodwill and acquisition of subsidiaries

Note 3 Significant accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these consolidated financial statements, unless otherwise indicated.

The accounting policies have been applied consistently by Group entities.

3.1. Basis of consolidation

3.1.1. Subsidiaries and consolidation method

Subsidiaries are entities controlled by the Group. Control is the power to govern the financial and operating policies of an entity so as to obtain economic benefits from its activities. In assessing control, the Group takes into consideration potential voting rights that currently are exercisable.

Regulations governing the ownership and certification of laboratories in certain jurisdictions require us to hold each clinical laboratory or a limited number of the clinical laboratories through a separate subsidiary. Certain countries also regulate the corporate form through which laboratories may be held, such as "SELs" (société d'exercice liberal) in France or "MVZs" (Medizinisches Versorgungszentrum) in Germany.

In France, we are subject to regulatory constraints on the ownership of share capital and voting rights of SELs operating clinical laboratories by persons other than laboratory doctors and laboratory companies.

To comply with such constrain, we have established a specific corporate structure pursuant to which and subject to a few exceptions, we directly and indirectly hold shares representing approximately up to 99.9% of the share capital of our SELs and the laboratory doctors operating such SELs hold the remainder. However, the articles of association of all of our SELs grant to the laboratory doctors operating them 50.01% of the voting rights at all the shareholders' general meetings.

Although we cannot have the majority of the voting rights in our SELs, we have put in place mechanisms that grant us substantially all of the economic rights over such SELs and allow us to control, within the French regulatory framework, and fully consolidate our French network: As we acquire SELs, we change their articles of association to implement the capital structure described above but also to adopt specific provisions, in particular with respect to governance.

The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. The acquisition date is the date on which control is transferred to the acquirer. Judgment is applied in determining the acquisition date and determining whether control is transferred from one party to another. The accounting policies of subsidiaries have been changed when necessary to align them with the policies adopted by the Group.

Non-controlling interests ("minority interests") represent the part of net income or loss, and of net equity not held by the Group. They are presented in the consolidated Income Statement, the Consolidated Statement of Comprehensive Income and in equity in the Consolidated Statement of Financial Position, separately from equity attributable to the owners of the Company. In the case of medical biology companies, whether controlled de jure or de facto, minority interests of other shareholders, i.e. laboratory doctors, must be assessed based on the financial rights attached to their shares rather than voting rights. These shares of stock are entitled to a priority dividend, calculated on a formula defined in each company's by-laws so long as their holders are professionally active in the company. However their rights to any surplus on liquidation (net assets) are strictly limited, which gives this portion a non-significant accounting value. Most by-laws of consolidated French companies call for two classes of shares. Class A shares are held by laboratory doctors associated in the SELs (Sociétés d'exercice liberal). They are awarded a priority dividend according to a formula worked out in the by-laws of each company and representing a profit sharing arrangement. They have this right as long as they are professionally active in the company. They are not actually minority interests but rather a mechanism of compensation for the services such professionals render to the Group. Consequently dividends thereon are recognized as compensation expense in profit or loss in the period in which services giving rise to profit sharing are rendered.

3.1.2. Investments in associates (equity accounted investees)

An associate is an entity over which the Group has significant influence and that is not a subsidiary. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control over those policies. Investments in associates are accounted for using the equity method (equity accounted investees) and are recognised initially at cost. The Group's investment includes goodwill identified on acquisition, net of any accumulated impairment losses. The consolidated financial statements include the Group's share of the income and expenses and equity movements of equity accounted investees, after adjustments to align the accounting policies with those of the Group, from the date that significant influence commences until the date that significant influence ceases.

3.1.3. Interests in joint ventures

A joint venture is a contractual arrangement whereby the Group and other parties undertake an economic activity that is subject to joint control (i.e. when the strategic financial and operating policy decisions relating to the activities of the joint venture require the unanimous consent of the parties sharing control). Jointly controlled entities are consolidated using the equity method in accordance with the option provided by IAS 31, Interests in Joint Ventures.

3.1.4. Transactions eliminated on consolidation

Intra-group balances and transactions, and any internal income and expenses arising from intra-group transactions, are eliminated in preparing the consolidated financial statements. Unrealised gains arising from transactions with equity accounted investees are eliminated against the investment to the extent of the Group's interest in the investee. Internal losses are eliminated in the same way as internal gains, but only to the extent that there is no evidence of impairment.

3.1.5. Business combinations

For acquisitions on or after 1 January 2009, the Group applies IFRS 3 revised (2008) and measures goodwill as the difference between (a) the sum of (i) the fair value of the consideration transferred, (ii) the recognised amount of any non-controlling interest in the acquiree, (iii) the acquisition date fair value of any previously held interest in the acquiree, and (b) the net recognised amount (generally fair value) of the identifiable assets acquired and liabilities assumed, all measured as of the acquisition date. Consideration transferred includes the fair values of the assets transferred, liabilities incurred by the Group to the previous owners of the acquiree, and equity interests issued by the Group. It also includes the fair value of any contingent consideration. When this difference is negative (negative goodwill), a bargain purchase gain is recognized immediately in profit or loss.

For business combinations that occurred since 2009, the Group measured any non-controlling interest in majority of cases at its proportionate interest in the identifiable net assets of the acquiree.

Transaction costs that the Group incurs in connection with a business combination, such as finder's fees, legal fees, due diligence fees, and other professional and consulting fees are expensed as incurred.

If a business combination is achieved in stages, re-measurement of any previously held equity interest in the acquiree at its acquisition-date is performed at fair value with any resulting gain or loss recognized in the statement of earnings.

Note 3 Significant accounting policies (Continued)

A contingent liability of the acquiree assumed in a business combination is recognized only if such a liability represents a present obligation and arises from a past event, and its fair value can be measured reliably.

If consideration transferred include a contingent consideration (earn-out for example), it is recorded at fair value at acquisition date. For a contingent consideration recorded as financial instrument in the scope of IAS 39, subsequent fair value variations are recognized in statement of income. If a contingent consideration is classified as equity, it will not be remeasured.

Acquisitions and disposal of non-controlling interests

Acquisitions and/or disposal of non-controlling interests are accounted for as transactions with equity holders in their capacity as equity holders. Therefore no goodwill is recognized or derecognized as a result of such transactions.

3.2. Financial instruments

Financial instruments include financial assets and financial liabilities. Financial assets comprise available-for-sale financial assets, loans and receivables carried at amortized cost including trade and other receivables, and financial assets measured at fair value through income, including derivative financial instruments. Financial liabilities include borrowings, trade and other payables, derivative financial instruments and other financial liabilities.

3.2.1. Non-derivative financial instruments

Non-derivative financial instruments comprise investment in equity and debt securities, trade and other receivables, loans and borrowing at amortized cost and trade and other payables.

The Group initially recognizes trade and other receivables on the date that they are originated. All other financial assets are recognized initially on the trade date at which the Group becomes a party to the contractual provisions of the instrument.

Available-for-sale financial assets

The Group's investments in equity securities (generally the non-consolidated investments) and certain debt securities are classified as available-for-sale financial assets. These items are measured at fair value on initial recognition, which generally correspond to the acquisition cost plus any directly attributable transaction costs. Subsequent to initial recognition, they are measured at fair value and changes therein, other than impairment losses are recognised in other comprehensive income and presented within equity in the fair value reserve. When an investment is derecognised, the cumulative gain or loss in other comprehensive income is transferred to profit or loss.

Loans and receivables at amortized cost

Loans and receivables, including trade and other receivables are financial assets with fixed or determinable payments that are not quoted in an active market.

Loans and receivables primarily include loans and advances to associates or non-consolidated companies, and guarantee deposits, are recognized initially at fair value, plus any directly attributable transaction costs. Subsequent to initial recognition, loans and receivables are measured at amortised cost using the effective interest rate method, less any impairment losses.

On initial recognition, trade and other receivables are recorded at fair value, which generally corresponds to their nominal value. Impairment losses are recorded based on the estimated risk of non-recovery.

Financial assets and liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Group has a legal right to offset the amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Note 3 Significant accounting policies (Continued)

Financial liabilities including trade and other liabilities

Financial liabilities, such as loans and borrowings carried at amortized cost, trade and other payables are recognized initially at fair value. Subsequent to initial recognition, these financial liabilities are measured at amortised cost using the effective interest rate method. On initial recognition, any issue or redemption premiums and discounts and issuing costs are added to/deducted from the nominal value of the borrowings concerned. These items are taken into account when calculating the effective interest rate and are therefore recorded in the consolidated income statement over the life of the borrowings using the amortized cost method.

Financial liabilities are broken down into current and non-current liabilities in the consolidated statement of financial position. Current financial liabilities comprise:

- Financial liabilities with a settlement or maturity date within 12 months of the statement of financial position date
- Financial liabilities in respect of which the Group does not have an unconditional right to defer settlement for at least 12 months after the statement of financial position date

3.2.2. Derivative financial instruments, including hedge accounting

The Group holds derivative financial instruments to hedge its interest rate risk exposures, for certain contracts the formal documentation of hedging relationship at inception has been prepared enabling hedge accounting according to IAS 39, whereas other instruments used in economic hedges have not been formally documented as hedging relationship therefore not qualifying for hedge accounting.

Derivatives are recognised initially at fair value; attributable transaction costs are recognised in profit or loss as incurred. Subsequent to initial recognition, derivatives are measured at fair value, and changes therein are accounted for as described below.

Cash flow hedges

When a derivative is designated as the hedging instrument in a hedge of the variability in cash flows attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction that could affect profit or loss, the effective portion of changes in the fair value of the derivative is recognised in other comprehensive income and presented in the hedging reserve in equity. The amount recognised in other comprehensive income is removed and included in profit or loss in the same period as the hedged cash flows affect profit or loss under the same line item in the statement of comprehensive income as the hedged item. Any ineffective portion of changes in the fair value of the derivative is recognised immediately in profit or loss as financial income or expenses.

On initial designation of the hedge, the Group formally documents the relationship between the hedging instrument and hedged item, including the risk management objectives and strategy in undertaking the hedge transaction, together with the methods that will be used to assess the effectiveness of the hedging relationship. The Group makes an assessment, both at the inception of the hedge relationship as well as on an ongoing basis, whether the hedging instruments are expected to be "highly effective" in offsetting the changes in the fair value or cash flows of the respective hedged items during the period for which the hedge is designated, and whether the actual results of each hedge are within a range of 80-125 percent. For a cash flow hedge of a forecast transaction, the transaction should be highly probable to occur and should present an exposure to variations in cash flows that could ultimately affect reported net income.

If the hedging instrument no longer meets the criteria for hedge accounting, expires or is sold, terminated or exercised, then hedge accounting is discontinued prospectively. The cumulative gain or loss previously recognised in other comprehensive income and presented in the hedging reserve in equity remains there until the forecast transaction occurs. If the forecast transaction is no longer expected to occur, then the balance in other comprehensive income is recognised immediately in profit or loss. In other cases the amount recognised in other comprehensive income is transferred to profit or loss in the same period that the hedged item affects profit or loss.

Note 3 Significant accounting policies (Continued)

Other derivatives

When a derivative financial instrument is not designated in a qualifying hedge relationship, all changes in its fair value are recognised immediately in profit or loss.

3.3. Cash and cash equivalent

Cash and cash equivalents comprise cash on hand, bank current accounts, and other bank deposits and short term investments considered to be readily convertible into a known amount of cash and where the risk of a change in their value is deemed to be negligible based on the criteria set out in IAS 7.

Bank overdrafts that are repayable on demand and form an integral part of Group's cash management are recorded under "Short term borrowings" but included as a component of cash and cash equivalents for the purpose of the statement of cash flows.

3.4. Share capital

Ordinary shares

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares and share options are recognised as a deduction from equity, net of any tax effects.

Repurchase of share capital (Treasury shares)

Own equity instruments which are repurchased (treasury shares) are presented as a deduction from equity. The amount of the consideration paid, which includes directly attributable costs, net of any tax effects, is recognised as a deduction from equity. No gain or loss is recognized in the consolidated statement of income on the purchase, sale, issue or cancelation of the Group own equity, but the resulting surplus or deficit on the transaction is transferred to/from retained earnings.

3.5. Property, plant and equipment

3.5.1. Recognition and measurement

Items of property, plant and equipment are measured at cost less accumulated depreciation and accumulated impairment losses.

Cost includes expenditure that is directly attributable to the acquisition of the asset. Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment.

When parts of an item of property, plant and equipment have different useful lives or provide benefits in a different pattern, they are accounted for as separate items (major components) of property, plant and equipment, thus necessitating the use of different depreciation rates and methods.

An item of property, plant and equipment is derecognised on disposal or when the asset is permanently withdrawn from use and no future economic benefits are expected. Gains and losses on disposal of an item of property, plant and equipment are determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment, and are recognised net within results from non-recurring activities in profit or loss. When revaluated assets are sold, the amounts included in the revaluation reserve are transferred to retained earnings.

3.5.2. Depreciation

Depreciation is based on the depreciable amount, which is the cost of an asset, or other amount substituted for cost, less its residual value. The residual value is estimated to be nil at the end of the useful life, except for real estate in certain cases.

Depreciation is recognized in profit or loss on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Group will obtain ownership by the end of the lease term. Land is not depreciated.

Note 3 Significant accounting policies (Continued)

The estimated useful lives for the current and comparative periods are as follows:

• buildings	15 - 30 years
• leasehold improvements & fixtures	3 - 10 years
• Laboratory & Office equipment	3 - 10 years
• fixtures and fittings	2 - 10 years
• Other	2 - 10 years

Depreciation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.

3.6. Intangible assets

3.6.1. Goodwill

Goodwill that arises upon the acquisition of subsidiaries, either through share deals or asset deals, is included in intangible assets. For the measurement of goodwill at initial recognition, see *Note 6—Acquisitions of subsidiaries*

Subsequent measurement

Goodwill is measured at cost less accumulated impairment losses if any. In respect of equity accounted investees, the carrying amount of goodwill is included in the carrying amount of the investment, and an impairment loss on such an investment is not allocated to any asset, including goodwill, that forms part of the carrying amount of the equity accounted investee.

3.6.2. Other intangible assets

Other intangible assets that are acquired by the Group and have finite useful lives are measured at cost less accumulated amortisation and accumulated impairment losses. Other intangible assets consist primarily of software and licenses.

3.6.3. Subsequent expenditure

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is recognised in profit or loss as incurred.

3.6.4. Amortisation

Amortisation is calculated over the cost of the asset, or other amount substituted for cost, less its residual value. Amortisation is recognised in profit or loss on a straight-line basis over the estimated useful lives of intangible assets, other than goodwill, from the date that they are available for use, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. The estimated useful lives for the current and comparative periods are as follows:

• Licenses	1 - 5 years
• Software	1 - 5 years

Amortisation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.

3.7. Leased assets

Leases in terms of which the Group assumes substantially all the risks and rewards of ownership are classified as finance leases. Upon initial recognition the leased asset is measured at an amount equal to the lower of its fair value and the present value of the minimum lease payments. Subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to that asset. However, if there is no reasonable certainty that the Group will obtain ownership by the end of the lease term, the finance lease assets are depreciated over the shorter of the estimated useful life of the asset and the lease term.

Note 3 Significant accounting policies (Continued)

The Group regularly reviews its contracts and arrangements to determine whether an arrangement is, or contains a lease. The analysis is based on the substance of the arrangement at inception date. If the Group believes the fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset, then the arrangement contains a lease and IAS 17 is applicable to the lease element. At inception, payments required by the arrangement are split into lease payments and payments related to other elements of such arrangement based on their relative fair values.

The Group uses equipment for its medical analyses. The contracts in use for this activity stipulate that the equipment is put at disposal for free if the laboratory buys exclusively from the supplier chemical reagents for a certain indicative volume during the term of the contract. As stated before, despite the fact that these agreements are not in the legal form of a lease, the arrangements qualify as lease contracts and Labco applied the requirements of IAS 17 to the lease element whereby the payments required by the arrangement are split into lease payments and payments relating to the other elements of the arrangement based on their relative fair values. For these contracts that are classified as finance leases, the related assets have been recognised in the statement of financial position of the Group.

Other leases are operating leases and the leased assets are not recognised in the Group's statement of financial position. Operating lease payments are recognised as an expense in the consolidated statement of income.

3.8. Inventories

Inventories consist of raw materials ("reagents") and consumables and are measured at the lower of cost and net realisable value. The cost of inventories is based on the weighted average unit costs, and includes expenditure incurred in acquiring the inventories and other costs incurred in bringing them to their existing location and condition.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

3.9. Impairment

3.9.1. Financial assets (including receivables)

A financial asset not carried at fair value through profit or loss is assessed at each reporting date to determine whether there is objective evidence that it is impaired. A financial asset is impaired if objective evidence indicates that a loss event has occurred after the initial recognition of the asset, and that the loss event had a negative effect on the estimated future cash flows of that asset.

Objective evidence that financial assets (including equity securities) are impaired can include default or delinquency by a debtor, restructuring of an amount due to the Group on terms that the Group would not consider otherwise, indications that a debtor or issuer will enter bankruptcy, or the disappearance of an active market for a security. In addition, for an investment in an equity security, a significant (more than 30%) or prolonged decline in its fair value below its cost is objective evidence of impairment.

3.9.2. Non-financial assets

The carrying amounts of the Group's non-financial assets, but other than inventories and deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. For goodwill, and intangible assets that have indefinite useful lives or that are not yet available for use, the recoverable amount is estimated each year at the same date time during the year-end closing process, and additionally whenever there is an indication that such assets may be impaired.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money, all the other risks specific to the assets being considered in the estimated future cash flows from the assets. Depending on the timely availability each year of long term business plans, future cash flows are either estimated based on the long term 5 year business plans approved by senior management or estimated based on the budget prepared for the following year and which are afterward extrapolated over the next 4 years consistently with the latest 5 years business plan, plus in any case the estimate of the terminal value using a perpetual growth rate.

For the purpose of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the "cash-generating unit, or CGU").

For the purposes of goodwill impairment testing, the lowest level at which goodwill is monitored for internal reporting purposes corresponds to the following geographical areas: France, Germany, Iberia, Italy, Belgium and United Kingdom. Goodwill acquired in a business combination is allocated to CGUs or groups of CGUs that are expected to benefit from the synergies of the combination. The Group's corporate assets (Labco SA, Labco Belgium, Labco Finance) could not be allocated on a reasonable and consistent basis to each cash-generating units. As such, they are included in the group of cash-generating units' impairment test (global test). Local holdings are included in their respective country.

An impairment loss is recognized if the carrying amount of an asset or its CGU exceeds its estimated recoverable amount. Impairment losses are recognized in profit or loss. Impairment losses recognized in respect of CGUs or groups of CGUs are allocated first to reduce the carrying amount of any goodwill allocated to the units or group of units, and then to reduce the carrying amounts of the other assets in the unit (group of units) on a *pro rata* basis.

An impairment loss in respect of goodwill is not reversed. In respect of other assets, impairment losses recognized in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

Goodwill that forms part of the carrying amount of an investment in an associate is not recognised separately, and therefore is not tested for impairment separately. Instead, the entire amount of the investment in an associate is tested for impairment as a single asset when there is objective evidence that the investment in an associate may be impaired. Such impairment loss can be reversed if the recoverable amount subsequently increases.

3.10. Employee benefits

3.10.1. Short-term employee benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

A liability is recognised for the amount expected to be paid under short-term cash bonus or profit-sharing plans if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the obligation can be estimated reliably.

3.10.2. Long term employee benefits, including retirement agreements

Depending on the laws and practices in force in the countries where Labco operates, Group companies have legal obligations in terms of pensions, early retirement payments and retirement bonuses. Such obligations are generally defined State contribution plans, which costs are expensed based on the amount of contribution payable in the period.

The Group is also concerned by other post-employment or post-retirement employee benefits which correspond to the legal retirement indemnity mainly applicable in France and Italy.

Commitments at retirement date and other similar advantages essentially correspond to the retirement compensations due to employees when they retire. Their assessment is made on the basis of an actuarial calculation using the projected unit credit method and taking into account the rate of staff turnover and mortality rates which are determined based on official age tables and estimated future salary increase. Discount rates are determined by the reference to the yield at the measurement date on high-quality corporate bonds.

Note 3 Significant accounting policies (Continued)

In compliance with IAS 19 revised, actuarial gains and losses are recognized directly in other comprehensive income in equity and are not amortized in the Income Statement.

3.10.3. Termination benefits

Termination benefits are recognised as an expense when the Group is committed demonstrably, without realistic possibility of withdrawal, to a formal detailed plan to either terminate employment before the normal retirement date, or to provide termination benefits as a result of an offer made to encourage voluntary redundancy. Termination benefits for voluntary redundancies are recognised as an expense if the Group has made an offer of voluntary redundancy, it is probable that the offer will be accepted, and the number of acceptances can be estimated reliably. If benefits are payable more than 12 months after the reporting period, then they are discounted to their present value.

3.10.4. Share-based payment transactions

The grant date fair value of share-based payment awards granted to employees is recognised as an expense, with a corresponding increase in equity, over the period required for the employees unconditionally becoming entitled to the awards. The amount recognised as an expense is adjusted to reflect the number of awards for which the related service and non-market vesting conditions are expected to be met, such that the amount ultimately recognised as an expense is based on the number of awards that do meet the related service and non-market performance conditions at the vesting date.

Share-based payment arrangements in which the Group receives goods or services as consideration for its own equity instruments are accounted for as equity-settled share-based payment transactions, regardless of how the equity instruments are obtained by the Group.

3.11. Provisions

A provision is recognised if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions giving rise to a cash outflow after more than one year are discounted if the impact is material. Discount rates reflect current assessments of the time value of money and risks that are specific to the liability and not included in expected cash flows. The unwinding of the discount is recognised as finance cost.

3.12. Revenue

The Group earns revenues from medical analyses both routine and esoteric which are invoiced to insurance companies, hospitals, individuals, pharmacies, and National Heath entities.

Revenue from medical analyses in the course of ordinary activities is measured at the fair value of the consideration received or receivable, net of returns, trade discounts and volume rebates. Revenue in connection with rendered services is recognized at the time the service is provided. Revenue is based on the net amount billed or billable if it can be estimated reliably. If it is probable that discounts will be granted and the amount can be measured reliably, then the discount is recognised as a reduction of revenue as the sales are recognised.

The process of estimating the ultimate collection of receivables associated with our clinical testing business involves significant assumptions and judgments. Billings for services reimbursed by third-party payers, including social security systems, are recorded as revenue net of allowances for differences between amounts billed and the estimated receipts from such payers. Adjustments to the allowances, based on actual receipts from the third-party payers, are recorded upon settlement as an adjustment to net revenue.

Government payers

Payments for clinical laboratory testing services made by the government are based on fee schedules set by governmental authorities. Collection of such receivables is normally a function of providing the complete and correct billing information within the various filing deadlines. Collection varies from country to country.

Note 3 Significant accounting policies (Continued)

Private insurers

Reimbursements from private insurers are based on negotiated fee-for-service schedules and on capitated payment rates.

Substantially all of the accounts receivable due from private insurers represent amounts billed under negotiated fee-for-service arrangements. We utilize a standard approach to establish allowances for doubtful accounts for such receivables, which considers the aging of the receivables, historical collection experience and other factors.

Client payers

Client payers include physicians, hospitals, employers and other commercial laboratories. Credit risk and ability to pay are more of a consideration for these payers than healthcare insurers and government payers. We utilize a standard approach to establish allowances for doubtful accounts for such receivables, which considers the aging of the receivables, as well as specific account reviews, historical collection experience and other factors.

Patient receivables (individuals)

Patients are billed based on established patient fee schedules, subject to any limitations on fees negotiated with healthcare insurers or physicians on behalf of their patients. Collection of receivables due from patients is subject to credit risk and ability of the patients to pay. We utilize a standard approach to establish allowances for doubtful accounts for such receivables, which considers the aging of the receivables, historical collection experience and other factors.

Other income in revenue mainly corresponds to interests earned on operating receivables as well as income generated by activities not directly related to clinical diagnostics and screening services.

3.13. Lease payments

Payments made under operating leases are recognised in profit or loss on a straight-line basis over the term of the lease. Lease incentives received are recognised as an integral part of the total lease expense, over the term of the lease.

Minimum lease payments made under finance leases are apportioned between the finance expense and the reduction of the outstanding liability. The finance expense is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability (effective interest rate method).

3.14. Finance income and finance costs

Finance income comprises interest income on funds invested (including available-for-sale financial assets), dividend income, gains on hedging instruments that are recognised in profit or loss, and foreign currency gains. Interest income is recognised as it accrues in profit or loss, using the effective interest method. Dividend income is recognised in profit or loss on the date that the Group's right to receive payment is established.

Finance costs comprise of cost of net debt and other financial expenses. Cost of net debt includes interest expense on borrowings and financial leases, as well as expenses related to derivatives. Other financial expenses mainly include unwinding of the discount on provisions. Borrowing costs that are not directly attributable to the acquisition, construction or production of a qualifying asset are recognised in profit or loss using the effective interest method. Labco Group does not own any qualifying asset.

3.15. Income tax

Income tax (income or expense) comprises current and deferred tax. Current tax and deferred tax are recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in other comprehensive income.

Note 3 Significant accounting policies (Continued)

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for the following temporary differences: the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss, and differences relating to investments in subsidiaries to the extent that it is probable that they will not reverse in the foreseeable future. In addition, deferred tax is not recognised for taxable temporary differences arising on the initial recognition of goodwill. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

A deferred tax asset is recognised for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Additional income taxes that arise from the distribution of dividends; are recognized at the same time that the liability to pay the related dividend is recognized;

For French entities of the Group, the former Business Tax has been modified by a law enacted December 30, 2009. The Business Tax now consists of two components:

- "Cotisation Foncière des Entreprises (CFE)", which is a tax on rental value of lands
- "Cotisation sur la Valeur Ajoutée des Entreprises (CVAE)", which is a tax determined on added value as defined based on statutory accounts

In accordance with the definition of income tax in IAS 12 and the definition of added value stipulated by article 1586 sexies of French Tax code, and by homogeneity with the treatment in other countries of taxes based on net aggregate of income and charges, Labco considers that the CVAE tax should be recorded as an income tax given its definition.

3.16. Results from operating activities, and net non-recurring expenses

Results from operating activities correspond to the operating performance of the various activities performed by Labco Group. Results from operating activities before non-recurring activities is an indicator used by the Group to present "a level of operational performance that can be used as part of an approach to forecast recurring performance".

In order to facilitate understanding of recurring operating performance, non-recurring expenses and income lines have been defined and include non recurring, unusual, items that are clearly not related to recurring activities and of certain significance. Those non recurring expenses and income consist of:

- Impairment and reversal of impairment on non-operational assets and liabilities
- Gains / losses on sale of assets
- Restructuring expenses and provisions for major litigations
- Perimeter effect including transaction costs for significant and unusual acquisitions (cancelled or realized as for realized acquisitions, costs are expensed according to IFRS 3 revised guidance implemented starting 2009 by Labco), as well as earn out variations of fair value subsequent to the 1 year window period.

Note 3 Significant accounting policies (Continued)

3.17. Earnings per share

The Group has not issued shares in a public market and is not in the process of doing so. Therefore the Group is not required to but has decided to present voluntarily basic and diluted earnings per share (EPS) data for its ordinary shares in accordance with IAS 33. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period, adjusted for own shares held. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding, adjusted for own shares held and, for the effects of all dilutive potential ordinary shares, which comprise convertible notes and warrants and free shares granted to employees.

3.18. Geographical information

The Group has not issued shares in a public market and is not in the process of doing so. Therefore the Group is not required to disclose segment information as required by IFRS 8. However the Group has decided to disclose a breakdown of revenue by country provided in *Note 7—Geographical information*

Iberia corresponds to the aggregate of Portugal and Spain.

3.19. EBITDA (Earnings Before Interest, Taxes, Depreciation and Amortization)

EBITDA is a non-Gaap measure but corresponds to an aggregate that is commonly used by stakeholders for analyzing the Group's performance. EBITDA has been defined by the Group based on Results from operating activities before non-recurring activities restated for net depreciation, amortization and impairment, provisions and reversal.

3.20. Share based payment transactions and transaction costs for usual small size acquisition

Labco presents in its operating result certain cost items on a specific line in order to help management and financial investors to better understand the Group' economic performance because it identifies separately elements which are non operational and inherently difficult to predict due to their irregular nature, even if the costs are for a certain period not very significant.

3.21. Determination of fair values

A number of the Group's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

3.21.1. Property, plant and equipment

The fair value of property, plant and equipment recognised as a result of a business combination is based on market values. The market value of property is the estimated amount for which a property could be exchanged on the date of valuation between a willing buyer and a willing seller in an arm's length transaction after proper marketing wherein the parties had each acted knowledgeably and willingly. The fair value of items of plant, equipment, fixtures and fittings is based on the market approach and cost approaches using quoted market prices for similar items when available and replacement cost when appropriate.

3.21.2. Trade and other receivables

The fair value of trade and other receivables is estimated as the present value of future cash flows, discounted at the market rate of interest at the reporting date. The net carrying value is considered as a reasonable estimate of their fair value considering the short payment and settlement periods applied by Labco Group. This fair value is determined for disclosure purposes.

Note 3 Significant accounting policies (Continued)

3.21.3. Derivatives

The fair value of interest rate swaps is based on broker quotes. Those quotes are tested for reasonableness on an ad-hoc basis by discounting estimated future cash flows based on the terms and maturity of each contract and using market interest rates for a similar instrument at the measurement date. Fair values also reflect the credit risk of the instrument and include adjustments to take account of the credit risk of the Group entity and counterparty when appropriate.

3.21.4. Non-derivative financial liabilities

Fair value, which is determined for disclosure purposes, is calculated based on the present value of future principal and interest cash flows, discounted at the market rate of interest at the reporting date. For finance leases the market rate of interest is determined by reference to similar lease agreements.

3.21.5. Share-based payment transactions

The fair value of employee share options is generally measured using a binomial lattice model. Measurement inputs include share price on measurement date, exercise price of the instrument, expected volatility (based on weighted average historic volatility of similar quoted entities), weighted average expected life of the instruments (based on historical experience and general option holder behaviour), expected dividends, and the risk-free interest rate (based on government bonds). Service and non-market performance conditions attached to the transactions are not taken into account in determining fair value.

Note 4 Financial risk management

4.1. Overview

The Group has exposure to the following risks from its use of financial instruments:

- credit risk
- liquidity risk
- market risk

This note presents information about the Group's exposure to each of the above risks, the Group's objectives, policies and processes for measuring and managing risk, and the Group's management of capital. Further quantitative disclosures are included throughout these consolidated financial statements.

4.2. Risk management framework

The Board of Directors, previously Strategic Committee before the conversion into "société anonyme", has overall responsibility for the establishment and oversight of the Group's risk management framework.

The Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits.

The Group Audit Committee oversees how management monitors compliance with the Group's risk management policies and procedures.

4.3. Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's receivables from customers and investment securities.

Detailed quantitative information on credit risk are provided in *Note 20 Trade and other receivables*.

4.3.1. Trade and other receivables

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The Group has no significant concentrations of credit risks due to the large numbers of customers and individually immateriality of amounts due. The Group performs ongoing credit evaluations of its receivables and establishes an allowance for impairment that represents its estimate of incurred losses in respect of trade and other receivables. The main components of this allowance are a specific loss component that relates to individually significant exposures.

4.3.2. Investments and cash and cash equivalents

The Group's exposure to credit risk arises from default of the counterparty. The Group limits its exposure to credit risk by investing mainly in liquid securities with counterparties that have a high credit rating. Management actively monitors its investments and does not expect any counterparty to fail to meet its obligations.

4.4. Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation. This planning considers the maturity of both its financial assets, and its projected cash flow from operations.

Typically the Group ensures that it has sufficient cash on demand to meet expected operational expenses for a period of 60 days, including the servicing of financial obligations. In addition, the Group maintains a line of credit (Revolving Credit Facility) under which drawings could be made for financing acquisitions or for general financing purposes. Refer to the *Note 23 Borrowings and other financial liabilities* for a description of the main characteristics of our Revolving Credit Facility.

Detailed quantitative information on liquidity risk are provided in *Note 29 Financial instruments*.

4.5. Market risk—interest rate risk

Market risk is the risk that changes in market prices, such as interest rates, will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

The Group's exposure to the risk of changes in market interest rates relates primarily to the debt drawn on the revolving credit facility (RCF). Major part of our Group long term debt is at fixed rate, enabling to limit the impacts of market risks.

Detailed quantitative information on interest rate risk are provided in *Note 29 Financial instruments*.

4.6. Operational risk

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the Group's processes, personnel, technology and infrastructure, and from external factors other than credit, market and liquidity risks such as those arising from legal and regulatory requirements and generally accepted standards of corporate behaviour. Operational risks arise from all of the Group's operations.

The Group's objective is to manage operational risk so as to balance the avoidance of financial losses and damage to the Group's reputation with overall cost effectiveness and to avoid control procedures that restrict initiative and creativity or impair operational independence of laboratory managers in countries where regulations emphasize medical independence of laboratory managers.

The primary responsibility for the development and implementation of controls to address operational risk is assigned to senior management within each business unit. This responsibility is supported by the development of overall Group standards for the management of operational risk in the following areas:

- compliance with regulatory and other legal requirements
- review regular accreditation procedures
- requirements for the periodic assessment of operational risks faced, and the adequacy of controls and procedures to address the risks identified

Note 4 Financial risk management (Continued)

- requirements for the reporting of operational losses and proposed remedial action
- training and professional development
- Ethical and business standards.

4.7. Capital management

The Board of Directors's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business.

The Board of Directors seeks to maintain a balance between the higher returns that might be possible with higher levels of borrowings and the advantages and security afforded by a sound capital position.

There were no changes in the Group's approach to capital management during the year.

Neither Labco SA nor any of its subsidiaries are subject to externally imposed capital requirements.

Note 5 Significant events

5.1. Acquisitions, business set-up, disposals and mergers

5.1.1. Acquisitions and business set-up

Refer to *Note 6—Acquisition of subsidiaries* for detailed information on acquisitions performed in 2012.

Main acquisitions during the reporting period are shown below by country.

Acquisition date	Country	Entities	
02.01.2012	France	Biobassin	
03.01.2012	France	Evlab	
29.02.2012	France	Isolab	
01.03.2012	UK	FMC contract acquisition (retroactive start as of January 2012)	Contract purchase
30.10.2012	France	Gritti Chiali	
30.10.2012	France	Brigout	Controlling ownership purchase
20.11.2012	France	Chancé	
30.11.2012	France	Degraef Pouliquen	Controlling ownership purchase
30.11.2012	France	Sèvre et Loire biologie	Controlling ownership purchase
30.11.2012	France	Trets	Commercial goodwill
17.12.2012	France	Medbio	
27.12.2012	France	Archambeaud	Commercial goodwill
27.12.2012	France	Mariani	Commercial goodwill
28.12.2012	France	Seudre Biologie	
28.12.2012	France	Labotri (Trichereau)	
28.12.2012	France	Auguet Lauroua	

iPP, our joint venture for developing business in the United Kingdom and consolidated under equity method, has started on June 1st 2012 the operation of the contract with Taunton and Somerset NHS Foundation Trust and Yeovil District Hospital NHS Foundation Trust. Through this contract, iPP delivers the full range of laboratory services to a Joint Venture operated by iPP and the Trusts whilst the clinical interpretation and clinical advice functions continue to be provided by the Trusts' medical staff who remain employed by the NHS. The partnership and related contract will last for 20 years. Whilst the partnership currently focus on providing services to both Trusts, which provide healthcare for a population of 500,000 along with over 100 GP practices in the area, the joint venture has been deliberately structured in a way that allows other Trusts in the region to join the collaboration and benefit from investment in the new service and the wide range of innovations and service improvements it will deliver. As at December 31, 2012 iPP generates a turnover of 7,6 M£ (at 100%).

Note 5 Significant events (Continued)

5.1.2. Disposals

Labco management decided to dispose the non-core business entity (operating imaging business) Centro Diagnostico Missori Srl in Italy, owned at 50% by Labco Group and consolidated fully in the group financial statements. Centro Diagnostico Missori Srl classified as assets held for sale under IFRS 5 as at March 31, 2012, have been effectively disposed in June 2012 generating a consolidated gain on sale.

5.1.3. Mergers and legal reorganisation

Labco Group has continued in 2012 to implement numerous mergers between French SELs, in order to reinforce, in compliance with French regulation, synergies actions by concentrating laboratories. Similar merger operations have been performed in Spain and Portugal, as well as finalization of the legal structure reorganisation in order to optimize the number of existing tax groups and enables to have only one tax group in Spain starting 2012, and one tax group in Portugal in 2014.

Country	Mergers
France	Labco Artois has been merged in Schaffner renamed Institut de Biologie Clinique
France	Filab has been merged in Celab
France	Labocentre has been merged in Labco Midi
France	Bioh has been merged in Labco Midi
France	Sainte Victoire has been merged in Tranchand Turcon renamed Mazarin
France	Tonin Mazarin has been merged in Tranchand Turcon renamed Mazarin
France	Solcalab has been merged in GDLCB
France	Gerylab has been merged in Anabio
France	Capeyron has been merged in Anabio
France	Bio Bassin has been merged in Anabio
France	Sorela has been merged in Biopaj
France	Laboratoire du Port has been merged in Anabiol
France	Bigo Maudens has been Merged in Novabio
France	Evlab has been Merged in Verdun de Lore
Iberia	Louro & Pires has been merged in Flavio Gusmao
Iberia	Sampletest Spain has been merged in Labco Spain
Iberia	Analisis Clinicos Jose Luis Vallejo has been merged in Sanilab
Iberia	David Santos Pinto has been merged in Texeira
Italy	Mifra has been merged in Centro Analisi Monza (CAM)

5.2. Legal conversion of Labco into a SA ("Société Anonyme") and capital increases

Legal conversion of Labco into a SA ("Société Anonyme")

On January 12, 2012, an extraordinary general meeting of Labco's shareholders decided the conversion of Labco from the corporate form of SAS ("Société par actions simplifiée") into a SA ("Société anonyme"). As a consequence, the corporate governance bodies have evolved.

Under the French company law applicable to SA, Labco SA's affairs are now managed by the board of directors (*conseil d'administration*), whose members are elected by our shareholders. Decisions are now taken within the board of directors under the rule of "one man—one vote". Labco's board of directors elected a Chairman (*président du conseil d'administration*), Andreas Gaddum, and appointed a General Manager (*directeur général*), Philippe Charrier.

Capital increases

On March 12, 2012, the board of directors recorded an increase in the share capital of our Company of €54 367 corresponding to 54 367 issued C shares deriving from exercise of financial investors warrants.

Pursuant to the deliberations of the extraordinary shareholders' meeting held on March 12, 2012, a capital increase of the Company of €24 748 796 has been carried out as of March 28, 2012 through the issuance at par of 24 748 796 shares with a par value of one euro each.

Note 5 Significant events (Continued)

The share capital was increased from €43 391 100 to €68 139 896. The preferential subscription rights have been maintained and the shares have been subscribed solely in cash. As of September 30, 2012 the costs directly related to the capital increase have been recorded as a deduction of issuance premium balances for an amount of 138 K€.

On June 7, 2012, the board of directors recorded an increase in the share capital of our Company of €115 756 as a consequence of its decision taken on April 5, 2012, using the delegation of powers granted by the general meeting of shareholders held on March 12, 2012, to increase the share capital and additional paid in capital of €1 034 859 by the issuance of 115 756 A shares at a subscription price of 8,94 € per share.

On October 30, 2012, an extraordinary general meeting of Labco's shareholders decided an increase in the share capital of our Company of €192 485 by the issuance of 192 485 A shares subscribed through contribution in kind.

On December 6, 2012, the board of directors recorded an increase in the share capital of our Company of €11 185 as a consequence of its decision taken on October 4, 2012, using the delegation of powers granted by the general meeting of shareholders held on March 12, 2012, to increase the share capital and additional paid in capital of €99 994 by the issuance of 11 185 A shares at a subscription price of 8,94 € per share.

In total, the share capital amounts as at December 31, 2012 to €68 459 322

5.3. Non-recurring restructuring plans

Restructuring in Germany

At year-end 2011, a restructuring of the laboratory MVZ Duisburg was implemented with a restructuring provision recorded for an amount of 0,8 M€. As at December 31, 2012, restructuring expenses have been recorded for 0,4 M€ and remaining provision amounts to 0,4 M€ mainly covering onerous renting contracts for unused sites.

End 2012, German management decided to restructure fundamentally the Mittelhessen region in which Labco operates 3 labs by especially merging the activities of those labs ("Hessen merger"). Restructuring plan in Mittel-Hessen (Marburg/Giessen) consist of closing of labs, dismissal of employees, build up of a new platform and lastly merger of Marburg/Giessen.

As a consequence, non-recurring restructuring expenses have been incurred in 2012 for 172 K€ and a restructuring provision of 199 K€ has been recorded as at December 31, 2012.

To take into account new facts in Germany relating notably to the impact of the new federal quota system announced in December 2012 and the full impact of the remediation of the alleged fraudulent activities in MVZ Dillenburg (refer to the *Note 27 Litigations and Contingent liabilities)* Labco has performed an impairment test on the Cash Generating Unit Germany resulting in an impairment amounting to 36 M€ of goodwill allocated to Cash Generating Unit Germany. Refer to *Note 13 Goodwill* for a detailed explanation on impairment analysis.

"Deep Dive" efficiency program in France

In the context of additional price pressure in French biology, driven by the overall economic environment, Management has decided to launch a full and detailed review of French operations in order to restructure the French network by identifying productivity improvements through accelerated concentration and in-depth reorganization. This "Deep Dive" program into the French network took place throughout first semester 2012 and resulted in a human resources optimization plan including its associated implementation cost (severance packages).

As a consequence, non-recurring restructuring expenses have been incurred in 2012 for 663 K€ and a restructuring provision of 115 K€ has been recorded as at December 31, 2012 for people notified before year-end. Further costs are expected in 2013 with the finalization of the "Deep Dive" efficiency program.

Note 5 Significant events (Continued)

Restructuring in Iberia (Portugal and Spain)

At year-end 2011, a significant restructuring program was initiated both in Spain and Portugal. As a consequence, a restructuring provision was recorded for an amount of 2,2 M€. Some restructuring measures have been implemented in 2012 leading to use the provision for an amount of 1,1 M€. As at December 31, 2012 the remaining restructuring provision amounts to 1,1 M€ for the residual measures to be implemented.

5.4. RCF Financing agreement amendments

RCF Financing agreement amendments

We have issued a "Request for Amendments" to Natixis, acting as Agent pursuant to the Revolving Credit Facility Agreement.

The amendments consisted of an amendment of the "Leverage ratios", an amendment of the "Incurrence Ratios" and a technical amendment. Please refer to *Note 23 Borrowings and other financial liabilities* for details of amended ratios. Natixis, acting as Agent pursuant to the Revolving Credit Facility Agreement, confirmed that the "request for Amendments" reached the consent of the Majority Lenders on April 13, 2012. The amendments entered into force immediately and had their first application for the calculation of the compliance certificates for the Quarter ending on March 31, 2012.

5.5. Strategic projects

In May 2012, Labco management received indications of interest from potential buyers interested in acquiring Labco. In compliance with the terms of our shareholders' agreement, our largest shareholder, 3i, appointed strategic advisors and organized an orderly sale process, which is currently ongoing. 3i has informed us that they have received non-binding offers from potential buyers who have expressed interest in acquiring a minority, a majority or all of our share capital. We understand that 3i is currently reviewing the offers received and at the same time considering the potential of stand-alone value creation for Labco. 3i intends to enter into more detailed discussions with one or more selected potential buyers. However, 3i may suspend or end the process, at any time.

Moreover, Labco has incurred non-recurring expenses for an amount of 2.8 M€ related mainly to external advisors and lawyers for diligences work used internally for various strategic options.

A sale of a controlling or significant stake in the Company may constitute a "Change of Control" under the Indenture and the Revolving Credit Facility agreement, and thereby trigger a requirement, unless waived by the holders of the Notes, that we offer to repurchase the Notes from holders at a price of 101% of their principal amount, plus accrued and unpaid interest. Additionally, a change of control under the Revolving Credit Facility Agreement, unless waived by the lenders, results in the cancellation of the commitments under the Revolving Credit Facility and all amounts outstanding under the Revolving Credit Facility would become due and payable. Refer to *Note 34 Events after the reporting period* for a description of the subsequent issuance on February 13, 2013 of Additional 8.5% Senior Secured Notes due 2018 issued for an aggregate nominal of 100 M€.

Note 6 Acquisitions of subsidiaries

Business combination

Main acquisitions during the 2011 reporting period are shown below by country. At the end of the 1 year window period, most goodwill have been confirmed with no significant changes apart from CIC group goodwill which has been decreased by 2.6m€.

Acquisition date (€ 000)	Country	Entities	Goodwill
08.09.2011	France	Sylab	17 973
14.10.2011	France	Laonnois	11 384
14.11.2011	France	Tonin—MAZARIN	10 770
19.09.2011	Portugal	Macedo Dias	8 680
23.08.2011	Brazil & Spain	CIC Groupe	5 572
12.05.2011	France	Laboratoires Associés	5 091
30.06.2011	France	Filab	4 225
16.12.2011	France	CvDD	3 989
29.03.2011	France	Celab Saint-Céré	3 448
14.09.2011	France	Lemaitre Godefrood	2 622
01.12.2011	France	Lafarge Poupart	2 294
31.08.2011	Belgium	Laboratoire M. A. B	2 177
31.12.2011	France	Maton Pelletier	2 133
30.03.2011	France	Henryon Lecat Decamaret	2 100
04.02.2011	Italy	Mifra	2 044
28.10.2011	France	Hauts de Garonne	1 638
01.07.2011	France	George	1 590
29.04.2011	France	Belloc	1 534
30.06.2011	France	Napoli	1 454
31.10.2011	France	Hegaret Vaurette	1 423
31.12.2011	France	Gerylab	1 266
30.11.2011	France	BioH—Hichri	1 146
29.11.2011	France	Analabo	1 072
06.05.2011	France	Sofilab 45	1 029
15.02.2011	France	Pallure	1 000

Main acquisitions during the reporting period are shown below by country:

Acquisition date	Country	Entities	Goodwill
29.02.2012	France	Isolab+Labo des Charentes	19 826
20.11.2012	France	Chancé	5 314
28.12.2012	France	Labotri (Trichereau)	3 788
28.12.2012	France	Seudre et Loire	2 392
20.12.2012	France	Acquisition of asset deal Mariani	2 380
30.11.2012	France	Sel Biologie—Sèvre et Loire controlling ownership purchase	1 396
20.12.2012	France	Acquisition of asset deal Archambeaud	1 284
30.11.2012	France	Degraef Pouliquen controlling ownership purchase	1 275
30.10.2012	France	Gritti Chiali	941
03.01.2012	France	Evlab	869
02.01.2012	France	Biobassin	748
30.10.2012	France	Brigout controlling ownership purchase	750
28.12.2012	France	Auguet Lauroua	715

All companies acquired earn revenues from medical analyses. Through these acquisitions the Group expects to reduce costs through economies of scale, and the goodwill thus represents the fair value of the expected synergies resulting from the acquisition. All amounts are provisional and subject to modification in the twelve months period following the acquisition date.

Note 6 Acquisitions of subsidiaries (Continued)

The cumulative effect of acquisitions on the Group's assets and liabilities on acquisition date corresponding to identifiable assets acquired and liabilities assumed for share deals acquisitions performed in 2012 as well as cumulative consideration transferred is presented below:

Acquisition price	**41 452**
In thousand of euros	**TOTAL**
Property, Plant and Equipment	**2 344**
Intangible assets	**175**
Investment in equity accounted investees	**0**
Other non-current assets	**460**
Deferred tax assets	**31**
Inventory	**281**
Trade Receivables	**2 035**
Other current assets	**347**
Cash and cash equivalents	**4 229**
TOTAL ASSETS	**9 902**
Provisions	**65**
Employee benefits liabilities	**111**
Deferred tax liabilities	**0**
Financial liabilities	**2 596**
Trade Liabilities	**1 214**
Other current liabilities	**2 106**
TOTAL LIABILITIES	**6 092**
Contingent liabilities	**0**
Total net identifiable assets	**3 809**
Goodwill	**37 643**

The goodwill is attributable mainly to the synergies expected to be achieved from integrating the companies into the Group. On top of goodwill generated by share deals, Labco also made acquisitions of asset deals that generated an increase of goodwill amounting to 4,2 M€.

Note 7 Geographical information

Detailed of revenue by country break down as follows:

€ 000	**2012**	**%**	**2011**	**%**
France	**301 786**	**53%**	250 082	49%
Germany	**53 881**	**9%**	55 280	11%
Iberia	**149 412**	**26%**	144 206	28%
Belgium	**25 923**	**5%**	22 196	4%
Italy	**35 844**	**6%**	36 696	7%
United Kingdom	**1 252**	**0%**	0	0%
Total revenue	**568 097**	**100%**	**508 460**	**100%**

Iberia corresponds to the aggregate of Portugal and Spain.

Note 8 Payroll related expenses

€ 000	2012	2011
Subcontracting and temporary staff	**(10 051)**	**(9 713)**
Salaries and wages	**(168 953)**	**(152 318)**
Social security contributions	**(50 381)**	**(44 828)**
Other personnel related costs	**(9 544)**	**(7 978)**
Total payroll related expenses	**(238 929)**	**(214 837)**

Number of persons	2012	2011
Executives	**356**	331
Employees	**4 346**	4 026
Total Number of persons	**4 702**	**4 357**

Other personnel related costs include amongst other profit sharing, pensions expenses, travel expenses, fees for training of personnel, food allowances.

Salaries and wages expenses include also the variable remuneration paid to biologists under various legal forms, either compensation paid as salary or fees or, mainly for French biologists, the priority dividends paid on the current year result.

As explained in the basis of preparation section, the priority dividends to be paid to certain laboratory doctors after year-end are recognized as employee benefits expense and liability in the current year.

Information about the share based payment transactions is included in *note 25—Share based payment schemes.*

Note 9 Other operating expenses

€ 000	2012	2011
Operating lease & rental expenses	**(29 781)**	(26 926)
Taxes	**(2 423)**	(1 976)
Repairs & maintenance & insurance expenses	**(13 829)**	(11 329)
Consulting & advisory fees	**(12 010)**	(14 733)
Utilities	**(19 211)**	(16 714)
Other expenses	**(9 628)**	(8 673)
Total other operating expenses	**(86 881)**	**(80 351)**

Other operating expenses include amongst other service charges relating to security and cleaning, marketing related expenses, storage costs.

According to IFRS 3 revised the transactions costs related to acquired entities are recorded in the consolidated statement of income, as well as with transaction costs for abandoned deals. Given the non operational, irregular or non-recurring nature of these costs, they have been presented on a separate line of consolidated statement of income, and depending on the amount of costs incurred by transaction project, they are qualified as transaction costs for usual small size acquisitions recorded as other operating expenses, or they are qualified as transaction costs for significant and unusual transactions recorded as non recurring operating expenses in the line Perimeter effect

The Group incurred acquisition-related costs of 1 626 K€ in 2012 (2011: 3 015 K€) for usual small size acquisition relating to external legal fees, due diligence costs and stamp taxes.

Note 10 Non recurring income and expenses

€ 000	2012	2011
Restructuring expenses and provisions for major litigations	**(9 235)**	(10 988)
Perimeter effect	**(2 715)**	(422)
Impairment of goodwill	**(36 000)**	(95 000)

Gains/(losses) on sale of assets	**360**	530
Non-recurring income and expenses	**(44 663)**	**(109 869)**

Restructuring expenses, provisions for major litigations, impairment and reversal of impairment on other non-operational assets and liabilities and impairment of goodwill mainly include in 2012 following expenses or provisions:

- 2,3 M€ of restructuring expenses mainly in relation with the restructuring schemes implemented in Spain, Portugal, Germany (Duisburg) and Belgium (MAB) announced at year-end 2011 and the finalization of the closure of Brussels headquarter. Those costs having been accrued, corresponding use of restructuring provisions have been recorded in the line Impairment and reversal of impairment on other non-operational assets and liabilities for 2,3 M€.
- 0,3 M€ of non-recurring expenses for the repurchase of the shares of a French laboratory owned by a biologist stopping to operate, already accrued as at December 31, 2011 with therefore corresponding reversal of the provisions being recorded in the line "Provisions, impairment losses and reversals on liabilities".
- 0,8 M€ of restructuring expenses and provisions in relation with the "Deep dive" efficiency program implemented in France during first semester 2012 and 0,4 M€ of restructuring expenses and provisions for the 2012 restructuring scheme implemented in Germany (Mittelhessen merger).
- 1,7 M€ of major litigation against former vendors of Dillenburg for alleged fraudulent activities and related consequences
- 1,8 M€ of net non-recurring income related to the settlement indemnity to be received in context of the early termination of a clinic contract in France, net of estimated restructuring expenses.
- 1,5 M€ of IFRS 2 expenses as a consequence of the cancellation of the Restricted Stock Unit "Free shares 2011" scheme in Q2 2012.
- 2,8 M€ of non-recurring costs expensed mainly in relation to strategic projects, which corresponds principally to advisors fees.
- 36 M€ of impairment of goodwill allocated to Germany Cash Generating Unit as a consequence of annual impairment test.

The Gains on sale of assets correspond mainly to consolidated gain on the sale of Centro Diagnostico Missori Srl.

Restructuring expenses and provisions for major litigations mainly included in 2011 expenses relating to strategic refinancing projects (4,2 M€), net severance costs mainly in Iberia and Germany (5,8 M€) and non-recurring major litigations expenses and provisions mainly related to Germany (4,5 M€). Moreover an impairment of goodwill of 95 M€ allocated to Iberian Cash Generating Unit has been recorded.

Perimeter effect corresponds to earn out variations of fair value subsequent to the 1 year window period for an amount of 386 K€ (2011: 422 K€) as well as earn out contracted on the acquisition of the CIC Group expensed for an amount of 2 329 K€.

Note 11 Net finance costs

€ 000	2012	2011
Financial income	**1 073**	2 465

Other financial expenses	**(923)**	(737)
Net Finance Costs	**(54 572)**	**(75 618)**

Other financial expenses correspond mainly to unwinding of the discount on provisions and other financial charges like foreign exchanges gains and losses.

As a consequence of the Refinancing operations in January 2011, and the early repayments of historical debts, a total of 26,1 M€ of one-off financial charges has been expensed in 2011 (write off of previous financing debt issuance costs and break up costs for early cancelation of previous financing and derivatives instruments).

The interest expenses correspond now mainly to the 500 M€ Senior Secured Bonds at an effective interest rate of 9%, the RCF interests expenses on the drawn part of the RCF and commitments fees and amortization of RCF debt issuance costs for the undrawn part of the Revolving Credit Facility. Furthermore it includes some one-off costs related to the covenant amendments implemented in April 2012 for 0,6 M€.

Write off of Deferred Tax Assets	0	(1 604)
Cancellation of hedging financial instruments		770
Other (including tax rates difference impact)	(895)	160
Total explained	**(7 929)**	**(21 597)**

The non-deductible expenses correspond mainly to the effect of the restatements of priority dividends paid to French biologists that have been classified as remuneration expenses under IFRS according to a "substance over form" analysis. In fact priority dividends recorded as personnel expenses in the consolidated financial statements are not an expense recorded in local books, and as a consequence it will not generate any Tax deductibility.

Tax losses and tax credits not recognised as deferred tax assets amounted to 136 M€ as of December 31,2012, tax losses mainly originated in Germany and Iberia.

€ 000

Impairment testing for cash-generating units containing goodwill

For the purpose of impairment testing, goodwill is allocated to groups of cash-generating units defined at the level of a country, except for Iberia (including Spain and Portugal), which represent the lowest level within the Group at which the goodwill is monitored for internal management purposes.

The aggregate carrying amounts of goodwill allocated to each group of unit and key assumptions of the impairment testing model are as follows:

€ 000	Total	France	Italy	Iberia	Germany	Belgium
Goodwill carrying amount at 31 December 2011	**616 124**	**303 861**	**30 968**	**166 623**	**96 872**	**17 801**

Discount rate 2012	**8,5%**	**8,5%**	**8,5%**	**8,5%**	**8,5%**	**8,5%**

Note 13 Goodwill (Continued)

The recoverable amount of each cash-generating unit was based on its value in use which was determined by discounting the future cash flows generated from the continuing use of the unit. The main assumptions on which the value in use of a cash generating unit is based are the discount rate and trends in volumes, prices and direct costs (inflation) over the period. The calculation of the value in use was based on the following key components:

- The Group's 5 years business plans determined during Summer 2012 in context of strategic operations and rationalized with 2013 budget. Trends in volumes, prices and direct costs are based on past trends and on the future market outlook which include a certain level of uncertainties, especially in the current context of economic difficult environment in certain European countries.
- Given announcement of German EBM quotas (ie a capped percentage of the scheduled fees under the statutory health insurance ("EBM")) for fourth quarter 2012 at 95,4% and at 89,2% for first quarter 2013, as well as a deterioration of our German activity in 2012, German local management updated its business plans in relation with 2013 budget. That updated business plan was used to perform the annual impairment test analysis on Germany cash generating unit.
- The cash flows projections for the years 2013 to 2016 include also:
  - Taxes impact by applying an average theoretical rate per country;
  - Working capital variance;
  - Capital expenditures corresponding in general to 2,5% of forecasted annual turnover.
- The terminal value is then calculated by discounting the forecast flows of the last year (2016) using a perpetual growth rate between 0,5% and 2% depending on the cash generating unit. This percentage is management's best estimate of the expected market evolution based on an organic growth rate such as inflation.
- The discount rate is based on the Group's weighted average cost of capital (WACC) including a leveraged beta, cost of debt and cost of equity (including market risk premium and size premium); Discount rates used are post-tax discount rates applied to post tax cash flows. Applying those rates result in value in use similar to those computed using pre-tax discount rates applied to pre-tax cash flows. (as requested by IAS 36).

Result of annual impairment testing

After having performed the annual impairment testing on goodwill, an impairment charge of 36 M€ has been recorded to partially write off goodwill allocated to the German cash generating unit, to take into account the announced German central federal EBM quotas and the consequences of the alleged fraudulent activities in our Dillenburg laboratory and the likely impact on Labco's business.

With regards to the assessment of value in use of the cash generating units, management believes that no reasonably possible change in any of the above key assumption would cause the carrying value of the unit to exceed materially its recoverable amount, except for German cash generating unit subject to impairment.

By applying the sensitivity test to the discount rate and growing rate assumptions, it appears that an increase or a decrease of 100 basis point would not significantly change the conclusions of the impairment tests. In the case of Germany CGU, these sensitivity tests revealed that its goodwill would decrease by 3,5 M€ in the event of a 100 basis point decrease in the long term growth rate (meaning a negative growth rate of 0,5%) or by 6,1 M€ in the event of a 100 basis point increase in the discount rate.

Note 15 Property, plant and equipment (Continued)

Leased plant and machinery

Included in the Property, Plant and equipment schedule are the finance lease plant and machinery:

€ 000	31.12.2012	31.12.2011
Leasing—furniture, industrial fixtures, equipment and tooling (gross)	**42 175**	42 381
Leasing—furniture, industrial fixtures, equipment and tooling (amt)	**(26 261)**	(25 865)
Net-book value	**15 914**	**16 516**
Leasing—motor vehicles (gross)	**663**	595
Leasing—Motor vehicles (dep)	**(340)**	(247)
Net-book value	**323**	**349**
Net lease property under finance leases	**16 237**	**16 864**

The leased plant and machinery mainly relate to the automats included in technical equipment used for medical analyses. The contracts in use for this activity stipulate that, if the laboratory buys exclusively from the supplier chemical reagents for a certain indicative volume during the term of the contract, the supplier, in return, puts an automat at the disposal of the Group for free during the contractual period (referred to as "pay per test" equipment").

These "put at disposal" schemes, although not under the legal form of a leasing agreement, correspond, in substance, to a lease agreement whereby the global price paid for the reagent includes the cost of the consumable and the rent/lease of the machine. As a consequence under IFRS, such agreements are analysed in accordance with IAS 17 on leases with respect to the transfer of majority of risks and rewards.

A number of such contracts have been classified as finance leases. For these contracts, the relating finance lease assets and liabilities have been recognized on the balance sheet at the lower of the fair value of the asset and the present value of the minimum lease payment at inception of the contract. The assets are depreciated over the average lease term (60 months).

Note 16 Investments in associates

The Group's share of profit in its associates (equity accounted investees) for the year was (69) K€ (2011: (267) K€).

The Group has mainly a 51% interests in the joint venture iPP, a 49% interest in a French biology laboratory (Val de Garonne), a 36% interest in an entity, Labo des Charentes, owned by Isolab as well as a 50% interest in a Spanish biology laboratory (Lab Dos Analisis) and a 30% interest in a Portuguese laboratory (Genetica Molecular Laboratorio SL). In 2012, Labco group acquired the controlling ownership of the 3 French biology laboratories historically recorded under equity method (Brigout, Degraef Pouliquen and Sèvre et loire biologie)

Otherwise the Group owned interests between 10% and 50% in local Economic Interest Group (so called Société Civile de Moyens [SCM] in France and Consorzio in Italy), which corresponds to entity in which support functions are pooled and working for the Labco group labs but also other external entities. For those entities, the Group has significant influence but no control of the entities.

In 2012 the Group receives dividends from its investments in equity accounted investees for an amount of 372 K€ (2011: 302 K€).

Note 16 Investments in associates (Continued)

Details of the Group's associates at the end of the reporting period are as follows:

Note 17 Other non-current assets

€ 000	31.12.2012	31.12.2011
Available-for-sale financial assets (non consolidated investments)	**687**	494
Other available-for-sale financial assets	**2 839**	3 228
Deposits and guarantees	**4 884**	2 974
Derivatives used for hedging	**0**	1
Non-current receivables	**528**	657
Other non current assets	**8 938**	**7 354**

Non-current assets correspond mainly to deposits and guarantees provided to lessors for the renting of buildings and other premises, as well as non-current other receivables.

For entities in which the Group has an ownership below 20% and no significant influence, they are not consolidated and the investments in those entities have been classified as available for sale financial assets pursuant to IAS 39 and, as such, recognized at fair value or historical value when fair value could not be reliably estimated. Unrealized gains and losses are taken directly to other comprehensive income, except for impairment losses that are recognized in the Income Statement. No unrealized gain or loss was recognized in 2012 and 2011.

The principal equity investments in unconsolidated companies held by the Group are as follows:

€ 000	31.12.2012	% ownership	31.12.2011	% ownership
Nancy Haut SCI	**13**	**3,16%**	13	3,16%

Labco Services France	**10**	**100,00%**		
Other unconsolidated equity investments	**104**		65	
Total unconsolidated equity investments	**687**		**494**	

The entities Labco Corporate Assistance and Labco Services France owned at 100% by Labco SA are not consolidated as at December 2012 because they were just created and had no activity. Those entities will join in 2013 the Labco SA tax integration but will remain with no activity until Labco management decides otherwise. The entity Laboratorios Martinez Reig has been recently acquired in 2012 with no financial information available timely and a limited activity.

Note 18 Deferred tax assets and liabilities

€000	Notes	31.12.2012	31.12.2011
Deferred tax assets on temporary differences book to tax		**1 311**	1 173
Deferred tax laibilities on temporray differences book to tax		**(3 115)**	(2 962)
Deferred tax assets on tax losses carried forward	(a)	**4 986**	1 176
Deferred tax liabilities relating to provisions (mainly retirement indemnities)		**1 846**	1 604
Deferred tax liabilities relating to fixed asset (mainly finance leases)		**149**	104
Deferred tax on derivatives		**69**	55
Net deferred tax		**5 246**	**1 150**
—Deferred tax assets		**7 615**	3 453
—Deferred tax liabilities		**(2 369)**	(2 302)
Net deferred tax		**5 246**	**1 150**

(a) Capitalized tax losses carried-forward represent French entities for 2,0 M€, Iberian entities for 2,4 M€, and Italian entities for 0,4 M€. The increase compared to 2011 is mainly explained by the activation of deferred tax assets on tax losses carried forward in Iberia for 2,1 M€ and in Labco SA for 2,1M€ after re-estimating the probability to use these losses within the next 5 years given changes in our forecasts following restructuring actions implemented cumulated with the impacts of the new Tax laws enacted in various countries.

Note 19 Inventories

€ 000	31.12.2012	31.12.2011
Raw materials	**1 705**	1 675
Reagents (net)	**7 233**	8 022
Total Inventories	**8 938**	**9 697**

There were no significant write-offs regarding inventories during 2011 and 2012.

Note 20 Trade receivables and other current assets

€ 000	31.12.2012	31.12.2011
Trade receivables	**97 442**	**98 992**
Other current assets	**13 704**	**11 557**
Prepaid expenses and accrued income	**2 963**	2 542
Receivables related to taxes	**6 527**	6 209
Other receivables	**4 214**	2 806
Trade receivables and other current assets	**111 146**	**110 549**

The decrease in Trade receivables is mainly explained by an improvement of overdue collection in Spain compared to December 31, 2011 position with increased payment delay in Iberia due to economic context and increased payment delay of Public Services, partly compensated by acquisition effects and increase in activity in Belgium or in France.

€ 000	Gross	Impairment	Net
Trade receivables	**100 478**	**(3 036)**	**97 442**
Other current assets	**14 279**	**(575)**	**13 704**

Other receivables	4 790	(575)	4 214
Trade receivables and other current assets	**114 757**	**(3 611)**	**111 146**

The Group's exposure to credit and currency risks related to trade and other receivables is disclosed below.

Note 20 Trade receivables and other current assets (Continued)

Credit risk

Exposure to credit risk

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was:

€ 000	31.12.2012	31.12.2011
Available-for-sale financial assets	**687**	494
Other available-for-sale financial assets	**2 839**	3 228
Cash and cash equivalents	**56 595**	69 833
Loans and receivables	**111 146**	110 549
Total	**171 266**	**184 104**

Impairment losses

The movement in the allowance for impairment in respect of loans and receivables during the year was as follows:

€ 000	2012	2011
Balance at 1 January	**(3 713)**	**(2 508)**
Increase	**(1 553)**	(1 504)
Reversal	**996**	740
Perimeter variations	**(226)**	(238)
Other	**885**	(202)
Balance at 31 December	**(3 612)**	**(3 713)**

The Group has no significant concentrations of credit risk due to the large number of customers and individually non-significance of amounts due. The Group performs ongoing credit evaluations of its receivables. The actual write off relating to trade receivables as at 31 December 2012 relates mainly to several non-significant clients especially in Iberia and amounts to 1.6 M€. As at 31 December 2011 it amounts to 1,6 M€. Actual losses are however within management's expectations.

Given settlement received from Inami in Belgium in fourth quarter 2012, impairment losses of other receivables has been released (0.9 M€) and presented in the line "Other".

Based on historic default rates, the Group believes that, apart from the above, no additional impairment allowance is necessary in respect of trade receivables. At 31 December 2012, as for 2011, the Group does not have any collective impairments on its loans and receivables or its investments.

Note 21 Cash and cash equivalents

For the purposes of the consolidated statement of cash flows, cash and cash equivalents include cash on hand and in banks, net of outstanding bank overdrafts and cash equivalent. Cash and cash equivalents at the end of the reporting period as shown in the consolidated statement of cash flows can be reconciled to the related items in the consolidated statement of financial position as follows:

€ 000	31.12.2012	31.12.2011
Cash equivalents	**8 745**	15 590
Cash on hand and bank deposits	**47 850**	54 243
Cash and cash equivalents	**56 595**	**69 833**
Bank overdrafts	**(466)**	(2 093)
Cash and cash equivalents in the statement of cash flows	**56 129**	**67 740**

Note 21 Cash and cash equivalents (Continued)

Cash equivalents correspond, according to the categorization by hierarchy of fair values as stated by IFRS 7, to financial instrument of level 1. Revolving Credit Facility ("RCF") covenants impose to keep a minimum cash balance of 20 M€ at each quarter end.

Note 22 Capital and reserves attributable to owners of the parent

Ordinary shares

As at December 31, 2012 the authorised share capital comprised 68 459 322 shares. The shares have a par value of one euro (1 €), all shares being fully paid. The shares are denominated into five types, the holders of shares are entitled to the same rights to receive dividend, and are entitled to one vote per share at general meetings of shareholders of the Company. The share capital of Labco is divided into five types of shares, each held by a different category of shareholder:

- certain laboratory doctors from whom we acquired clinical laboratories (the "A Shareholders");
- our shareholders known as "founders" (the "B Shareholders");
- financial investors (the "C Shareholders"); and
- other shareholders (the "D Shareholders" and the "Ordinary Shareholders") such as our management, family members and estate planning entities of the laboratory doctors who are also our A Shareholders.

Approximately 193 laboratory doctors of our Group are A Shareholders, holding together with some of their affiliates who are also A Shareholders, approximately 20,3% of the Company's share capital. These laboratory doctors became shareholders of the Company by reinvesting a part of the purchase price we paid to acquire their laboratories. The aggregate shareholding of our A Shareholders and their affiliates (who are D Shareholders or Ordinary Shareholders) represents 30,9% of the Company's share capital.

The B Shareholders, representing the "founding" shareholders of our Group, are Eric Souêtre, Stéphane Chassaing, Luis Vieira and the shareholders from whom we acquired "General Lab S.A." in 2007. Together, they hold approximately 17,6% of the Company's share capital.

The C Shareholders are financial investors who together hold approximately 41,4% of the Company's share capital. To date, the investment vehicles managed by "3i" are, together, our largest shareholder, the latter having invested €115 million and holding approximately 17,8% of our share capital. "3i" is an international investor focused on private equity, infrastructure and debt management. Other financial investors include notably Viking Limited, a private equity firm that invested in Labco in 2004, CM-CIC Investissements, TCR Capital and Ixen Investissement.

The D Shareholders and the Ordinary Shareholders, comprised of our management and the family members and estate planning entities of the laboratory doctors who are also our shareholders, hold the remaining approximately 20.6% of the Issuer's share capital (i.e., approximately 19.6% of D shares and 0.9% of ordinary shares).

The remaining part of the share capital, ie approximately 0,1%, is held by the Company itself as Treasury shares.

In number of shares	2012	2011

Issuance of ordinary shares during the period

On March 12, 2012, the board of directors recorded an increase in the share capital of our Company of €54 367 corresponding to 54 367 issued C shares deriving from exercise of financial investors warrants. The share capital is increased from €43 336 733 to €43 391 100.

Note 22 Capital and reserves attributable to owners of the parent (Continued)

Pursuant to the deliberations of the extraordinary shareholders' meeting held on March 12, 2012, a capital increase of the Company of €24 748 796 has been carried out as of March 28, 2012 through the issuance at par of 24 748 796 shares with a par value of one euro each.

The share capital was increased from €43 391 100 to €68 139 896. The preferential subscription rights have been maintained and the shares have been subscribed solely in cash. As of June 30, 2012 the costs directly related to the capital increase have been recorded as a deduction of issuance premium balances for an amount of 138 K€.

On June 7, 2012, the board of directors recorded an increase in the share capital and additional paid in capital of 1 035 K€ by the issuance of 115 756 A shares at a subscription price of 8.94 € per share.

On October 30, 2012, an extraordinary general meeting of Labco's shareholders decided an increase in the share capital and additional paid in capital of 1 721 K€ by the issuance of 192 485 A shares at a subscription price of 8.94 € per share in order to remunerate the contribution in kind of remaining Isolab shares as agreed in the acquisition agreement dated February 2012.

On December 6, 2012, the board of directors recorded an increase in the share capital of our Company of €11 185 as a consequence of its decision taken on October 4, 2012, using the delegation of powers granted by the general meeting of shareholders held on March 12, 2012, to increase the share capital and additional paid in capital of €99 994 by the issuance of 11 185 A shares at a subscription price of 8.94 € per share.

In total, the share capital amounts as at December 31, 2012 to €68 459 322.

Hedging reserve

The hedging reserve comprises the effective portion of the cumulative net change in the fair value of cash flow hedging instruments related to hedged transactions that have not yet occurred. As a consequence of refinancing operations performed in January 2011, all cumulative fair value changes of cash flow hedging instruments recorded in other comprehensive Income have been recycled in profit & loss.

Stock option plan reserve

The stock option reserve comprises the employee expenses relating to the share-based payment plans of the Group.

Actuarial gains and losses reserve

The actuarial gains and losses reserve comprises the cumulative net change in actuarial gains and losses (due to discount rate and main actuarial assumptions) computed for the long term employee benefits valuation.

Reserve for own shares

The reserve for own shares comprises the costs of the Company's shares held by the Group. As of December 31, 2011, the Group held 646 K€ of the Company's shares, corresponding to 80 728 shares. Twenty one (21) treasury shares have been sold during the three months ended 31 March 2012 to twenty managers, two (2) have been repurchased, and as of December 31, 2012, the Group held 646 K€ of the Company's shares, corresponding to 80 709 shares (80 707 A shares and 2 D shares)

Dividends

No dividends were declared and paid to the shareholders of Labco SA during 2011 and 2012.

Equity Warrant schemes

Labco has issued warrants to financial investors and key management personnel of our Group.

Note 22 Capital and reserves attributable to owners of the parent (Continued)

Warrants Issued to Financial Investors

During the year ended December 31, 2008, the Company issued three warrant schemes entitling the holders, upon exercise of the warrants to subscribe for other financial instruments or shares of the Company at a fixed price of €1 per share.

The number of warrants that can be exercised depends on the ability of the Group to meet certain financial and operational targets. The exact terms of the exchange at the exercise dates were determined when the Company entered into the issuance agreements. Subject to the fulfillment of their conditions, the warrants are exercisable at any time during a period of 15 years after their date of subscription.

A total of 4 223 394 "ABSA C1" were issued, i.e., 4 223 394 Class C shares to which a total of 16 893 576 warrants of four different kinds were attached, providing subscription rights for a maximum of 4 113 531 new Class C shares at a price of €1 per share. A total of 80 878 shares were issued in 2009 by the exercise of 80 878 warrants attached to the "ABSA C1", pursuant to their terms and conditions.

A total of 4 223 394 "ABSA C2" were issued, i.e., 4 223 394 Class C shares to which a total of 8 446 788 warrants of two different kinds were attached, giving subscription rights for a maximum of 2 323 852 new Class C shares at a price of €1 per share. A total of 27 049 shares were issued in 2010 by the exercise of 27 049 warrants attached to the "ABSA C2", pursuant to their terms and conditions.

A total of 1 967 083 "BEABSA" were issued, i.e., 1 967 083 options giving subscription rights for a maximum of 2 097 145 "ABSA C3", i.e., 2 097 145 Class C shares to which a total of 4 541 820 warrants of two different kinds could be attached, giving subscription rights for a maximum of 1 176 860 new Class C shares at a price of €1 per share. A total of 2 020 660 "ABSA C3" were issued in 2009 by exercise of the 1 967 083 "BEABSA", pursuant to their terms and conditions.

A total of 54 367 C shares were issued in 2012 by the exercise of 54 367 financial investors warrants.

Subsequently on January 18, 2013, general meetings of holders of certain securities issued by Labco and an extraordinary general meeting of Labco's shareholders decided to amend the terms and conditions of the ABSA C1, ABSA C2 and BEABSA in order to modify their conditions of exercise.

Warrants Issued to Mezzanine Lenders

Three additional warrant schemes were issued by the Company in July 2008. These warrants entitle the holders upon exercise of the instrument to buy one share of the Company at either a fixed price of €1 (mezzanine B and C) or €14,206582 (mezzanine A) per share. The warrants were granted at a price of €0,0001 per warrant. A total of 494 241 Senior Mezzanine warrants, split in 313 243 Senior Mezzanine A, 38 752 Senior Mezzanine B and 142 246 Senior Mezzanine C, were issued. A total of 6 018 shares were issued in 2010 by exercise of 6 018 Senior Mezzanine B warrants, pursuant to their terms and conditions.

A total of 1 464 175 Junior Mezzanine warrants, consisting of 927 975 Junior Mezzanine A, 114 800 Junior Mezzanine B and 421 400 Junior Mezzanine C, were issued. A total of 17 829 shares were issued in 2010 by exercise of 17 829 Junior Mezzanine B warrants, pursuant to their terms and conditions.

A total of 1 460 443 Junior additional Mezzanine warrants, consisting of 925 609 Junior Additional Mezzanine A, 114 508 Junior Additional Mezzanine B and 420 326 Junior Additional Mezzanine C, were issued. A total 17 784 shares were issued in 2010 by exercise of 17 784 Junior Additional Mezzanine B warrants, pursuant to their terms and conditions.

No mezzanine lenders' warrants were exercised in 2012.

Subsequently on January 18, 2013, Labco entered into a settlement agreement with the Mezzanine lenders and the C Shareholders regarding the exercise conditions of certain Mezzanine warrants.

Note 23 Borrowings and other financial liabilities

This note provides information about the contractual terms of the Group's interest-bearing loans, borrowings, which are measured at amortized cost, and other financial liabilities. For more information

Labco performed a refinancing operation early 2011 that significantly modified the sources of fundings for Labco Group.

On January 14, 2011, Labco SAS issued High Yield Senior Secured Notes (also, the "Bond") due 2018 for 500M€ with international investors in London and with Deutsche Bank as Trustee. The main terms and conditions of the Notes are:

- Fixed interest rate amounting to 8.5%, with interests paid semi-annually in arrears.
- Maturity of the Notes is January 15, 2018
- The Notes are guaranteed on a senior secured basis by certain subsidiaries, mainly through first ranking liens over the capital stock of certain subsidiaries and certain present and future intercompany loan receivables
- Under the Notes indentures, Labco will have to respect certain covenants mainly related to reporting and information requirement.
- The Notes have been listed on the Official List of the Irish Stock Exchange and admitted to trading on the Irish Stock Exchange.

The Notes proceeds have been primarily used to repay the December 31, 2010 existing bank debt facilities as well as fees related to this operation. Fees directly linked to the debt issuance or linked to the strategic refinancing project amounted to approximately 16 M€ (excluding VAT) and following their analysis have been either expensed or capitalized as debt issuance costs to be amortized over the Notes maturity using the effective interest rate method.

Note 23 Borrowings and other financial liabilities (Continued)

At the same time end of January 2011, Labco SAS entered into a 135 M€ revolving credit facility under a syndicated Revolving Credit Facility Agreement (the "RCF") with Credit Suisse, Deutsche Bank, Natixis and UBS as lead banks, and Natixis as agent. The main terms and conditions of the RCF are:

- Floating interest rate defined as Euribor + a margin of 4,5% per annum (margin that may reduced to 4.0% or 3.5% per annum by reference to a total net debt to adjusted EBITDA test);
- Maturity of the RCF is February 15th, 2017;
- Borrowings under the RCF will mandatory be used to finance part or all of purchase price and related costs of certain permitted acquisitions (as defined in the agreement), refinance existing indebtedness of entities acquired, finance restructuring costs in relation with acquisition, finance capital expenditure and fund working capital and other general corporate purposes of the Group, provided that the aggregate outstanding amounts of utilization under capital expenditure or working capital funding may not at any time exceed 50 M€;
- The RCF is guaranteed on a joint and several basis by certain subsidiaries qualified as Guarantors, mainly through first ranking liens over the capital stock of certain subsidiaries and certain present and future intercompany loan receivables. The RCF requires that the EBITDA of the Guarantors represent not less than 70% of consolidated EBITDA of the Group;
- The Revolving Credit Facility Agreement also requires Labco, each Borrower and each Guarantor (together, the "Obligors") to observe certain customary affirmative and restrictive covenants, subject to certain exceptions, including:
  - covenants relating to financial information and accounting;
  - covenants relating to obtaining required authorizations; compliance with laws; compliance with environmental laws; information about environmental claims; payment of taxes; *pari passu* ranking of unsecured payment obligations; insurance; granting of access; intellectual property; compliance with financial assistance laws; guarantor coverage (as described above); publicity; limitations on disposals and reorganizations; additional restrictions on distribution of dividends;
  - no other financial indebtedness ranking senior to, or *pari passu* with, the RCF (other than additional Notes and, subject to lenders' consent, additional revolving credit facilities);
  - restriction on incurring additional indebtedness subject to customary exceptions including up to (i) 25 M€ at any time for all members of the Group and (ii) 15 M€ at any time for all members of the Group other than the Borrowers and the Guarantors; and
  - restriction on incurring recourse factoring or similar arrangements in excess of 5.0 M€ in aggregate at any time.
- The Revolving Credit Facility Agreement also requires Labco to ensure compliance with some financial covenants detailed below.

Fees directly linked to the debt issuance amounted to approximately 8.8 M€ (excluding VAT) and have been capitalized as debt issuance costs to be amortized over the RCF maturity using the effective interest rate method.

An Intercreditor Deed Agreement has also been signed between, among others, the Obligors, Deutsche Bank AG, London Branch as Security Agent, Natixis as senior Agent, Deutsche Bank AG, London Branch as Senior Secured Notes Trustee, the Lenders (as Revolving Credit Facility Lenders), the Arranger (as Senior Arrangers), the Hedge Counterparties (each as defined in the Intercreditor Deed), and the Intra-Group Lenders (as defined in the Intercreditor Deed) to define securities and guarantees provided by certain subsidiaries in the context of Bond and RCF issuance.

As of December 31, 2012, the Group borrowings comprises

- A 500 M€ 8.5% Senior Secured Notes due 2018 net of debt issuance costs, with interests paid semi-annually in arrears;
- Some bilateral bank borrowings for a total of 15.8 M€;

Note 23 Borrowings and other financial liabilities (Continued)

- The Revolving Credit Facility (RCF) amounting 135 M€ entered into in January 2011 has been drawn as at December 31, 2012, for an amount of 41 M€ and debt issuance costs have been capitalized and amortized over RCF maturity.

8.5% Secured Senior Notes covenants

Under the Notes indentures, Labco has to respect certain covenants mainly related to reporting and information requirement.

Revolving Credit Facility (RCF) covenants

The RCF includes certain financial covenants as defined in the agreements.

- leverage ratio tested quarterly (calculated as the ratio of consolidated total net debt at each quarter end to consolidated adjusted EBITDA for the 12 months ending on that quarter end),
- super senior gross leverage ratio tested quarterly (calculated as the ratio of total super senior gross debt at each quarter end to adjusted EBITDA for the 12 months ending on that quarter end);
- minimum cash balance of €20 million, tested quarterly; and
- operating capital expenditure for a financial year not to exceed 3.5% of consolidated group revenue

Furthermore, Labco should also achieve an incurrence ratio when we are willing to draw on the RCF. The incurrence ratio is calculated as the ratio of pro forma the acquisitions consolidated total net debt to consolidated adjusted EBITDA for the immediate preceding period pro forma the effect of acquisitions.

As stated in *Note 5 Significant Events*, we obtained an amendment of the “Leverage ratios”, an amendment of the “Incurrence Ratios” and a technical amendment. The amendments signed on April 13, 2012 entered into force immediately and have their first application for the calculation of the compliance certificates for the Quarter ending on March 31, 2012

Amended “Leverage Ratios” in clause 26.2(a) of the Revolving Credit Facility Agreement is as follows:

Relevant Period	Initial Ratio	Amended Ratio
Relevant Period expiring after 31 December 2011 but on or before 31 December 2012	*5.25:1*	**5.75:1**
Relevant Period expiring after 31 December 2012 but on or before 31 December 2013	*5.00:1*	**5.75:1**
Relevant Period expiring after 31 December 2013 but on or before 31 December 2014	*4.75:1*	**5.50:1**
Relevant Period expiring after 31 December 2014 but on or before 31 December 2015	*4.50:1*	**5.25:1**
Relevant Period expiring after 31 December 2015	*4.25:1*	**5.00:1**

Note 23 Borrowings and other financial liabilities (Continued)

Amended "Incurrence Ratios" in clause 27.14(c) of the Revolving Credit Facility Agreement is as follows:

Relevant Period	Initial Ratio	Amended Ratio
Relevant Period expiring after 31 December 2011 but on or before 31 December 2012	*5.00:1*	**5.25:1**
Relevant Period expiring after 31 December 2012 but on or before 31 December 2013	*4.75:1*	**5.25:1**
Relevant Period expiring after 31 December 2013 but on or before 31 December 2014	*4.50:1*	**5.00:1**
Relevant Period expiring after 31 December 2014 but on or before 31 December 2015	*4.25:1*	**4.75:1**
Relevant Period expiring after 31 December 2015	*4.00:1*	**4.50:1**

The Group requested also that the definition of EBITDA set forth in clause 26.1 (Financial definitions) of the Revolving Credit Facility Agreement be amended by adding a new paragraph (ix) under paragraph (a) of the EBITDA definition as follows: "before taking into account any VAT loss resulting from a corporate recharge".

As of December 31, 2012, Labco achieved the expected covenants ratio targets.

Finance lease liabilities

The Group has finance leases mainly for the technical equipment (refer to note 15 *Property, plant and equipment*).

Note 24 Employee benefit liabilities

All of employees of the Group are covered by state pension and collective plans managed by third parties if required under local legislation. Those plans are defined contribution plans.

In addition to these legal pension schemes, a provision is set up for post-employment benefits in France and Italy amounting to 8,2 M€ as of December 31, 2012 (6,2 M€ and 2,0 M€ thousand respectively). In Italy, there is a legal obligation (so called TFR) to pay 7,4% of the employee's annual remuneration for every working year at the departure date.

In France the principal assumptions used for the purposes of the actuarial valuations are as follows:

Principal assumptions	2012	2011
Voluntary departure	**100%**	100%
Discount rate	**3,00%**	4,30%
Social charge rate	**45%**	45%
Employer contribution rate	**50%**	50%
Age at retirement	**67 years**	67 years
Salary increase	**1,5%**	2%
Employee turnover rate	**low**	low

The movements in the provision for post employment benefits in France and in Italy can be summarized as follows:

€ 000	French Post Employment benefit	Italian Post Employment benefit	Total
Balance at 1 January 2012	**5 292**	**2 078**	**7 370**
Current service cost	288	(121)	**166**
Interest cost on benefit obligation	219		**219**
Net actuarial loss recognised in OCI	(302)		**(302)**
Impact from business combination	704	0	**704**
Balance at 31 December 2012	**6 201**	**1 957**	**8 158**

Note 24 Employee benefit liabilities (Continued)

The French post employment benefit and the portion of TFR before January 1st, 2007 accounted for as post employment benefit are not financed through external fundings.

The cumulative net actuarial gains and losses recognized in OCI is detailed in the table Other comprehensive Income and amount to 302 K€ (2011: (578) K€).

Note 25 Share based payment schemes

Warrants Issued to Management

On March 24, 2005, the Company established two manager share warrant schemes (denominated "BSA 2005-1-1" and "BSA 2005-1-2") that entitle key management personnel to subscribe for new shares of the Company, subject to the fulfillment of the conditions detailed in the corresponding issuance agreements. On June 7, 2006 ("BSA 2006-1-1"), March 13, 2007 ("BSA 2007-1-1"), December 30, 2007 ("BSA 2007-1-2"), March 5, 2008 ("BSA 2008-1-1") and September 20, 2010 ("BSA 2010-1-1"), additional manager share warrant schemes were implemented in favor of key management personnel of the Group.

Each share warrant gives the beneficiary the right to subscribe for one share of the Company at an exercise price determined on the allocation date, on predetermined graded vesting dates. The exercise conditions mainly depended on certain financial targets and, in some cases, include an employment condition. The meeting of the Strategic Committee of the Company held on April 23, 2008 established that the exercise conditions of the three categories of share warrants issued on June 7, 2006, March 13, 2007 and December 30, 2007 (BSA 2006-1-1, BSA 2007-1-1 and BSA 2007-1-2) were fulfilled, pursuant to their terms and conditions, so as to allow the holders to exercise such share warrants at any time.

The general meeting of shareholders held on December 30, 2008 modified the terms and conditions of the two categories of share warrants issued on March 24, 2005 (BSA 2005-1-1 and BSA 2005-1-2) to remove all constraints in order to allow the holders to exercise such share warrants at any time. As a result of these decisions and the modifications to the schemes, the beneficiaries can exercise the share warrants granted by these five schemes at any time, within a period of ten years following the date of subscription. According to IFRS 1, the Group did not apply IFRS 2 to 2005, 2006 and 2007 share-based payment arrangements since they had vested at the date of transition.

For the BSA 2008-1-1 scheme, the share warrants vest in 2009, 2010 and 2011. For the BSA 2010-1-1 scheme, the share warrants can be exercised only upon the sale or initial public offering of the Company.

No warrants issued to management were exercised in 2012.

On April 7, 2011, the Company established a Restricted Stock Unit Plan (denominated "Free Shares 2011") that entitle key management personnel to obtain up to 150 000 free shares, subject to the fulfillment of the conditions detailed in the issuance agreement. IFRS 2 was applied to the Free Shares 2011 plan and those free shares will vest in case of sale or initial public offering of Labco. The fair value of the services received in return for free shares is based on the fair value of the free shares granted, measured using the same weighted average models of scenarios than for the "BSA 2010-1-1" plan given the vesting conditions are similar based on exit price per share in case of sale or initial public offering of Labco. No pre-vesting forfeiture has been considered given the limited number of people involved. The total fair value of "Free Shares 2011" plan has been estimated to 2.6 M€.

The services received during 2012 (share-based payment expense) amounts to a total of 565 K€, 220 K€ for Restricted Stock Unit "Free Shares 2011" scheme Q1 2012 expense given the plan has been cancelled in Q2 2012 and 345 K€ for 2010 BSA schemes. Indeed, the 2008 BSA plan is now fully vested and the 2010 BSA schemes IFRS 2 expense has been revised due to the departure of certain beneficiaries. The Restricted Stock Unit scheme has been cancelled in Q2 2012 resulting in the residual IFRS 2 estimated charges initially spread over vesting period to be immediately recorded in consolidated statement of income for an amount of 1 537 K€ in non-recurring expenses and the whole amount of Fair Value reserve related to Restricted Stock Unit scheme of 3.5 M€ recycled in other consolidation reserves. The total amount of Fair Value reserves related to the stock options plans amounts to 3.5 M€ as at December 31, 2012 (4,0 M€ as at December 31, 2011).

Note 25 Share based payment schemes (Continued)

Terms and conditions of the share option programs

The terms and conditions relating to the grants of share warrants are as follows; all share warrants are to be settled by physical delivery of shares:

Plan	Number of instruments	Exercise period	Exercise price	Option price	Average fair value at grant date
BSA 2005-1-1	907 067	At any time between 30 December 2008 and 23 June 2015	1	0,1	0,21
BSA 2005-1-2	108 782	At any time between 30 December 2008 and 23 June 2015	1	0,1	0,21
BSA 2006-1-1	6 796	At any time between 23 April 2008 and 7 June 2016	1	0,1	1,08
BSA 2007-1-1	109 806	At any time between 23 April 2008 and 13 March 2017	2,5	0,25	1,34
BSA 2007-1-2	104 337	At any time between 23 April 2008 and 30 December 2017	2,5	0,25	3,74
BSA 2008-1-1	438 317	At any time between 1 January 2009, 1 January 2010 and 1 January 2011 (each tranche 1/3 of the options)	8	0,8	4,97
BSA 2010-1-1	279 268	Upon sale or initial public offering of Labco	14,84	1,5	7,02
Total	**1 954 373**				

Given the dilutive effect of March 12, 2012 capital increase at par value, all equity warrants holders have been granted a protection right against the dilutive effect. In fact, pursuant to the ninth resolution adopted by the general shareholders' meeting held on March 12, 2012, holders of securities granting access to the share capital will be allowed to subscribe to new shares as of right, at the ratio of four new shares with a par value of one euro each for seven shares subscribed with their securities (seven shares subscribed by exercise of their securities granting access to the share capital giving the right to subscribe to four additional new shares at a subscription price of one euro per share).

Fair value of the options granted during the period

The fair value of the services received in return for share options is based on the fair value of the share options granted, measured using the Binomial model for 2008 scheme and using a weighted average models of scenarios for the "BSA 2010-1-1" scheme and "Free Shares 2011" plan with the following inputs:

	2010 scheme	2008 scheme
Expected volatility (% pa) (based on average volatility on certain indicators of results of comparable quoted entities)	na	32,95
Risk-free interest rate (% pa)	na	4
Expected dividend yield (% pa)	na	nil
Rate of pre-vesting forfeiture (% pa)	20%	nil
Rate of post-vesting leaving (% pa)	na	nil
Multiplier	na	3
Number of nodes	na	200

The Group recognized as share-based payment expense 345 K€ during the year (1 233 K€ in 2011) for 2010 schemes and 220 K€ for Free shares 2011 for Q1 2012 as well as 1 537 K€ in non-recurring expenses following cancelation of the Free shares plan (878 K€ in 2011). The total amount of reserves related to the stock options plans amounts to 3 504 K€ (4 037 K€ in 2011).

Note 25 Share based payment schemes (Continued)

Movements in share options during the year

	2012		2011	
	Number of share options	**Weighted average exercise price**	**Number of share options**	**Weighted average exercise price**
Outstanding at the beginning of the year	**1 954 373**	**5**	1 954 373	5
Granted during the year	**0**	**0**	0	0
Forfeited during the year	**0**	**0**	0	0
Exercised during the year	**0**	**0**	0	0
Expired during the year	**0**	**0**	0	0
Outstanding at the end of the year	**1 954 373**	**5**	1 954 373	5
Of which exercisable at the end of the year	**1 675 105**		1 675 105	

No options have been exercised in 2011 or in 2012.

As a reminder, the protection right of equity warrants holders against the dilutive effect of March 12, 2012 capital increase enables them to subscribe in case of exercise of the warrants new shares at the ratio of four new shares with a par value of one euro each for seven shares subscribed with their securities.

Note 26 Provisions

€ 000	**Provision for litigations**	**Provisions for restructuring**	**Other provisions**	**Total**
At 1 January 2012	**3 722**	**3 523**	**724**	**7 969**

Other	(908)	(148)	1 055	**(1)**
At 31 December 2012	**2 718**	**2 045**	**1 941**	**6 704**
Current at the end of the period	2 069	1 836	1 941	**5 846**
Non-current at the end of the period	649	209		**858**

Provision for litigation

In the normal conduct of its business, the Group has legal suits relating to different matters (personnel, taxes, suppliers) with uncertainties about the amount or timing of the outflows. According to management and as confirmed by legal counsels, the recorded provision is considered to be sufficient to cover probable losses. The line "Other" corresponds mainly to the reversal of the provision for tax litigation recorded at year end 2011 for Labco SA tax reassessment for period 2008 - 2010 and actual expenses have been recorded for the same amount.

The main provision (1.0 M€) for litigation is related to the major litigation with former vendors of Dillenburg for alleged fraudulent activities and the related consequences.

Provisions for restructuring

The provisions for restructuring correspond mainly to remaining provisions for restructuring in Iberia and Germany (Duisburg) recorded at year-end 2011 covering principally the severance payments and the remaining rental fees for the building to be abandoned as well as provisions set up in 2012 for restructuring plan Mittelhessen merger in Germany and Deep dive efficiency plan in France (refer to *Note 5.3 Non-recurring restructuring plans*).

Other Provisions

The other provisions correspond mainly to the provision for negative share of investments in associates recorded under equity method and the increase in 2012 is related to the shares of iPP net losses.

Note 27 Litigations and Contingent liabilities

Group companies are involved in various legal proceedings arising in the ordinary course of business, including disputes concerning professional liability and employee related matters, as well as inquiries from governmental agencies and health insurance carriers regarding, among other things, billing issues or litigations with tax, social security and customs authorities. Provisions have been set aside for the probable costs, as estimated by the Group's entities and their counsel, for the various litigations.

We had a lawsuit against the seller of one of our clinical laboratories which, although not material to us, is referred to in other notes as the Duisburg litigation. We also summarize below the lawsuit against the seller of another clinical laboratories MVZ Dillenburg in a context of alleged fraudulent activities.

MVZ Duisburg

In 2009, one of our German subsidiaries, MVZ Labor Duisburg GmbH, brought an arbitral claim for breach of contract against the laboratory doctor from whom it had acquired a clinical laboratory in Duisburg. Following the acquisition, the laboratory lost one of its larger clients, a blood bank owned by the laboratory's former owner and his wife. In the proceedings, MVZ Labor Duisburg GmbH claims that the loss of the contract constitutes a breach of the non-compete clause of the acquisition agreement. This case was settled in 2011. Pursuant to the settlement agreement, the defendant paid € 1 million to MVZ Labor Duisburg GmbH.

MVZ Dillenburg

In 2008, we acquired MVZ Medizinisches Fachlabor Dillenburg ("Dillenburg"), a German laboratory company. In April 2012, we discovered that the selling shareholders of Dillenburg had charged unlawful fees to the German Doctors' Insurance Billing Organization (Kassenärztliche Vereinigung Hessen, or "KV Hessen") and private health insurance companies. The new management promptly ended this practice upon its discovery. The actions of the selling shareholders are subject to an ongoing internal investigation.

The new management has notified both the state prosecutor and KV Hessen of the fraud, has enabled the clarification of facts and is closely cooperating with the state prosecutor and KV Hessen who have initiated a criminal investigation against the selling shareholders of Dillenburg. We believe that the German Doctors' Insurance Billing Organization and other private health insurance companies may commence reimbursement claims against Dillenburg to recover fees inappropriately charged. The fraudulent charging of fees could also result in a withdrawal of the license of Dillenburg. However, we believe this is unlikely, due to the fact that Labco was victim of a fraud when we acquired the shares of Dillenburg GmbH, because the sellers had practiced the fraudulent charging before the acquisition and because the new management of Dillenburg has promptly notified the state prosecutor and KV Hessen of the fraud. We are currently reviewing any other action we may commence against the selling shareholders of Dillenburg. As of December 31, 2012 we have also recorded a non-recurring litigation expense of €1.7 million in relation to this issue.

No contingent liability has been identified for which it will be necessary to disclose information in the notes to the consolidated financial statements.

Additionally, we operate in a regulated industry. As such, in the ordinary course of business, we are subject to national and local regulatory scrutiny, supervision and controls.

Below is a summary of the challenges and proceedings brought against us by the French Ordre des pharmaciens and Ordre des médecins and of the litigation we brought against the Ordre des pharmaciens before the European Commission.

Ordre des Pharmaciens and Ordre des Médecins

In France, the Ordre des pharmaciens and, to a lesser extent, the Ordre des médecins have challenged our organization and legal structure. In numerous instances, the Ordre des pharmaciens instituted disciplinary actions against our laboratories or laboratory doctors. In 2003, shortly after our creation, the Ordre des pharmaciens and the Ordre des médecins (together, the "Ordres" in a joint letter to Labco) expressed the view that Labco's project of creating a network of laboratories contravened the principle of independence of laboratory doctors. In their joint letter, the Ordres singled out two aspects of Labco's structure: (i) capital ownership and voting rights arrangements between the laboratory doctors working in each laboratory company and the rest of the Labco Group; and (ii) the ultimate ownership of a network of laboratories by a financial holding company not subject to the French regulations pertaining to clinical laboratories.

In keeping with this initial position, the Ordre des pharmaciens, as well as in several instances the Ordre des médecins, have raised a number of objections to the organization of our French operations in the context of their administrative review of proposed changes in the articles of association or ownership structure of clinical laboratories. These objections were communicated to the French administrative authorities in charge of granting the administrative authorization necessary to operate our laboratories. All such authorizations were nevertheless eventually granted. Most of the objections raised by the Ordres dealt with the capital ownership structure of our French laboratory companies. The Ordres argued that ownership of a large majority of shares in a clinical laboratory by a person or entity other than the laboratory doctors working in that laboratory constituted a threat to the independence of such laboratory doctors—notwithstanding the fact that such laboratory doctors retained a majority of the voting rights at shareholders' meetings, as required by French law. It also challenged the separation of voting rights from economic rights in such a manner. In addition, the Ordre des pharmaciens expressed the view that the supermajority voting provisions contained in the articles of association of our SELs for certain matters were incompatible with the principle of independence of laboratory doctors insofar as they took away from doctors practicing within the laboratory the final decision making power over a number of matters pertaining to the laboratory. Finally, the Ordre des pharmaciens challenged the formula set out in the articles of association of SELs for the distribution of Priority Dividends to those laboratory doctors who are also shareholders in their laboratory company. The Ordre des pharmaciens argued that such a formula, by limiting ex-ante the share of dividends to be distributed to laboratory doctors, was incompatible with the principle of the independence of laboratory doctors. Both the Ordre des pharmaciens and the Ordre des médecins have, in several cases, raised objections to the registration, based on one or more of the above grounds, of one of our SELs on their respective national registries.

At the disciplinary level, the Ordre des pharmaciens introduced a number of actions against SELs in the Labco network, as well as against laboratory doctors practicing within these SELs. Several of these actions, some of which are still pending, directly challenge the capital ownership structure and the supermajority voting provisions contained in the articles of association of our French laboratory companies as a breach of the principle of independence of laboratory doctors. Labco has appealed decisions of the disciplinary body of the Ordre des pharmaciens in the highest French administrative court (Conseil d'Etat) and has won a number of cases on procedural grounds. No final decision has, however, been reached on the merits of these cases. The Ordre des pharmaciens has also regularly brought, or threatened to bring, legal actions against our laboratory companies for failing to timely file with it proposed changes in articles of association or capital ownership. Some of these actions are still pending. We have appealed some of these decisions and have won a number of such appeals on procedural grounds.

In addition, certain of our laboratory doctors and laboratory companies have been disciplined for failing to maintain adequate health, safety and quality standards. Certain of these disciplinary procedures, brought on the grounds of a failure to meet filing requirements or to maintain adequate quality and safety standards, resulted in decisions to close, for periods ranging from one week to several months, several of our laboratories. In several instances, however, we successfully obtained from the responsible administrative authority a requisition order to prevent such closing, arguing the public need for access to local laboratory testing services.

In 2007, Labco filed a complaint with the European Commission, arguing that the Ordre des pharmaciens had inappropriately used the administrative and disciplinary powers granted to it to impede the development of free competition and the creation of groups of laboratories in the French clinical laboratories services market.

On December 8, 2010, the Commission ruled against the Ordre des pharmaciens, finding that the Ordre des pharmaciens had (i) systematically targeted groups like Labco since 2003 with the aim of impeding their development and (ii) attempted to set minimum prices on the French market between September 2004 and September 2007 by seeking to impose minimum prices for the provision of clinical laboratory services, limiting the negotiation of discounts under contracts with large customers such as hospitals or insurance bodies. The Commission held that the Ordre des pharmaciens had breached the

Note 27 Litigations and Contingent liabilities (Continued)

antitrust rules and provisions on restrictive business practices of the Treaty establishing the European Community by introducing such distortions to competition without adequate public health grounds to do so, and imposed a 5 M€ fine on the Ordre des pharmacien and its governing bodies. According to the press release issued by the European Commission commenting on this decision, the Commission's ruling did not extend to an appreciation of the French laws regulating the clinical laboratories market, but was only directed at the behavior of the Ordre des pharmaciens. The Ordre des pharmaciens has since appealed this decision before the General Court of the European Communities.

Pending a decision on appeal, aggrieved parties such as Labco are entitled to seek damages before French courts on the basis of the European Commission's findings.

Note 29 Financial instruments

The Group's principal financial instruments, other than derivatives, comprise bank loans and overdrafts, debentures, finance leases, trade payables, purchase contracts and loans granted. The main purpose of these financial instruments is to raise finance for the Group's operations. The Group has various financial assets such as accounts receivables and cash and short-term deposits, which arise directly from its operations.

€ 000	Breakdown by accounting classification							
	Carrying amount	Market value	Fair value through income	Available for sale	Loans and receivables	Amortised cost	Derivatives qualifying for hedge accounting	Derivatives not qualifying for hedge accounting
Non-current assets								
Non-current financial assets	8 938	8 938		3 526	5 412			0
Current assets								
Trade receivables	97 442	97 442				97 442		
Other current financial assets	0	0						0
Cash and cash equivalents	56 595	56 595				56 595		
Non-current liabilities								
Borrowings and other financial liabilities—non current	548 675	548 675				548 476		199
Current liabilities								
Borrowings and other financial liabilities—current	31 917	31 917				31 917		0
Other current financial liabilities								
Trade payables	56 971	56 971				56 971		

The main risks arising from the Group's financial instruments are credit risk, liquidity risk and interest rate risk. Under our current financing strategy, the Secured Senior Notes are 8,5% fixed rate, therefore we are only exposed to market risk arising from fluctuations in interest rates of our Revolving Credit Facility (the RCF) drawn as at December 31, 2012 for a net amount of 41 M€. We are not required to enter into hedging transactions or to use derivative financial instruments to mitigate the adverse effects of interest rate fluctuations pursuant to the RCF Agreement. We do not enter into financial instruments for trading or speculative purposes. The derivatives existing as at December 31, 2010 have been early cancelled as a consequence of the refinancing operation early 2011.

Labco has only one non-significant instrument for a laboratory in Belgium and is accounted for as trading derivatives (fair value through P&L). That derivative corresponds, according to the categorization by hierarchy of fair value as stated in IFRS 7, to level 2 financial instruments. Labco do not have any level 3 financial instruments.

Due to the Group's specific interest rate risk position and funding structure, risk management policies require to manage the cash flow volatility.

Liquidity risk

The Group monitors its risk to a shortage of funds using a systematic liquidity planning scheme. This scheme considers the maturity of its financial investments and assets and the projected cash flows from operations.

Please refer to Note 23 *Borrowings and other financial liabilities* for a detail of maturities of financial indebtedness, as well as for a description of the covenants in place with the RCF agreement. Under these covenants, if the Group does not respect contractual requirements, it may result in early repayment clause being activated by syndicated borrowers.

€ 000	31.12.2012	31.12.2011
Cash and cash equivalents	**56 595**	69 833
Undrawn line of credit (RCF)	**94 000**	87 000
Total gross amount of liquidity	**150 595**	**156 833**
Current loans and borrowings	**31 917**	33 996
Total liquidity net of current loans and borrowings	**118 678**	**122 836**

Note 29 Financial instruments (Continued)

Revolving Credit Facility ("RCF") covenants impose to keep a minimum cash balance of 20 M€ at each quarter end.

The refinancing operation performed February 13, 2013 has subsequently modified the source of financing, please refer to Note 34 *Events after the reporting period* and to the prospective liquidity analysis presented in that paragraph.

Interest rate risk

At the reporting date the interest rate profile of the Group's interest-bearing financial instruments was:

€ 000	31.12.2012	31.12.2011
Fixed rate instruments		
Financial assets	**0**	0
Financial liabilities	**524 382**	525 850
Variable rate instruments		
Financial assets	**56 595**	69 833
Financial liabilities	**36 264**	43 777

The fixed rate financial liabilities correspond to 8.5% Senior Secured Notes, the finance leasing, the recourse factoring and the bilateral loan and borrowings, that are under fixed rate, whereas the variable rate instruments correspond to cash and cash equivalent for financial assets and to the RCF drawn and floating rates loan and borrowings, as well as bank overdrafts.

The other financial instruments of the Group that are not included in the above table are non-interest bearing and are therefore not subject to interest rate risk.

Cash flow sensitivity analysis for variable rate instruments

Given the refinancing operation performed February 13, 2013 resulting in the RCF being fully reimbursed (refer to *note 34 Events after the reporting period*), a change of 100 basis points in interest rates would have increased or decreased the annual interest rate charges by less than 0.1 M€ (2011: 2.4 M€). This analysis assumes that all other variables remain constant and financial income on financial assets is considered as not significant.

Fair values

The fair values of financial assets and liabilities, together that are not at fair value in the statement of financial position, are not significantly different from recorded carrying amounts.

The basis for determining fair values is disclosed in note 3.21 *Determination of fair values*.

Note 30 Capital commitments and contingencies

Operating lease and commercial commitments

The Group has entered into commercial leases on certain motor vehicles and items of machinery. These leases have an average life of between two and five years with no renewal option included in the contracts.

€ 000	31.12.2012	31.12.2011
Within one year	**8 097**	5 871
Between 1 and 5 years	**5 096**	4 884
More than 5 years	**0**	143
Operating lease Equipment	**13 193**	**10 898**

Note 30 Capital commitments and contingencies (Continued)

Furthermore Labco leases almost all of the properties where its labs are located. The lease in France is on a 3/6/9 year lease contracts and in Portugal and Spain, situation is such that Labco can exit leases at 6-12 months notice.

€ 000	31.12.2012	31.12.2011
Within one year	**17 744**	11 520
Between 1 and 5 years	**36 700**	30 701
More than 5 years	**14 024**	6 230
Operating lease Buildings	**68 468**	**48 452**

Operating lease expense related to property amounted to 21.0 M€ in 2012 (2011: 19.1 M€) and equipment lease expense of around 8.7 M€ (2011: 7.8 M€).

Finance lease and commercial commitments

Reagents suppliers in certain instances provide the testing equipment free of charge to laboratories in exchange for exclusive purchasing commitments, including sometimes minimum volume commitments. Management believes minimum volume commitments for consumables are substantially below current volumes and therefore we do not consider these minimum purchase commitments to be material for us.

As stated in *Note 15 Property, Plant and Equipment*, some of these contracts have been qualified as capital lease over an average duration of 5 years because the contracts have tacit renewal clauses, but no purchase options. Renewals are at the option of the specific entity that holds the leases. Future minimum lease payments under the finance leases are as follows:

€ 000	31.12.2012	31.12.2011
Within one year	**6 611**	6 631
Between 1 and 5 years	**11 248**	11 856
More than 5 years	**57**	105
Total finance lease commitments	**17 916**	**18 592**

Off balance sheet commitments given and received

As of December 31, 2012, the Group's off-balance sheet commitments consist principally of guarantees given in the course of its investing and financing activities, especially securities given to secure the Notes and the RCF.

Indeed the obligations taken by Labco in the Senior Secured Notes indentures and by the borrowing entities, direct subsidiaries of Labco, according to the RCF agreement, have been guaranteed by commitments given by a certain number of Group entities, called Guarantors.

Commitments given to the Security Agent are mainly:

- The initial Guarantors and Borrowers agreed to pledge the shares of certain subsidiaries they owned;
- If a Guarantor or Borrower acquires a subsidiary company which has an annual EBITDA equal to or greater than 750 K€, it agreed to pledge the shares of the said subsidiary company;
- If a company accedes to the RCF Agreement as a new Borrower, the said company must pledge the shares held in its direct subsidiaries which has an annual EBITDA equal to or greater than 750 K€;
- If a company accedes to the RCF Agreement as a new Guarantor, the said company must pledge the shares held in its direct subsidiaries which has an annual EBITDA equal to or greater than 1 M€;
- In any case, additional Borrowers and Guarantors agreed to pledge the long term intercompany loans receivables with other members of the Group they have or they could enter in the future arising under any intra group loan in excess of 1 M€.

Note 30 Capital commitments and contingencies (Continued)

As at December 31, 2012, the Guarantors are the following entities:

Guarantors

Note 32 Related party transactions

Transactions with key management personnel

Key executive management compensation

With the exception of the standing independent members of the board of directors, members of the board of directors and the executive committee receive no compensation for their services on either of these committees. The independent member of the board of director, Daniel Bour, received in 2012 a compensation of €40 000 per year.

Certain members of the board of directors (Philippe Charrier, Andreas Gaddum, Stéphane Chassaing, Albert Sumarroca, Philippe Dauchy, Philippe Sellem, Xavier Merlen, Thierry Mathieu, Gilles Meshaka) and the executive committee (Philippe Charrier, Albert Sumarroca, Luis Vieira, Etienne Couelle, Oliver Harzer, Santiago Valor, Philippe Cailly, Andrew Geoffrey Searle and Vincent Marcel) are, or were in 2012, compensated for certain other services they render to our Group. Such remuneration is paid to them (or to professional companies wholly owned by them) by way of a fixed annual salary (or fees) and an annual bonus. In 2011, the executive committee was enlarged with members starting during second semester 2011 and exceptional bonuses have also been paid to certain key management personnel in relation with refinancing operations. The aggregate remuneration paid to or accrued on behalf of members of the board

Note 32 Related party transactions (Continued)

of directors and the executive committee for such other services was approximately 5.8 M€ for the year ended December 31, 2012 (2011: 6.9 M€).

€ 000	Note	2012	2011
Short term benefits		**5 788**	5 788
Post-employment benefits	*(i)*	**NS**	NS
Termination indemnities		**0**	0
Share-based payments	*(ii)*	**0**	1 145
Total		**5 788**	**6 933**

(i) : Post-employment benefits are not significant and correspond only for the few members concerned to French legal post-employment benefits due to employees as described in *note 24 Employee benefit liabilities*.

(ii) : Restricted Stock Unit "Free Shares 2011" scheme to the benefit of certain senior management members has been canceled in Q2 2012 resulting in the residual IFRS 2 estimated charges initially spread over vesting period to be immediately recorded in consolidated statement of income for an amount of 1 537 K€ as described in note 25. Furthermore the 2008 BSA plan is now fully vested and no senior management members have any remaining 2010 BSA.

Other related party transactions with key management members

Secondment Agreement with 3i Gestion SA

Labco SAS and 3i Europe plc, an affiliate of 3i, entered in the past into a secondment agreement pursuant to which Mr. Etienne Couelle was seconded to Labco. The contract terminated on October 1st, 2011 with Etienne Couelle being hired by Labco. In 2011, 3i France was paid 220 K€ under that contract.

Legal Services

We have engaged Maryse Coppet Souêtre, a partner in the law firm Cabinet Coppet Sprl, to provide us with various legal services. Mrs. Coppet Souêtre was the wife of Mr. Eric Souêtre, one of our founding shareholders and a member of the board of directors. We believe that Mrs. Coppet Souêtre's legal services are negotiated on an arm's length basis. Our payments to Cabinet Coppet Sprl amounts to nil as at December 31, 2012 (2011: 0.2 M€).

Other related party transactions

Balances and transactions between Labco SA and its subsidiaries, which are related parties of Labco SA, have been eliminated on consolidation and are not disclosed in this note.

A number of associates accounted for under the equity method incur expenses for certain subsidiaries of the Group. These operating expenses are recharged to the relevant subsidiaries. The net operating expenses that have been recharged by the associates accounted amounted to nil in 2012 (2011: 856 K€).

All transactions and outstanding balances with the related parties during the year are priced on an arm's length basis. None of the balances is secured.

Note 33 Group entities

Subsidiaries of Labco Deutschland group are consolidated in the financial statements herewith presented. In accordance with § 246B of German commercial laws (HGB), these entities may benefit from the exemption of publishing financial report and consolidated financial statements pursuant to German GAAP. Subsidiaries that have opted for this exemption are listed below.

The consolidation scope at December 31, 2012 and December 31, 2011 was established as follows:

Note 34 Events after the reporting period

Additional 8,5% Senior Secured Notes due 2018 issued for an aggregate nominal of 100 M€

Labco S.A. issued on February 13, 2013 €100 million in aggregate principal amount of its 8.5% Senior Secured Notes due 2018, which constitutes an add-on of, and form a single class with, Labco's existing 500 M€ 8.5% Senior Secured Notes due 2018. The Additional Senior Secured Notes will mature on January 15, 2018. The gross proceeds of the issuance amounts to 103 M€, ie meaning a yield of 7.75% and will be used to repay the outstanding amounts borrowed under Labco's revolving credit facility, pay the costs, fees and expenses in relation to the issuance transaction and for general corporate purposes. As a consequence Labco revolving credit facility amounting to 135 M€ will be fully reimbursed but not canceled and the unused portion of the proceeds of the Additional Senior Secured Notes will remain as cash and cash equivalent on our balance sheet.

Prospective liquidity analysis at refinancing date taking into account balances for other financial debts and trade payables as at December 31st, 2012 is as follows

€ 000	Note	2012 Carrying amount	Cash Flow	1 year or less	1 - 5 years	More than 5 years
Non derivatives financial instruments						
Bonds loans		**600 000**	**(855 000)**	(51 000)	(804 000)	
Revolving Credit Facility	*(a)*		**(29 700)**	(7 425)	(22 275)	
Other financial debts	*(b)*	**53 834**	**(56 930)**	(32 550)	(22 245)	(2 135)
Trade payables		**56 971**	**(56 971)**	(56 971)		

(a) Revolving Credit Facility amounting 135 M€ has been fully reimbursed with the proceed of the additional Notes issuance (RCF was drawn for an amount of 67 M€ as at additional Notes issuance date ie February 13, 2013). Amounts to be paid are estimated at refinancing date as the commitments fees paid on undrawn facility until early 2017 with a rate corresponding to 45% of margin (margin being estimated at 4.5%). Revolving Credit Facility will be however drawn for financing future acquisitions as soon as the excess cash obtained from additional €100 million Notes issuance would have been used.

(b) Other financial debt corresponds to other loans and borrowings, finance lease liabilities, accrued HYB interests to be paid in January 2013 and factoring debt.

Disposal of assets and acquisitions

Some acquisitions have been performed in February and March 2013 for a total consideration of 5,2 M€. It corresponds mainly to 3 entities, or asset deals in France and to the acquisition of the 25% minority interests in the entity Hauts de Garonne. Detailed information on entities acquired could not be

Note 34 Events after the reporting period (Continued)

disclosed as requested by IFRS 3 (2008) given the recent closings and the time necessary to obtain accounts on closing date.

Evolution of Dillenburg litigation

Labco S.A. and its subsidiaries, Labco Deutschland and MVZ Medizinisches Fachlabor Dillenburg GmbH, have signed a settlement agreement on March 27, 2013 with the former vendors of our laboratory in Dillenburg in the context of the major litigation initiated given the alleged fraudulent activities, and related consequences. That agreement stipulates the payment of a total indemnity of 5,5 M€ by the former vendors of Dillenburg and the waiver of the litigations they had initiated against Labco and its subsidiaries.

Note 35 Auditor fees

The amount of the signatory statutory auditors fees for the consolidated financial statements of Labco for the year 2012 for all the consolidated companies, where they are appointed is broken down as follow..

		2012		2011	
€ 000	**Note**	**Deloitte**	**Scacchi & Associés**	**Deloitte**	**Scacchi & Associés**
Legal audit		**713**	**112**	**694**	**122**
Agreed upon services	*(a)*	**512**	**140**	**0**	**0**
Other services		**0**	**0**	**111**	**0**
Auditor fees		**1 225**	**252**	**805**	**122**

(a) including fees related to issuance of letters of comfort for the 100 M€ additional bond issuance operation.
